Formulated by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is crafted to evaluate receptive vocabulary for American English. It is swift and simple to conduct, conserving precious time so that concentration can be put on executing effective interventions.

The PPVT-4 evaluation content includes a wide scope of vocabulary comprehension ranks, ranging from pre-kindergarten through adult age. The evaluation problems broadly sample words that portray 20 subject areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and household and educational vocabulary.

The test gives two equal forms which contain distinct vocabulary items, making sure that the person has not "memorized" the assessment. One edition can be used ahead of intervention to measure individuals' vocabulary comprehension and the second form can be utilized for re-assessment to assess and note improvement. The PPVT-4 also includes a distinctive Growth Scale Value (GSV) which is sensitive to slight changes with time.
