Developed by Lloyd M. Dunn and Douglas M. Dunn, the assessment is designed to measure vocabulary comprehension for Standard American English. It is swift and simple to conduct, saving precious time so that concentration can be put on executing effective strategies.

The PPVT-4 assessment material covers a extensive scope of vocabulary comprehension grades, spanning from preschool through adult age. The assessment questions widely feature words that represent 20 subject domains (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and school vocabulary.

The assessment gives two equal forms which contain distinct vocabulary words, guaranteeing that the test-taker has not "memorized" the assessment. One edition can be utilized before intervention implementation to evaluate test-takers' vocabulary comprehension and the alternative version can be used for re-assessment to evaluate and note progress. The PPVT-4 also contains a unique Growth Scale Value (GSV) which is reactive to small changes with time.
