Although there are risks if you decide to go undergo acupuncture, these can be avoided as long as the one doing it is a licensed professional who makes sure that the needles used are sterilized before they are inserted into the body.

These days, a lot of people in the medical field have accepted the fact that alternative medicine such as this can also help the patient which is why they may refer someone when it is needed.

So, if you are tired of experiencing the side effects of conventional medicine and want to try a holistic form of healthcare, why don't you see what acupuncture can do for you? It is painless and cost effective. In fact, it is just one of many you can try to help treat a chronic condition.

#### **Legend crime mystery collection 110 thrillers detective tales,A Primer on Medical Acupuncture**

Have you ever had an uncontrollable urge to be pierced by a dozen needles? This is the image most people get when someone mentions the word "acupuncture". It comes as no surprise that most view this technique with suspicion, even downright horror. The fact is, however, that this relatively painless ancient Chinese technique has helped relieve the symptoms of millions of people. Properly used, it can help in the management of many medical conditions including chronic pain and fatigue.

How does needle puncture work?

Practitioners of Chinese traditional medicine believe in energy flows. This energy, called Qi, circulates around the body using pathways called meridians. Meridians run very close to the surface of the skin in certain areas and can be accessed by needles. Much like plumbing, these pipes can get blocked or go the wrong way, causing health problems. The insertion of needles at these points is aimed to help loosen blocks and normalize flow.

#### **The Best crime mystery collection 110 thrillers detective tales-Acupuncture and Weight Loss**

There are a lot of people who are overweight. For those who are obese, perhaps surgery is the best option but for those who can't, they can try to see if acupuncture can help take out the excess weight.

Acupuncture is a form of holistic healthcare that uses needles to help treat a patient. Unlike the cartoon where the balloon will pop and all the air will go out, the needles that are inserted into the vital points will stimulate the body to release endorphins thus helping the person control their appetite.

But before needles are inserted, the specialist will first ask the patient some questions and perform an examination. This is needed to understand the main cause for the person to be overweight.

Analysis crime mystery collection 110 thrillers detective tales...Acupuncture can do more than just helping patients deal with arthritis or migraine. Clinical tests have shown that it can help obese people lose weight and those who are suffering from insomnia.

In some countries, acupuncture has even been used to replace chemical anesthesia prior to surgery as there are some patients who are not able to tolerate regular anesthesia.

Another field which acupuncture has proven to be effective is helping patients deal with their addictions such as alcohol, drugs and smoking. One study of smokers revealed that the average patient will cut down by half the number of cigarettes they consume after just one treatment. Just imagine the potential after a few more sessions!

#### Solutions crime mystery collection 110 thrillers detective tales

In the 5th or 7th treatment, this becomes more evident as your face looks more relaxed as though you just came from a vacation.

The end result is that you will look and feel 5 to 15 years younger but of course this depends on how well the patient has taken care of themselves outside the confines of the clinic.

To sum things up, facial acupuncture can do for you. It can eliminate fine lines and reduces wrinkles, improve your overall facial color and add luster to the skin, relaxes tension in the face and furrows in the brow, brightens the eyes and reduce dark circles and puffiness, improve muscle tone for sagging skin, enhance your natural radiance in the skin and eyes, slow the aging process within, promotes overall health and well being as well as relaxes and revitalizes the entire body.

#### **For Free crime mystery collection 110 thrillers detective tales;Successful Career in Accounting Even if You're Hit Forty!**

You're never too old to dream, right? If it is your ambition to become a well-known and most sought-after accountant in the business industry, you can turn that dream into reality even if you're 40 years + already.

If you started planning your career path when you were still younger, your dream is within your arm's reach. In order to experience continuing success, you must have excellent knowledge in accountancy. You must work accurately and you should gather work experience through the years in the profession. Check these steps so that you can at least evaluate your situation right now:

1. You must excel in Mathematics – you must know how to manipulate numbers. Did you excel the subject when you were still in high school or college? As an accountant, you should love mathematics. If you hate it, then you're not an efficient accountant and you're bound to commit mistakes especially in the computation and analysis of financial data.

#### **Acupuncture Can Help You Quit Smoking**

Smoking is one hard habit to break. If nicotine patches and gum doesn't work, perhaps you should try something else like an alternative form of healthcare like acupuncture.

Acupuncture is an ancient practice involving the use of needles. This instrument is inserted into the skin to allow you energy or Qi to start flowing freely around your body and thus help you quit smoking.

When you go visit an acupuncturist for the first time and tell him or her that you want to quit smoking, after answering some questions, the specialist will carry out an examination of your ears and search for areas where the energy is low.

#### *Instruction crime mystery collection 110 thrillers detective tales* **Acupuncture Can Help Treat Migraines**

Acupuncture can help treat migraines. This was discovered after a comparative study was done with conventional medical care. In some cases, it even prevents it from happening which helps improve the quality of life for the patient.

To understand how acupuncture helps migraine sufferers, you have to understand that in traditional Chinese medicine, it is believed that an imbalance in the flow of blood and energy causes this to happen.

In order to treat it, the specialist must relieve the tension by inserting needles into the body to improve the blood flow to the brain thus reducing the pain experienced during an attack.

#### **Lolita crime mystery collection 110 thrillers detective tales:Acupuncture for Effective Weight Loss**

In a generation when physical fitness is given topmost attention, people are always on the lookout for the newest and most effective means for weight loss. Acupuncture, the method of inserting thin, filiform needles on certain points in an individual's body, has been found to be one effectual method for losing weight.

Not many people may find the idea of being inserted by needles quite comforting in their quest for weight control. However, this ancient Chinese alternative treatment seeks to deliver a control mechanism, enabling the patient to manage hunger cravings more successfully in the long run.

### **Acupuncture in the Western World**

One of the most debated issues between the East and the West is the use of acupuncture as a western means of medical treatment. Even though this form of medicine has been used as an effective method for over five thousand years in China, there is no concrete evidence from scientific research studies that have proven the healing properties of acupuncture.

Skeptics shrug off the positive effects of acupuncture as merely placebo effects. Believers in acupuncture, however, say that the benefits have simply not yet been proven. Believers promote that the treatment is harmless and can be used as a complement to western medicine.

### **For Free crime mystery collection 110 thrillers detective tales-Is Acupuncture The Remedy for You?**

With the growing acceptance of alternative medicine in Western cultures, acupuncture is quickly becoming a popular practice. More and more people today are choosing acupuncture over western medicine to treat bodily pains, relieve stress, or to promote overall health. If you are thinking about trying acupuncture but are wondering if it is safe or if it's the right treatment for you, the following information may aid you in making a more informed decision.

#### **Description and Origin**

Acupuncture is the practice of inserting fine needles into specific points in the body for therapeutic purposes. According to theory, these specific points called "acupuncture points" lie along pathways of the body along which one's vital energy is said to flow. The needles are used to promote free-flow of energy in areas of the body that circulation may have stagnated. Although acupuncture is practiced in many Asian cultures such as Japan, Tibet, and Korea the practice is commonly known to have originated in China.

#### **Best Seller : crime mystery collection 110 thrillers detective tales**

In TCM, practitioners adhere to the concept of Qi, or energy flow, and the meridians in which they travel. They use longer needles and insert them deeper in order to reach the acupuncture points. Modern science has found little evidence to prove the existence of these energy channels, but this is the technique that has been used effectively for thousands of years.

In medical acupuncture, the practitioners are graduates of western medical schools. Their application of needles is not based on the traditional acupuncture points, but on anatomic data. These acupuncturists use shorter needles and the insertions are shallower. They also tend to use fewer needles and leave them inserted for shorter periods of time. Adherents to TCM feel this is a watered-down version of the real thing. Nevertheless, many patients have felt relief of symptoms through this method.

Conditions for Puncture Application

There is a broad and extensive list of ailments which can be treated with acupuncture. The conditions run the gamut from asthma to constipation, anxiety to weight loss. Most TCM practitioners believe that any health condition results from an imbalance in Qi flow, therefore amenable to needle therapy. Western acupuncturists tend to have a more limited list of indications, the most common of which is undoubtedly control of pain.

Behind the crime mystery collection 110 thrillers detective tales,Teens get anemia as they grow rapidly the amount of iron intake may not be enough to keep up with the pace of the growth as it needs more nutrients in this process. In the case of girls they need more iron after puberty and are at risk due to heavy blood loss during menstrual periods. In some cases pregnancies also leads to anemia. Also, teens who diet excessively to lose weight may also be at risk of having iron deficiency. Meat eaters especially red meat eaters are at less risk compared to vegetarians as meat has rich iron in it.

#### **Asthma in Adolescents**

Most of the teenagers who have asthma are also allergic to many things. The asthma can get severe even if the people with asthma are exposed to allergens of low grade. Allergies play an important role in asthma cases which are undiagnosed. Other factors that also trigger childhood asthma include upper respiratory infections like colds, second hand smoke, and certain climate conditions like cold air and due to emotional physical expressions like laughing, crying or yelling. However, it is not the end of the road for asthmatics as they can live active and healthy if they manage asthma properly by avoiding asthma triggers, regular intake of prescribed medications, being alert of the warnings and be aware of the ways to deal with an asthma attack.

**Curse crime mystery collection 110 thrillers detective tales**;Right after each acupuncture session, you will feel a bit tired and may need to rest. Some people feel an increase in their energy levels. The response to acupuncture is very individual. In some cases there is immediate relief of symptoms. For some patients, the beneficial effects may only be noticed after undergoing a few sessions. Do not be alarmed and keep your acupuncturist updated on what you are feeling to ensure everything is going as expected.

You need never fear the thought of needles ever again. Acupuncture is a beneficial treatment with a long history of effectiveness. It is used to complement current medical therapy and should not replace currently existing medications or treatments.

The safe application of this once exclusively Chinese therapy can now be experienced by chronic disease sufferers worldwide.

#### **Cholesterol in Adolescents**

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning. The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

*Discovery crime mystery collection 110 thrillers detective tales*-Control of pain is the most well researched of all of the indications for acupuncture. There is a definite beneficial effect for a majority of patients using this method. Migraines, premenstrual syndrome, arthritis, carpal tunnel syndrome, and neuralgias are but a few examples. The theory behind its effectiveness is also medically accepted and well researched, called the gate-control theory of pain. It states that the needles can stimulate nerves so that they block the impulses from pain triggers.

Expected Puncture Session Result

It is important to emphasize that acupuncture is used only on top of existing medical therapy. At no time should a patient discontinue medication or ignore medical instructions in favor of needle puncture. After undergoing a needle puncture regimen, the primary care physician can make an evaluation with regards to decreasing dependence on other therapies.

Transformation crime mystery collection 110 thrillers detective tales

Cholesterol screening helps to determine the cholesterol and fat levels in the blood. Children and adolescents with normal cholesterol level is a thing of the past. Because of the changing lifestyle and junk food trend, even they have a high risk to develop high levels of cholesterol which also increases the risk of developing heart diseases which can affect the blood vessels and the coronary arteries. The main cause of this change is obesity, junk food high in fat, fast food diets, sedentary lifestyle and high cholesterol level in family history. Keeping the blood cholesterol levels at normal is a good way of avoiding high blood pressure and coronary artery diseases.

The blood cholesterol level can vary from individual to individual. Healthy levels of LDL is less than one hundred and thirty milligrams, HDL is greater than thirty five milligrams. If the HDL is less than thirty five milligrams then the adolescent is at a higher risk of developing heart diseases. And LDL more than one hundred and thirty milligrams is dangerous. But a high level of LDL cholesterol is a problem in many citizens of America. And there is an expected increase in number, the figure is unknown, of adolescents who have a family history of high cholesterol levels.

An adolescent or a child who has a parent having high levels of blood cholesterol and family history of heart diseases at an early age, should take cholesterol test from the age of two. Adolescents who are obese also should have lipid test along with cholesterol test. The lipid test shows levels of kinds of fats in blood such as triglycerides, LDL and HDL.

There are things that patients have to be aware of before, during and after surgery. The same goes for those who undergo acupuncture because in order to enhance the value of the treatment, there are some do's and don'ts that patients have to follow.

First, you should not eat a large meal before or after treatment.

You should also avoid over exercising, engaging in a sexual activity or consume alcoholic beverages 6 hours before and after treatment.

Since the acupuncture session will last from 45 minutes to 2 hours depending on how often you have to go to the clinic, you better fix your schedule so you have time to rest.

You can probably ask for the name and contact number of a previous client so you can ask this person how everything went. Remember, if it doesn't work out for you, don't be afraid to find someone else who can do a better job. The most important thing to do during the session is to relax. If you feel an itch or something, tell the acupuncturist. The same goes if you are nervous or experience a burning sensation so the specialist will take out the needles.

*Solutions crime mystery collection 110 thrillers detective tales:*The needles used in acupuncture are very small and you will probably feel a slight twitch when the needle goes in. They will be inserted carefully to ¼ or an inch in depth and will stay there from 45 minutes to an hour depending on the condition of the patient.

If inserted properly, you should feel some cramping, distention, electric sensation or tingling which means that the treatment is working.

Needles used for acupuncture especially in the US are clean because they are required to be disposable. This prevents any chance that those who go for treatment will be contaminated by a communicable disease like hepatitis or HIV.

Miracle crime mystery collection 110 thrillers detective tales.Every business aims to get a good and positive figure because that would mean profit to them; if not, the business is at a loss. Societies and economies are built on profit. However, there are times when a certain business incurs losses. Consumer behaviors and economic trends change. Because of this fact, it is not possible to foresee the company's future performance at all times.

How can you tell if a business is at a loss? That is understandable and even those who have no background in accounting know what it means. All liabilities will be deducted from the assets and if results to a negative amount, then the business is at a loss. The accounting staff of the company can still pursue effective measures to revive the business. If the business has efficient and effective accounting staffs, the business can improve in the near future.

The first is called TCM based acupuncture. Here, it uses eight principles of complementary opposites to create harmony in the body. These include yin/yang, internal/external, excess/deficiency, hot/cold.

Next is called French energetic acupuncture. This is often used by MD acupuncturists. Meridian patterns are emphasized here particularly the yin-yang pairs of primary meridians.

Korean hand acupuncture is another as practitioners believe that the hands and feet have concentrations of qi, and that applying acupuncture needles to these areas is effective for the entire body.

Acupuncture comes from two Latin words namely "acus" which means needle in English and "pungere" which means prick. Its history originated in China more than 2000 years ago and has evolved into various forms.

Some of the techniques of acupuncture do not even use needles anymore. Vibrating objects, ultrasound and even the fingers of the practitioner have taken some of the work to make the person feel better.

#### **High Blood Pressure in Adolescents**

High blood pressure is a condition where the blood pressure is more than normal. It is also known as hypertension. Heart pumps out blood, so that oxygen can reach to different parts of the body via blood. The pressure with which heart pumps blood is known as blood pressure. The blood pressure comprises of two measures, the systolic pressure and diastolic pressure. Systolic pressure is the larger figure and represents the pressure within the artery of the heart, when contractions take place which pump blood to different parts of the body. Diastolic pressure is the pressure within the artery of the heart, when the blood is filling in the heart and it is at rest. Both the pressures are measured in millimeters of mercury or mmHg. High blood pressure is abnormal increase in systolic pressure or diastole pressure.

Blood pressure is measured by putting a blood pressure cuff on the arm and placing a stethoscope on the chest. There can be very little variation in blood pressure depending upon the time, emotional moods, age, gender, weight, height, physical activity, stress and other illness such as heart disease and kidney disease. Children and adolescents become anxious when they visit the doctor. This is also an important factor which affects the blood pressure and the readings taken get tampered because of it. That is the reason why many blood pressure readings are taken in order to determine whether the adolescent has high blood pressure or not. The nurse may even ask the adolescent to calm down while taken the readings. Time gap is given between each reading, so as to give time to the adolescent to calm down. Emotions can also affect the blood pressure reading.

Heat cramps are the mildest of all heat related injuries and constitute aching muscle cramps and also spasms that occur during intense exercising and also after intense exercising and also sweating in high heat. The symptoms of heat cramps include cramps that are painful in the legs. Flushed and moist skin is also symptoms of heat cramps. The symptoms could also include mild fever generally below 102 degree Fahrenheit. Teens suffering from heat cramps should move to a cool place and take adequate rest. Remove any excessive clothing and wear or put cool clothing on skin or cool skin using air conditioner or fan. Sports drinks which are cool and which contains sugars and salts can also be taken. Stretching out cramped muscles slowly and steadily also helps reduce heat cramps.

On the other hand heat exhaustion is more serious and severe compared to heat cramps and occur due to heavy loss of salt and water from the body. Extreme heat conditions, inadequate fluid intake and excessive sweating results in this conditions. Also, heat exhaustion occurs as a result of inability of the body to maintain the body temperature below the normal which can deteriorate further and also result in a heat stroke which is even worse. The symptoms of heat exhaustion are: muscle cramps, moist skin, pale skin, nausea, fever above 102 degree Fahrenheit, diarrhea, vomiting, fatigue, headache, weakness, anxiety and faint feeling. Teens suffering from heat exhaustion should stay in cool surrounding and take enough rest. Removing excessive clothing, putting on cool clothes and sitting in fan or air conditioning also helps the situation. Intake of cold sports drinks which contains salts and sugars are also advisable. If a teen doesn't show any signs of improvement even after taking all these measures a physician should be consulted immediately.

The treatment is finished after an hour and when the needles are removed, you are advised to wear ear magnets so your session continues even when you leave the clinic. While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy.

Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.

One of the foremost effects of acupuncture on the body is relaxation. Stress is frequently pinpointed as the main precursor for a host of physical ailments. There are particular points all over the body that direct the flow of harmony and relaxation and when these are enthused, the patient becomes more at ease.

Another positive effect of this alternative therapy is increased pain control. During a session, a patient will usually feel very minimal pain as the thin needles are being inserted gradually. However, the needles are deliberately placed in varying depths, depending on the health requirements of the patient. When the needles reach the right depth, the patient will feel deeper pain, although the entire procedure is not necessarily painful.

It is also recommended for relief from chemotherapy fatigue as well as chemotherapy-related nausea. It has also been found to be largely effective for back pains, migraines, menstrual cramps, and as a pain controller for patients after undergoing surgical operations.

The imbalance in the Qi may go one way or the other because of Yin and Yang. The person can only be normal if there is harmony between the two which is what acupuncture is trying to achieve. This can only be restored by stimulating these acupuncture points so your Qi can be adjusted, balanced and harmonized.

Apart from using needles, practitioners also use friction, heat, impulses of electromagnetic energy and pressure to stimulate these points in order to balance the movement of energy in the body to reduce one's health.

An example of this is sonopuncture where an ultrasound device that transmits sound waves is applied to these points in the body. Some use a tuning fork and other vibration devices.

Patients of acupuncture typically experience very minimal or no pain at all, however most of the points are located near nerve endings and muscle tissues. As the needles are embedded in the body, signals are sent to the brain thus promoting the release of endorphins from the pituitary gland.

There are also other points in the body that serve as gateways for better weight management. One of these placements promotes a decrease in an individual's appetite, while another has the ability to reduce water retention in the body. The acupuncturist may choose a multi-targeted approach, depending on the requirements of the patient.

Periodontal disease can be diagnosed by a dentist or a periodontist after reviewing the complete medical history and also physical examination of the teenager's mouth. Usually x-ray of the teeth is taken to evaluate the disease. Periodontal disease is classified into different types based on what stage the disease is in. The mildest form of gum disease is known as "gingivitis" in which gums become swollen, red and tender resulting in bleeding while daily brushing and flossing. Gingivitis is again divided into 4 groups primarily acute, sub-acute, recurrent and chronic. Acute gingivitis is nothing but sudden appearance which lasts for shorter duration and could be painful. Sub-acute gingivitis is less severe type of gingivitis. Recurrent gingivitis is the one that comes back after treatment. Chronic gingivitis is the one that onsets slowly, lasts longer and is generally painless. A dentist's treatment and proper and continuous care can easily solve the problem of gingivitis but if left untreated could result in periodontitis.

Periodontitis is further classified into mild and moderate to advance. Periodontitis results from untreated gingivitis. In this stage the deterioration of the bone in the vicinity of the tooth becomes evident. The common symptoms include red gums that bleed; mouth tastes bad; loose teeth; tooth loss. Proper treatment is a must to control the disease and prevent further deterioration. Periodontitis which is in moderate to advanced stage shows signs of major loss of tissue and bone loss near the teeth.

There are various treatments available for periodontal disease which is decided by the dentist depending on teenager's age, medical history and health in general. The method of treatment also depends on the extent to which disease has reached. The tolerance of the teenager to certain medicines, therapies and procedures are also taken into consideration. Expectations and opinion of the parents or teenager is also the criteria in deciding the type of treatment. The treatment usually involves plaque removal, medication and in worse cases a surgery.

Once he or she knows the reason, this is the time that the needles are inserted into different parts of the body. One way is called the multi-targeted approach which is designed to lower the body's weight by increasing the output of the pituitary gland.

The areas where the needles will be inserted will be in the ear and in two of three body points. These areas could also include the mouth, the stomach, the lung, the endocrine, the spleen, kidney or thyroid.

During the initial treatment, the "Four Gate" points would be used to circulate energy throughout the entire body. It is also possible that electro simulation will also be done to increase endorphin release and stimulate metabolism.

These ear tacs work by applying mild pressure whenever he or she feels hungry. It causes a mild endorphin release and helps the patient relax making it possible to use their willpower and resist the temptation to eat.

The patient will also have to reduce cravings on certain food by cutting down the intake. Some studies suggest that this can also lower insulin levels or lipid levels in the blood.

Aside from that, you should also make some lifestyle changes as there are trigger factors that have been known to cause migraines. Stress is number one on the list so you get enough rest and exercise as well as a balanced diet.

Patients who are suffering from migraine should also check if acupuncture is covered by their HMO. Most insurance providers and HMO's these days cover all or part of the cost but there are restrictions so you should check what is covered by your policy.

Once these spots are identified, these sharp needles are then inserted. Usually 5 needles are placed in various acupoints.

But how well acupuncture does for one patient may vary with another. This depends on the condition of the attack and the individual.

The best part about acupuncture is that there are no side effects and it is painless. Skillful professionals can do this so you don't suffer from hematoma or pneumothorax. Another disease is potentially dangerous is HIV or hepatitis which can be prevented of course as long as the needles used are properly sterilized. It will be much better if the person uses disposable needles.

Acupuncture has been practiced in the United States for more than 2 decades. Although tests have shown how effective it can be to treat chronic conditions and certain addictions, more studies need to be done to see where else it can be useful.

[Fight crime mystery collection 110 thrillers detective tales..](#)When will the cure be found? Only time can tell as there are many other questions that have to be answered in order for doctors to further understand neurological disabilities. Doctors who are conducting research believe that an interdisciplinary approach is needed given that acupuncture has shown positive results in helping children with autism.

Part of examination is to help the acupuncturist figure out where the needles will be inserted. Your pulse will give the person an idea on your general state of energy and the general health of your stomach.

You will also have to open your mouth and show your tongue to check for cracks, peelings or puffiness on the stomach area as this provides clues to why you are overweight.

**File Pdf crime mystery collection 110 thrillers detective tales~**There are basically two types of diabetes that will affect an adolescent. It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system's function as the systems attacks the pancreas' insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and constant hunger. And if the adolescent isn't treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life. In type2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss.

Parents play a vital role in determining the problem. They should constantly observe their child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents, who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items. Because of this they will feel different from the crowd and can feel left out. Not only does diabetes pose behavioral challenges, but also emotional challenges.
