The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a widely recognized vocabulary test that has been in practice for close to half a century. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is crafted to assess vocabulary comprehension for American English. It is swift and simple to administer, preserving precious time so that attention can be set on implementing intelligent strategies. The PPVT-4 evaluation material encompasses a broad scope of receptive vocabulary levels, ranging from preschool through adult age. The test problems widely sample words that represent 20 content areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and household and school vocabulary.

The assessment provides two equivalent versions which contain different vocabulary items, guaranteeing that the person has not “mastered” the assessment. One edition can be used before intervention implementation to measure test-takers’ vocabulary knowledge and the alternative version can be used for re-testing to assess and document improvement. The PPVT-4 also includes a special Growth Scale Value (GSV) which is sensitive to small changes in time.
