The Vietnam War
2020-03-24 Geoffrey Ward The complete text of the bestselling narrative history of the Vietnam War—based on the celebrated PBS television series by Ken Burns and Lynn Novick More than forty years have passed since the end of the Vietnam War, but its memory continues to loom large in the national psyche. In this intimate history, Geoffrey C. Ward and Ken Burns have crafted a fresh and insightful account of the long and brutal conflict that reunited Vietnam while dividing the United States as nothing else had since the Civil War. From the Gulf of Tonkin and the Tet Offensive to Hamburger Hill and the fall of Saigon, Ward and Burns trace the conflict that dogged three American presidents and their advisers. But most of the voices that echo from these pages belong to less exalted men and women—those who fought in the war as well as those who fought against it, both victims and victors—willing for the first time to share their memories of Vietnam as it really was. A magisterial tour de force, The Vietnam War is an engrossing history of America’s least-understood conflict.

Digital Literacies for Learning
2006 Allan Martin In the 21st century, digital tools enable information to be generated faster and in greater profusion than ever before, to the point where its extent and value are literally beyond imagining. Such quantities can only be meaningfully addressed using more digital tools, and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching, and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered, but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians and IT strategists, to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged, and new literacies, including information literacy and IT literacy, need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico and throughout Europe contribute to the debate, and Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky, provides the foreword. The book is in two parts: In Part 1, Literacies in the Digital Age, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed, and discuss the nature of the new literacies that have emerged in this new virtual and e-learning environment. In Part 2, Enabling and Supporting Digital Literacies, the contributors go on to consider the ways in which digital literacies can be made available to learners, and how these literacies are being relocated in a more student-centred environment within the broader perspective of learning. Readership: This book takes the issues raised in the successful Information and IT Literacy, also co-edited by Allan Martin, into a broader context. It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age.
