Competitividad turística como motor de desarrollo regional Wilson Montenegro Velandia 2019-10-11 El crecimiento turístico es una tendencia en el siglo XXI, y más para Colombia, que en los últimos años ha vivido un proceso de transformación social y política, el cual ha fortalecido los indicadores de seguridad, por lo que el país se ha convertido en un destino turístico internacional muy apetecido. Con base en lo anterior, este libro presenta un modelo de desarrollo competitivo para el sector turismo en las fases de investigación e implementación. Para ello, se basa en la exposición del caso del Suroeste antioqueño y parte de la pregunta por las estrategias pertinentes para conseguir la competitividad del clúster turismo en dicha subregión como motor de desarrollo. A partir de allí, se presentan conclusiones y recomendaciones que buscan aportar en la elección de las estrategias que deben aplicarse al momento de estandarizar los servicios en unidades productivas que quieran actuar como una red de empresas. También, se evidencian algunas formas de organización para hacer más eficiente la gestión de un producto turístico, los recursos y la competitividad de la subregión; así como sobre los aspectos que deben continuar fortaleciéndose para la construcción de un producto en este campo. El Suroeste antioqueño tiene grandes potencialidades por su riqueza natural y cultural. Pero es fundamental articular de manera clara los diferentes servicios para crear una experiencia que impacte en los turistas y haga del territorio un espacio realmente competitivo.

The Promise of Early Childhood Development in Latin America and the Caribbean Emiliana Vegas 2009-12-03 Early childhood development outcomes play an important role throughout a person's life, affecting one's income-earning capacity and productivity, longevity, health, and cognitive ability. The deleterious effects of poor early childhood development outcomes can be long-lasting, affecting school attainment, employment, wages, criminality, and social integration of adults. The authors first take stock of early childhood development indicators in the region and explore access to early childhood development services for children of different backgrounds. They review recent evidence on the impact of early childhood development interventions in the region and investigate more deeply a selection of programs in Latin America and the Caribbean to distill lessons related to their design, implementation and institutionalization processes. The book concludes with a discussion of the challenges of scaling up and presents policy options to develop national early childhood development policies and programs that may be effective and sustained over time.

Finally, it takes on the subjective and intersubjective experiential dimensions of the new educational reforms and alternative paths for educational reform tied to the ethical imperative to reimagine education for human flourishing, justice, and equality. Sapiens. De animales a dioses / Sapiens: A Brief History of Humankind Yuval Noah Harari 2016-09-27 El libro de no ficción del AÑO Un best seller internacional con más de un millón de ejemplares vendidos. Lúcido e iluminador: la historia de la humanidad en un solo volumen. Este es el fascinante relato de nuestra extraordinaria historia: de simios sin importancia a amos del mundo. ¿Cómo logró nuestra especie imponerse en la lucha por la existencia? ¿Por qué nuestros ancestros recolectores se unieron para crear ciudades y reinos? ¿Cómo llegamos a creer en dioses, en naciones o en los derechos humanos; a confiar en el dinero, en los libros o en las leyes? ¿Cómo acabamos sometidos a la burocracia, a los horarios y al consumismo? ¿Y cómo será el mundo en los milenios venideros? En Sapiens. De animales a dioses, Yuval Noah Harari traza una breve historia de la humanidad, desde los primeros humanos que caminaron sobre la Tierra hasta los radicales y a veces devastadores avances de las tres grandes revoluciones que nuestra especie ha protagonizado: la cognitiva, la agrícola y la científica. A partir de hallazgos de disciplinas tan diversas como la biología, la antropología, la paleontología o la economía, Harari explora cómo las grandes corrientes de la historia han modelado nuestra sociedad, los animales y las plantas que nos rodean e incluso nuestras personalidades. ¿Hemos ganado en felicidad a medida que ha avanzado la historia? ¿Seremos capaces de liberar alguna vez nuestra conducta de la herencia del pasado? ¿Podemos hacer algo para influir en los siglos futuros? Audaz, ambicioso y provocador, este libro cuestiona todo lo que creíamos saber sobre el ser humano: nuestros orígenes, nuestras ideas, nuestras acciones, nuestro poder... y nuestro futuro. • El fuego nos dio poder. • La conversación hizo posible que cooperáramos. • La agricultura alimentó nuestra ambición. • La mitología sostuvo la ley y el orden. • El dinero ofreció algo en lo que confiar. • Las contradicciones crearon la cultura. • La ciencia nos hizo imparables. Reseñas: «Aborda las cuestiones más importantes de la historia y del mundo modernos, y además está escrito con un estilo vívido e inolvidable.» Jared Diamond «Renueva la creencia en la capacidad de decidir de los propios lectores. El éxito más sorprendente y renovador de un libro de no ficción de la última década.» Shmuel Rosner, editor original (Israel) ENGLISH DESCRIPTION New York Times Bestseller From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be "human." One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

Frontiers of Development Economics Gerald M. Meier 2001 With contributions from 35 leading economists, this forward-looking book explores the future of development economics against the background of the past half-century of development thought and practice. Outstanding representatives of the past two generations of development economists assess development thinking at the turn of the century and look to the unsettled questions confronting the next generation.The volume offers a thorough analysis of the broad range of issues involved in development economics, and it is especially timely in its critique of what is needed in development theory and policy to reduce poverty. An overriding issue is whether in the future 'development economics' is to be regarded simply as applied economics or whether the nature and scope of development economics will constitute a need for a special development theory to supplement general economic theory.'Frontiers of Development Economics' is an ideal reference for all those working in the international development community.

Rural Industrial Policy and Strengthening Value Chains United Nations 2017 This book underscores the need for a rural industrial policy that promotes a structural change based on innovation, greater value added and better employment and living conditions, all in harmony with the environment. *The Impact Evaluation of Cluster Development Programs* Franco Boneu 2016-05-02 Do cluster development programs work? Do they fundamentally encourage the essential inter-firm linkages and coordination? Do they lead to innovation and productivity, enterprise development, larger employment, and export growth, and if so, after how long? Do other firms benefit from these programs? This book offers insight into quantitative methods that help answer these questions. Cluster development is a form of modern industrial policy that is spreading across the world to help exploit the externalities emerging from geographical agglomeration and inter-firm coordination. Therefore, rigorous impact evaluations are necessary because they help policymakers understand better ways to design future programs and provide accountability for public resources. The chapters argue that enterprise clusters and the programs to

support them are diverse and multidimensional processes that require a variety of instruments to be fully understood and assessed. The book as a whole gathers various methodological essays and quantitative tests of complementary tools and approaches, emphasizing their usefulness and effectiveness in coordination with one another. Most importantly, it asserts that policy evaluation is crucial, in particular when it comes to cluster development programs, to ensure the best use of public resources, the accountability of beneficiaries, and most of all to feed the necessary learning to improve the design and implementation of public policies for enterprise development.

Prospectiva para un mundo interdependiente Javier Medina Vásquez 2023-08-17 Este es un libro de gran importancia para quienes estudian y aplicarán la prospectiva con el fin de ayudar a gobernar realidades complejas. Se trata de un tema en expansión, será de enorme utilidad para los distintos sectores, especialmente jóvenes y funcionarios Sergio Bitar Chacra. Exministro de Estado. Santiago de Chile públicos que necesiten adquirir conocimientos para fortalecer la capacidad de gobernar. Realiza un recorrido interesantísimo de todos los enfoques y paradigmas de los estudios del futuro, un análisis sobre el aporte de las universidades y del pensamiento para mejorar las capacidades nacionales.Así mismo, es relevante el abordaje del tema institucional, sobre cómo se ha organizado y evolucionado la organización de la gobernanza anticipatoria, con base en iluminadoras experiencias. En el caso de la Unión Europea, por la variedad de centros y articulaciones alineados en torno al concepto de autonomía estratégica y su dimensión integral, que abarca todos los principales procesos de la actividad humana; y en el caso de Finlandia, tomándolo como ejemplo de una prospectiva inmersa en toda la sociedad, que anticipa la forma de resolver problemas complejos antes de que devengan en caóticos, mediante una interacción entre el Estado y la sociedad civil, empresas y trabajadores, universidades y territorios.Sin embargo, lo más innovador es la exploración de las relaciones entre prospectiva, política y resiliencia. Aporta un punto de vista psicosocial que merece especial atención, porque incorpora conceptos nuevos como el de resiliencia aplicado a la prospectiva, el de crisis progresivas y de crisis en cascada, el de horizontes temporales múltiples, y el liderazgo para un mundo interdependiente. Todo ello destaca el necesario cambio de pensamiento y modelo mental que provocará la pandemia, tanto en la conciencia de quienes gobiernan como también en el which our world is moving financially and economically. In this new enlarged edition -- which includes ten new chapters and a new introduction -- the author reviews the causes and consequences of famine in Sub-Saharan Africa, the dramatic meltdown of financial markets, the demise of State social programs and the devastation resulting from corporate downsizing and trade liberalisation. The book has been published in 11 languages. Over 100,000 copies sold world-wide.

Informe Mundial de las Naciones Unidas sobre el Desarrollo de los Recursos Hídricos UNESCO World Water Assessment Programme 2022-09-23 *The Globalization of Poverty and the New World Order* Michel Chossudovsky 2003 In this new and expanded edition of Chossudovskys international best-seller, the author outlines the contours of a New World Order which feeds on human poverty and the destruction of the environment, generates social apartheid, encourages racism and ethnic strife and undermines the rights of women. The result as his detailed examples from all parts of the world show so convincingly, is a globalisation of poverty. This book is a skilful combination of lucid explanation and cogently argued critique of the fundamental directions in which our world is moving financially and economically. In this new enlarged edition -- which includes ten new chapters and a new introduction -- the author reviews the causes and consequences of famine in Sub-Saharan Africa, the dramatic meltdown of financial markets, the demise of State social programs and the devastation resulting from corporate downsizing and trade liberalisation. The book has been published in 11 languages. Over 100,000 copies sold world-wide.

Troubled Transit Antje Missbach 2015-09-11 Troubled Transit considers the situation of asylum seekers stuck in limbo in Indonesia from a number of perspectives. It presents not only the narratives of many transit migrants but also the perceptions of Indonesian authorities and of representatives of international and non-government organizations responsible for the care of transiting asylum seekers. Fascinated by the extraordinary and seemingly limitless resilience shown by asylum seekers during their often lengthy and dangerous journeys, the author highlights one particular fragment of their journeys — their time in Indonesia, which many expect to be the last stepping stone to a new life. While they long for their new life to unfold, most asylum seekers become embroiled in the complexities of living in transit. Indonesia, a vast archipelago of more than 17,000 islands, is more than a location where people spend time waiting; it is a nation state that interacts with transiting asylum seekers and formulates policies that have a profound impact on their experience in transit there. Troubled Transit tries to explain the complexities faced by the transiting migrants within the context of the Indonesian government and its political challenges, including its relationship with Australia. The Australia-centric view of recent asylum seeker issues has tended to ignore the larger socio-political context of the migratory routes and the perspectives of transit states towards asylum seekers stuck in transit. This book hopes to direct the Australia-centric gaze northwards to take Indonesian policies and policymaking into account, thereby giving Indonesia more relevance as a transit country and as an important partner in regional protection schemes and migration management. Even though some Indonesian policies and practices are less than favourable for asylum seekers, and even reprehensible from a human rights perspective, more attention must be paid to ongoing developments that impact on transiting asylum seekers in Indonesia if any of the hardships they suffer there are to be alleviated.

Protección social en América Latina La desigualdad en el banquillo United Nations Economic Commission for Latin America and the Caribbean 2017-06-05 En América Latina los sistemas de protección social adolecen de profundas segmentaciones y desigualdades, y varios de ellos enfrentan graves crisis de legitimidad como consecuencia de promesas incumplidas. Para emprender reformas que permitan encarar la complejidad de los sistemas existentes, fortalecer su ethos redistributivo y solidario y mejorar la calidad de los servicios es indispensable forjar amplias coaliciones políticas.En este libro se tratan los avances y desafíos de los sistemas de pensiones y salud, y se razona acerca de la necesidad de que el cuidado sea un nuevo pilar de la protección social dada su gama de objetivos cruciales. Se indaga en sistemas de protección social fragmentados y poco equitativos y, a partir de ello, se abordan e hilvanan de manera recursiva los diversos enfoques sobre la protección social y sus efectos; además, se fundamentan los principios de universalidad y solidaridad y se hace un contrapunto con el aseguramiento de mercado. Asimismo, se estudian las coberturas para reconstruir un mosaico de las desigualdades asociadas con el mercado laboral y con la morfología de los sistemas. Se examina el efecto negativo que el aseguramiento guiado por el lucro en materia de salud y pensiones ha tenido en la desigualdad y el bienestar social. Por último, se analiza la judicialización del derecho a la salud y, al respecto, se pone de manifiesto la existencia de una vasta zona de claroscuros.

Disconnected Marina Bassi 2012-01-01 Disconnected is a path-breaking analysis of the relationship between schooling and employers in Latin America. It is sophisticated in its design, using multiple surveys and multiple methods. It distinguishes carefully among different types of skills and the relationship of each type to employment outcomes and employer needs. It examines both the demand and the supply side of the labor market. And it provides guidance for further work. We commend this book to all readers, scholars, and practitioners concerned with schooling and job markets in Latin America.

Two to Tango Eduardo Fernández-Arias 2016-06-17 It takes two to tango. Strong public-private collaboration is key for discovering and implementing effective productive development policies to bring out the best in existing economic activities and to foster economic transformation. The 25 Latin American cases analyzed in this volume show how and why many public and private partners are dancing smoothly while others stumble or follow different drummers. This book is a resource for designing institutions to make public-private interaction a win-win strategy.

Global Value Chains and World Trade René Antonio Hernández 2014 "Selection of original papers presented at the international conference 'Latin America's Prospects for Upgrading in Global Value Chains', held on 14-15 March 2012, at Colegio de Mexico, Mexico City"--Title page vers **21 Lessons for the 21st Century** Yuval Noah Harari 2019-01-29 #1 NEW YORK TIMES BESTSELLER • In Sapiens, he explored our past. In Homo Deus, he looked to our future. Now, one of the most innovative thinkers on the planet turns to the present to make sense of today's most pressing issues. "Fascinating . . . a crucial global conversation about how to take on the problems of the twenty-first century."—Bill Gates, The New York Times Book Review NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES AND PAMELA PAUL, KQED How do computers and robots change the meaning of being human? How do we deal with the epidemic of fake news? Are nations and religions still relevant? What should we teach our children? Yuval Noah Harari's 21 Lessons for the 21st Century is a probing and visionary investigation into today's most urgent issues as we move into the uncharted territory of the future. As technology advances faster than our understanding of it, hacking becomes a tactic of war, and the world feels more polarized than ever, Harari addresses the challenge of navigating life in the face of constant and disorienting change and raises the important questions we need to ask ourselves in order to survive. In twenty-one accessible chapters that are both provocative and profound, Harari builds on the ideas explored in his previous books, untangling political, technological, social, and existential issues and offering advice on how to prepare for a very different future from the world we now live in: How can we retain freedom of choice when Big Data is watching us? What will the future workforce look like, and how should we ready ourselves for it? How should we deal with the threat of terrorism? Why is liberal democracy in crisis? Harari's unique ability to make sense of where we have come from and where we are going has captured the imaginations of millions of readers. Here he invites us to consider values, meaning, and personal engagement in a world full of noise and uncertainty. When we are deluged with irrelevant information, clarity is power. Presenting complex contemporary

challenges clearly and accessibly, 21 Lessons for the 21st Century is essential reading. "If there were such a thing as a required instruction manual for politicians and thought leaders, Israeli historian Yuval Noah Harari's 21 Lessons for the 21st Century would deserve serious consideration. In this collection of provocative essays, Harari . . . tackles a daunting array of issues, endeavoring to answer a persistent question: "What is happening in the world today, and what is the deep meaning of these events?"—BookPage (top pick)

El economista camuflado Tim Harford 2016-02-29 ¿Alguna vez te has preguntado por qué el café de Starbucks es el triple de caro que el de cualquier otra cafetería? Tim Harford responde en este libro a esta y otras cuestiones, y nos enseña a ver el mundo con la mirada de un economista. Este singular libro sobre el funcionamiento del mundo desde el punto de vista de un economista se ha convertido en un referente incuestionable. Nos cautiva con una sencilla pregunta: «¿Quién paga tu café?». Pronto nos damos cuenta de que no existen las preguntas sencillas, ya que un café encierra un complejo y gigantesco sistema económico. De esta forma tan casual, Harford nos invita a llevar a cabo una labor detectivesca para intentar resolver algunos de los rompecabezas de nuestra sociedad actual. Aprenderás a pensar más como un economista y menos como un consumidor inocente que se pregunta por qué no se puede comprar un coche de segunda mano decente o qué debería hacer para evitar gastar tanto dinero en un supermercado. Reseñas: «Un libro de lectura obligada.» Steven D. Levitt, autor de Freakonomics «Harford es inteligente, tan inteligente que da miedo. Puede arrojar luz sobre ideas y factores de gran complejidad.» The Sunday Tribune «La economía popular no es un oximoron, y esta es la prueba.» Financial Times

Instilling Diversity and Social Inclusion Practices in Teacher Education and Curriculum Development Alegre de la Rosa, Olga María 2022-06-30 There has recently been a societal push to better achieve equity for all, with many bringing to light the bias, racism, and discrimination that many factions face on a daily basis. Naturally, integrating diversity and social inclusion thoughts into the classroom is one of the best ways to start changing the mindset of society and promoting more inclusive practices in the next generations. Therefore, diversity and social inclusion have become common approaches in the planning and management of primary, secondary, and higher education schools in many international contexts. However, there are certainly challenges that must be overcome in developing these new practices and their implementation within teacher curriculum. Instilling Diversity and Social Inclusion Practices in Teacher Education and Curriculum Development provides an analysis of educational inclusion practices and identifies university students' voices on diversity and social inclusion. It further assesses teacher performance in an international online training context and promotes a model of curriculum development on diversity and social inclusion. Covering topics such as culturally competent teachers, student academic achievement, and attitudes towards diversity, this premier reference source is an excellent resource for teacher educators, pre-service teachers, administrators and educators of both K-12 and higher education, social workers, researchers, and academicians.

Trading Promises for Results Mauricio Mesquita Moreira 2019-09-23 Thirty years after the region embarked on large-scale liberalization, trade policy could have been expected to become all but irrelevant. Instead, a mismatch between expectations and what could realistically be delivered set the stage for much of the disappointment, skepticism, and fatigue regarding trade policy in the region, particularly in the early 2000s. By setting the bar unrealistically high, governments and analysts made trade policies an easy target for special interests that were hurt by liberalization and for those ideologically opposed to free

trade. The most immediate victims were the more tangible growth and welfare gains, whose relevance was lost amid the noise of grandiose visions.

1492 - El encubrimiento del otro Enrique Dussel 2021-02-14 En conmemoración del quinto centenario de la invasión de América en 1492, el rectorado de la Universidad de Frankfurt invitó al autor de estas Lecciones universitarias (Vorlesungen) durante el semestre de otoño de 1992, ante la presencia de unos 200 estudiantes. Estas lecciones cumplieron muchos objetivos. En primer lugar, se trataba de dar una nueva visión de la historia mundial de las culturas. En segundo lugar, criticar la visión eurocéntrica de la filosofía europea en general, y en especial de la Aufklärung y del romanticismo desde Kant hasta el Idealismo alemán. Hegel era el centro del debate. Pero, en tercer lugar, se trataba de mostrar el origen de la modernidad europea en su apertura al Atlántico, que para evadir el sitio musulmán-otomano y siguiendo los pasos de los navegantes chinos se lanzaron hacia el Occidente, para originar así una nueva Edad del mundo. El 1492 -contra la opinión de muchos autores, entre ellos Toulmin o Habermas- era la fecha inicial de la modernidad. Enrique Dussel nació el 24 de Diciembre de 1934, en el pueblo de La Paz, Mendoza, Argentina. Exiliado político desde 1975 en México, hoy ciudadano mexicano, es profesor en el Departamento de Filosofía en la Universidad Autónoma Metropolitana (UAM, Iztapalapa, ciudad de México), y en el Colegio de Filosofía de la Facultad de Filosofía y Letras de la UNAM (Ciudad Universitaria). Licenciado en Filosofía (Universidad Nacional de Cuyo, Mendoza, Argentina), doctor en filosofía por la Universidad Complutense de Madrid, doctor en historia en La Sorbonne de París y una licenciatura en teología en París y Münster. Ha obtenido doctorados honoris causa en Freiburg (Suiza) y en la Universidad de San Andrés (La Paz, Bolivia). Fundador con toros del movimiento Filosofía de la Liberación. Trabaja especialmente en el campo de la Ética y la Filosofía Política. EDITORIAL DOCENCIA - BUENOS AIRES, ARGENTINA.
