*Dizionario biografico degli Italiani: Latilla-Levi Montalcini* Alberto Maria Ghisalberti 1960 This scholarly biographical encyclopedia is the standard source for information on prominent men and women from Italian history.

*The Vatican Library* Ambrogio M. Piazzoni 2012 The history of the

Vatican Library began when the Pope Silvester I (314- 335) settled in the Basilica of St. John Lateran in Rome, thanks to the Edict of Constantine in 313. The Basilica was built by Constantine himself and by the half of that century was set in it a scrinum sanctum, that is a collection of books which was at the same time a library for the booksellers and an archive for documents. This book mainly deals with the location of the popes' library, but it also presents the history of the library building from its

beginnings. Between 1587 and 1589 Pope Sixtus V built the Salone Sistino in the Vatican Apostolic Palace nearby St. Peter, which became the new location of the library. This place is one of the gems of Vatican City, since it contains frescos representing the history of Councils and the Charter for the Codices and for print. In 2012 this architectural and decorative wonder will reopen as a reference collection space, although it still won't be accessible to the Museum's visitors and tourists.

[Ancient Terracottas from South Italy and Sicily in the J. Paul Getty Museum](#) Maria Lucia Ferruzza 2016-01-25 In the ancient world, terracotta sculpture was ubiquitous. Readily available and economical—unlike stone suitable for carving—clay allowed artisans to craft figures of remarkable variety and expressiveness. Terracottas from South Italy and Sicily attest to the prolific coroplastic workshops that supplied sacred and decorative images for sanctuaries, settlements, and cemeteries. Sixty terracottas are investigated here by noted scholar Maria Lucia Ferruzza, comprising a selection of significant types from the Getty's larger collection—life-size sculptures, statuettes, heads and busts, altars, and decorative appliqués. In addition to the comprehensive catalogue entries, the publication includes a guide to the full collection of over one thousand other figurines and molds from the region by Getty curator of antiquities Claire L. Lyons. Reflecting the Getty's commitment to open content, *Ancient Terracottas from South Italy and Sicily in the J. Paul Getty Museum* is available online at [www.getty.edu/publications/terracottas](http://www.getty.edu/publications/terracottas) and may be downloaded free of charge in multiple formats. *Archaeological Spatial Analysis* Mark Gillings 2020-01-16 Effective spatial analysis is an essential element of archaeological research; this book is a unique guide to choosing the appropriate technique, applying it correctly and understanding its implications both theoretically and practically. Focusing upon the key techniques used in archaeological spatial analysis, this book provides the authoritative, yet accessible, methodological guide to the subject which has thus far been missing from the corpus. Each chapter tackles a specific technique or application area and follows a clear and coherent structure. First is a richly referenced introduction to the particular technique, followed by a detailed description of the methodology, then an archaeological case study to illustrate the application of the technique, and conclusions that point to the implications and potential of the technique within archaeology. The book is designed to function as the main textbook for archaeological spatial analysis courses at undergraduate and post-graduate level, while its user-friendly structure makes it also suitable for self-learning by archaeology students as well as researchers and professionals.

*Renovatio Urbis* Nicholas Temple 2011-04-25 Examining the urban and architectural developments in Rome during the Pontificate of Julius II (1503-13) this book focuses on the political, religious and artistic motives behind the principal architect, Donato Bramante, and his ambition to create a unified urban/architectural scheme.

*Broadsheets* Andrew Pettegree 2017-07-10 A landmark study of single-sheet publishing during the first two centuries after the invention of

**Stanley Kubrick and Me** Emilio D'Alessandro 2016-05-17 This intimate portrait by his former personal assistant and confidante reveals the man behind the legendary filmmaker—for the first time. Stanley Kubrick, the director of a string of timeless movies from *Lolita* and *Dr. Strangelove* to *A Clockwork Orange*, *2001: A Space Odyssey*, *Full Metal Jacket*, and others, has always been depicted by the media as the Howard Hughes of filmmakers, a weird artist obsessed with his work and privacy to the point of madness. But who was he really? Emilio D'Alessandro lets us see. A former Formula Ford driver who was a minicab chauffeur in London during the Swinging Sixties, he took a job driving a giant phallus through the city that became his introduction to the director. Honest, reliable, and ready to take on any task, Emilio found his way into Kubrick's neurotic, obsessive heart. He became his personal assistant, his right-hand man and confidant, working for him from *A Clockwork Orange* until Kubrick's death in 1999. Emilio was the silent guy in the room when the script for *The Shining* was discussed. He still has the coat Jack Nicholson used in the movie. He was an extra on the set of *Eyes Wide Shut*, Kubrick's last movie. He knew all the actors and producers Kubrick worked with; he observed firsthand Kubrick's working methods down to the smallest detail. Making no claim of expertise in cinematography but with plenty of anecdotes, he offers a completely fresh perspective on the artist and a warm, affecting portrait of a generous, kind, caring man who was a perfectionist in work and life.

The Islamic Coins George Carpenter Miles 1962 All but 9 of the 6,449 Islamic coins found at Athenian Agora up to the date when this book was written belong to the Ottoman period. The earliest datable Ottoman coin is from the reign of Mehmed I (1413-21). Most of the coins come from

overseas mints such as those of Istanbul, Cairo, Macedonia, Serbia, and Bosnia. Although the name of Athens cannot be read on any coin, the author thinks that many of the crude coppers of the 15th to 16th centuries A.D. were locally struck.

This book looks at secular urban space in the Mediterranean city, A.D. 284-650, focusing on places where people from different religious and social groups were obliged to mingle. It looks at streets, processions, fora/

agorai, market buildings, and shops.

*Attitudes Towards the Past in Antiquity* Brita Alroth 2014 "This volume brings together twenty-eight papers from an International conference on attitudes towards the past and the creating of identities in Antiquity. The volume addresses many different approaches to these issues, spanning over many centuries, ranging in time from the Prehistoric periods to the Late Antiquity, and covering large areas, from Britain to Greece and Italy and to Asia Minor and Cyprus. The papers deal with several important problems, such as the use of tradition and memory in shaping an individual or a collective identity, continuity and/or change and the efforts to connect the past with the present. Among the topics discussed are the interpretation of literary texts, e.g. a play by Plautus, the Aeneid, a speech by Lykurgos, poems by Claudian and Prudentius, and of historical texts and inscriptions, e.g. funerary epigrams, and the analysis of the iconography of Roman coins, Etruscan reliefs, Pompeian and Etruscan frescoes and Cypriote sculpture, and of architectural remains of houses, tombs and temples. Other topics are religious festivals, such as the Lupercalia, foundation myths, the image of the emperor on coins and in literature, the significance of intra-urban burials, forgeries connected with the Trojan War, Hippocrates and Roman martyrs"--Verso of title page.

**Tokens** Antonino Crisà 2019-12-30 This volume is the first dedicated to the analysis of tokens ranging from the Neolithic until the modern age. The volume discusses tokens from different periods in detail, addressing the makers, users, types, and contexts of these objects. Unpublished material is presented in several of the contributions. This comparative approach reveals the recurring characteristics of tokens across time, as well as their importance to human society.

**Roman Republican Coin Hoards** Michael Hewson Crawford 1969  
**Populonia da San Cerbone ai d'Appiano. Archeologia di una "città debole" della Maremma toscana** Fabio Redi 2018-12-14 Nel volume sono contenuti i risultati delle ricerche archeologiche che dal 1992 al 2014, quasi ininterrottamente, sono state compiute a Populonia e Baratti, esattamente in località Poggio del Castello, già San Cerbone Vecchio,

Fonte di San Cerbone e Chiesa di San Cerbone, per verificare tempi e modalità delle vicende insediative dal periodo tardoantico a quello della signoria dei D'Appiano, cioè dal V al XVI secolo. Dal confronto fra i rinvenimenti effettuati e le risultanze delle ricerche nell'acropoli di Populonia, area dei templi, e nel sito del monastero di San Quirico emerge un paesaggio riconducibile a quelli relativi alle città definite "deboli" della Toscana centro-meridionale, cioè forme insediative a discontinuità di vita, nelle quali il filo conduttore è costituito dalla presenza di vescovi e signorie laiche capaci di coordinare le attività produttive e commerciali essenziali per l'insediamento pur attraverso inevitabili momenti critici.

**Coin Hoards** Ute Wartenberg 2002 This, the ninth volume of *Coin Hoards*, is again dedicated solely to hoards of Greek coins. It includes hoards from all areas around the Mediterranean from the sixth century BC to the second century AD. *Coin Hoards IX*, together with the previous volumes in the series, thus forms an essential supplement to the *Inventory of Greek Coin Hoards*, published in 1973 by Thompson, Morkholm and Kraay. Since the last volume, published eight years ago, the number of Greek coin hoards has increased considerably. Not only does this volume list new hoards, but it also updates and often amends information on hoards already published. Overall, the inventory for this volume consists of 744 entries, with detailed references to find-spot (if known), content, approximate burial date and bibliography. In addition to the inventory, *Coin Hoards IX* also contains the detailed publication of a number of significant hoards. An important aspect of this volume is the inclusion of 66 plates of photographs illustrating a large proportion of those coins described. This volume will be an indispensable tool for all future research in the field.

*Numismatics* Elvira Eliza Clain-Stefanelli 1965 The present monograph is intended to give only a synoptic view of the complex world of numismatic research. An area of knowledge that spans centuries and contains such varying fields as primitive media of exchange, coins, paper money, money substitutes, tokens, medals, and decorations, can hardly be given a detailed history by a single person in a single work. -- Introduction.

**The Seville Communion** Arturo Pérez-Reverte 1999-05-06 An “intricate literary mystery [of] wrenching effect” by the internationally acclaimed, bestselling author of *The Club Dumas* (*The New Yorker*). Someone has hacked into the pope’s personal computer—not to spy on the Vatican or to spread a virus, but to send an urgent plea for help: SAVE OUR LADY OF THE TEARS. The crumbling Baroque church in the heart of Seville is slated for demolition—and two of its defenders have suddenly died. Accidents? Or murders? And was the church itself somehow involved? The Vatican promptly dispatches Father Lorenzo Quart, their worldly and enormously attractive emissary, to investigate the situation, track down the hacker—known only as “Vespers”—and stay alive. Thus begins a sophisticated and utterly suspenseful page-turner that has taken its readers by storm. “An elegant thriller that is as much about the elusive quest for happiness as it is about solving the murders.” —*The Denver Post* “An indelible tale of love, faith, and greed.” —*People*, Page-Turner of the Week

**Money and Coinage in the Middle Ages** Rory Naismith 2018 *Money and Coinage in the Middle Ages* presents an original and valuable set of studies into aspects of a critical but challenging category of material.

**Possessing Nature** Paula Findlen 1994-09-16 In 1500 few Europeans regarded nature as a subject worthy of inquiry. Yet fifty years later the first museums of natural history had appeared in Italy, dedicated to the marvels of nature. Italian patricians, their curiosity fueled by new voyages of exploration and the humanist rediscovery of nature, created vast collections as a means of knowing the world and used this knowledge to their greater glory. Drawing on extensive archives of visitors' books, letters, travel journals, memoirs, and pleas for patronage, Paula Findlen reconstructs the lost social world of Renaissance and Baroque museums. She follows the new study of natural history as it moved out of the universities and into sixteenth- and seventeenth-century scientific societies, religious orders, and princely courts. Findlen argues convincingly that natural history as a discipline blurred the border between the ancients and the moderns, between collecting in order to recover ancient wisdom and the development of new textual and

experimental scholarship. Her vivid account reveals how the scientific revolution grew from the constant mediation between the old forms of knowledge and the new.

**Crime in the Art and Antiquities World** Stefano Manacorda 2011-02-26 The theft, trafficking, and falsification of cultural property and cultural heritage objects are crimes of a particularly complex nature, which often have international ramifications and significant economic consequences. Organized criminal groups of various types and origins are involved in these illegal acts. The book *Crime in the Art and Antiquities World* has contributions both from researchers specializing in the illegal trafficking of art, and representatives of international institutions involved with prevention and detection of cultural property-related crimes, such as Interpol and UNESCO. This work is a unique and useful reference for scholars and private and public bodies alike. This innovative volume also includes an Appendix of the existing legal texts, i.e. international treaties, conventions, and resolutions, which have not previously been available in a single volume. As anyone who has undertaken research or study relating to the protection of cultural heritage discovers one of the frustrations encountered is the absence of ready access to the multi- various international instruments which exist in the field. Since the end of the Second World War these instruments have proliferated, first in response to increasing recognition of the need for concerted multinational action to give better protection to cultural property during armed conflict as well as ensuring the repatriation of cultural property looted during such conflict. Thus the international community agreed in 1954 upon a Convention for the Protection of Cultural Property in the Event of Armed Conflict. That Convention, typically referred to as the Hague Convention of 1954, is now to be found reproduced in the Appendix to this book (Appendix I) together with 25 other important and diverse documents that we believe represent a core of the essential international sources of reference in this subject area. In presenting these documents in one place we hope that readers will now experience less frustration while having the benefit of supplementing their understanding and interpretation of the various instruments by

referring to individual chapters in the book dealing with a particular issue or topic. For example, Chapter 9 by Mathew Bogdanos provides some specific and at times rather depressing descriptions of the application in the field of the Hague Convention 1954, and its Protocols (Appendices II and III), to the armed conflict in Iraq. Reference may also be had to the resolution of the UN Security Council in May 2003 (Appendix VI) urging Member States to take appropriate steps to facilitate the safe return of looted Iraqi cultural property taken from the Iraq National Museum, the National Library and other locations in Iraq. Despite such pleas the international antiquities market seems to have continued to trade such looted property in a largely unfettered manner, as demonstrated by Neil Brodie in Chapter 7. Fittingly, as referred to in the Preface to this book, the last document contained in the Appendix (Appendix 26) is the "Charter of Courmayeur", formulated at a ground breaking international workshop on the protection of cultural property conducted by the International Scientific and Professional Advisory Council (ISPAC) to the United Nations Crime Prevention and Criminal Justice Program in Courmayeur, Italy, in June 1992. The Charter makes mention of many of the instruments contained in the Appendix while also foreshadowing many of the developments which have taken place in the ensuing two decades designed to combat illicit trafficking in cultural property through international collaboration and action in the arena of crime prevention and criminal justice.

**The Court Artist in Seventeenth-Century Italy** Elena Fumagalli  
2015-05-08T00:00:00+02:00 Up to now the theme of the artist in the service of Italian courts has been examined in various studies focused mostly on the High Renaissance, as though the phenomenon was relevant only to the XV and XVI centuries. It actually lasted much longer, spanning the whole *longue durée* of the lives of the courts of the ancient regime. The present volume intends to fill this gap, presenting for the first time a comprehensive examination of the subject of the court artist

from sixteenth to seventeenth century and the transformations of this role. "Court artist" is here defined as one who received a regular salary, and was therefore attached to the court by a more or less exclusive service relationship. The book is divided in six chapters: each of them examines the position of the court artist in the service of the most important ruling families in Italy (the Savoy in Turin, the Gonzaga in Mantua, the Este in Modena, the Della Rovere in Pesaro and Urbino, the Medici in Florence) and in papal Rome, a particular and unique center of power.

*The Oxford Handbook of Latin Palaeography* Frank Coulson 2020-10-26 Latin books are among the most numerous surviving artifacts of the Late Antique, Mediaeval, and Renaissance periods in European history; written in a variety of formats and scripts, they preserve the literary, philosophical, scientific, and religious heritage of the West. The Oxford Handbook of Latin Palaeography surveys these books, with special emphasis on the variety of scripts in which they were written.

Palaeography, in the strictest sense, examines how the changing styles of script and the fluctuating shapes of individual letters allow the date and the place of production of books to be determined. More broadly conceived, palaeography examines the totality of early book production, ownership, dissemination, and use. The Oxford Handbook of Latin Palaeography includes essays on major types of script (Uncial, Insular, Beneventan, Visigothic, Gothic, etc.), describing what defines these distinct script types, and outlining when and where they were used. It expands on previous handbooks of the subject by incorporating select essays on less well-studied periods and regions, in particular late mediaeval Eastern Europe. The Oxford Handbook of Latin Palaeography is also distinguished from prior handbooks by its extensive focus on codicology and on the cultural settings and contexts of mediaeval books. Essays treat of various important features, formats, styles, and genres of

mediaeval books, and of representative mediaeval libraries as intellectual centers. Additional studies explore questions of orality and the written word, the book trade, glossing and glossaries, and manuscript cataloguing. The extensive plates and figures in the volume will provide readers with clear illustrations of the major points, and the succinct bibliographies in each essay will direct them to more detailed works in the field.
