like a member of a senior management team who has the goal of balancing risk, cost, and most of all, human life. The questions will take you through how to resist thinking from a technical perspective to one that is more holistic of the entire organization. Like all of Study Notes and Theory's CISSP practice questions, these questions correlate multiple high-level security concepts and require thinking like a manager. Extracting the most value comes from understanding not only which choice is correct, but more importantly, why the other choices are wrong.
