Financial Sector Development in Ghana James Atta Pehrah 2023-01-20 This book investigates factors that contribute to the development of an efficient financial sector in Ghana. While sustainable finance has long been known to propel economic growth and development, and while many African countries have taken initiatives to develop integrated frameworks of their financial sectors that tackle developmental challenges, scholars and policymakers have always grappled with understanding of factors that enhance performance of the financial sector. In this book, an expert team of authors examines the financial landscape, central bank policies, competition, financial innovation, financial inclusion and banking stability in Ghana, while also exploring how financing models such as enterprise finance and microfinance can be more effective in sustaining financial markets. The authors discuss how Ghana can build fortified institutions, regulatory frameworks, and productive capacity to strengthen the financial sector and foster pathways that will enhance economic development. Empirical and scientific evidence give this book a unique approach that is both qualitative and quantitative.

The Supreme Court of Pennsylvania John J. Hare 2018-01-24 Established in 1684, over a century before the Commonwealth, Pennsylvania's Supreme Court is the oldest appellate court in North America. This balanced, comprehensive history of the Court examines over three centuries of legal proceedings and cases before the body, the controversies and conflicts with which it dealt, and the impact of its decisions and of the case law its justices created Introduced by constitutional scholar Ken Gormley, this volume describes the Supreme Court's structure and powers and focuses at length on the Court's work in deciding notable cases of constitutional law, civil rights, torts, criminal law, labor law, and administrative law. Through three sections, "The Structure and Powers of the Supreme Court," "Decisional Law of the Supreme Court," and "Reporting Supreme Court Decisions," the contributors address the many ways in which the Court and its justices have shaped life and law in Pennsylvania and beyond. They consider how it has adjudicated new and complex issues arising from some of the most notable events and tragedies in American history, including the struggle for religious liberty in colonial Pennsylvania, the Revolutionary War, slavery, the Johnstown Flood, the Homestead Steel Strike and other labor conflicts, both World Wars, and, more recently, the dramatic rise of criminal procedural rights and the expansion of tort law. Featuring an afterword by Chief Justice Saylor and essays by leading jurists, deans, law and history professors, and practicing attorneys, this fair-minded assessment of the Court is destined to become a criterion volume for lawmakers, scholars, and anyone interested in legal history in the Keystone State and the United States.

Obstructive Marketing Maitland Hyslop 2016-05-23

In *Obstructive Marketing*, Maitland Hyslop deals with a very negative kind of activity which embraces activities, legal or otherwise, designed to prevent or restrict the distribution of a product or service, temporarily or permanently, against the wishes of the product manufacturer, service provider or customer. When the author defined this phenomenon as *Obstructive Marketing* and started to research it more than a decade ago, it was seen as a valid concept that was perhaps ahead of its time.

The World has moved on and in the era of globalization a study of this negative aspect of marketing is now required. *Obstructive Marketing* is now seen as the business equivalent of asymmetric warfare, which is increasingly understood because the rise of the South and East at the expense of the North and West has brought some *Obstructive Marketing* stratagems into sharp focus. Using the author's own research, this book explains what *Obstructive Marketing* is and why it is not called *Anti-Marketing*. The author explains who practises *Obstructive Marketing*, where, when and how; and why businesses are particularly vulnerable when entering new markets and engaging in change and innovation. Intriguing concepts such as cultural risk are illuminated along with formal links between *Obstructive Marketing*, asymmetric warfare and terrorism. This all leads to identification of the need for a strong Government/Business partnership to counter the effects of this darkest kind of marketing.
