Corporate Tax Base in the Light of the IAS/IFRS and EU Directive 2013/34: A Comparative Approach 2016-06-17 Mario Grandinetti The recent relaunch of the European Commission's Common Consolidated Corporate Tax Base (CCCTB) project promises a sorely needed leap forward in the harmonization of the rules by which companies calculate their taxable profits. In particular, the initiative hopes to remedy the severe

barrier to cross-border business caused by the 'the accounting Tower of Babel' by which companies' tax bases are determined under national law. This thorough analysis and commentary covers the influence of accounting rules on tax, considering both generally accepted standards – international accounting standards (IAS) and international financial reporting standards (IFRS) – and EU Directive 2013/34. Three introductory chapters usher in detailed comparative overviews of the effect of these rules on taxation in nine EU Member States as well as in two other major EU trading partners, the United States and Brazil. Fully explaining the remarkable recent improvement in the comparability of accounts that represent favourable preconditions for creating a single market for financial services within the EU, this book covers every relevant detail, including the following and much more: – criterion of evaluation of alternative fixed assets based on revaluated amounts; – criterion based on fair value; – provisions applicable to income statements, notes, reports, and financial statements; – rules applicable to the publication of documents; – transparency in payments to governments; – dispositions on exemptions; – hierarchy of general provisions and principles; – balance sheet and profit and loss account; – simplifications for small and medium-sized enterprises (SMEs); – system of creditors' protection; and – protection of investors' interests. This book is a peerless explication of the taxation choices granted to Member States

under IAS/IFRS and EU Directive 2013/34 and how they will be affected by ongoing Commission initiatives. Because relevant, timely, reliable, and comparable information assumes a leading role in protecting the interests of investors, creditors, and other stakeholders, as well as in ensuring that all operators act on a level playing field under equal conditions, the analysis presented here is of immeasurable value to lawyers, business persons, and officials concerned with taxation, not only in Europe but anywhere within the reach of international trade.

Financial Accounting and Management Control 2015-02-20 Fredrik Nilsson This book is about financial accounting and management control and how these two information systems are related as well as how their objectives conflict. At the most fundamental level, the objective of financial accounting is to provide owners and funders with comparable information on a company's value creation. The aim of management control, on the

other hand, is to give the board, senior executives and employees unique information for strategy formulation and implementation. One often-mentioned negative effect is the risk of financial accounting affecting management control design and use, making it less relevant for decision-making at the company level. The book provides an analysis of the complex relationship between financial accounting and management control. The analysis is based on theoretical reasoning as well as several examples of how financial accounting standards affect not only the annual report but also the control system. An interesting, and perhaps unexpected conclusion is that management control seems to affect financial accounting almost as much as financial accounting affects management control.

These complex relationships, which can influence the design and use of both financial accounting and management control, are discussed in detail in this book.

Corporate Social Responsibility and Governance 2022-03-10 Panagiotis Dimitropoulos Corporate social responsibility (CSR) has developed into a crucial corporate and organizational issue around the world. It has been incorporated into various sectors and countries, and includes many types of activities and dimensions. It is a common notion that organizations are more inclined today to broaden and shift their performance focus from short-term goals towards long-term social, environmental, and value-added perspectives. Under the framework of corporate governance, organizations

and companies are motivated to promote fairness, transparency, ethics, and accountability in their transactions, while concurrently maintaining enhanced standards of governance. This means that organizations and corporations must align their activities with community aspirations which is an issue falling within the sphere of CSR. Increased attention has been placed on the organizations regarding their approach towards the needs of various stakeholders. However, a crucial issue that this book attempts to address is the association, intersection, and inter-relationship between governance and CSR within the EU region, which are not adequately established in the existing literature. The book will show that governance and CSR are highly connected. With the purpose of studying the association of CSR with legal, managerial and empirical aspects of governance in corporations and not-for-profit organizations, in various sectors of the economy, the book also intends to provide useful policy implications, as well as to offer constructive directions for future research. This book will be of value to researchers, academics, practitioners, policymakers, and students in the fields of CRS and governance, organizational theory, marketing management, business ethics and human resource management.
