The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a highly regarded vocabulary assessment that has been in use for close to 50 years. Created by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is crafted to assess receptive vocabulary for Standard American English. It is quick and effortless to conduct, preserving valuable time so that focus can be put on executing intelligent interventions.

The PPVT-4 test subject matter includes a extensive scope of receptive vocabulary levels, spanning from pre-kindergarten through adulthood. The assessment problems widely include words that depict 20 subject areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and educational vocabulary.

The assessment offers two identical editions which hold various vocabulary terms, making sure that the person has not “memorized” the assessment. One version can be used ahead of intervention implementation to evaluate individuals’ vocabulary knowledge and the other edition can be employed for re-evaluation to measure and document advancement. The PPVT-4 also contains a special Growth Scale Value (GSV) which is responsive to small changes in time.
