**Heart Rate Variability Analysis with the R package RHRV** Constantino Antonio García Martínez 2017-09-18 This book introduces readers to the basic concepts of Heart Rate Variability (HRV) and its most important analysis algorithms using a hands-on approach based on the open-source RHRV software. HRV refers to the variation over time of the intervals between consecutive heartbeats. Despite its apparent simplicity, HRV is one of the most important markers of the autonomic nervous system activity and it has been recognized as a useful predictor of several pathologies. The book discusses all the basic HRV topics, including the physiological contributions to HRV, clinical applications, HRV data acquisition, HRV data manipulation and HRV analysis using time-domain, frequency-domain, time-frequency, nonlinear and fractal techniques. Detailed examples based on real data sets are provided throughout the book to illustrate the algorithms and discuss the physiological implications of the results. Offering a comprehensive guide to analyzing beat information with RHRV, the book is intended for masters and Ph.D. students in various disciplines such as biomedical engineering, human and veterinary medicine, biology, and pharmacy, as well as researchers conducting heart rate variability analyses on both human and animal data. *The Visual World in Memory* James R. Brockmole 2008-10-07 The book examines how well we remember what we see. Research in human memory for visual material varies tremendously across the time scales, stimuli, and scenarios of interest. Because of these distinct pursuits, research in the field of 'visual memory' is in practice rather compartmentalized and as such is disseminated across a range of literatures. The Visual World in Memory pulls together this disparate field with a series of chapters, each written by a leading expert, that concisely present the state-of-the-science in all the areas of research. The result is a single source of information that bridges the divides that separate the field as a whole. Each chapter reviews and analyzes current theories and controversies regarding such issues as visual and spatial working memory, memory for visual features, conjunctions, objects, and locations, memory for faces, memory for real-world scenes, memory for visual events, the role of visual memory in motor planning and action, the relationship between visual memory, reference frames, and navigation, and visual imagery. The rigorous discussion and analysis included in each chapter will appeal to established researchers and vision scientists whilst the breadth of the book will make it an ideal companion for students learning about memory.

**Marshfield Dreams** Ralph Fletcher 2005-09-01 The colorful boyhood of a popular author comes to life in this personal account Imagine learning from a nosy classmate that your mother is having yet another baby. To Ralph's classmates, news of one more Fletcher baby is just "scuttlebutt." But for Ralph, the oldest of nine, being part of a large family means more kids to join in the fun—from making tripods in the woods and "snicking" up the rug, to raising chicks and even discovering a meteor (well, maybe). It doesn't feel like there's life beyond Marshfield, Massachusetts. Then one day Dad's new job moves the family to Chicago, and there's so much Ralph has to leave behind. In this humorous and captivating memoir, Ralph Fletcher traces the roots of his storytelling.

**Pedagogy, Disability and Communication** Michael S. Jeffress 2017-04-28 Research has long substantiated the fact that living with a disability creates significant and complex challenges to identity negotiation, the practice of communication, and the development of interpersonal relationships. Furthermore, individuals without disabilities often lack the knowledge and tools to experience self-efficacy in communicating with their differently-abled peers. So how do these challenges translate to the incorporation of disability studies in a classroom context and the need to foster an inclusive environment for differently-abled students? Bringing together a range of perspectives from communication and disability studies scholars, this collection provides a theoretical foundation along with practical solutions for the inclusion of disability studies within the everyday curriculum. It examines a variety of aspects of communication studies including interpersonal, intercultural, health, political and business communication as well as ethics, gender and public speaking, offering case study examples and pedagogical strategies as to the best way to approach the subject of disability in education. It will be of interest to students, researchers and educators in communication and disability studies as well as scholars of sociology and social policy, gender studies, public health and pedagogy. It will also appeal to anyone who has wondered how to bring about a greater degree of inclusion and ethics within the classroom.

*The English Teacher's Companion* Jim Burke 2008 Teachers and teacher educators asked for: the latest research on literacy more information about national standards ways to consider gender in instruction advice for teaching Advanced Placement classes ideas for teaching media literacy and incorporating technology effectively into instruction even more resources for mentoring new teachers analysis of how trends in society, culture, and politics impact teachers and their classrooms. And Jim delivers. He has revamped his introductory chapters on literacy learning to include up-to-the-minute thinking from the field, and he has incorporated lists of key standards and helpful suggestions for reaching them. His practical strategies turn recent findings on literacy and gender into well-designed, research-based instruction, and his ideas help you meet the very different needs of AP students by understanding their goals and providing them with appropriate challenges.

**Blood Infernal** James Rollins 2015-02-10 In a masterpiece of supernatural mystery and apocalyptic prophecy, New York Times bestselling authors James Rollins and Rebecca Cantrell bring to a thunderous conclusion their epic trilogy of novels set between the worlds of shadow and light, between salvation and damnation, where the very gates of Hell must be shattered to discover the true fate of humankind in... Blood Infernal As an escalating scourge of grisly murders sweeps the globe, archaeologist Erin Granger must decipher the truth behind an immortal prophecy foretold in the Blood Gospel, a tome written by Christ and lost for centuries: The shackles of Lucifer are loosed and his Chalice remains lost. It will take the light of all three to forge the Chalice anew and banish him again to his eternal darkness. With the Apocalypse looming, Erin must again join forces with Army Sergeant Jordan Stone and Father Rhun Korza to search for a treasure lost for millennia. But the prize has already fallen into the hands of their enemy, a demon named Legion, before whom even the walls of the Vatican will fall. The search for the key to salvation will take Erin and the others across centuries and around the world, from the dusty shelves of the Vatican's secret archives to lost medieval laboratories, where ancient alchemies were employed to horrific ends. All the while, they are hunted, besieged by creatures of uncanny skill and talent. As clues are dug free from ancient underground chapels and found frozen in icy mountain caverns, one that will destroy not only her, but all she loves. To protect the world, Erin must walk through the very gates of Hell and face the darkest of enemies: Lucifer himself. With The Blood Gospel, the first novel in the Order of the Sanguines series, James Rollins and Rebecca Cantrell combined science, myth, and religion to introduce a breathtaking world where miracles hold new meaning and the fight for good over evil is far more complicated than we ever dreamed. And now, in this epic conclusion to the Sanguines trilogy, Blood Infernal, they take us to the very tip of Hell itself, making us peer into the abyss and face our greatest fears, to answer the ultimate question: What price will we pay for true salvation?

**Current Thinking and Research in Brief Therapy** William Matthews 2013-06-20 In Volume 2 of Current Thinking and Research in Brief Therapy the author's consideration of Ericksonian-influenced brief therapy continues. Presently, there is a concern among those in the psychotherapy profession who worry that this area of science will become heartless. Others are equally concerned that their hearts not become science-less in the future. In this volume, the authors respect both viewpoints and attempt to weave these notions together. Throughout this book, different types of emotions in psychotherapy unfold. For instance, Harry Aponte presents a thoughtful piece on the issue of client-therapy intimacy, while Doug Flemons and Shelley Green, a married couple, share a humorous yet sensitive article on sexual concerns in couples, and finally, Daniel Handel provides a powerful story of the use of hypnosis with a dying adolescent. In addition to the emotional side of psychotherapy, the authors include the scientific aspects of psychotherapy. A discussion about various models of brief therapy is given, emphasizing that the therapeutic effects of the treatment models are attributable to "the non-treatment specifics" of the therapeutic interaction. A review of empirical data on the key elements of Ericksonian hypnosis and the social-psychological aspect of Ericksonian hypnosis are discussed as well. Finally, an important, and perhaps controversial, essay on ethics in the general non-therapeutic use of hypnosis by lawyers and its use in recovering memories is presented.

**Katherine Mansfield and the Bloomsbury Group** Todd Martin 2017-06-01 The New Zealand-born writer Katherine Mansfield associated intimately with many members of the Bloomsbury group, but her literary aesthetics placed her at a distance from the artistic works of the group. With chapters written by leading international scholars, Katherine Mansfield and the Bloomsbury Group explores this conflicted relationship. Bringing together biographical and critical studies, the book examines Mansfield's relationships - personal and literary - with such major Modernist figures as Virginia Woolf, T.S. Eliot, Aldous Huxley and Walter de la Mare as well as the ways in which her work engaged with and reacted against Bloomsbury. In this way the book reveals the true extent of Mansfield's wider influence on 20th-century modernist writing.

**Whatever You Are, Be a Good One** Lisa Congdon 2014-04-01 Wise words from great minds: "Revisit this colorful read whenever you need a pick-me-up—or a push—to get out there and make the most of your day." —Real Simple A quote book like no other, this thought-provoking collection compiles the timeless wisdom of great original minds— from Marie Curie to Stephen King, Joan of Arc to Jack Kerouac, Oscar Wilde to Harriet Tubman—brilliantly hand-lettered by beloved indie artist Lisa Congdon. You'll find enlightening insights ("Wisdom begins in wonder" — Socrates), stirring calls to action ("Leap and the net will appear" —John Burroughs), and stimulating encouragements ("Be curious, not judgmental" —Walt Whitman) beautifully illuminated on every page. A delightful reminder to make the most of life, Whatever You Are, Be a Good One is perfect for recent graduates, creative thinkers, and anyone looking for a little inspiration. "An impossibly charming compendium . . . The common thread underpinning these quotes—which include such beloved luminaries as Albert Camus, Simone de Beauvoir, Henry James, Anne Lamott, Soren Kierkegaard, and Leo Tolstoy—is Congdon's own sensibility about what it means to live with kindness and integrity, to cherish beauty and the creative spirit, and ultimately to be a good human being." —Brain Pickings

**New Dramaturgy** Katalin Trencsenyi 2014-04-24 Recent shifts in the theatrical landscape have had corresponding implications for dramaturgy. The way we think about theatre and performance today has changed our approaches to theatre making and composition. Emerging new aesthetics and new areas of dramaturgical work such as live art, devised and physical theatre, experimental performance, and dance demand new approaches and sensibilities. New Dramaturgy: International Perspectives on Theory and Practice is the first book to explore new dramaturgy in depth, and considers how our thinking about dramaturgy and the role of the dramaturg has been transformed. Edited by Katalin Trencsenyi and Bernadette Cochrane, New Dramaturgy: International Perspectives on Theory and Practice provides an unrivalled resource for practitioners, scholars, and students.

**Disney, Culture, and Curriculum** Jennifer A. Sandlin 2016-03-10 A presence for decades in individuals' everyday life practices and identity formation, the Walt Disney Company has more recently also become an influential element within the "big" curriculum of public and private spaces outside of yet in proximity to formal educational institutions. Disney, Culture, and Curriculum explores the myriad ways that Disney's curricula and pedagogies manifest in public consciousness, cultural discourses, and the education system. Examining Disney's historical development and contemporary manifestations, this book critiques and deconstructs its products and perspectives while providing insight into Disney's operations within popular culture and everyday life in the United States and beyond. The contributors engage with Disney's curricula and pedagogies in a variety of ways, through critical analysis of Disney films, theme parks, and planned communities, how Disney has been taught and resisted both in and beyond schools, ways in which fans and consumers develop and negotiate their identities with their

engagement with Disney, and how race, class, gender, sexuality, and consumerism are constructed through Disney content. Incisive, comprehensive, and highly interdisciplinary, Disney, Culture, and Curriculum extends the discussion of popular culture as curriculum and pedagogy into new avenues by focusing on the affective and ontological aspects of identity development as well as the commodification of social and cultural identities, experiences, and subjectivities.

**The History of Philosophical and Formal Logic** Alex Malpass 2017-06-29 The History of Philosophical and Formal Logic introduces ideas and thinkers central to the development of philosophical and formal logic. From its Aristotelian origins to the present-day arguments, logic is broken down into four main time periods: Antiquity and the Middle Ages (Aristotle and The Stoics) The early modern period (Bolzano, Boole) High modern period (Frege, Peano & Russell and Hilbert) Early 20th century (Godel and Tarski) Each new time frame begins with an introductory overview highlighting themes and points of importance. Chapters discuss the significance and reception of influential works and look at historical arguments in the context of contemporary debates. To support independent study, comprehensive lists of primary and secondary reading are included at the end of chapters, along with exercises and discussion questions. By clearly presenting and explaining the changes to logic across the history of philosophy, The History of Philosophical and Formal Logic constructs an easy-to-follow narrative. This is an ideal starting point for students looking to understand the historical development of logic.

**Hegel's Philosophical Psychology** Susanne Herrmann-Sinai 2016-03-31 Hegel's Philosophical Psychology draws attention to a largely overlooked piece of Hegel's philosophy: his substantial and philosophically rich treatment of psychology at the end of the Philosophy of Subjective Spirit, which itself belongs to his main work, the Encyclopaedia of the Philosophical Sciences. This volume makes the case that Hegel's approach to philosophy of mind as developed within this text can make an important contribution to current discussions about mind and subjectivity, and can help clarify the notion of spirit (Geist) within Hegel's larger philosophical project. Scholars from different schools of Hegelian thought provide a multifaceted overview of Hegel's Psychology: Part I begins with an overview of Hegel's Philosophy of Subjective Spirit, which outlines both its historical context and its systematic context within Hegel's philosophy of subjective spirit. Parts II and III then investigate the individual chapters of the sections on psychology: the theoretical mind and the practical and free mind. The volume concludes by examining the challenges which Hegel's Psychology poses for contemporary epistemological debates and the philosophy of psychology. Throughout, the volume brings Hegel's views into dialogue with 20th- and 21st-century thinkers such as Bergson, Bourdieu, Brandom, Chomsky, Davidson, Freud, McDowell, Sellars, Wittgenstein, and Wollheim.

**The Vistas of American Military History 1800-1898** Dr Brian Holden-Reid 2019-01-02 A team of leading American military historians here investigate the factors that shaped the United States Army in the nineteenth century. Throwing new light on its history, this deeply researched book explores a multiplicity of themes. These include the social structure, command system and relationship with civil power which are all important in assessing its efficiency and behaviour in war; and the way the army is depicted in military literature and cinema which affects its social portrait. Deliberately exploring neglected themes, this key work includes discussion on: \* the roles of the many volunteer colonels in the Mexican War, 1846-48 \* Robert Wettemann and the alleged 'isolation' of the US Army in the nineteenth century \* John Ford's famous 'cavalry trilogy' of motion pictures.

Containing so much food for thought, for students of US history and military history this is an entertaining as well as instructional book.

**Experimental Metaphysics** David Rose 2018-12-27 Metaphysics, almost entirely neglected by experimental philosophers, is the central focus of Experimental Metaphysics. The volume brings together a range of views aimed at addressing the question of how cognitive science might be relevant to metaphysics. With contributions from cognitive scientists and philosophers, chapters focus on theoretical and empirical issues involving the potential role of cognitive science in metaphysics. Alongside topics such as free will, objects and causation, in which relevant empirical evidence is discussed and connected to relevant metaphysical issues, more programmatic papers explore theoretical issues centered on the connection between cognitive science and metaphysics. This balanced approach exposes metaphysicians to philosophically relevant work in cognitive science, while showing cognitive scientists the ways in which their work might be important for philosophers. Presenting cutting-edge empirical and theoretical research, Experimental Metaphysics pushes forward the discussion and encourages further engagement with issues at the intersection of cognitive science and metaphysics.

**Language Teacher Education and Technology** Jeong-Bae Son 2017-06-29 Language teachers' competencies in computer-assisted language learning (CALL) are a crucial factor affecting their own implementation of CALL. However, there is still a concern that many language teachers are not adequately prepared to make effective use of CALL or to identify and evaluate potential CALL solutions. This can be the result of many different factors and raises the question of how to train teachers to develop their CALL knowledge and skills to a greater degree. The discussion of approaches to training language teachers in the use of technology adopted in areas of Australia, the UK and the US provides valuable insights for those already involved in this area, and inspiration for those who have some interest in carrying out this kind of training, but as yet have little or no experience. This book explores the current status of CALL teacher education and discusses issues and challenges CALL teacher educators face in their own contexts. Specifically, it looks at postgraduate CALL courses offered at different universities to find ways of improving CALL teacher training. It represents the first overview of a topic that is relevant to most postgraduate courses in Applied Linguistics or TESOL across the globe. The use of technology for language learning and teaching is increasingly common but, as is so often the case, training for teachers in how to use that technology remains limited, to a large extent by lack of expertise among trainers.

**Disappointment River** Brian Castner 2018-03-13 In 1789, Alexander Mackenzie traveled 1200 miles on the immense river in Canada that now bears his name, in search of the fabled Northwest Passage that had eluded mariners for hundreds of years. In 2016, the acclaimed memoirist Brian Castner retraced Mackenzie's route by canoe in a grueling journey -- and discovered the Passage he could not find. Disappointment River is a dual historical narrative and travel memoir that at once transports readers back to the heroic age of North American exploration and places them in a still rugged but increasingly fragile Arctic wilderness in the process of profound alteration by the dual forces of globalization and climate change. Fourteen years before Lewis and Clark, Mackenzie set off to cross the continent of North America with a team of voyageurs and Chipewyan guides, to find a trade route to the riches of the East. What he found was a river that he named "Disappointment." Mackenzie died thinking he had failed. He was wrong. In this book, Brian Castner not only retells the story of Mackenzie's epic voyages in vivid prose, he personally retraces his travels, battling exhaustion, exposure, mosquitoes, white water rapids and the threat of bears. He transports readers to a world rarely glimpsed in the media, of tar sands, thawing permafrost, remote indigenous villages and, at the end, a wide open Arctic Ocean that could become a far-northern Mississippi of barges and pipelines and oil money.

**Fig Pudding** Ralph Fletcher 2013-09-03 Clifford Allyn Abernathy III (just Cliff, for short) is the oldest of six kids in a family that does everything—fighting, laughing, playing, eating, telling stories, and celebrating the holidays—in a big, often outlandish, and sometimes poignant way. Taking the family from Christmas to Christmas, the chapters of Fig Pudding, narrated by eleven-year-old Cliff, are complete short stories in themselves. Read together, they tell the tale of life in a large, loving family. Besides a fresh look, this edition includes a brand new story.

*Althusser and Law* Laurent de Sutter 2013-03-05 Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.
