*Strengthening Forensic Science in the United States* National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

*My Badass Book of Saints* Maria Morera Johnson 2015-10-30 Winner of a 2016 Association of Catholic Publishers Excellence in Publishing Award: Inspirational Books (First Place). In this edgy, honest, and often audacious book of Catholic spirituality, blogger and popular podcaster Maria Morera Johnson explores the qualities of twenty-four holy women who lived lives of virtue in unexpected and often difficult circumstances. In *My Badass Book of Saints*, Johnson shares her experience as a first-generation Cuban-American, educator of at-risk college students, and caregiver for a husband with Lou Gehrig's disease. Through humorous, empowering, and touching portraits of twenty-four spiritual mentors who inspired her, Johnson shows how their bravery, integrity, selflessness, perseverance, and hope helped her and can help others have courage to reach for a closer connection to God. She presents remarkable holy women and saints—including the gun-toting Servant of God Sr. Blandina Segale who tried to turn the heart of Billy the Kid, and Nazi resister Irena Sendler who helped smuggle children out of the Warsaw Ghetto during World War II—in a way that brings their vivid personalities to life and helps readers live out the challenges of their lives with virtue and conviction. The book includes a group discussion guide.

**Detroit Tigers 1984** Mark Pattison The 1984 Detroit tigers roared out of the gate, winning their first nine games of the season and compiling an eye-popping 35-5 record after the campaign's first 40 games--still the best start ever for any team in major league history. The tigers led wire-to-wire in 1984, becoming only the third team in the modern era of the majors to have done so. And Detroit's determination and tenacity resulted in a sweep of the Kansas City Royals in the AL playoffs and a five-game triumph over the San Diego Padres in the World Series. And Tigers fans will tell you that the bottom of the eighth inning in Game Five was the first time Kirk Gibson hit an iconic home run in the Fall Classic. Detroit Tigers 1984: What a Start! What a Finish!, an effort by the society of American Baseball research's BioProject Committee, brings together biographical profiles of every Tiger from that magical season, plus those of field management, top executives, the broadcasters--even venerable Tiger Stadium and the city itself.

**The Teleological Grammar of the Moral Act** Steven A. Long 2015 Cutting through contemporary confusions with his characteristic rigor and aplomb, Steven A. Long offers the most penetrating study available of St. Thomas Aquinas's doctrine of the intention, choice, object, end, and species of the moral act. Many studies of human action and morality after Descartes and Kant have suffered from a tendency to split body and soul, so that the intention of the human spirit

comes to justify whatever the body is made to do. The portrait of human action and morality that arises from such accounts is one of the soul as the pilot and the body as raw material in need of humanization. In this masterful study, Steven Long reconnects the teleology of the soul with the teleology of the body, so that human goal-oriented action rediscovers its lost moral unity, given it by the Creator who has created the human person as a body-soul unity.

**The Spaces and Places of Horror** Francesco Pascuzzi 2020-01-16 This volume explores the complex horizon of landscapes in horror film culture to better understand the use that the genre makes of settings, locations, spaces, and places, be they physical, imagined, or altogether imaginary. In The Philosophy of Horror, Noël Carroll discusses the "geography" of horror as often situating the filmic genre in liminal spaces as a means to displace the narrative away from commonly accepted social structures: this use of space is meant to trigger the audience's innate fear of the unknown. This notion recalls Freud's theorization of the uncanny, as it is centered on recognizable locations outside of the Lacanian symbolic order. In some instances, a location may act as one of the describing characteristics of evil itself: In A Nightmare on Elm Street teenagers fall asleep only to be dragged from their bedrooms into Freddy Krueger's labyrinthine lair, an inescapable boiler room that enhances Freddie's powers and makes him invincible. In other scenarios, the action may take place in a distant, little-known country to isolate characters (Roth's Hostel films), or as a way to mythicize the very origin of evil (Bava's Black Sunday). Finally, anxieties related to the encroaching presence of technology in our lives may give rise to postmodern narratives of loneliness and disconnect at the crossing between virtual and real places: in Kurosawa's Pulse, the internet acts as a gateway between the living and spirit worlds, creating an oneiric realm where the living vanish and ghosts move to replace them. This suggestive topic begs to be further investigated; this volume represents a crucial addition to the scholarship on horror film culture by adopting a transnational, comparative approach to the analysis of formal and narrative concerns specific to the genre by considering some of the most popular titles in horror film culture alongside lesser-known works for which this anthology represents the first piece of relevant scholarship.

**The Work of Art** Alison Gerber 2017 Artists are everywhere, from celebrities showing at MoMA to locals hoping for a spot on a café wall. They are photographed at gallery openings in New York and Los Angeles, hustle in fast-gentrifying cities, and, sometimes, make quiet lives in Midwestern monasteries. Some command armies of fabricators while others patiently teach schoolchildren how to finger-knit. All of these artists might well be shown in the same exhibition, the quality of work far more important than education or income in determining whether one counts as a "real" artist. In The Work of Art, Alison Gerber explores these art worlds to investigate who artists are (and who they're not), why they do the things they do, and whether a sense of vocational calling and the need to make a living are as incompatible as we've been led to believe. Listening to the stories of artists from across the United States, Gerber finds patterns of agreements and disagreements shared by art-makers from all walks of life. For professionals and hobbyists alike, the alliance of love and money has become central to contemporary art-making, and danger awaits those who fail to strike a balance between the two. The stories artists tell are just as much a part of artistic practice as putting brush to canvas or chisel to marble. By explaining the shared ways that artists account for their activities--the analogies they draw, the arguments they make--Gerber reveals the common bases of value artists point to when they say: what I do is worth doing. The Work of Art asks how we make sense of the things we do and shows why all this talk about value matters so much.
