Budge wrote this book using the full resources of the British Museum, and the resulting work offers an in-depth look at ancient Egyptian funerary practices.

Forensic Investigator 2009-08-03 Esther McKay FORENSIC INVESTIGATOR Geoff Bernasconi had always been passionate about his job as a policeman in rural New South Wales and, from the earliest days of his career, went the extra mile, both for victims of crime and for their families. But one night in 1984, he was called to investigate the scene of an horrific car accident in which an entire family had been wiped out – and which it was impossible for him to forget. Geoff's day-to-day working life became a catalogue of tragedies, some of which involved people close to him, and he found himself spiralling downwards in the grip of post-traumatic stress disorder. When Esther McKay, fellow forensic investigator and author of the best-selling Crime Scene, heard that Geoff has been awarded maximum compensation for his suffering, she knew immediately this was a story that needed to be told. This is a harrowing account of what it is like to work on the front-line of crime and tragedy as a forensic investigator. But it is also the inspiring story of someone who has been exposed to sights and experiences many of us can hardly even imagine, yet has emerged from the darkness to begin his journey to recovery.

impressive examples of the insights

Generic Composition in Greek and Roman Poetry 2007 Francis Cairns Original in conception and powerful in scope, Generic Composition in Greek and Roman Poetry remains one of the most important books on early Greek, Hellenistic and Roman poetry in a generation. First published in the philological climate of the early 1970s, Francis Cairns' book was among the first works that sought to further our comprehension of difficult or obscure ancient poems by applying new literary-

critical conventions and terminology, notably the concept of genre. Ancient literary studies have grown more sophisticated over the last years, and Generic Composition in Greek and Roman Poetry now finds itself very much in the midst of current debates. The new edition includes a new Postscript by the author, and important corrections to the text, notes, and indices. The original publisher remarked, "This is the first serious attempt to formulate a system of literary criticism for ancient poetry, derived wholly from ancient evidence. It is based on methods of generic analysis, assignment and interpretation applicable to all Greek and Roman poetry. It outlines what the author deduces are the creative principles informing ancient poets' approach to their subject matter, and establishes criteria that enable an objective discussion of the poems' originality and merit." Generic Composition in Greek and Roman Poetry examines uses of topoi and categories of genres, and offers detailed and insightful interpretations of many individual poems in both languages. It also highlights five specific generic sophistications, among them inversion and inclusion. The work is accompanied by extensive notes and indices, together with translations of the original texts that make it accessible and valuable to classicists and non-classicists alike. One of the great contributions of Francis Cairns' work has been firmly to move the study of ancient poetry away from the realm of fictive literary biography, while grounding critical analysis in the techniques that were employed by ancient authors to create meaning.

Encomium of Ptolemy Philadelphus 2003-11-10 Theocritus In particular, the book explores the subtle and complex links among Theocritus's poem, modes of praise drawn from both Greek and Egyptian traditions, and the subsequent flowering of Latin poetry in the Augustan age."

Tradition and Innovation in Hellenistic Poetry 2005-01-13 Marco Fantuzzi Hellenistic poets of the third and second

centuries BC were concerned with the need both to mark their continuity with the classical past and to demonstrate their independence from it. In this revised and expanded translation of *Muse e modelli: la poesia ellenistica da Alessandro Magno ad Augusto*, Greek poetry of the third and second centuries BC and its reception and influence at Rome are explored allowing both sides of this literary practice to be appreciated. Genres as diverse as epic and epigram are considered from a historical perspective, in the full range of their deep-level structures, providing a different perspective on the poetry and its influence at Rome. Some of the most famous poetry of the age such as Callimachus' *Aitia* and Apollonius' *Argonautica* is examined. In addition, full attention is paid to the poetry of encomium, in particular the newly published epigrams of Posidippus, and Hellenistic poetics, notably Philodemus.

Theocritus and the Archaeology of Greek Poetry 2006-12-14 Richard Hunter This book focuses on the hymns, mimes and erotic poems of the Greek poet Theocritus, and examines how Theocritus uses the traditions of earlier Greek poetry to recreate past forms in a way that exploits the new conditions under which poetry was written in the third century BC. Recent papyri have greatly increased our understanding of how Theocritus read archaic poetry, and these new discoveries are fully drawn on in a set of readings that will change the way we look at Hellenistic poetry.
