The Respiratory Therapist's Legal Answer Book Anthony L. DeWitt 2006 Each day a new law or regulation affects the way respiratory therapists perform their jobs. This basic legal guide contains the extensive information respiratory therapists need to know about the court system, lawyers, law, and litigation. Written by the author, a lawyer and therapist with 13 years of clinical experience ranging from floor therapy to administrative and management functions, this book combines the author's knowledge of the complex interactions in the legal system and how the legal system relates to therapy delivered at the bedside. A resource for students and professionals, the book presents 16 areas of the law, including medical negligence, hospital law and employment law. The text also contains a series of questions and answers about the subject areas of the law, and provides extensive guidance for therapists navigating the treacherous currents of ever changing laws. This is a book for anyone who treats respiratory therapy patients or manages therapists. Most legal texts are written either by non-lawyers or non-therapists. Non-lawyers do not understand the complex interactions in the legal system, and are not permitted to give advice. Non-therapists may understand the law very well, but be unable to relate to how therapy is delivered at the bedside. This book is written by a therapist who is a lawyer, and who has been at the bedside. With thirteen years of clinical experience ranging from floor-therapy to administration and management functions, the author understands how a hospital works. The result is a book that is useful both as a course-book and as a reference

13th Edition helps you understand and apply nutrition concepts in the treatment of disease, disease prevention, and life enhancement. The text is broken out into three parts: the basics of nutrients and the body, the life cycle and community nutrition, and clinical nutrition. Case studies help you determine nutritional interventions in treating both acute and chronic conditions. Written by nutrition specialists Joyce Gilbert and Eleanor D. Schlenker, this book includes the latest advances in research and evidence-based practice. Strong community focus includes robust coverage of health promotion, cultural competence, patient safety, lifespan, and public health issues. Person-centered approach helps you develop practical solutions to individual problems, based on the authors' personal research and clinical experience. MyPlate for Older Adults is included, as developed by nutrition scientists at Tufts University and the AARP Foundation, along with the Nestlé Mini Nutritional Assessment Scale. Health Promotion sections help you with nutrition education, stressing healthy lifestyle choices and prevention as the best medicine. Case studies provide opportunities for problem solving, allowing you to apply concepts to practical situations in nutrition care. Evidence-Based Practice boxes emphasize critical thinking and summarize current research findings. Focus on Culture boxes highlight cultural competence and the nutritional deficiencies, health problems, and appropriate interventions relating to different cultural, ethnic, racial, and age groups. Focus on Food Safety boxes alert you to food safety issues related to a particular nutrient, population group, or medical condition. Complementary and Alternative Medicine boxes offer uses, contraindications, and advantages/disadvantages of common types of herbs and supplements, and potential interactions with prescription or over-the-counter medications. Chapter summaries and review questions reinforce your understanding of key concepts and their application. Key terms are identified in the text and defined on the page to help reinforce critical concepts.
