## The F-16 Fighting Falcon Multinational Weapon System, 1972 to 2019

2020-02-29 Herbert A. Hutchinson This book starts with an overlap of the period from 1963 to 1975, described in final chapters of the “Inside History of the USAF Lightweight Fighters, 1900 to 1975”. The next major portion of this book then describes the Transition Contract to “missionize” the General Dynamics YF-16 and Northrop YF-17 designs into a USAF Air Combat Fighter (ACF) and also to “navalize” both ACF designs for potential procurement as the USN Air Combat Fighter (NACF). The latter portion of this book describes the early F-16 Full Scale Development activities and then describes the numerous Block changes made to increase the capabilities of the production F-16 Fighting Falcon aircraft. In the concluding chapter is captured the very purpose for the development of “the fighter pilot’s fighter” – the use of the F-16 in operations world-wide. The F-16 Fighting Falcon Multinational Weapon System became the cornerstone of the fighter inventories of over 25 free-world countries for the past forty years and remains in their future plans for a few decades. F-16C/D service life extensions and upgrades continue to be made.

## Muye Dobo Tongji

2000 Chôngjo ((Roi de Corée ;) In 1789, King Chongjo, ruler of the Yi dynasty, ordered General Yi Duk-moo to compile an official textbook on all martial art forms then present in Korea to preserve them for future generations. The result, the Muye Dobo Tongji, is the only surviving classical text on the Korean arts of war. Based on the earliest known Korean martial arts treatise, the Muye Chebo written in 1599, the Muye Dobo Tongji clearly shows the influence of the neighbouring Japanese and Chinese armies. Through hundreds of wars and invasions, Korean soldiers adapted battlefield skills and tactics from their enemies, creating a unique system of their own. Organised into 24 distinct disciplines comprised of empty hand fighting, weaponry and horsemanship, this book is an accurate historical snapshot of the warrior arts of the hermit kingdom in the late 18th century. The release of 'The Comprehensive Illustrated Manual of Martial Arts of Ancient Korea' marks the first time this volume is available in English. Carefully translated from the original text and illustrated with reproductions of ancient woodblock carvings, this book provides fascinating insights into Korea's martial arts legacy.

## Fighting Machines

2021-12-03 Dan Saxon Lethal autonomous weapons are weapon systems that can select and destroy targets without intervention by a human operator. Fighting Machines explores the relationship between lethal autonomous weapons (LAWS), the concept of human dignity, and international law. Much of this analysis speaks to three fundamental and related problems: When a LAWS takes a human life, is that killing a violation of human dignity? Can states and non-state actors use LAWS in accordance with international law? And are there certain responsibilities of human decision-making during wartime that we should not delegate to machines? In the book, Dan Saxon argues that the use of LAWS to take human life constitutes a violation of human dignity. Rather than concentrating on the victims of the use of lethal force, Saxon instead focuses on the technology and relevant legal principles and rules to advance several propositions. First, as LAWS operate at increasingly greater speeds, their use will undermine the opportunities for, and the value of, human reasoning and judgment. Second, by transferring responsibility for reasoning and judgment about the use of lethal force to computer software, the use of LAWS violates the dignity of the soldiers, commanders, and law enforcement officers who historically have made such decisions, and, therefore, breaches international law. Third, weapon designs that facilitate teamwork between humans and autonomous systems are necessary to ensure that humans and LAWS can operate interdependently so that individuals can fulfil their obligations under international law—including the preservation of their own dignity—and ensure that human reasoning and judgment are available for cognitive functions better suited to humans than machines. Fighting Machines speaks to the fields of international humanitarian law, human rights, criminal law, and legal philosophy. It will also be of interest to non-lawyers, especially military officers, government policy makers, political scientists, and international relations scholars, as well as roboticists and ethicists.

## The Fighting Staff

2018-01-09 Dwight C. Mclemore In the latest addition to his Fighting Weapons series, Dwight McLemore does for the staff what he did earlier for the Bowie, tomahawk, and sword. The Fighting Staff is a modern illustrated guide to using one of man's oldest weapons. In keeping with his philosophy on fighting weapons, in this workbook McLemore does not attempt to duplicate methods from a specific period in the past. Rather, he offers an eclectic approach that borrows the most effective techniques from Asian and European martial arts throughout history. The Fighting Staff covers such essentials as footwork, grip, strikes, thrusts, blocks, and targeting. But its real value lies in the fighting concepts imparted, which serve as a language for advanced training. As always, your martial arts training is greatly enhanced by McLemore's beautifully executed drawings that take you step-by-step through 25 fighting drills for the martial arts staff. His use of frontal, side and overhead views, as well as his unique "floating staff" perspective, allows you to truly see how your actions correlate with those of your training partner (or opponent), as well as how and where your weapon moves. The training techniques taught in this book are not limited to the staff. They can also be used effectively with other weapons.
