Mary and Philip

2020-01-22 Alexander Samson The co-monarchy of Mary I and Philip II put England at the heart of early modern Europe. This positive reassessment of their joint reign counters a

series of parochial, misogynist and anti-Catholic assumptions, correcting the many myths that have grown up around the marriage and explaining the reasons for its persistent marginalisation in the historiography of sixteenth-century England. Using new archival discoveries and original sources, the book argues for Mary as a great Catholic queen, while fleshing out Philip's important contributions as king of England. It demonstrates the many positive achievements of this dynastic union in everything from culture, music and art to cartography, commerce and exploration. An important corrective for anyone interested in the history of Tudor England and Habsburg Spain.

Managing for Development Results

2010-01-01 Roberto García López Results-based management (RBM) is a public management strategy that involves decision making based on reliable information regarding the effects of governmental actions on society. It has been adopted in various developed countries as a way of improving efficiency and effectiveness in public policy. In Latin American and Caribbean (LAC) countries, governments and public managers show increasing interest in this management strategy. Given the relative novelty

of RBM in the region, however, there is scant literature on the subject. This book is intended to fill this gap in two ways. First, it seeks to describe some of the basic RBM concepts and adapt them according to regional characteristics. Second, it presents an assessment, based on studies carried out in 25 countries, of the challenges facing LAC countries and their capacity to implement results-based public management.

The Measure of Madness:

2010-07-01 Cheryl Paradis Enter the "fascinating" and frightening world of modern forensic psychology as experienced by one of the most respected practitioners in the field today (Robert K. Tanenbaum, New York Times-bestselling author). At the heart of countless crimes lie the mysteries of the human mind. In this eye-opening book, Dr. Cheryl Paradis draws back the curtain on the fascinating world of forensic psychology, and

revisits the most notorious and puzzling cases she has handled in her multifaceted career. Her riveting, sometimes shocking stories reveal the crucial and often surprising role forensic psychology plays in the pursuit of justice—in which the accused may truly believe their own bizarre lies, creating a world that pushes them into committing horrific, violent crimes. Join Dr. Paradis in a stark concrete cell with the indicted as she takes on the daunting task of mapping the suspect's madness or exposing it as fakery. Take a front-row seat in a tense, packed courtroom, where her testimony can determine an individual's fate—or if justice will be truly served. The criminal thought process has never been so intimately revealed—or so darkly compelling—as in this “excellent and entertaining” journey into the darkest corners of the human mind (Booklist).
