What do we know about the possible poisons that industrial technologies leave in our air and water? How reliable is the science that federal regulators and legislators use to protect the public from dangerous products? As this disturbing book shows, ideological or economic attacks on research are part of an extensive pattern of abuse. Thomas O. McGarity and Wendy E. Wagner reveal the range of sophisticated legal and financial tactics political and corporate advocates use to discredit or suppress research on potential human health hazards. Scientists can find their research blocked, or find themselves threatened with financial ruin. Corporations, plaintiff attorneys, think tanks, even government agencies have been caught suppressing or distorting research on the safety of chemical products. With alarming stories drawn from the public record, McGarity and Wagner describe how advocates attempt to bend science or "spin" findings. They reveal an immense range of tools available to

The International Library of Essays on Capital Punishment, Volume 2 Peter Hodgkinson
2016-12-05 The essays selected for this volume develop conventional abolition discourse and explore the conceptual framework through which abolition is understood and posited. Of particular interest is the attention given to an integral but often forgotten element of the abolition debate: alternatives to capital punishment. The volume also provides an account of strategies employed by the abolition community which challenges tired methodologies and offers a level of transparency previously unseen. This collection tackles complex but fundamental components of the capital punishment debate using empirical data and expert observations and is essential reading for those wishing to comprehend the fundamental issues which underpin capital punishment discourse.

DeathQuest Robert M. Bohm 2016-11-10 This fifth edition of the first true textbook on the death penalty engages the reader with a full account of the arguments and issues surrounding capital punishment. The book begins with the history of the death penalty from colonial to modern times, and then examines the moral and legal arguments for and against capital punishment. It also provides an overview of major Supreme Court decisions and describes the legal process behind the death penalty. In addressing these issues, the author reviews recent developments in death penalty law and procedure, including ramifications of newer case law, such as that regarding using lethal injection as a method of execution. The author's motivation has been to understand what motivates the "deathquest" of the American people, leading a large percentage of the public to support the death penalty. The book educates readers so that whatever their death penalty
