Economic and Social History of Medieval Europe Henri Pirenne 1956 An account of the historical evolution of Western Europe from the end of the Roman Empire to the middle of the 15th century.

The Economics of the Global Defence Industry Keith Hartley 2019-11-20 This book makes an original contribution to our knowledge of the world’s major defence industries. Experts from a wide range of different countries – from the major economies of North America and Western Europe to developing economies and some unique cases such as China, India, Singapore, South Africa and North Korea – describe and analyse the structure, conduct and performance of the defence industry in that country. Each chapter opens with statistics on a key nation’s defence spending, its spending on defence R&D and on procurement over the period 1980 to 2017, allowing for an analysis of industry changes following the end of the Cold War. After the facts of each industry, the authors describe and analyse the structure, conduct and performance of the industry. The analysis of ‘structure’ includes discussions of entry conditions, domestic monopoly/oligopoly structures and opportunities for competition. The section on ‘conduct’ analyses price/non-price competition, including private and state funded R&D, and ‘performance’ incorporates profitability, imports and exports together with spin-offs and technical progress. The conclusion explores the future prospects for each nation’s defence industry. Do defence industries have a future? What might the future defence firm and industry look like in 50 years’ time? This volume is a vital resource and reference for anyone interested in defence economics, industrial economics, international relations, strategic studies and public procurement.

A European Public Investment Outlook Floriana Cerniglia 2020-06-12 This outlook provides a focused assessment of the state of public capital in the major European countries and identifies areas where public investment could contribute more to stable and sustainable growth. A European Public Investment Outlook brings together contributions from a range of international authors from diverse intellectual and professional backgrounds, providing a valuable resource for the policy-making community in Europe to feed their discussion on public investment. The volume both offers sector-specific advice and highlights larger areas which should be prioritized in the policy debate (from transport to social capital, R&D and the environment). The Outlook is structured into two parts: the chapters of Part I respectively explore public investment trends in France, Germany, Italy, Spain and Europe as a whole, and illuminate how the legacy of the 2008 Global Financial Crisis is one of insufficient public investment. Part II investigates some areas into which resources could be channelled to reverse the recent trend and provide European economies with an adequate public capital stock. The essays in this outlook collectively foster a broad approach to and definition of public investment, that is today more relevant than ever. Offering up a timely and clear case for the elimination of bias against investment in European fiscal rules, this outlook is a welcome contribution to the European debate, aimed both at policy makers and general readers.

Latin America–European Union relations in the twenty–first century Arantza Gomez Arana 2022-03-22 Latin America–European Union relations in the twenty-first century provides a valuable overview of transatlantic trade agreement negotiations and developments in the first decades of the twenty-first century. This edited collection examines key motivations behind trade agreements, traces the evolution of negotiations and explores some of the initial impacts of new generation trade agreements with the EU on South American countries. The book makes an important contribution to our understanding of relations between these regions by contextualising relations and trade agendas, both in terms of domestic political and economic policies and broader global trends. It demonstrates the importance of a shift toward mega-regional trade agreements in the 2010s, particularly under the Obama administration in the United States, in shaping South American and European agendas for trade agreement negotiations and their outcomes. Detailed case studies in the book investigate EU relations and negotiations with countries that have successfully negotiated new generation trade agreements with the EU: Mercosur, the Andean states, Chile and Mexico. Other contributions offer a wider overview of EU–Latin American relations, including parliamentary and civil society relations. The net result is a balanced analysis of contemporary EU relations with South America, useful for students and scholars of foreign policy and political economy in both regions.

The Consequences of the Crisis on European Integration and on the Member States Steio Mangiameli 2017-02-23 The book examines the economic crisis in the European Union and its consequences for European integration and the member states. Discussing the provisions introduced by the Treaty of Lisbon, from the effects of macroeconomic monitoring to the restraints produced by the Fiscal Compact, it offers an analysis of the European Union’s current situation and the effects of the measures adopted to manage the crisis, also making reference to how Europe is perceived by its citizens. Moreover, the chapters offer thoughts on the European integration process, in particular the effects that the policies adopted to tackle the crisis have had on the economic and financial sovereignty of the member states. This detailed examination of the situation of the EU between the Treaty of Lisbon and the Fiscal Compact is characterized by an original multidisciplinary approach that offers an articulate reflection on the criticalities that affect the actions of both European and national institutions. *A Monetary Hope for Europe* Max Guderzo 2016 A Monetary Hope for Europe. This book studies the euro in a global perspective and opens a new series edited by the Jean Monnet European Centre of Excellence of the University of Florence, Verso l’unificazione europea. Most of the chapters have been written by economists who met and discussed their diverse views at a multi-disciplinary conference organized by the Centre in May 2013 under the title The euro and the struggle for the creation of a new global currency: Problems and perspectives in the building of the political, financial and economic foundations of the European federal government. The list of contributors also includes historians as well as European and international law academics. Their essays have been revised on the basis and against the backdrop of an ongoing crisis of both the euro and the whole European project in the last years and months. The volume aims to provide useful data and interpretations to improve knowledge on the euro and the European Union in their economic, historical, juridical and political perspectives. --

Sustainability and the Humanities Walter Leal Filho 2018-08-22 This book explores the strong links between sustainability and the humanities, which go beyond the inclusion of social sciences in discussions on sustainability, and offers a holistic discussion on the intellectual and moral aspects of sustainable development. The contributions from researchers in the fields of education, social sciences, religion, humanities, and sustainable development fulfill three main aims: They provide university lecturers interested in humanities and sustainable development with an opportunity to present their work; foster the exchange of information, ideas and experiences acquired in the execution of teaching and research; and discuss methodological approaches and projects that provide a better understanding of how the humanities can contribute to the debate on sustainable development. Prepared by the Inter-University Sustainable Development Research Programme and the World Sustainable Development Research and Transfer Centre, the book reiterates the need to promote integrated approaches to sustainable development. Including practice-based lessons learnt that can be replicated further, it is a valuable resource for scientists and practitioners working in the humanities and sustainable development.

European Lawyers Union – Union des Avocats Européens (UAE), the Associazione Italiana per la Tutela della Concorrenza - the Italian section of the Ligue Internationale du Droit de la Concurrence (LIDC)-, the Associazione Italiana Giuristi di Impresa (AIGI), the European Company Lawyers Association (ECLA), and the Associazione Antitrust Italiana (AAI). Some of the papers have been extensively reviewed and updated by the authors prior to publication. The contributions contained in this volume are the result of an in-depth analysis and study of the most salient issues arising from the application of antitrust rules, carried out by experienced and high-ranking professionals, in-house lawyers, academics and EU/national and international institutional representatives who attended the Conference. They deal with extremely topical issues, lying at the heart of current antitrust debate. Some of the most contemporary topics include those related to private antitrust enforcement after the implementation of Directive 2014/104/EU, and to the interplay between antitrust and intellectual property rights. Ample consideration is also given to recent developments in the field of new technologies and the related antitrust issues, as well as to the relations between consumer protection and antitrust. * * * Questo volume contiene gli atti del XIII Convegno sul tema “Antitrust fra Diritto Nazionale e Diritto dell’Unione Europea”, tenutosi a Treviso il 24 e 25 maggio 2018 con il patrocinio dell’Unione degli Avvocati Europei (UAE), dell’Associazione Italiana per la Tutela della Concorrenza - sezione italiana della Ligue Internationale du Droit de la Concurrence (LIDC) -, dell’Associazione Italiana dei Giuristi di Impresa (AIGI), della European Company Lawyers Association (AEJE-ECLA) e dell’Associazione Antitrust Italiana (AAI). Alcuni contributi sono stati sostanzialmente rivisti ed aggiornati dagli autori prima della pubblicazione. Gli articoli contenuti nel presente volume sono il frutto del prezioso lavoro di studio e approfondimento delle più interessanti tematiche correlate all’applicazione del diritto antitrust, svolto da qualificati esponenti del mondo professionale, imprenditoriale, accademico ed istituzionale, intervenuti al Convegno. I contributi pubblicati affrontano temi di estrema rilevanza, che rapp sentano il cuore delle problematiche antitrust oggi maggiormente dibattute, tra le quali spiccano, per attualità, quelle connesse al private enforcement ed al risarcimento dei danni in seguito dell’attuazione della Direttiva 2014/104/UE, nonché alle interazioni tra diritto antitrust e diritti di proprietà intellettuale. Ampio spazio è inoltre dedicato alle tematiche concernenti le nuove tecnologie e la loro rilevanza dal punto di vista antitrust, nonché ai rapporti tra tutela del consumatore e diritto antitrust.

State, Economy and the Great Divergence Peer Vries 2015-02-26 State, Economy and the Great Divergence provides a new analysis of what has become the central debate in global economic history: the ‘great divergence’ between European and Asian growth. Focusing on early modern China and Western Europe, in particular Great Britain, this book offers a new level of detail on comparative state formation that has wide-reaching implications for European, Eurasian and global history. Beginning with an overview of the historiography, Peer Vries goes on to extend and develop the debate, critically engaging with the huge volume of literature published on the topic to date. Incorporating recent insights, he offers a compelling alternative to the claims to East-West equivalence, or Asian superiority, which have come to dominate discourse surrounding this issue. This is a vital update to a key issue in global economic history and, as such, is essential reading for students and scholars interested in keeping up to speed with the on-going debates.

Liquidity Risk Management in Banks Roberto Ruzzi 2012-09-21 The recent turmoil on financial markets has made evident the importance of efficient liquidity risk management for the stability of banks. The measurement and management of liquidity risk must take into account economic factors such as the impact area, the timeframe of the analysis, the origin and the economic scenario in which the risk becomes manifest. Basel III, among other things, has introduced harmonized international minimum requirements and has developed global liquidity standards and supervisory monitoring procedures. The short book analyses the economic impact of the new regulation on profitability, on assets composition and business mix, on liabilities structure and replacement effects on banking and financial products.

Local Governance in the New Urban Agenda Carlos Nunes Silva 2020-10-19 The book explores and discusses some of the changes, challenges and opportunities confronting local governance in the context of the new urban paradigm associated with the HABITAT III New Urban Agenda, a 20-year strategy for sustainable urbanization, adopted in October 2016 in Quito, Ecuador. The chapters included in the book address public policy issues from different theoretical perspectives and methodological approaches, written by authors from different academic disciplines within the broad area of social sciences (Geography, Political Science, Public Administration, Spatial Planning, Law, Regional Science, among other fields), and offer an inter-disciplinary vision of these issues. The chapters are written by members of the International Geographical Union (IGU) Commission on Geography of Governance.

Environmental Crime in Europe Andrew Farmer 2017-12-14 "Environmental crime is a growing challenge for policy makers and law enforcers. This is an important and timely study which examines in depth how environmental crime is treated at national level within the European Union and the impact of the 2008 EU Directive on environmental crime on national systems. It will be required reading by anyone concerned with making environmental law more effective." Richard Macrory, Emeritus Professor, University College London The aim of this important new collection is to explore how environmental crime is controlled and environmental criminal law is shaped and implemented within the European Union and its Member States. It examines the legal framework, looking in particular at Directive 2008/99/EC, and the specific competences of the EU in this domain. In addition, it provides a detailed analysis of environmental criminal law in seven Member States, focusing inter alia on the basic legislation, the way in which environmental pollution is criminalised and the main actors in place to enforce environmental criminal law. In so doing, it provides a much needed explanation of the evolution of environmental criminal law in Europe at Union level and how this is implemented in selected Member States.

Industrial Symbiosis for the Circular Economy Roberta Salomone 2020-02-07 The book is designed to help public and private decision-makers and academics deepen their knowledge and understanding of the contexts, obstacles and challenges of a variety of business types involved in Industrial Symbiosis and Circular Economy practices. Industrial Symbiosis is reported in the Action Plan on the Circular Economy developed by the European Commission in 2015 (COM / 2015/0614 final) and in its revision of 14 March 2017, but relatively little is known of how these practices start, develop or fail, and mutate in a rapidly changing context. Including selected contributions presented at the 24th ISDRS 2018 Conference, “Actions for a Sustainable World: from theory to practice” in the two theme tracks “5c. Circular economy, zero waste & innovation” and “5g. Industrial symbiosis, networking and cooperation as part of industrial ecology”, this book offers a transdisciplinary perspective on real experiences of industrial symbiosis, performed both by industries and the scientific community, best practices, success and unsuccessful cases (implemented or under implementation), with the final aim to promote the adoption of Industrial Symbiosis as an operational and systematic tool for the Circular Economy. In particular, a focus on the environmental, social, and economic impact of Circular Economy and Industrial Symbiosis practices, and how those impacts may be context and/or scale dependent is given.

Economia Dell’allargamento Dell’Unione Europea Franco Praussello 2003

La fine di un mondo. Rapporto ISPI 2019 AA.VV. 2019-02-21 Anche nell’ultimo anno si sono moltiplicati i segnali di scomposizione del mondo politico, economico e istituzionale concepito alla fine della Seconda guerra mondiale e definitivamente liberato dalla fine della guerra fredda. Intanto, l’avvento di Donald

Trump alla presidenza degli Stati Uniti ha introdotto un'inedita tensione tra gli Usa e l'ordine internazionale da loro stessi prodotto. Più in generale, la crescita della Cina e la rinnovata assertività della Russia sembrano preludere a una nuova fase del riflusso dell'impatto occidentale sul resto del Mondo. Soprattutto, una variegata contestazione di legittimità ha investito lo stesso orientamento liberale dell'ordine post-bipolare, con conseguenze sempre più profonde sulla tenuta del tessuto multilaterale della convivenza internazionale, delle organizzazioni internazionali e persino dell'assetto istituzionale dei singoli stati. Il Rapporto ISPI 2019 s'interroga su questo coinvolgimento, tanto nella dimensione politica quanto in quella economica. La prima parte del volume è dedicata al contesto globale e ai suoi contraccolpi sull'Europa, mentre la seconda si rivolge come di consueto alla politica estera italiana.

Politics and Finance in the European Union Francesco Capriglione 2016-03-09 The recent financial and sovereign debt crisis, while turning the spotlight into the degenerating effects of modern-day capitalism, has engendered a series of hard-to-control events that are severely testing the stability of the European institutions. The adjustments, to date, have proved unable to adequately tackle the financial turmoil that is undermining the construction of the EU. Hence the need to identify the reasons behind this situation, which is accompanied by the failure to achieve an osmosis between the member countries of the Union. The objective to be pursued is clarifying the uncertainties and contradictions within Europe, for the purpose of addressing what many see as a “systemic crisis”.

Historia de la economía europea Derek Howard Aldcroft 1989 Primera historia económica de la Europa del siglo XX que se publica en España. Desde el análisis del crecimiento económico y de los factores que lo han estimulado o inhibido, el autor pasa revista a la vida económica europea desde la primera guerra mundial hasta nuestros días, y reflexiona sobre el futuro de un proyecto en común.

Finance for SMEs: European Regulation and Capital Markets Union Patrizio Messina 2019-06-19 With the European Commission's announcement of the Capital Markets Union in 2016, a major step was at last taken to provide for the special needs of small and medium enterprises (SMEs). This book presents the first in-depth legal analysis of the challenges that SMEs have to face when managing their balance sheets and trying to attract investors, what alternative financing tools are most effective and how recent legislation reaches fair and convenient conditions for SMEs. The analysis focuses specifically on the Capital Markets Union structure and on other European initiatives that support and enhance SMEs' raising money on capital markets in order to better diversify their investments and plan a growth and development strategy. An updated description of the European framework is provided, together with references to relevant national systems. Issues and topics covered include the following: need for long-lasting access to funds; securitization for SMEs; SME Z-score; crowdfunding; and peer-to-peer, minibond and accounts receivables financing. Case study analyses furnish a deep understanding of the financial structures and their main features. Appendices include English texts of the main European Union (EU) legal documents pertaining to SMEs. For SMEs discouraged by over-regulation designed for larger businesses, and who find themselves in difficulties when they have to face the required process, this book will prove to be of immeasurable practical value. This book represents one of the first publications on SMEs and finance and contains data and information resulting from a deep and well-focused research on the topic. The added value of this study will allow the academics to understand the main issues related to this topic and will provide for a steady basis for further research and analysis with regards to law and economics for SMEs. Furthermore, it will be also warmly welcomed by practitioners in the area of SME financing and will be useful to support them in the selection of the most appropriate tools for their clients. Banks and interested EU officials will also value its clear and straightforward approach to the subject.

Classical Economics Today Marcella Corsi 2018-01-22 “Classical Economics Today: Essays in Honor of Alessandro Roncaglia” comprises a collection of original essays by leading economists who adopt a Classical approach to political economy. The essays showcase the relevance and topicality of the Classical approach, as opposed to the sterility and real-world irrelevance of mainstream economics.

Crisis in the European Monetary Union Giuseppe Celi 2017-12-22 After decades of economic integration and EU enlargement, the economic geography of Europe has shifted, with new peripheries emerging and the core showing signs of fragmentation. This book examines the paths of the core and peripheral countries, with a focus on their diverse productive capabilities and their interdependence. Crisis in the European Monetary Union: A Core-Periphery Perspective provides a new framework for analysing the economic crisis that has shaken the Eurozone countries. Its analysis goes beyond the short-term, to study the medium and long-term relations between ‘core’ countries (particularly Germany) and Southern European ‘peripheral’ countries. The authors argue that long-term sustainability means assigning the state a key role in guiding investment, which in turn implies industrial policies geared towards diversifying, innovating and strengthening the economic structures of peripheral countries to help them thrive. Offering a fresh angle on the European crisis, this volume will appeal to students, academics and policymakers interested in the past, present and future construction of Europe.

Labour Markets, Industrial Relations and Human Resources Management in Europe Roger Blanpain 2012-03-01 Social models are always contested and ambiguous. This is particularly evident in the field of human resources management, where decisions that ultimately affect the patterns of social relations are made every day. This collection of in-depth essays focuses on some central human resources elements – gender, youth, ageing, educational background, training, workers' rights – providing an up-to-date summary and analysis of how employers are dealing – and should be dealing – with workforce characteristics under current globalized forces. The emphasis is on Europe, but valuable insights come also from Chile, Canada, and the United States. Sixteen experts discuss such important issues as the following: the shift from intervention in favour of workers' rights towards corporate neo-liberal policies; importance of transnational framework agreements in countries where a trade union; tradition is lacking; evidence that provision of childcare promotes female labour market participation; short-time working, labour hoarding, and labour underutilization; enhancing training policies for employable skills; enforcement of corporate social responsibility; alarmingly high rates of precarious employment; worldwide decline of full-time permanent positions; pension system reform; over-exposure of young people to non-standard employment; discouraged workers; regional imbalances in employment policy; and weaknesses of education programmes in connection with the world of work. Industrial relations and human resources professionals as well as employment lawyers worldwide will welcome this incisive analysis, and academics everywhere are sure to benefit from its evidence, insights, and proposals. The book presents a selection of papers from the international conference in commemoration of Marco Biagi entitled Europe 2020: Comparative Perspectives and Transnational Action, held at the Marco Biagi Foundation in Modena, Italy. 17–19 March 2011.

Economía de la Unión Europea Eva María Buitrago Esquinas 2014-11-20 En este libro se realiza un análisis económico del proceso de integración europeo con el objetivo de ofrecer al lector un material que le permita, por un lado, comprender la evolución que ha seguido la integración europea hasta el momento y, por otro, conocer las claves que le faciliten la anticipación e interpretación de los acontecimientos futuros. En principio, se ha diseñado como un manual destinado a orientar el aprendizaje de las asignaturas relacionadas con la economía de la Unión Europea incluidas en los estudios universitarios. No obstante, puede ser de gran utilidad para cualquier lector que esté interesado en comprender la cada vez más compleja realidad económica de la integración europea. El contenido de los apartados de cada capítulo se complementa con cuatro tipos de recuadros: «Lecturas para recordar conceptos», «lecciones de la historia», «lecturas complementarias» y «quieres saber más». Asimismo, al final de cada capítulo se incluyen preguntas de revisión y actividades prácticas, que sirven de orientación para el aprendizaje de la materia.

Sociology of music and its cultural implications. Interdisciplinary insights from theoretical debate and field work AA. Excommunication for Debt in Late Medieval France Tyler Lange 2016-03-24 Late medieval church courts frequently excommunicated debtors at the request of their creditors. Tyler Lange analyzes over 11,000 excommunications between 1380 and 1530 in order to explore the forms, rhythms, and cultural significance of the practice. Three case studies demonstrate how excommunication for debt facilitated minor transactions in an age of scarce small-denomination coinage and how interest-free loans and sales credits could be viewed as encouraging the relations of charitable exchange that were supposed to exist between members of Christ's body. Lange also demonstrates how from 1500 or so believers gradually turned away from the practice and towards secular courts, at the same time as they retained the moralized, economically irrational conception of indebtedness we have yet to shake. The demand-driven rise and fall of excommunication for debt reveals how believers began to reshape the institutional Church well before Martin Luther posted his theses.

Social Entrepreneurship: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources 2019-04-01 Businesses are looking for methods to incorporate social entrepreneurship in order to generate a positive return to society. Social enterprises have the ability to improve societies through altruistic work to create sustainable work environments for future entrepreneurs and their communities. Social Entrepreneurship: Concepts, Methodologies, Tools, and Applications is a useful scholarly resource that examines the broad topic of social entrepreneurship by looking at relevant theoretical frameworks and fundamental terms. It also addresses the challenges and solutions social entrepreneurs face as they address their corporate social responsibility in an effort to redefine the goals of today's enterprises and enhance the potential for growth and change in every community. Highlighting a range of topics such as the social economy, corporate social responsibility, and competitive advantage, this multi-volume book is ideally designed for business professionals, entrepreneurs, start-up companies, academics, and graduate-level students in the fields of economics, business administration, sociology, education, politics, and international relations.

The Economy of Collaboration Francesco Ramella 2020-11-29 Over the past few decades, the world economy has undergone radical transformations, in part connected to the expansion of the ‘digital economy’, in part to the growing interconnection via the internet of the world of objects and physical processes. This ‘great transformation’ poses the dilemma on the capitalism's ability to reconcile economic and social value, keeping together economic well-being, social cohesion and political freedom. The Economy of Collaboration can offer a contribution in this direction but requires courageous policies to mediate the various interests at stake, as well as to rethink and make more sustainable its development, by increasing the benefits not only for businesses but also for workers and consumers. In short, to create shared value. This book refers to a mode of organizing the production, distribution and consumption of goods and services based on cooperative relations. The main reference is to activities linked to the digital economy, since they are the emerging forms of a definitely older phenomenon, but which is expanding on an ever-wider scale thanks to new technologies. These collaborative activities can be regulated differently, along a continuum that ranges from the pole of market exchanges to that of generalized reciprocity, with various intermediate mixed forms.

Neoenodogenous Development in European Rural Areas Eugenio Cejudo 2020-01-01 This book is one of the main outcomes of the projects “Development Programmes and Rural Change in the European Union: governance, results and lessons to share” and “Successes and failures in the practice of neoenodogenous rural development in the European Union (1991-2013)”, funded both of them by the Spanish Ministry of Economy and Competitiveness. This publication aims, on one side, to clarify and deepen the knowledge of the social, economic and territorial effects of the LEADER approach, and, on the other, to analyze the importance of the participation of several stakeholders (young people and women) as well as some traditional activities –agriculture- or modern ones (tourism) linked all of them to the rich cultural and natural heritage of these areas. It also provides an in-depth study of the causes that lead to the generation of successful projects in the practice of neoenodogenous rural development and also explores the reasons that cause certain projects to fail in the

path towards LEADER support so that they are finally not implemented. In addition, it is shown the problems, results and best practices that cause the neoenodogenous rural development in different areas inside of the European Union: Austria, Finland, France, Germany, Italy, Spain and United Kingdom.

Thereby it helps to improve the decision-making in rural development, both on a local and regional scale. The multidisciplinary and international character of the authors, as well as the specificity of the research trajectory of each of them, in the analysis of rural development, enriches the publication and facilitates the different and critical reflections on the contributions, errors and meaning of the neoenodogenous local development. Researchers in this discipline and technicians working in the practice of rural development along the European Union are the main audience of the book.

A World of Regions Peter J. Katzenstein 2015-11-16 Observing the dramatic shift in world politics since the end of the Cold War, Peter J. Katzenstein argues that regions have become critical to contemporary world politics. This view is in stark contrast to those who focus on the purportedly stubborn persistence of the nation-state or the inevitable march of globalization. In detailed studies of technology and foreign investment, domestic and international security, and cultural diplomacy and popular culture, Katzenstein examines the changing regional dynamics of Europe and Asia, which are linked to the United States through Germany and Japan. Regions, Katzenstein contends, are interacting closely with an American imperium that combines territorial and non-territorial powers. Katzenstein argues that globalization and internationalization create open or porous regions. Regions may provide solutions to the contradictions between states and markets, security and insecurity, nationalism and cosmopolitanism. Embedded in the American imperium, regions are now central to world politics.

Art and Business Stefania Masè 2020-08-29 Analyzing the relationship between the arts and business, this book offers an in-depth perspective on the increasingly common art-based strategies adopted by enterprises in various industries, with a focus on luxury sector. Pursuing an exhaustive, systematic, evidence-based and interdisciplinary approach, it explores the limits of potential strategic collaborations between the two fields. In addition, the book provides a structure for this field of inquiry, offering a solid basis for future research and highlighting the benefits of art-based strategies for executives. Each research strand explored in this book is supported by a representative case study.

Digital Work and Personal Data Protection Lourdes Mella Méndez 2018-12-21 This book gathers contributions related to the most pressing problems and challenges that new information and communications technologies (ICT) and digital platforms introduce into the labour market, and the impact they have on the way that people work, their rights and even their health and dignity. In addition, there are also chapters studying personal data protection, which is currently a topic of maximum interest due to the New European Regulation about it. The contributors here are drawn from around the world, with several countries represented, such as Portugal, Spain, Italy, Brazil, Australia and Venezuela. The book will appeal lawyers, legal and human resources experts, economists, judges, academics and staff from trade unions, and employers' representation. The volume features insights and contributions in different languages, with chapters in Spanish (12), English (6) and Portuguese (4).

Entrepreneurship in the Fourth Sector María Isabel Sánchez-Hernández 2021-06-09 “The fourth sector” is a relatively new sector that consists of for-benefit organizations that combine market-based approaches of the private sector with the social and environmental aims of the public and non-profit sectors. This book examines trends of entrepreneurship in the fourth sector, describes specific ecosystems fostering new ventures around the world, and characterizes the most common and innovative business models. It covers as well the main effects, among others, of technological change, innovation, and institutional behavior on the sector in the last years.

The Routledge Handbook of Public Taxation in Medieval Europe Denis Menjot 2022-11-30 Beginning in the twelfth century, taxation increasingly became an essential component of medieval society in most parts of Europe. The state-building process and relations between princes and their subject cities or between citizens and their rulers were deeply shaped by fiscal practices. Although medieval taxation has produced many publications over the past decades there remains no synthesis of this important subject. This volume provides a comprehensive overview on a European scale and suggests new paths of inquiry. It examines the fiscal systems and practices of medieval Europe, including essential themes such as medieval fiscal theory and the power to tax; royal and urban taxation; and Church taxation. It goes on to survey the entire European continent, as well as including comparative chapters on the non-European medieval world, exploring questions on how taxation developed and functioned; what kinds of problems authorities encountered assessing their fiscal power; and the circulation of fiscal cultures and practices across cities and kingdoms. The book also provides a glossary of the most important types of medieval taxes, giving an essential definition of key terms cited in the chapters. The Routledge Handbook of Public Taxation in Medieval Europe will appeal to a large audience, from seasoned scholars who need a comprehensive synthesis, to students and younger scholars in search of an overview of this critical subject.

A Century of Italian American Economics Valentina Sgro 2020-07-24 Through a historical analysis of the link between Italian American migration in the 20th century and the investigation of the minutes of the Board of Directors and the financial statements of the American Chamber of Commerce in Italy, this book provides a privileged observation point for the study of the economic relations between Italy and the United States throughout the twentieth century. Showing that the Chamber played a fundamental role in highlighting the changes of Italian economy and society, and in strengthening the cooperation between the two countries, it retraces a long-lasting tradition of trade and business, and depicts a solid and enduring relationship between Italy and the United States.

Entrepreneurial Universities Marta Peris-Ortiz 2016-12-13 This book analyses the importance of the entrepreneurial university, specifically in relation to the creation of entrepreneurial ideas and attitudes in students and entrepreneurial initiatives in academic institutions. The aim of the editors and contributing authors is to provide the reader with a set of experiences illustrating the advantages of communicating and encouraging entrepreneurship among students, thereby highlighting the “third mission” of the university: the need to adopt entrepreneurial strategy without disrupting the quality of teaching and research. Featuring initiatives from institutions around the world, the authors argue that the increasing importance of knowledge in the technical and social dimensions of today's world provides greater relevance to the entrepreneurial university. In this context, universities transcend their traditional focus on teaching and basic research to carry out technology transfers, marketing ideas, and patent registrations, and incorporate spin-off companies that contribute to industrial innovations, economic growth, and job creation. In the teaching dimension, the entrepreneurial university represents a focus on programs which train students in the applications and most advanced practices in knowledge-driven fields. The book addresses such questions as: Can marketing ideas deteriorate the quality of research in the long term? What importance does the cultural framework have for an entrepreneurial education? What circumstances and programs facilitate spin-offs in universities? What are the key features of entrepreneurial universities? In reference to entrepreneurship education in its broadest sense, then, it corresponds to the framework of ideas and general features on which entrepreneurship is founded: in-depth knowledge of the projects or ventures which they wish to carry out, capacity to perceive the relevant characteristics of the environment, and the leadership and goal setting skills to achieve success.

The National Politics of EU Enlargement in the Western Balkans James Ker-Lindsay 2020-06-30 The National Politics of EU Enlargement in the Western Balkans examines the way in which a number of European Union member states, including Germany and France, formulate their policies towards enlargement in the Western Balkans. The six countries of the Western Balkans – Albania, Bosnia and Herzegovina, Kosovo, Montenegro, North Macedonia and Serbia – are on course to become the next members of the European Union. While there has been a lot of work on the ways in which these countries are preparing for accession, and how the EU as a whole approaches the question of expansion, very little attention has been paid to how individual EU member states regard enlargement into a region that presents a number of serious challenges, including the legacies of the conflicts of the 1990s, economic underdevelopment and poor governance. Focusing on key states, such as Germany, France and Italy, the neighbouring countries of Central and South East Europe, and Britain, once a leading advocate of enlargement that is now in the process of leaving the European Union, this volume casts important new empirical and conceptual light on the diverse motivations that underpin member state attitudes towards EU enlargement. The National Politics of EU Enlargement in the Western Balkans will be of great interest to scholars of the European Union, European politics, and the politics of the Western Balkans. The chapters were originally published as a special issue of Southeast European and Black Sea Studies.

International Disaster Response Law Andrea de Guttry 2012-08-31 With a Foreword by Kristalina Georgieva, European Commissioner for International Cooperation, Humanitarian Aid and Crisis Response Over the last decades natural and man-made disasters have been increasing in terms of frequency, size, number of people affected and material damage caused. There is growing awareness of the importance of adequate national and international legal frameworks for disaster prevention, mitigation and response. The implementation of these frameworks, however, poses serious challenges. This book analyses International Disaster Response Law as developed in recent times and identifies the main existing normative gaps. The authors address the rights and duties of States in preventing and mitigating disasters, in facilitating access to their territory for humanitarian relief actors, as well as issues related to liability and compensation. Due attention is paid to European Union law governing disaster response (and to its reform in the light of the Lisbon Treaty) and to the main trends in domestic legislation. Human rights obligations are thoroughly examined and the potential relevance of international criminal law is assessed. Additional topics such as the status of relief personnel, the hindrances to the delivery of relief consignments by customs and excise administration, the use of civilian and military defence assets in emergency situations, the mechanisms and procedures available to offer financial support for recovery and rehabilitation, risk insurance, and the issue of corruption during disaster-related activities are specifically addressed. By drawing on the expertise of lawyers, political scientists, economists and humanitarian practitioners, the book promotes much-needed interdisciplinary dialog and sheds light on a largely uncharted field of research. It is therefore essential reading for academics and practitioners in international and EU law, policy makers, civil protection and humanitarian operators and for anyone interested in exploring the legal facets of the international community's response to large-scale calamitous events. Handbook of Research on Social Entrepreneurship and Solidarity Economics Saiz-Álvarez, José Manuel 2016-05-19 Education programs in social entrepreneurship helps to create and fill jobs devoted to developing the local economy, which has become a dual transfer strategy by which a virtuous circle occurs between a retrofitted educational system based on social entrepreneurship, and vocational students who are highly entrepreneurial. The Handbook of Research on Social Entrepreneurship and Solidarity Economics focuses on practical experience and theoretical models for popularizing the concept of social entrepreneurship as a critical element of economic growth. Emphasizing the ways in which social entrepreneurship benefits developing regions, small and medium enterprises, and low-income communities, this handbook of research is a pivotal reference source for professionals, academics, and graduate-level

students in the fields of economics, business administration, sociology, education, politics, and international relations.

Risk and Resilience Alessandro Balducci 2020-11-11 This book presents and discusses methodological approaches and operational tools aimed at increasing the awareness and skills necessary to face the social, economic and environmental challenges usually encountered in spatial planning. In addition, it deals with the concepts of risk and resilience from both a theoretical and operational point of view. The book promotes a better understanding of risk, resilience, and related notions such as vulnerability, fragility and anti-fragility in urban and landscape studies, while also analyzing new planning policies. Accordingly, it will benefit all researchers and public decision-makers looking for an interdisciplinary approach to risk and resilience.
