*The Astrophotography Manual* Chris Woodhouse 2015-05-01 The Astrophotography Manual is for those photographers who aspire to move beyond using standard SLR cameras and editing software, and who are ready to create beautiful images of nebulae, galaxies, clusters, and the solar system. Beginning with a brief astronomy primer, this book takes readers through the full astrophotography process, from choosing and using equipment through image capture, calibration, and processing. This combination of technical background information and the hands-on approach brings the science down to earth with a practical method to plan for success. Features include: Over 400 images, graphs, and tables to illustrate these concepts A wide range of hardware to be used, including smartphones, tablets, and the latest mount technologies How to utilize a variety of leading software such as Maxim DL, Nebulosity, Sequence Generator Pro, Photoshop, and PixInsight Case studies showing how and when to use certain tools and overcoming technical challenges How sensor performance and light pollution relate to image quality and exposure planning

**Medical Internet of Things** Anirban Mitra 2021-10-28 In recent years, the Medical Internet of Things (MIoT) has emerged as one of the most helpful technological gifts to mankind. With the incredible development in data science, big data technologies, IoT and embedded systems, it is now possible to collect a huge amount of sensitive and personal data, compile it and store it through cloud or edge computing techniques. However, important concerns remain about security and privacy, the preservation of sensitive and personal data, and the efficient transfer, storage and processing of MIoT-based data. Medical Internet of Things: Techniques, Practices and Applications is an attempt to explore new ideas and novel techniques in the area of MIoT. The book is composed of fifteen chapters discussing basic concepts, issues, challenges, case studies and applications in MIoT. This book offers novel advances and applications of MIoT in a precise and clear manner to the research community to achieve in-depth knowledge in the field. This book will help those interested in the field as well as researchers to gain insight into different concepts and their importance in multifaceted applications of real life. This has been done to make the book more flexible and to stimulate further interest in the topic. Features: A systematic overview of concepts in Medical Internet of Things (MIoT) is included. Recent research and some pointers on future advancements in MIoT are discussed. Examples and case studies are included. It is written in an easy-to-understand style with the help of numerous figures and datasets. This book serves as a reference book for scientific investigators who are interested in working on MIoT, as well as researchers developing methodology in this field. It may also be used as a textbook for postgraduate-level courses in computer science or information technology.

**Timeless Thomas** Gene Barretta 2012-07-17 What do record players, batteries, and movie cameras have in common? All these devices were created by the man known as The Wizard of Menlo Park: Thomas Edison. Edison is most famous for inventing the incandescent lightbulb, but at his landmark laboratories in Menlo Park & West Orange, New Jersey, he also developed many other staples of modern technology. Despite many failures, Edison persevered. And good for that, because it would be very difficult to go through a day without using one of his life-changing inventions. In this enlightening book, Gene Barretta enters the laboratories of one of America's most important inventors.

review □ "A fast-paced murder mystery." —Publishers Weekly, starred review □ "A Lipan Apache Sookie Stackhouse for the teen set." —Shelf-Awareness,

starred review A Texas teen comes face-to-face with a cousin's ghost and vows to unmask the murderer. Elatsoe—Ellie for short—lives in an alternate

contemporary America shaped by the ancestral magics and knowledge of its Indigenous and immigrant groups. She can raise the spirits of dead

animals—most importantly, her ghost dog Kirby. When her beloved cousin dies, all signs point to a car crash, but his ghost tells her otherwise: He was

murdered. Who killed him and how did he die? With the help of her family, her best friend Jay, and the memory great, great, great, great, great, great

grandmother, Elatsoe, must track down the killer and unravel the mystery of this creepy town and its dark past. But will the nefarious townsfolk and a

mysterious Doctor stop her before she gets started? A breathtaking debut novel featuring an asexual, Apache teen protagonist, Elatsoe combines mystery,

horror, noir, ancestral knowledge, haunting illustrations, fantasy elements, and is one of the most-talked about debuts of the year.

[The Art of Astrophotography](#) Ian Morison 2017-02-02 In The Art of Astrophotography, astronomer and Popular Astronomy columnist Ian Morison provides the essential foundations of how to produce beautiful astronomical images. Every type of astroimaging is covered, from images of the Moon and planets, to the constellations, star clusters and nebulae within our Milky Way Galaxy and the faint light of distant galaxies. He achieves this through a series of worked examples and short project walk-throughs, detailing the equipment needed - starting with just a DSLR (digital single lens reflex) camera and tripod, and increasing in complexity as the book progresses - followed by the way to best capture the images and then how, step by step, these may be processed and

enhanced to provide results that can rival those seen in astronomical magazines and books. Whether you are just getting into astrophotography or are

already deeply involved, Morison's advice will help you capture and create enticing astronomical images.

*A Wizard's Guide to Defensive Baking* T. Kingfisher 2020-07-21 Fourteen-year-old Mona isn't like the wizards charged with defending the city. She can't

control lightning or speak to water. Her familiar is a sourdough starter and her magic only works on bread. She has a comfortable life in her aunt's bakery

making gingerbread men dance.But Mona's life is turned upside down when she finds a dead body on the bakery floor. An assassin is stalking the streets of

Mona's city, preying on magic folk, and it appears that Mona is his next target. And in an embattled city suddenly bereft of wizards, the assassin may be the

least of Mona's worries!

**Kirkus Reviews** 1990 Adult books are categorized by genre (i.e., fiction, mystery, science fiction, nonfiction). Along with bibliographic information, the expected date of publication and the names of literary agents for individual titles are provided. Starred reviews serve several functions: In the adult section, they mark potential bestsellers, major promotions, book club selections, and just very good books; in the children's section, they denote books of very high quality. The unsigned reviews manage to be discerning and sometimes quite critical.
