Scorecasting

2012-01-17 Tobias Moskowitz In Scorecasting, University of Chicago behavioral economist Tobias Moskowitz teams up with veteran Sports Illustrated writer L. Jon Wertheim to overturn some of the most cherished truisms of sports, and reveal the hidden forces that shape how basketball, baseball, football, and hockey games are played, won and lost. Drawing from Moskowitz's original research, as well as studies from fellow economists such as bestselling author Richard Thaler, the authors look at: the influence home-field advantage has on the outcomes of games in all sports and why it exists; the surprising truth about the universally accepted axiom that defense wins championships; the subtle biases that umpires exhibit in calling balls and strikes in key situations; the unintended consequences of referees' tendencies in every sport to "swallow the whistle," and more. Among the insights that Scorecasting reveals: • Why Tiger Woods is prone to the same mistake in high-pressure putting situations that you and I are • Why professional teams routinely overvalue draft picks • The myth of momentum or the "hot hand" in sports, and why so many fans, coaches, and broadcasters fervently subscribe to it • Why NFL coaches rarely go for a first down on fourth-down situations--even when their reluctance to do so reduces their chances of winning. In an engaging narrative that takes us from the putting greens of Augusta to the grid iron of a small parochial high school in Arkansas, Scorecasting will forever change how you view the game, whatever your favorite sport might be.

A term paper is a research paper written by students over an academic term, accounting for a major part of a grade. Its a vital component of your college education, often assigned towards the conclusion of a semester. The paper is a vehicle through which educators gauge your comprehension of the course content. Writing a term paper isnt just about summarizing facts. It requires a combination of organization, deep research, and the art of presenting your findings in a way thats both clear and analytical. This means structuring your arguments logically, citing relevant sources, and critically evaluating the information youve gathered. When grading a term paper, there are three important aspects to consider. First, the paper should be passionately written and captivating to read. Second, it should have good grammar and style (following MLA, APA, or CMS style). Third, it should be well documented with in-text references (in parentheses) linking their assertions to scholarly articles in the list of references at the end of the paper.

The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a well-respected vocabulary test that has been in practice for nearly half a century. Developed by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is crafted to evaluate receptive vocabulary for American English. It is fast and easy to carry out, preserving precious time so that focus can be put on implementing effective strategies.

The PPVT-4 assessment content includes a broad range of vocabulary comprehension ranks, ranging from pre-kindergarten through adulthood. The test items broadly sample words that portray 20 content fields (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and educational vocabulary.

The evaluation offers two identical editions which contain different vocabulary terms, making sure that the test-taker has not "learned" the evaluation. One edition can be used ahead of intervention to measure people's vocabulary knowledge and the second form can be used for re-evaluation to evaluate and record advancement. The PPVT-4 also contains a distinctive Growth Scale Value (GSV) which is responsive to minor changes over time.
