The Adult Learner 2020-12-21 Malcolm S. Knowles How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

LSD, My Problem Child 2017-09-27 Albert Hofmann This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann, Ph.D. He traces LSD's path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. In *LSD: My Problem Child*, we follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experiences may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend "the wonder, the mystery of the divine, in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people." More than sixty years after the birth of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.

Data-Intensive Text Processing with MapReduce 2022-05-31 Jimmy Lin Our world is being revolutionized by data-driven methods: access to large amounts of data has generated new insights and opened exciting new

opportunities in commerce, science, and computing applications. Processing the enormous quantities of data necessary for these advances requires large clusters, making distributed computing paradigms more crucial than ever. MapReduce is a programming model for expressing distributed computations on massive datasets and an execution framework for large-scale data processing on clusters of commodity servers. The programming model provides an easy-to-understand abstraction for designing scalable algorithms, while the execution framework transparently handles many system-level details, ranging from scheduling to synchronization to fault tolerance. This book focuses on MapReduce algorithm design, with an emphasis on text processing algorithms common in natural language processing, information retrieval, and machine learning. We introduce the notion of MapReduce design patterns, which represent general reusable solutions to commonly occurring problems across a variety of problem domains. This book not only intends to help the reader "think in MapReduce", but also discusses limitations of the programming model as well. Table of Contents: Introduction / MapReduce Basics / MapReduce Algorithm Design / Inverted Indexing for Text Retrieval / Graph Algorithms / EM Algorithms for Text Processing / Closing Remarks

Networks, Crowds, and Markets 2010-07-19 David Easley Are all film stars linked to Kevin Bacon? Why do the stock markets rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.

The Day of the Triffids 2022-04-19 John Wyndham The influential masterpiece of one of the twentieth century's most brilliant—and neglected—science fiction and horror writers, whom Stephen King called "the best writer of science fiction that England has ever produced." "[Wyndham] avoids easy allegories and instead questions the relative values of the civilisation that has been lost, the literally blind terror of humanity in the face of dominant nature. . . . Frightening and powerful, Wyndham's vision remains an important allegory and a gripping story."—The Guardian What if a meteor shower left most of the world blind—and humanity at the mercy of mysterious carnivorous plants? Bill Masen undergoes eye surgery and awakes the next morning in his hospital bed to find civilization collapsing. Wandering the city, he quickly realizes that surviving in this strange new world requires evading strangers and the seven-foot-tall plants known as triffids—plants that can walk and can kill a man with one quick lash of their poisonous stingers.

Nonetheless, regardless of its first achievement, the Northstar engine has been connected with a number of issues over the years.

One of the most frequent issues is getting too hot, which can cause considerable damage to the engine block. An additional problem is oil use, which can lead to low fuel efficiency and costly repairs. Numerous Northstar engine owners also report troubles with head gaskets, which can cause overheating troubles and result in costly repairs.

Especially, the Northstar engine versions from 1993 to 2005 have been documented to have seepage problems, broken seals, harmed head gaskets, more oil loss, damaged valve cover, defective water pumps, and carbon collection. These issues are not major, but the expense to fix the issues was considerably higher than the majority of other engines because of the complex engineering.

The publication "Analyzing Casual Conversation" by Suzanne Eggins and Diana Slade, first published in 1997, establishes a systematic model for the examination and description of casual conversation in English. The writers assert that in spite of its at times aimless appearance and ostensibly unstructured material, casual conversation is a highly structured task and plays a vital part in the social construction of reality. The publication goes through real examples of casual conversations including participants differing in age, gender, ethnicity, and socio-economic class¹². Deriving on insights from sociology, linguistics, and critical semiotics, the publication equips readers with the analytic skills to depict the layers of structure and critical interpretive structures to elucidate the 'social work' that occurs on through chat.
