Along the way, she lived with an indigenous Mayan community in Guatemala, hiked alone in the Ecuadorian Andes, got mugged in Costa Rica, swam across the border from Costa Rica to Panama, slept under a meteor shower in the cracked salt desert of Gujarat and learnt to conquer her deepest fears. The Borders of "Europe"
2017-08-18 Nicholas De Genova
In recent years the borders of Europe have been perceived as being besieged by a staggering refugee and migration crisis. The contributors to *The Borders of "Europe"* see this crisis less as an incursion into Europe by external conflicts than as the result of migrants exercising their freedom of movement. states use to curb, control, and constrain what contributors to the volume call the autonomy of migration, this book shows how the continent's amorphous borders present a premier site for the enactment and disputation of the very idea of Europe. They also outline how from Istanbul to London, Sweden to Mali, and Tunisia to Latvia, migrants are finding ways to subvert visa policies and asylum procedures while negotiating increasingly militarized and surveilled borders. Situating the migration crisis within a global frame and attending to migrant and refugee supporters as well as those who stoke nativist fears, this timely volume demonstrates how the enforcement of Europe's borders is an important element of the worldwide regulation of human mobility. Visa Stories 2013-07-29
Bahriye Kemal Visa Stories: Experiences between Law and Migration is an interdisciplinary volume that addresses recent public controversies on migration in the UK and Europe. In this context, it aims to recover the voice of migrants by proposing a new, non-conventional form of literary writing: the visa narrative genre. This is a versatile and dialogic form which moves beyond strictly academic modes of migration talk and aims to re-introduce a human, experiential dimension in the representation of people on the move. Indeed, the visa narratives collected in this volume provide a unique example of testimonies and memories of migrants from different geographical locations and social positions, from the student to the refugee. In its political and poetic aspects, this collective volume is a useful tool for understanding the

complexity of migration today and the way in which national and international regulations are applied in different regions of the world. Whereas our era is commonly portrayed as one of increased globalisation and freedom of movement, visa narratives offer a closer insight into the experience of people trying to cross borders, and reveal a substantially different reality of immobility, distrust and misunderstanding.

**Privatising Border Control
2022-11-22** In recent years, many breaches of immigration law have been criminalised. Foreign nationals are now routinely identified in court and in prison as subjects for deportation. Police at the border and within the territory refer foreign suspects to immigration authorities for expulsion. Within the immigration system, new institutions and practices rely on criminal justice logic and methods. In these examples, it is not the state that controls the national border: instead, it is often privately contracted companies. This collection of essays explores the growing use of the private sector and private actors in border control and its implications for our understanding of state sovereignty and

Privatising Border Control is an important empirical and theoretical contribution to the growing, interdisciplinary body of scholarship on border control. It also contributes to the academic inquiry into the growing privatisation of policing and punishment. These domains, once regarded as central to the state's police power and its monopoly on violence, are increasingly outsourced to private providers. With contributions from scholars across a range of jurisdictions and disciplines, including Criminology, Law, and Political Science, Privatising Border Control provides a novel and comparative account of contemporary border control policy and practice. This is a must-read for academics, practitioners, and policymakers interested in immigration law and the growing use of the private sector and private actors in border control.

presents the results of several qualitative research project with different actors that put migration policies into practice. It shows the different ways in which day-to-day activities of organisations shape migration policies on the ground. This book offers a comprehensive exploration on how different migration policies are implemented day by day. Such an approach allows to show the different ways in which migration policies on the ground take a life of their own when compared to the letter of the law. The book shows the need to understand the specific logics and workings of the implementation of policies, while taking into account the continued role played by politicians and the judiciary, non-state actors and migrants. Qualitative research with different public institutions implementing migration policies are combined with an exploration of the role of

NGOs, supranational institutions and the migrants themselves. Bringing together the results of several research projects with fieldwork in Belgium, the UK, France, Morocco and Malta, the book covers the different stages of the migratory career. It follows the potential trajectory of a migrant from visa obtention (both in general and for students specifically) to border controls, asylum (including resettlement and gender and sexuality-based asylum), access to residence (with a specific focus on marriage-based residence), healthcare and nationality, or to detention and managed return migration. Through its chapters it shows the day-to-day logics, routines and tactics that bureaucrats and other actors adopt, within the constrains of laws, social interactions, and ideas about policies. - expanding demand for food, water, and energy

It furthermore describes potential game changers, including:

- a global economy that could thrive or collapse
- increased global insecurity due to regional instability in the Middle East

Enforcement represents a key dimension in measuring the effectiveness and legitimacy of transnational private regulation. This detailed book shifts the focus from rule-making to enforcement and compliance, and moves from a vertical analysis to a comparative sectoral analysis. Both public and private transnational regulation fall under the scrutiny of the authors, and the book considers the effectiveness of judicial models of enforcement.
