**Essentials of Sociology: a Down-to-Earth Approach** James M. Henslin 2006

**The Research Act** Norman K. Denzin 2017 At once a unique textbook for methods courses and a major contribution to sociological theory, this book teaches students the principles of research and how to construct and test theories. It brings coherence to the study of methods by presenting four major approaches to experimentation: survey research, participant observation, life histories, and unobtrusive measures from a single theoretical point of view, symbolic interaction. It demonstrates the need for a synthesis between theory and methods, and shows how different methods limit and affect research results. Denzin's argues that no single method, theory, or observer can capture all that is relevant or important in reality. He argues for the use of triangulation and for a view of theory and methods as "concept sensitizers." His approach enables sociologists to acquire specific facts about a particular situation while simultaneously elevating these to the level of shared meaning. The author shows students how to proceed with research, bringing sharply into focus the possibilities and their limitations. Since his view is integrated rather than eclectic, this is much more than a "how to do it" manual. Denzin points out aspects of research that fall outside the scope of a given method yet affect results, and emphasizes the need to employ several methods to cross-check each other. "The Research Act" covers all the content of conventional methods courses. The presentation is exciting and imaginative, and provides a thorough review of major sociological methods, a cogent statement about approaches to sociological inquiry, and a source from which a understanding of the problems of research can be derived. "Norman K. Denzin" is professor of sociology, cinema studies, and interpretive theory at the University of Illinois, Urbana-Champaign. He was awarded the George Herbert Mead Award for Lifetime Achievement from the Society for the Study of Symbolic Interaction. He is the author of several books, including "The Alcoholic Society, Children and Their Caretakers, Hollywood Shot by Shot, Sociological Methods" and "The Values of Social Science" all available from Transaction.

**Assembling Petroleum Production and Climate Change in Ecuador and Norway** Elisabeth Marta Tømmerbakk 2021-08-02 This book addresses some of the controversies and uncertainties associated with

reducing the extensive exploitation of fossil fuels due to their role in global warming. Elisabeth Marta Tómmerbakk explores why a transition towards a post-carbon society is so difficult to accomplish by examining how the relationship between petroleum production and climate change is politically framed and negotiated in contested cases. This question is approached through a process-oriented comparative case study of Lofoten, located in the Norwegian Sea above the Arctic Circle, and Yasuní-ITT (Ishpingo, Tambococha, and Tiputini) located in the Ecuadorian Amazon: regions that both belong to oil-exporting countries with highly oil-dependent economies. Tómmerbakk draws on rich empirical data that includes qualitative interviews with subjects in both countries and applies an Actor-Network Theory framework to show that oil and climate are intricately entangled in knowledge and policy practices. Overall, *Assembling Petroleum Production and Climate Change in Ecuador and Norway* provides an in-depth examination of how climate science and petroleum extraction are negotiated, adapted, assembled, and coordinated with other national policies and political aims. This book will be of great interest to students and scholars of petroleum production, climate change, environmental policy, and environmental sociology.

**An Introduction to Sociology** Anthony Giddens 2000-04-01

**Communities, Neighborhoods, and Health** Linda M. Burton 2011-02-15 Place is an important element in understanding health and health care disparities. More than merely a geographic location, place is a socio-ecological force with detectable effects on social life, independent well-being, and health. Despite the general enthusiasm for the study of place and the potential it could have for a better understanding of the distribution of health in different communities, research is at a difficult crossroads because of disagreements in how the construct should be conceptualized and measured. This edited volume incorporates a cross-disciplinary approach to the study of place, in order to come up with a comprehensive and useful definition of place. Topics covered include: Social Inequalities, Historical Definitions of Place, Biology and Place, Rural vs. Urban Places, Racialization of a Place, Migration, Sacred Places, Technological Innovations An understanding of place is essential for health care professionals, as interventions often do not have the same effects in the clinic as they do in varied, naturalistic social settings.

*Sociological Perspectives on Media Piracy in the Philippines and Vietnam* Vivencio O. Ballano 2015-12-26 This book addresses the persistence of the optical media piracy trade in the Philippines and Vietnam. It goes beyond arguments of defective law enforcement and copyright legal systems by applying sociological perspectives to examine the socio-economic forces behind the advent of piracy in the region. Using

documentary and ethnographic data, in addition to resistance and ecological theories in sociology of law and technology as the overall theoretical framework, the book investigates factors that contribute to this phenomenon and factors that impede the full formalization of the optical media trade in the two countries. These factors include the government's attitude towards the informal sector and strong resistance to tougher IPR protection, unstable and sometimes conflicting policies on technologies, burdensome business registration process and weak enforcement of business regulations, bureaucratic corruption and loopholes in law enforcement system as well as trade ties with China. In addition to that, the book highlights the social background of the actors behind the illegal business of counterfeit CDs and DVDs, thereby explaining the reasons they continue to persist in this type of trade. It invites policymakers, law enforcers, advocates of anti-piracy groups, and the general public to use a more holistic lens in understanding the persistence of copyright piracy in developing countries, shifting the blame from the moral defect of the traders to the current problematic copyright policy and enforcement structure, and the difficulty of crafting effective anti-piracy measures in a constantly evolving and advancing technological environment.

*Boys in White* Howard Saul Becker 2002 The transition from young layman aspiring to be a physician to the young physician skilled in technique and confident in his dealings with patients is slow and halting. To study medicine is generally rated one of the major educational ordeals of American youth. The difficulty of this process and how medical students feel about their training, their doctor-teachers, and the profession they are entering is the target of this study. Now regarded as a classic, *Boys in White* is of vital interest to medical educators and sociologists. By daily interviews and observations in classes, wards, laboratories, and operating theaters, the team of sociologists who carried out this firsthand research have not only captured the worries, cynicism, and basic idealism of medical students—they have also documented many other realities of medical education in relation to society. With some sixty tables and illustrations, the book is a major experiment in analyzing and presenting qualitative data.

*Continuity and Change in Voluntary Action* Lindsey, Rose 2018-05-30 There are great expectations of voluntary action in contemporary Britain but limited in-depth insight into the level, distribution and understanding of what constitutes voluntary activity. Drawing on extensive survey data and written accounts of citizen engagement, this book charts change and continuity in voluntary activity since 1981. How voluntary action has been defined and measured is considered alongside individuals' accounts of their participation and engagement in volunteering over their lifecourses. Addressing fundamental questions such as whether the public are cynical about or receptive to calls for greater voluntary action, the book considers whether respective government expectations of volunteering can really be fulfilled. Is Britain really a "shared society", or a "big society", and what is the scope for expansion of voluntary effort? This pioneering study combines rich, qualitative material from the Mass Observation Archive between 1981 and 2012, and data from many longitudinal and cross-sectional social surveys. Part of the Third Sector Research Series, this book is informed by research undertaken at the Third Sector Research Centre, funded by the Economic and Social Research Council and Barrow Cadbury Trust.

**ANTI-History** Gabrielle A. T. Durepos 2012-04-01 This book sets out to answer the call for the historic turn in organization studies through the development of an alternative methodology for history, one that we call ANTI-History. In responding to that call, this book contributes generally to the broad critique of the ahistorical nature of management and organization theory, but more specifically it sets out to address the need for more historicized research and in particular, alternative ways of writing and conceptualizing history. The application and theoretical development of ANTI-History is explored through the performance of a series of histories of Pan American Airways.

*Sociologists and Music* Paul Honigsheim 2023-04-14 Sociologists have always been fascinated with music. In one way or another they have encountered music as an important social force in its own right, as an accompaniment or byproduct of phenomena they studied (such as youth culture or the drug scene), or as a means for obtaining social compliance (as in religious ceremonies or in the military). This book goes one step toward remedying this situation by culling the existing literature for building blocks toward introducing sociological synthesis and by presenting the English version of the extensive writings on music and society by Paul Honigsheim.

*Social Meanings of Suicide* Jack D. Douglas 2015-03-08 This book presents a review and criticism of all sociological literature on suicide, from Emile Durkheim's influential *Suicide* (1897) to contemporary writings by sociologists who have patterned their own work on Durkheim's. Douglas points out fundamental weaknesses in the structural-functional study of suicide, and offers an alternative theoretical approach. He demonstrates the unreliability of official statistics on suicide and contends that Durkheim's explanations of suicide rates in terms of abstract social meanings are founded on an inadequate and misleading statistical base. The study of suicidal actions, Douglas argues, requires an examination of the individual's own construction of his actions. He analyzes revenge, escape, and sympathy motives; using diaries, notes, and observers' reports, he shows how the social meanings of actual cases should be studied. Originally published in 1967. Families and Food in Hard Times Rebecca O'Connell 2021-05-24 Food is fundamental to health and social participation, yet food poverty has increased in the global North. Adopting a realist ontology and taking a comparative case approach, Families and Food in Hard Times addresses the global problem of economic retrenchment and how those most affected are those with the least resources. Based on research carried out with low-income families with children aged 11-15, this timely book examines food poverty in the UK, Portugal and Norway in the decade following the 2008 financial crisis. It examines the resources to which families have access in relation to public policies, local institutions and kinship and friendship networks, and how they intersect. Through 'thick description' of families' everyday lives, it explores the ways in which low income impacts upon practices of household food provisioning, the types of formal and informal support on which families draw to get by, the provision and role of school meals in children's lives, and the constraints upon families' social participation involving food. Providing extensive and intensive knowledge concerning the conditions and experiences of low-income parents as they endeavour to feed their families, as well as children's perspectives of food and eating in the context of low income, the book also draws on the European social science literature on food and families to shed light on the causes and consequences of food poverty in austerity Europe.

**Regional Comparisons in Comparative Policy Analysis Studies** Iris Geva-May 2020-06-29 Volume Three of the Classics of Comparative Policy Analysis, contains chapters concerned with "Regional Comparisons and Policy Analysis" - one of the most prevailing approaches in comparative public policy. Through the prism of inter-jurisdiction comparisons of similarities and variations, they address comparisons in specific policy sectors, governance or institutional constructs, and political regimes. The foci are, nevertheless, on those comparisons between countries or regions, which help to lesson-draw by identifying and understanding the variation in policy analysis and policy making that exists within or across regions. One benefit of regional comparisons is that it often allows studies to hold constant many variables, ranging from colonial legacy to federal systems, or from language to specific traditions, and more effectively isolate dependent variables. Regional organizations like the Organization for Economic Co-operation and Development (OECD) or European Union are also considered as catalysts for regional policy approaches and harmonization, and occupy a major role in this volume. The chapters address a broad and diverse number of countries and geographical areas: Latin America, North America, East Asia, Southeast Asia, Southern Africa, the Baltic states, the Nordic states, Western Europe, Central Europe, Eastern Europe, and Europe as a whole. "Regional Comparisons and Policy Analysis" will be of great interest to scholars and learners of public policy and social sciences, as well as to practitioners considering what can be learned or facilitated through methodologically and theoretically sound approaches. The chapters were originally published as articles in the Journal of Comparative Policy Analysis which in the last two decades has pioneered the development of comparative public policy. The volume is part of a four-volume series, the Classics of Comparative Policy Analysis including Theories and Methods, Institutions and Governance, Regional Comparisons, and Policy Sectors. Each volume showcases a different new chapter comparing domains of study interrelated with comparative public policy: political science, public administration, governance and policy design, authored by the JCPA co-editors Giliberto Capano, Iris Geva-May, Michael Howlett, Leslie A. Pal and B. Guy Peters.

**Key Concepts in Social Research** Geoff Payne 2004-03-18 `This clearly written and user-friendly book is ideal for students or researchers who wish to get a basic, but solid grasp of a topic and see how it fits with other topics. By following the links a student can easily and efficiently build up a clear conceptual map of social research' - Malcolm Williams, Reader in Sociology, Cardiff University `This is a really useful book, written in an accessible manner for students beginning their study of social research methods. It is helpful both as an introductory text and as a reference guide for more advanced students. Most of the key topics in methods and methodology are covered and it will be suitable as a recommended text on a wide variety of courses' - Clive Seale, Brunel University At last, an authoritative, crystal-clear introduction to research methods which really takes account of the needs of students for accessible, focused information to help with undergraduate essays and exams. The key concepts discussed here are based on a review of teaching syllabi and the authors' experience of many years of teaching. Topics range over qualitative and quantitative approaches and combine practical considerations with philosophical issues. They include several new topics, like internet and phone polling, internet searches, and visual methods. Each section is free-standing, can be tackled in order, but with links to other sections to enable students to cross-reference and build up a wider understanding of central research methods. To facilitate comprehension and aid study, each section begins with a definition. It is followed by a summary of key points with key words and guides to further reading and

up-to-date examples. The book is a major addition to undergraduate reading lists. It is reliable, allows for easy transference to essays and exams and easy to use, and exceptionally clearly written for student consumption. The book answers the needs of all those who find research methods daunting, and for those who have dreamt of an ideal introduction to the subject.

**Sociology** David M. Newman 2016-08-16 Adapted from David M. Newman's best-selling *Sociology: Exploring the Architecture of Everyday Life*, this briefer, streamlined version continues to show students how to see the "unfamiliar in the familiar," inspiring them to think critically about their own lives and social contexts. As in the full text, the author's approachable writing style and lively personal anecdotes make the Brief Edition a text that "reads like a real book." It uses the metaphors of "architecture" and "construction" to help students understand that society is not something that exists "out there," independently of themselves; it is a human creation that is planned, formed, maintained, or altered by individuals. Rather than surveying every subfield in sociology, the Brief Edition focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures.
