Worldly Affiliations Sonal Khullar 2015-05-02 The purpose of art, the Paris-trained artist Amrita Sher-Gil wrote in 1936, is to “create the forms of the future” by “draw[ing] its inspiration from the present.” Through art, new worlds can be imagined into existence as artists cultivate forms of belonging and networks of association that oppose colonialist and nationalist norms. Drawing on Edward Said’s notion of “affiliation” as a critical and cultural imperative against empire and nation-state, *Worldly Affiliations* traces the emergence of a national art world in twentieth-century India and emphasizes its cosmopolitan ambitions and orientations. Sonal Khullar focuses on four major Indian artists—Sher-Gil, Maqbool Fida Husain, K. G. Subramanyan, and Bhupen Khakhar—situating their careers within national and global histories of modernism and modernity. Through a close analysis of original artwork, archival materials, artists’ writing, and period criticism, Khullar provides a vivid historical account of the state and stakes of artistic practice in India from the late colonial through postcolonial periods. She discusses the shifting terms of Indian artists’ engagement with the West—an urgent yet fraught project in the wake of British colonialism—and to a lesser extent with African and Latin American cultural movements such as Négritude and Mexican muralism. Written in a lucid and engaging style, this book links artistic developments in India to newly emerging histories of modern art in Asia, Africa, and Latin America. Drawing on original research in the twenty-first-century art world, Khullar shows the persistence of modernism in contemporary art from India and compares its function to Walter Benjamin’s ruin. In the work of contemporary artists from India, modernism is the ground from which to imagine futures. This richly illustrated study juxtaposes little-known, rarely seen, or previously unpublished works of modern and contemporary art with historical works, popular or mass-reproduced images, and documentary photographs. Its innovative art program renders newly visible the aesthetic and political achievements of Indian modernism.

[Applied Geography](#) Dr. Anoop Kumar Singh 2021-09-09 Applied Geographers have the knowledge, tools and skills to help resolve these conflicts and play an essential part within a multi-cultural world in which understanding, tolerance and sensitivity are fundamental to social and economic well-being and to the good management of our natural environment. Geography was always applied, long before it became an identified academic discipline; much geographical knowledge was created for specific purposes. Since the discipline was established, individuals have used their knowledge in a wide range of contexts and for various types of clients. For the first half of the 20th century, the development of geography as

an academic discipline was closely associated with its educational role, especially in the preparation of teachers and of teaching materials. Increasingly, however, geographers responded to societal changes—especially the extending role of the state—by promoting their discipline as a potential contributor in a range of activities. Some, like L. Dudley Stamp, argued that geographers' factual knowledge regarding environments and places plus their understanding of spatial organization principles should be applied in town, city, country, and regional planning. This could just involve information provision, but increasingly it was argued that geographical analyses could inform the understanding of current patterns and trends and the preparation of plans for the future. Such geographical involvement expanded in the late 20th century as pressures grew on universities to orient their work more to societal needs and to undertake applied research for public- and private-sector sponsors. A useful book for those who are interested in the study of this subject. It may equally be liked by the general readers interested in studying the topic as also the academics, public administrators and practitioners.
