but aren't sure where to begin. Most educators are well aware of the reasons for emphasizing STEAM—topics that fall within the broad headings of science, technology, engineering, arts, and mathematics—in the curriculum, regardless of grade level. But how do librarians who work with 'tweens in middle school, high school, and public libraries—fit into the picture and play their roles to underscore their relevance in making STEAM initiatives successful? This book answers those key questions, providing program guidelines and resources for each of the STEAM areas. Readers will learn how to collaborate in STEAM efforts by providing information on resources

activities, standards, conferences, museums, programs, and professional organizations. Emphasis is placed on encouraging girls and minorities to take part in and get excited about STEAM. In addition, the book examines how makerspaces can enhance this initiative; how to connect your programs to educational standards; where to find funding; how to effectively promote your resources and programs, including how school and public librarians can collaborate to maximize their efforts; how to find and provide professional development; and how to evaluate your program to make further improvements and boost effectiveness. Whether you are on the cusp of launching a STEAM initiative, or looking for ways to grow and enhance your program, this book will be an invaluable resource.

Bestseller Instant New York Times Bestseller A game-changing approach to marketing, sales, and advertising. Seth Godin has taught and inspired millions of entrepreneurs, marketers, leaders, and fans from all walks of life, via his blog, online courses, lectures, and bestselling books. He is the inventor of countless ideas that have made their way into mainstream business language, from Permission Marketing to Purple Cow to Tribes to The Dip. Now, for the first time, Godin offers the core of his marketing wisdom in one compact, accessible, timeless package. This is Marketing shows you how to do work you're proud of, whether you're a tech startup founder, a small business owner, or part of a large corporation. Great marketers don't use consumers to solve their company's problem; they use marketing to solve other people's problems. Their tactics rely on empathy,

connection, and emotional labor instead of attention-stealing ads and spammy email funnels. No matter what your product or service, this book will help you reframe how it's presented to the world, in order to meaningfully connect with people who want it. Seth employs his signature blend of insight, observation, and memorable examples to teach you: *

- How to build trust and permission with your target market.
- * The art of positioning--deciding not only who it's for, but who it's not for.
- * Why the best way to achieve your goals is to help others become who they want to be.
- * Why the old approaches to advertising and branding no longer work.
- * The surprising role of tension in any decision to buy (or not).
- * How marketing is at its core about the stories we tell ourselves about our social status. You can do work that matters for people who care.

The Psychopolitics of Food 2016-06-10 Mihalis Mentinis

The Psychopolitics of Food probes into the contemporary 'foodscape', examining culinary practices and food habits and in particular the ways in which they conflate with neoliberal political economy. It suggests that generic alimentary and culinary practices constitute technologies of the self and the body and argues that the contemporary preoccupation with food takes the form of 'rites of passage' that express and mark the transition from a specific stage of neoliberal development to another vis-à-vis a re-configuration of the alimentary and sexual regimes. Even though these rites of passage are taking place on the borders of cultural bi-polarities, their function, nevertheless, is precisely to define these borders as sites of a neoliberal transition.

demand; that is, to produce a cultural bifurcation between 'eating orders' and 'eating dis-orders', by promoting and naturalising certain social logics while simultaneously rendering others as abject and anachronistic. The book is a worthwhile read for researchers and advanced scholars in the areas of food studies, critical psychology, anthropology and sociology.

The Science of Chocolate
2007-10-31 Stephen Beckett
Chocolate is available to today's consumers in a variety of colours, shapes and textures. But how many of us, as we savour our favourite brand, consider the science that has gone into its manufacture? This book describes the complete chocolate making process, from the growing of the beans to the sale in the shops. The Science of Chocolate first describes the history of this intriguing substance. Subsequent

ingredients and processing techniques, enabling the reader to discover not only how confectionery is made but also how basic science plays a vital role with coverage of scientific principles such as latent and specific heat, Maillard reactions and enzyme processes. There is also discussion of the monitoring and controlling of the production process, and the importance, and variety, of the packaging used today. A series of experiments, which can be adapted to suit students of almost any age, is included to demonstrate the physical, chemical or mathematical principles involved. Ideal for those studying food science or about to join the confectionery industry, this mouth-watering title will also be of interest to anyone with a desire to know more about the production of the world's favourite confectionery.

empire 2017-03-01 Emma Robertson From Charlie and the Chocolate Factory to Chocolat, from romantic gift to guilty indulgence, chocolate has a special place in Western popular culture. But what are the hidden histories behind this luxurious commodity? This book examines chocolate production from cocoa bean to chocolate box, illuminating the dynamics of gender, race and empire which have structured the cocoa chain. Using a varied range of sources, and drawing on the author's own relationship to the industry, this book reconnects the people and places at different stages of chocolate production. Emma Robertson stresses the need to recognise the complex histories of empire and labour which have made such pleasurable consumption possible. Marketing Projects

2020-01-24 Olivier Mesly

Marketing is about placing a new product or service into the market. Projects are about delivering new products and services. The merger of these two fields holds great promise for delivering value to organizations and their clients. Project managers can serve many markets ranging from investors who fund projects to that of clients who use new products and services.

Marketing Projects is a guide for helping project managers have projects funded or deliver value to end users. It is also a guide for marketing

implement their strategies. This book explains how project managers can develop meaningful relationships with clients to foster trust and have positive interactions. Project managers excel at managing the processes for delivering new products and services. Marketers are keenly aware of latent, or unconscious needs, as well as those developing and emerging, and can provide project promoters and managers with exciting ideas. This book will help improve the mutual understanding between marketing and project managers, an effort ultimately benefiting end users, whether they be investors or customers. A better work atmosphere and a closer fit between marketing and project management objectives can only serve the interests of investors and end users, for whom marketers and project managers conceive and

In the vanguard of the revolution has been John Grant, co-founder of the legendary agency St. Luke's and author of The New Marketing Manifesto, whose radical thinking has informed a generation. Now Grant is set to stun the industry again. In The Brand Innovation Manifesto, he redefines the nature of brands, showing why old models and scales no longer work and revealing that the key to success today is impacting people's lifestyles (think Starbucks, iPod and eBay). At the heart of the book is the concept of the 'brand molecule' to which new cultural ideas can be constantly added to keep pace with change. Cataloguing 32 classes of idea, Grant presents a practical approach to mixing and matching them within your own market to develop new brand ideas

Buyology 2010-02-02 Martin Lindstrom NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions

actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Cocoa Industry 2017-03-02 United Nations Conference on Trade and Development (UNCTAD) This publication examines the vertical and horizontal integration in the cocoa industry and its potential impacts on stakeholders along the value chain, in particular small cocoa farmers who constitute the backbone of cocoa production worldwide. It contends that the concentration pattern observed at all segments of cocoa GVC may have contributed to a high level of efficiency, but could become

problematic, in particular if it fosters oligopsonic/monopsonic or monopolistic/oligopolistic behaviour in the industry with detrimental effects for small players. It also discusses the extent of integration of cocoa farmers into international markets by assessing the transmission of international cocoa prices to the domestic prices paid to farmers. The results suggest that transmission has increased with trade liberalizing reforms undertaken by cocoa producing countries, but, overall, the outcomes are mixed, so far. The reforms have increased the exposure of farmers to the vagaries of international markets, but they are not associated with a significant, if any, increase in the share of world prices of cocoa accruing to farmers. In order to make cocoa cultivation a more viable source of livelihoods for farmers, and ensure a sustainable global cocoa economy, it would be

essential for governments and other stakeholders to implement policies that enable cocoa farmers to increase their incomes. The publication is useful for governments of cocoa producing countries, development practitioners, including agricultural economists and the private sector, with an interest in empowering farmers, and in the development of a sustainable cocoa economy. Ultimately, it should make an invaluable contribution to the debate on how to reduce poverty, and attain the Sustainable Development Goals (SDGs) with their commitment to "leave no one behind", especially in cocoa farming communities.

Edible Insects 2013 Arnold van Huis
Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production.

diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of

brining!)—and use a foolproof method that works every time? As Serious Eats's culinary nerd-in-residence, J. Kenji López-Alt has pondered all these questions and more. In *The Food Lab*, Kenji focuses on the science behind beloved American dishes, delving into the interactions between heat, energy, and molecules that create great food. Kenji shows that often, conventional methods don't work that well, and home cooks can achieve far better results using new—but simple—techniques. In hundreds of easy-to-make recipes with over 1,000 full-color images, you will find out how to make foolproof Hollandaise sauce in just two minutes, how to transform one simple tomato sauce into a half dozen dishes, how to make the crispiest, creamiest potato casserole ever conceived, and much more.

The work "Analyzing Casual Conversation" by Suzanne Egging and Diana Slade, originally released in 1997, establishes a systematic model for the study and depiction of casual conversation in English. The scholars argue that notwithstanding its occasionally aimless look and seemingly unstructured content, casual conversation is a extremely structured undertaking and performs a crucial part in the social building of reality. The book goes through authentic

samples of casual conversations including participants varying in age, gender, ethnicity, and socio-economic class¹². Drawing on perspectives from sociology, linguistics, and critical semiotics, the book equips readers with the examinative skills to depict the levels of structure and critical interpretive frameworks to explain the 'social work' that goes on through chat.

Eva had always been intrigued by the realm of magic, but she never anticipated that she would uncover her own magical heritage. She had spent her childhood in a typical family, living in a quaint town, devoid of any signs of the supernatural. However, on her sixteenth birthday, her life took an unexpected turn. A mysterious package arrived, sent by her grandmother, who had passed away years ago. Within the package lay an ancient leather-bound book, its cover adorned with the inscription, "The Book of Shadows". As Eva opened the book, a surge of power coursed through her veins. She realized that the book held the arcane knowledge of her family's magical lineage, and that she was the last descendant of a long line of mighty witches. But she also discovered that she was not alone. There were others like her, individuals who possessed similar abilities, and some of them sought to wield their magic for evil purposes. Eva faced a pivotal decision: embrace her destiny as a witch and delve into the world of sorcery, or reject her newfound powers and continue living her life as she had always known it. Regardless of her choice, she knew that her life would forever be transformed from that moment forward.
