Low-tech Magazine

2019 Kris De Decker Low-tech Magazine underscores the potential of past and often forgotten technologies and how they can inform sustainable energy practices. Sometimes, past technologies can be copied without any changes. More often, interesting possibilities arise when older technology is combined with new knowledge and new materials, or when past concepts and traditional knowledge are applied to modern technology. Inspiration is also to be found in the so-called "developing" world, where resource constraints often lead to inventive, low-tech solutions. Contains 159 images in black & white.

Advanced Networking Concepts Applied Using Linux on IBM System z

2012-03-06 Lydia Parziale This IBM® Redbooks® publication describes important networking concepts and industry standards that are used to support high availability on IBM System z®. Some of the networking standards described here are VLANs, VLAN trunking, link aggregation, virtual switches, VNICs, and load-balancing. We examine the various aspects of network setups and introduce the main Linux on System z networking commands and configuration files. We describe the management of network interface parameters, assignment of addresses to a network interface, and usage of the ifconfig command to configure network interfaces. We provide an overview of connectivity options available on the System z platform. We also describe high availability concepts and building a high availability solution using IBM Tivoli® System Automation. We also provide the implementation steps necessary to build a redundant network connections set up between an IBM z/VM® system and the external network switches using two Open Systems Adapter-Express 3 (OSA-Express 3) adapters with 10 Gb Ethernet ports. We describe the tests performed in our lab environment. The objectives of these tests were to gather information about performance and failover from the perspective of a real scenario, where the concepts of described in this book were applied. This book is focused on information that is practical and useful for readers with experience in network analysis and engineering networks, System z and Linux systems administrators, especially for readers that administer networks in their day-to-day activities. For additional reading: A Technote is available that explains changes to using channel bonding interfaces introduced with SLES 11 SP 2. 2021-01-01 Edward Carpenter In this ground-breaking study of homosexuality, Edward Carpenter reviews an extensive body of literature, including accounts of Shamans and Bedarches (transgenders) in tribal society, and same-sex unions in ancient Greece and feudal Japan. This book includes much that has a direct bearing on issues of gay spirituality, including a discussion of the Kedushim, the priests of the ancient Near Eastern Goddess religion, and target of the Levitical anti-sodomy and anti-cross-dressing regulations. There is also a mention of the sanctioned Christian male same-sex unions in the Balkans, which gives a new dimension to recent controversies. The chapter on same-sex unions in feudal Japan is also of particular interest, as it deals with a topic very rarely dealt with by western writers.
