Exploring Xenakis: Performance, Practice, Philosophy 2019-07-15 Alfia Nakipbekova Considered to be one of the most revolutionary composers of the twentieth century, Iannis Xenakis pushed the boundaries of classical music. As a largely self-taught composer, Xenakis drew from his technical training in engineering and architecture to produce music that had the ability to both unnerve and enrapture his audiences. Motivated by his intense study of many scientific disciplines, he employed the mathematical rules of the natural world to test the traditional rules of counterpoint and harmony, and to explore the spatial texture of sound, colour and architecture. The Romanian-born Greek-French composer transformed twentieth century classical music for decades to come, leaving behind an undeniable legacy that continues to inspire and even shock listeners to this day. By approaching Xenakis's creative output from a variety of perspectives, the contributors to this edited volume seek not only to situate Xenakis's music within a larger cultural, social and political context but also to shed light on contemporary issues surrounding his work. Each chapter focuses on a different aspect of Xenakis's music (in the context of particular works) and musical philosophy: mathematical, structural, performative, as well as the genesis of his compositional style and distinctive sound. Xenakis's artistic presence on the contemporary music scene, his political influence during the tumultuous protests in Paris '68, and his first piano composition, Herma, are also explored in-depth providing new insights into the life and work of this avant-garde figure. This book will appeal to contemporary music researchers, students and scholars and may also be of interest to artists, performers and composers, alike.

Formalized Music 1992 Iannis Xenakis Pendragon Press is proud to offer this new, revised, and expanded edition of Formalized Music, Iannis Xenakis's landmark book of 1971. In addition to three totally new chapters examining recent breakthroughs in music theory, two original computer programs illustrating the actual realization of newly proposed methods of composition, and an appendix of the very latest developments of stochastic synthesis as an invitation to future exploration, Xenakis offers a very critical self-examination of his theoretical propositions and artistic output of the past thirty-five years. This edition of Formalized Music is an essential tool for understanding the man and the thought processes of one of this century's most important and revolutionary musical figures.

Xenakis 2004-08-02 James Harley Xenakis: His Life in Music is a full-length study of the influential contemporary composer Iannis Xenakis. Following the trajectory of Xenakis's compositional development, James Harley, who studied with Xenakis, presents the works together with clear explanations of the technical and conceptual innovations that shaped them. Harley examines the relationship between the composer and two early influences: Messiaen and Le Corbusier. Particular attention is paid to analyzing works which were vital to the composer's creative development, from early, unpublished works to the breakthrough pieces Metastasis and Pithoprakta, through the oft-discussed decade of formalization and the evolving styles of the succeeding three decades.

From Xenakis's UPIC to Graphic Notation Today 2020-04-20 Richard Barrett On the legacy of Xenakis' innovations in music notation for contemporary composers Trained in mechanical engineering, Greek-French composer Iannis Xenakis (1922-2001) transformed mathematical models into architectonic musical entities. In the late 1970s Xenakis developed a digital apparatus that rendered waveforms drawn on a tablet as musical compositions. The device was called UPIC, or Unité Polyagogique Informatique du CEMAMu, named for the French contemporary music research institute that Xenakis had helped found a decade earlier. The device proved to be an essential tool for the development of contemporary music—a version of the software is still used by today's composers. Featuring archival materials, this book examines the origins of Xenakis' UPIC. It also serves as a compositional tool: embedded QR codes allow readers to create their own sound-images from UPIC compositions.

Xenakis Creates in Architecture and Music 2021-11-05 Roger Reynolds Xenakis Creates in Architecture and Music describes the collaborative interaction of internationally acclaimed composer Roger Reynolds, musician Karen Reynolds, and musically inspired composer, engineer, and architect Iannis Xenakis (1922-2001) to create a house design, The Reynolds Desert House. The process combined aesthetics and intuition with mathematical systems, showcasing how art and science are balanced—by way of music and architecture—to address the essential technical aspects of music along with the role of emotion and energy. The book analyzes three representative chamber works and presents a trove of primary sources: letters, diaries, notes, photographs, sketches, and person-to-person conversations. What emerges are patterns of direct parallels between how Xenakis characterized the process of musical creation and his design of The Reynolds Desert House. Xenakis Creates in Architecture and Music is a testament to the singularly innovative and creative mind of Iannis Xenakis. Iannis Xenakis's Persepolis 2023-01-12 Aram Yardumian Iannis Xenakis' Persepolis stood as witness to one of the most important events in modern human history, the Iranian Revolution in 1979. Its existence is owed to an invitation to participate in the 1971 Shiraz Arts Festival, which was overseen by Empress Farah Pahlavi. Like the Festival, and the extravagant celebratory party held the same year, Xenakis' symbolic paean to Persian history was polarizing. Many loved it, others detested it. Overwhelming but also subtle and precise in its non-harmonic shifts in texture and density, listeners and critics simply did not know what to make of it. This book tells the story of Xenakis' early history and involvement in the Resistance against the Axis occupation of Greece during the Second World War, escape and re-settlement in Paris, work as an architect with Le Corbusier, and distinct views on world history and politics that all led to his 1972 electro-acoustic album Persepolis.

From Music to Sound 2019-10-28 Makis Solomos From Music to Sound is an examination of the six musical histories whose convergence produces the emergence of sound, offering a plural, original history of new music and showing how music had begun a change of paradigm, moving from a culture centred on the note to a culture of sound. Each chapter follows a chronological progression and is illustrated with numerous musical examples. The chapters are composed of six parallel histories: timbre, which became a central category for musical composition; noise and the exploration of its musical potential; listening, the awareness of which opens to the generality of sound; deeper and deeper immersion in sound; the substitution of composing the sound for composing with sounds; and space, which is progressively viewed as composable. The book proposes a global overview, one of the first of its kind, since its ambition is to systematically delimit the emergence of sound. Both well-known and lesser-known works and composers are analysed in detail; from Debussy to contemporary music in the early twenty-first century; from rock to electronica; from the sound objects of the earliest musique concrète to current electroacoustic music; from the Poème électronique of Le Corbusier-Varèse-Xenakis to the most recent inter-arts attempts. Covering theory, analysis and aesthetics, From Music to Sound will be of great interest to scholars, professionals and students of Music, Musicology, Sound Studies and Sonic Arts. Supporting musical examples can be accessed via the online Routledge Music Research Portal.

Messiaen Perspectives 2: Techniques, Influence and Reception 2016-04-22 Robert Fallon Focusing on Messiaen's relation to history - both his own and the history he engendered - the Messiaen Perspectives volumes convey the growing understanding of his deep and varied interconnections with his cultural milieu. Messiaen Perspectives 1: Sources and Influences examines the genesis, sources and cultural pressures that shaped Messiaen's music. Messiaen Perspectives 2: Techniques, Influence and Reception analyses Messiaen's compositional approach and the repercussions of his music. While each book offers a coherent collection in itself, together these complementary volumes elucidate how powerfully Messiaen was embedded in his time and place, and how his music resonates ever more today. Messiaen Perspectives 2: Techniques, Influence and Reception explores Messiaen's imprint on recent musical life. The first part scrutinizes his compositional technique in terms of counterpoint, spectralism and later piano music, while the second charts ways in which Messiaen's influence is manifest in the music and careers of Ohana, Xenakis, Murail and Quebecois composers. The third part includes case studies of Messiaen's reception in Italy, Spain and the USA. The volume also includes an ornithological catalogue of Messiaen's birds, collates information on the numerous 'tombeaux' pieces he inspired, and concludes with a Critical Catalogue of Messiaen's Musical Works.

Privacy in the Digital Age [2 volumes] 2015-06-19 Nancy S. Lind A collection of expert essays examines the privacy rights that have been lost in the post-9/11 era—giving students and others the knowledge they need to take back their constitutional protections. This timely two-volume collection shares information every citizen should have, tackling the erosion of privacy rights engendered by the ability of digital technology to intercept, mine, and store personal data, most often without the knowledge of those being monitored. Examining its subject through the lens of Fourth Amendment rights, the work focuses on technological advances that now gather personal data on an unprecedented scale, whether by monitoring social media, tracking cell phones, or using thermal imaging to watch people's movement. It also examines the possible impact of the widespread gathering of such data by law enforcement and security agencies and by private corporations such as Google. Organized by hot-button topics confronting U.S. citizens in the post-9/11 era, the work reviews the original intent of the Fourth Amendment and then traces the development and erosion of interpretations of that amendment in the 21st century. Topical essays offer a comprehensive treatment and understanding of current Fourth Amendment issues, including those that have been brought before the courts and those relative to the continuing governmental and societal emphasis on security and public safety since the Columbine shootings in 1999 and the events of September 11, 2001.

Three Questions for Sixty-five Composers 2011 Bálint András Varga Master interviewer Bálint András Varga poses three probing questions to renowned contemporary composers about their work, and carefully renders their answers in their own words.

Regulation, Deregulation, Reregulation 2009 Claude Ménard After 25 years of industry restructuring, regulatory reform and deregulation across many industrial sectors in many countries, it is an appropriate time to take stock of the impacts of these reforms on consumers, producers and overall economic performance. This book contains the latest thinking on these issues by a distinguished international group of scholars. It is a collection of essays for our time that is well worth reading. Paul L. Joskow, Massachusetts Institute of Technology, US The most exciting development in the study of regulation in the past quarter century is research on the incentives that are created by the details of the procedures for creating and enforcing regulatory rules. This book brings together a rich collection of studies that collectively advance our understanding of the effect of regulatory governance on the performance of regulated firms, with important lessons about how to design more effective regulatory instruments and processes. Roger G. Noll, Stanford University, US Cycles of poorly-designed or weakly-enforced regulation, disappointing performance and political over-reaction are now familiar to students of regulated industries. Nourished by recent developments in the economics of incentives, including their transaction costs and property rights dimensions, and written by renowned experts in the field, Regulation, Deregulation, Reregulation is a must-read for all those interested in the economics and politics of regulation. A timely book, the publication of which coincides with the designing of a post-subprime regulatory framework for the financial industry. Jean Tirole, Toulouse School of Economics, France Building on Oliver Williamson's original analysis, the contributors introduce new ideas, different perspectives and provide tools for better understanding changes in the approach to regulation, the reform of public utilities, and the complex problems of governance. They draw largely upon a transaction cost approach, highlighting the challenges faced by major economic sectors

and identifying critical flaws in prevailing views on regulation. Deeply rooted in sector analysis, the book conveys a central message of new institutional economics: that theory should be continuously confronted by facts, and reformed or revolutionized accordingly. With its emphasis on the institutional embeddedness of regulatory issues and the problems generated by the benign neglect of institutional factors in the reform of major public utilities, this book will provide a wide-ranging audience with challenging views on the dynamics of regulatory approaches. Economists, political scientists, postgraduate students, researchers and policymakers with an interest in institutional economics and economic organization will find the book to be a stimulating and enlightening read.

Theatre in the Dark 2017-08-10 Adam Alston Theatre in the Dark: Shadow, Gloom and Blackout in Contemporary Theatre responds to a rising tide of experimentation in theatre practice that eliminates or obscures light. It brings together leading and emerging practitioners and researchers in a volume dedicated to exploring the phenomenon and showcasing a range of possible critical and theoretical approaches. This book considers the aesthetics and phenomenology of dark, gloomy and shadow-strewn theatre performances, as well as the historical and cultural significances of darkness, shadow and the night in theatre and performance contexts. It is concerned as much with the experiences elicited by darkness and obscured or diminished lighting as it is with the conditions that define, frame and at times re-shape what each might 'mean' and 'do'. Contributors provide surveys of relevant practice, interviews with practitioners, theoretical reflections and close critical analyses of work by key innovators in the aesthetics of light, shadow and darkness. The book has a particular focus on the work of contemporary theatre makers – including Sound&Fury, David Rosenberg and Glen Neath, Lundahl & Seidl, Extant, and Analogue – and seeks to deepen the engagement of theatre and performance studies with what might be called 'the sensory turn'. Theatre in the Dark explores ground-breaking areas that will appeal to researchers, practitioners and audiences alike.

Dividing Africa with Policy 2020-06-08 Lara Hierro This book addresses timely concerns of rising African nationalism and the 2nd decolonisation in Africa. The wholesale rejection of all things considered 'Western' is seen to be a result of 'integrationalism', defined as the specific kind of methodology by which EU foreign policy engagement may be interpreted. Using complexity theory and panarchy, a specific arrangement of interacting complex adaptive systems together with a 'resilience assessment', the EU's foreign policy is shown to be undermining the aims of the premier African institution, the AU, created to provide unity and security on the continent: the EU pursues these objectives in its own image rather than honouring African values. This book raises awareness of these issues, as well as to widen the application of the theoretical framework in international relations and politics, which is becoming increasingly important in a complex world. The aim of this book is to show that the negative isolationism pursued in order to counteract western influence is not the answer and can be avoided through this awareness.

Modeling Creativity 2013-02-01 Tom De Smedt Modeling Creativity (doctoral thesis, 2013) explores how creativity can be represented using computational approaches. Our aim is to construct computer models that exhibit creativity in an artistic context, that is, that are capable of generating or evaluating an artwork (visual or linguistic), an interesting new idea, a subjective opinion. The research was conducted in 2008–2012 at the Computational Linguistics Research Group (CLiPS, University of Antwerp) under the supervision of Prof. Walter Daelemans. Prior research was also conducted at the Experimental Media Research Group (EMRG, St. Lucas University College of Art & Design Antwerp) under the supervision of Lucas Nijs. Modeling Creativity examines creativity in a number of different perspectives: from its origins in nature, which is essentially blind, to humans and machines, and from generating creative ideas to evaluating and learning their novelty and usefulness. We will use a hands-on approach with case studies and examples in the Python programming language.

Learning, Teaching, and Musical Identity 2011-03-30 Lucy Green Musical identity raises complex, multifarious, and fascinating questions. Discussions in this new study consider how individuals construct their musical identities in relation to their experiences of formal and informal music teaching and learning. Each chapter features a different case study situated in a specific national or local socio-musical context, spanning 20 regions across the world. Subjects range from Ghanaian or Balinese villagers, festival-goers in Lapland, and children in a South African township to North American and British students, adults and children in a Cretan brass band, and Gujerati barbers in the Indian diaspora.

The Routledge Research Companion to Modernism in Music 2018-10-29 Björn Heile Modernism in music still arouses passions and is riven by controversies. Taking root in the early decades of the twentieth century, it achieved ideological dominance for almost three decades following the Second World War, before becoming the object of widespread critique in the last two decades of the century, both from critics and composers of a postmodern persuasion and from prominent scholars associated with the 'new musicology'. Yet these critiques have failed to dampen its ongoing resilience. The picture of modernism has considerably broadened and diversified, and has remained a pivotal focus of debate well into the twenty-first century. This Research Companion does not seek to limit what musical modernism might be. At the same time, it resists any dilution of the term that would see its indiscriminate application to practically any and all music of a certain period. In addition to addressing issues already well established in modernist studies such as aesthetics, history, institutions, place, diaspora, cosmopolitanism, production and performance, communication technologies and the interface with postmodernism, this volume also explores topics that are less established; among them: modernism and affect, modernism and comedy, modernism versus the 'contemporary', and the crucial distinction between modernism in popular culture and a 'popular modernism', a modernism of the people. In doing so, this text seeks to define modernism in music by probing its margins as much as by restating its supposed essence.

Enacting Musical Time 2019-10-09 Mariusz Kozak What is musical time? Where is it manifested? How does it enter into our experience, and how do we capture it in our analyses? A compelling approach among works on temporality, phenomenology, and the ecologies of the new sound worlds, Enacting Musical Time argues that musical time is itself the site of the interaction between musical sounds and a situated, embodied listener, created by the moving bodies of participants engaged in musical activities. Author Mariusz Kozak describes musical time as something that emerges when the listener enacts her implicit knowledge about "how music goes," from deliberate inactivity, to such simple actions as tapping her foot in time with the beat, to dancing in a way that engages her entire body. Kozak explores this idea in the context of modernist and postmodernist musical styles, where composers create unfamiliar and idiosyncratic temporal experiences, blur the line between spectatorship and participation, and challenge conventional notions of form. Basing his discussion on the phenomenology of Merleau-Ponty and on the ecological psychology of J. J. Gibson, Kozak examines different aspects of musical structure through the lens of embodied cognition and what phenomenologists call "lived time." A bold new theory derived from an unprecedented fusion of research perspectives, Enacting Musical Time will engage scholars across a range of disciplines, from music theory, music cognition, cognitive science, continental philosophy, and social anthropology.

The European Union and Occupied Palestinian Territories 2014-02-03 Dimitris Bouris This book analyses the present European Union (EU) approach to state-building, both in policy and operation. It offers a review of the literature on peace-building, EU state-building and conflict resolution, before examining in detail the EU's role as a state-builder in the case of the Occupied Palestinian Territories following the 1993 Oslo Accords. Drawing on extensive fieldwork and over 140 interviews carried out in Brussels, London, Jerusalem and Ramallah with EU, Palestinian and Israeli officials as well as academics, members of NGOs and civil society, the author evaluates the present approach of state-building and offers a framework to test the effectiveness

of the EU as a state-builder. Examining security sector reform, judiciary sector reform and the rule of law, the book brings the 'voices from the field' to the forefront and measures the contribution of the EU to state-building against a backdrop of on-going conflict and a polarised social setting. This book will be of interest to students and scholars of international relations, EU politics, Middle Eastern politics, conflict resolution and state-building.

Living Under Austerity 2018-07-20 Evdoxios Doxiadis Since its sovereign debt crisis in 2009, Greece has been living under austerity, with no apparent end in sight. This volume explores the effects of policies pursued by the Greek state since then (under the direction of the Troika), and how Greek society has responded. In addition to charting the actual effects of the Greek crisis on politics, health care, education, media, and other areas, the book both examines and challenges the "crisis" era as the context for changing attitudes and developments within Greek society.

Islam, Migration and Jinn 2021-03-13 Annabelle Böttcher This book explores the agency of Jinn, the so-called "demons of Islam". They are regarded as mostly invisible and highly mobile creatures. In a globalized world with manifold forms of forced and voluntary migrations, Jinn are likewise on the move, interfering in the human world and affecting the mental and physical health of Muslims. This continuous challenge has so far been mainly addressed by traditional Muslim health management and by the so-called spiritual medicine or medicine of the Prophet. This book shifts perspective. Its interdisciplinary chapters deal with the transformation of manifold cultural resources by first analyzing the doctrinal and cultural history of Jinn and the treatment of Jinn affliction in Arabic texts and other sources. It then discusses case studies of Muslims and current health management approaches in the Middle East, namely in Egypt and Syria. Finally, it turns to the role of Jinn in a number of migratory settings such as Spain, Denmark, Great Britain and Guantanamo.

Transnational Threats 2007-05-30 Kimberley L. Thachuk This collection of essays demonstrates how the security of Americans is potentially threatened by individuals and governments who are engaged in the illicit trade in arms, drugs, and human beings in distant parts of the globe. More than just a threat to Americans, the essays underscore that these activities are often detrimental to the United States interests around the world due to the destabilizing impact that each activity can have on a nation or region. More revealing is how terrorists benefit from this illegal trade, generating critical sources of funding used for everything from recruiting to procurement of weapons and explosives of all types to extend and expand the scope of their struggle. The scope of this work is truly global. Fourteen essays touch on prevailing problems from the Balkans to Southeast Asia and the Pacific; from Africa to the Caribbean, and more. In each essay, the authors explore a problem that not only has direct regional repercussions, but larger international ones as well. The essays present problems that result from these illegal activities as a global epidemic, not simply regionalized problems.

Ethics Challenges in Forensic Psychiatry and Psychology Practice 2018-03-06 Ezra E. Griffith Forensic psychiatry and psychology involve specialized practice with unique patients, including children, the incarcerated, and involuntary clients, presenting practitioners with specific ethics challenges. In this volume, Ezra E. H. Griffith offers a selection of engaging essays that guide practicing forensic specialists through particular situations that often result in ethics dilemmas. In chapters covering topics such as forensic practice and critical feminist theory, neuroethics in court, work with asylum applicants, and ethics problems presented by the internet, the contributors demonstrate methods to help practitioners resolve problems that they are likely to encounter in forensic practice. Rationalizing Culture 1995-09-08 Georgina Born As a year-long participant-observer, Born studied the social and cultural economy of an institution for research and production of avant-garde and computer music. Aberrant Nuptials 2019-12-11 Paulo de Assis Unique focus on the relation between artistic research and the philosophy of Gilles Deleuze Aberrant Nuptials explores the diversity and richness of the interactions between artistic research and Deleuze studies. "Aberrant nuptials" is the expression Gilles Deleuze uses to refer to productive encounters between systems characterised by fundamental difference. More than imitation, representation, or reproduction, these encounters foster creative flows of energy, generating new material configurations and intensive experiences. Within different understandings of artistic research, the contributors to this book—architects, composers, film-makers, painters, performers, philosophers, sculptors, and writers—map current practices at the intersection between music, art, and philosophy, contributing to an expansion of horizons and methodologies. Written by established Deleuze scholars who have been working on interferences between art and philosophy, and by musicians and artists who have been reflecting Deleuzian and Post-Deleuzian discourses in their artworks, this volume reflects the current relevance of artistic research and Deleuze studies for the arts.

Theories of International Regimes 1997-10-02 Andreas Hasenclever International regimes have been a major focus of research in international relations for over a decade. Three schools of thought have shaped the discussion: realism, which treats power relations as its key variable; neoliberalism, which bases its analysis on constellations of interests; and cognitivism, which emphasizes knowledge dynamics, communication, and identities. Each school articulates distinct views on the origins, robustness, and consequences of international regimes. This book examines each of these contributions to the debate, taking stock of, and seeking to advance, one of the most dynamic research agendas in contemporary international relations. While the differences between realist, neoliberal and cognitivist arguments about regimes are acknowledged and explored, the authors argue that there is substantial scope for progress toward an inter-paradigmatic synthesis.
