FairTax: The Truth Neal Boortz 2009-10-13 The author of the #1 New York Times bestseller The FairTax Book offers a new look at the fast-growing populist tax reform movement that's poised to become a key campaign issue for 2008 In 2005, firebrand radio talk show host Neal Boortz and Georgia congressman John Linder teamed up to create The FairTax Book, the first book devoted to the FairTax movement they had been promoting for years. Riding the growing groundswell of popular support for the tax reform measure, The FairTax Book became an overnight sensation. As the election season heats up, Boortz and Linder return to add fuel to the fire with this radical follow-up. Talking back to the critics who have grossly misrepresented the simple principles behind the tax reform measure—which would abolish the IRS and replace it with a 23 percent retail sales tax on all new goods and services—Boortz and Linder: • Debunk myths about the tax and answer critical charges—that it would bankrupt the economy, that it would leave poor people in the lurch, that the math doesn't work • Offer new insights into aspects of the plan not originally covered • Show the American voter that there's still hope of replacing our currently outdated, corrupt, and punitive income tax system with a simple plan that will revolutionize the way American pays for itself.

ATF - National Firearms Act Handbook U.S. Department of Justice 2019-03-17 This handbook is primarily for the use of persons in the business of importing, manufacturing, and dealing in firearms defined by the National Firearms Act (NFA) or persons intending to go into an NFA firearms business. It should also be helpful to collectors of NFA firearms and other persons having questions about the application of the NFA. This publication is not a law book. Rather, it is intended as a ?user friendly? reference book enabling the user to quickly find answers to questions concerning the NFA. Nevertheless, it should also be useful to attorneys seeking basic information about the NFA and how the law has been interpreted by ATF. The book's Table of Contents will be helpful to the user in locating needed information. Although

the principal focus of the handbook is the NFA, the book necessarily covers provisions of the Gun Control Act of 1968 and the Arms Export Control Act impacting NFA firearms businesses and collectors.

Home Rule in America Dale Krane 2001 Home rule powers are essential parts of the American governing process, but they vary widely from state to state. This authoritative reference work examines the powers and functions of municipalities and counties that operate under home rule within each state. For example, the ability of a local municipality to raise taxes, annex land, or impose regulations is determined by their home rule powers from the states. This volume provides a reliable reference work for researchers and students - a single source that readers can trust for information about: The actions that local governments can - and cannot - pursue States where power is centralized at the capital and where it is not How home rule varies within each state by governmental function Trends in important issues such as taxes, land annexation, and citizen access. The editors organized the book in three parts: an overview of American home rule,

including its history; a state-by-state description of home rule authority; and a comparative appendix that allows readers a quick reference source of powers by state. A scholar or governmental expert was selected in each state to prepare the state descriptions. Each chapter follows the same outline of content that allows easy comparison between states. In an era of power and responsibilities devolving from the national government to states and localities, the use of home rule powers has become increasingly important to the health of American government and federalism. Researchers and interested citizens will benefit from this comprehensive reference. Home Rule in America was directed by Dale Krane of the department of public administration, University of Nebraska, Omaha; Platon N. Rigos, department of government and international affairs, University of South Florida; and Melvin Hill, the Vinson Institute of Government, University of Georgia.

Regulatory and Procedural Barriers to Trade in Georgia Hana Daoudi 2018 Since 2010, the ECE has been undertaking demand-driven national studies of regulatory and procedural barriers to trade, with a view to: helping countries achieve greater regional and global economic integration; informing donors as to where assistance might be required; and supporting policy discussions within the Steering Committee on Trade Capacity and Standards (previously, the Committee on Trade) and its subsidiary bodies on where additional work is required. This study summarizes the key findings of the seventh study, which focuses on Georgia. It was prepared by the ECE secretariat in close consultation with public and private sector stakeholders. The study integrates the outcome of the stakeholder meeting, which was organized in Tbilisi, Georgia on 23 April 2018 by the Ministry of Economy and Sustainable Development to discuss the initial results and recommendations.

Realizing the Urban Potential in Georgia Asian Development Bank 2016-07-01 This publication details the rapid assessment of the urban sector in Georgia to understand key urbanization trends and patterns of growth and to analyze challenges and opportunities. It gives a snapshot of the state of urban affairs at the national level with an urbanization profile, governance and urban management profile, capacity needs assessment, urban finance matrix, and a "3E" assessment covering economic, environmental, and social equity profiles. This document is not a strategy but the basis for developing a national urban strategy and road map for integrated investments to maximize development impact.

Public Administration in Post-Communist Countries Saltanat Liebert 2017-09-25 Although it has been more than 20 years since Communism crumbled in Central and Eastern Europe and the Soviet Union, many scholars and politicians still wonder what the lifting of the Iron Curtain has really meant for these former Communist countries. And, because these countries were largely closed off to the world for so long, there has yet to be an all-inclusive study on their administrative systems—until now. In *Public Administration in Post-Communist Countries: Former Soviet Union, Central and Eastern Europe, and Mongolia*, expert contributors supply a comprehensive overview and analysis of public administration in their respective post-Communist countries. They illustrate each country's transformation from an authoritarian system of governance into a modern, market-based, and in some cases, democratic government. The book covers the countries that were officially part of the Soviet Union (Russia, Ukraine, Moldova, Estonia, Lithuania, Georgia, Kazakhstan, and Kyrgyzstan); those that were theoretically independent but were subject to Soviet-dominated Communist rule (Bulgaria, Hungary, Romania, and Poland); as well as a satellite republic that was under significant Soviet influence (Mongolia). Each chapter includes a brief introduction to the specific country, an overview of politics and administration, and discussions on key aspects of public management and administration—including human resource management, public budgeting, financial management, corruption, accountability, political and economic reform, civil society, and prospects for future development in the region. The book concludes by identifying common themes and trends and pinpointing similarities and differences to supply you with a broad comparative perspective.

NeoVouchers Kevin Grant Welner 2008 This book provides a comprehensive analysis of the structure, legality, and policy implications of tuition tax credit policies. At a time when these tax credit policies are becoming a major form of American school choice, this book offers insights into both the strengths and weakness of the approach.

Spillovers in International Corporate Taxation International Monetary Fund 2014-09-05 This paper explores the nature, significance and policy implications of spillovers in international corporate taxation—the effects of one country's rules and practices on others. It complements current initiatives focused on tax avoidance by multinationals, notably the G20-OECD project on Base Erosion and Profit shifting (BEPS). The paper draws on the IMF's experience on international tax issues with its wide membership, including through technical assistance (TA), and on its previous analytical work, to analyze spillovers and how they might be addressed. In doing so, it goes beyond current initiatives to look at a wide set of possible responses.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Distributional Impact of Taxes and Transfers Gabriela Inchauste 2017-09-19 The World Bank has partnered with the Commitment to Equity Institute at Tulane University to implement their diagnostic tool—the Commitment to Equity (CEQ) Assessment—designed to assess how taxation and public expenditures affect income inequality, poverty, and different economic groups. The approach relies on comprehensive fiscal incidence analysis, which measures the contribution of each individual intervention to poverty and inequality reduction as well as the combined impact of taxes and social spending. The CEQ Assessment provide an evidence base upon which alternative reform options can be analyzed. The use of a common methodology makes the results comparable across countries. This volume presents eight country studies that examine the distributional effects of individual programs and policy measures—and the net effect of each country's mix of policies and programs. These case studies were produced in the context of Bank policy dialogue and have since been used to propose alternative reform options.

Global Trends 2040 National Intelligence Council 2021-03 "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) *Global Trends 2040—A More Contested World* (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics—by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics—increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate—a hotter world will increase water, food, and health insecurity. - Technology—the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.
