Gregory Heisler: 50 Portraits 2013-10-22 Gregory Heisler In his first-ever showcase of his work, Gregory Heisler, one of professional photography’s most respected practitioners, shares 50 iconic portraits of celebrities, athletes, and world leaders, along with fascinating, thoughtful, often humorous stories about how the images were made. From his famously controversial portrait of President George H.W. Bush (which led to the revocation of Heisler’s White House clearance) to his evocative post-9/11 Time magazine cover of Rudolph Giuliani, to stunning portraits of Julia Roberts, Denzel Washington, Hillary Clinton, Michael Phelps, Muhammad Ali, and many more, Heisler reveals the creative and technical processes that led to each frame. For Heisler’s fans and all lovers of photography, Gregory Heisler: 50 Portraits offers not only a gorgeous collection of both black-and-white and color portraits, but an engrossing look at the rarely seen art of a master photographer at work. With a foreword by New York City mayor Michael R. Bloomberg.

Handbook of African Medicinal Plants, Second Edition 2014-02-04 Maurice M. Iwu With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedical uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

Mindset 2007-12-26 Carol S. Dweck From the renowned psychologist who introduced the world to “growth mindset” comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. “Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life.”—Bill Gates, GatesNotes “It’s not always the people who start out the smartest who end up the smartest.” After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

My Mouth is a Volcano 2005-01-01 Julia Cook Teaching children how to manage their thoughts and words without interrupting. Louis always interrupts! All of his thoughts are very important to him, and when he has something to say, his words rumble and grumble in his tummy, they wiggle and jiggle on his tongue and then they push on his teeth, right before he ERUPTS (or interrupts). His mouth is a volcano! But when others begin to interrupt Louis, he learns how to respectfully wait for his turn to talk. My Mouth Is A Volcano takes an empathetic approach to the habit of interrupting and teaches children a witty technique to help them manage their rambunctious thoughts and words. Told from Louis’ perspective, this story provides parents, teachers, and counselors with an entertaining way to teach children the value of respecting others by listening and waiting for their turn to speak.

Rules of Law and Laws of Ruling 2016-04-08 Franz von Benda-Beckmann Offering an anthropological perspective, this volume explores the changing relations between law and governance, examining how changes in the structure of governance affect the relative social significance of law within situations of legal pluralism. The authors argue that there has been a re-regulation rather than a de-regulation, propagated by a plurality of regulative authorities and this re-regulation is accompanied by an increasing ideological dominance of rights talk and juridification of conflict. Drawing on insights into such processes, this volume explores the extent to which law is used both as a constitutive legitimization of governance and as the medium through which governance processes take place. Highlighting some of the paradoxes and the unintended consequences of these regulating processes and the ensuing dynamics, Rules of Law and Laws of Ruling will be a valuable resource for researchers and students working in the areas of legal anthropology and governance.

Art in Felt & Stitch 2012-04-02 Moy Mackay In this visually stunning book, Moy Mackay reveals how you too can create beautiful pictures using felt. Characterised by her wonderful use of colour, Moy’s work is breathtaking and includes still-lifes, animals and landscapes inspired by the dramatic scenery of the Scottish Borders where she lives and works. Moy takes you through every step of the process, including the materials and tools you need, the feltmaking process itself (which is easier than you’d imagine), and how to put together four fabulous felt paintings of your own. There is guidance on stitching, including both hand- and machine-stitching, as well as how to use colour and introduce texture in the form of different fibres and threads. There are numerous examples of Moy’s work through the book, and by the end you will not fail to be inspired to create gorgeous felt paintings of your own. “e;Moy’s passionate use of colour and the deep texture created by felting are what draw me to her work. I also like the way that she concentrates on her surroundings for her subject matter - her work is very free.”e;Kaffe Fassett

America to Europe, (e.g. Spain, Germany or the UK) to Asia (such as China, Thailand and India). Though each country examined in this volume is affected by the economic crisis in a different way, the effects are especially apparent for the young generation. In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best. The contributions in this volume demonstrate that VET alone cannot solve these problems, but can be used to support a smooth transition from school to work. If the quality of VET is high and the status and job expectations are good, VET can help to fill the skills gap, especially at the intermediate skill level. Furthermore, VET can also offer a realistic alternative to the university track for young people in many countries.

The Mixed Language Debate 2003-01-01 Yaron Matras Mixed Languages are speech varieties that arise in bilingual settings, often as markers of ethnic separateness. They combine structures inherited from different parent languages, often resulting in odd and unique splits that present a challenge to theories of contact-induced change as well as genetic classification. This collection of articles is devoted to the theoretical and empirical controversies that surround the study of Mixed Languages. Issues include definitions and prototypes, similarities and differences to other contact languages such as pidgins and creoles, the role of codeswitching in the emergence of Mixed Languages, the role of deliberate and conscious mixing, the question of the existence of a Mixed Language continuum, and the position of Mixed Languages in general models of language change and contact-induced change in particular. An introductory chapter surveys the current study of Mixed Languages. Contributors include leading historical linguists, contact linguists and typologists, among them Carol Myers-Scotton, Sarah Grey Thomason,William Croft, Thomas Stolz, Maarten Mous, Ad Backus, Evgeniy Golovko, Peter Bakker, Yaron Matras.

The Shooting Star 2018-09-14 Shivya Nath Shivya Nath quit her corporate job at age twenty-three to travel the world. She gave up her home and the need for a permanent address, sold most of her possessions and embarked on a nomadic journey that has taken her everywhere from remote Himalayan villages to the Amazon rainforests of Ecuador. Along the way, she lived with an indigenous Mayan community in Guatemala, hiked alone in the Ecuadorian Andes, got mugged in Costa Rica, swam across the border from Costa Rica to Panama, slept under a meteor shower in the cracked salt desert of Gujarat and learnt to conquer her deepest fears. With its vivid descriptions, cinematic landscapes, moving encounters and uplifting adventures, The Shooting Star is a travel memoir that maps not just the world but the human spirit.

The African Roots of Marijuana 2019-05-09 Chris S. Duvall After arriving from South Asia approximately a thousand years ago, cannabis quickly spread throughout the African continent. European accounts of cannabis in Africa—often fictionalized and reliant upon racial stereotypes—shaped widespread myths about the plant and were used to depict the continent as a cultural backwater and Africans as predisposed to drug use. These myths continue to influence contemporary thinking about cannabis. In The African Roots of Marijuana, Chris S. Duvall corrects common misconceptions while providing an authoritative history of cannabis as it flowed into, throughout, and out of Africa. Duvall shows how preexisting smoking cultures in Africa transformed the plant into a fast-acting and easily dosed drug and how it later became linked with global capitalism and the slave trade. People often used cannabis to cope with oppressive working conditions under colonialism, as a recreational drug, and in religious and political movements. This expansive look at Africa’s importance to the development of human knowledge about marijuana will challenge everything readers thought they knew about one of the world’s most ubiquitous plants.

Breath 2020-05-26 James Nestor A New York Times Bestseller A Washington Post Notable Nonfiction Book of 2020 Named a Best Book of 2020 by NPR “A fascinating scientific, cultural, spiritual and evolutionary history of the way humans breathe—and how we’ve all been doing it wrong for a long, long time.” —Elizabeth Gilbert, author of Big Magic and Eat Pray Love No matter what you eat, how much you exercise, how skinny or young or wise you are, none of it matters if you’re not breathing properly. There is nothing more essential to our health and well-being than breathing: take air in, let it out, repeat twenty-five thousand times a day. Yet, as a species, humans have lost the ability to breathe correctly, with grave consequences. Journalist James Nestor travels the world to figure out what went wrong and how to fix it. The answers aren’t found in pulmonology labs, as we might expect, but in the muddy digs of ancient burial sites, secret Soviet facilities, New Jersey choir schools, and the smoggy streets of São Paulo. Nestor tracks down men and women exploring the hidden science behind ancient breathing practices like Pranayama, Sudarshan Kriya, and Tummo and teams up with pulmonary tinkerers to scientifically test long-held beliefs about how we breathe. Modern research is showing us that making even slight adjustments to the way we inhale and exhale can jump-start athletic performance; rejuvenate internal organs; halt snoring, asthma, and autoimmune disease; and even straighten scoliotic spines. None of this should be possible, and yet it is. Drawing on thousands of years of medical texts and recent cutting-edge studies in pulmonology, psychology, biochemistry, and human physiology, Breath turns the conventional wisdom of what we thought we knew about our most basic biological function on its head. You will never breathe the same again.

The Language Teacher Toolkit 2016-02-10 Steven Smith "Strongly recommend the book: a must-have" "Chapeau! Already on our trainee reading list." "Absolutely loving this! Inspirational, practical, so sensible and backed up by research. Well done, gentlemen, and thank you." The Language Teacher Toolkit is designed with both practising and trainee (pre-service) teachers in mind and uniquely bridges the gap between research and classroom practice. It is a comprehensive and clearly written handbook, particularly useful for teachers of modern foreign languages (world languages) who work in high schools (secondary education). Written by two highly-experienced teachers with an interest in research and theory, it offers a reflective approach along with many practical classroom activities which can immediately be applied in daily teaching. The book closes with sample lessons for French, German and Spanish. Chapters include - methods - classroom oral techniques - teaching in the target language - developing spontaneous talk - teaching grammar and vocabulary - listening, reading and writing - subject knowledge - using song, drama and games - assessment - using pictures - teaching advanced level students - technology - behaviour and motivation - evaluating and writing resources - translation - lesson planning - example lesson plans The busy languages teacher can quickly find ideas for enhancing practice, while insightful consideration of research helps create a basis for personal development in the field. The authors are two internationally well-known bloggers in the field of language teaching and applied linguistics: Steve Smith is a former Head of Languages, taught languages for over 30 years, holds an MA in applied linguistics, writes the very popular resources site frenchteacher.net and the widely-read blog frenchteacher.net.com Dr Gianfranco Conti has taught languages for over twenty years, holds a PhD in applied linguistics, is as award-winning blogger and resource writer for TES and runs the popular interactive website language-gym.com

Overcoming the Achievement Gap Trap 2015 Anthony Muhammad Explores the state of the “academic achievement gap” that exists in U.S. public schools, particularly among poor and minority students, and argues that the mindset that achievement gaps are inevitable are no longer tolerable. Explores ways to close the achievement gap via real-world case studies where principals and educators have adopted new mindsets for education.

Medicinal Plants of the World 2004 Ben-Enik Van Wyk Medicinal Plants of the World is a fully illustrated, comprehensive and scientifically accurate guide to the best-known and most important medicinal plants, and their uses. It includes plants of special commercial as well as historical interest. Features: More than 320 medicinal plants and their close relatives are described. Each entry gives a short description of the plant, the geographical origin, therapeutic category, uses and properties, preparation and dosage, active ingredients and pharmacological effects. More than 800 excellent full-color photographs assist in the identification of the plants and related or similar plants. Introductory chapters explain the various healing cultures of the world, general concepts, common ailments and their treatment with modern phytomedicines and with traditional remedies and the study of active compounds and their pharmacological effects. A checklist of 900 of the most important and well-known medicinal plants of the world acts as a quick reference to each plant, listed alphabetically according to scientific name with the common names, family name, region of origin, therapeutic category and plant parts used. Also included is a glossary of medical and related terms.
