Social Justice for Children and Young People Caroline S. Clauss-Ehlers 2020-07-31 According to the Convention on the Rights of the Child, the goal of a social justice approach for children is to ensure that children “are better served and protected by justice systems, including the security and social welfare sectors.” Despite this worthy goal, the UN documents how children are rarely viewed as stakeholders in justice rules of law; child justice issues are often dealt with separate from larger justice and security issues; and when justice issues for children are addressed, it is often through a siloed, rather than a comprehensive approach. This volume actively challenges the current youth social justice paradigm through terminology and new approaches that place children and young people front and center in the social justice conversation. Through international consideration, children and young people worldwide are incorporated into the social justice conversation.

Sleep Disorders and Sleep Deprivation Institute of Medicine 2006-10-13 Clinical practice related to sleep problems and sleep disorders has been expanding rapidly in the last few years, but scientific research is not keeping pace. Sleep apnea, insomnia, and restless legs syndrome are three examples of very common disorders for which we have little biological information. This new book cuts across a variety of medical disciplines such as neurology, pulmonology, pediatrics, internal medicine, psychiatry, psychology, otolaryngology, and nursing, as well as other medical practices with an interest in the management of sleep pathology. This area of research is not limited to very young and old patients—sleep disorders reach across all ages and ethnicities. Sleep Disorders and Sleep Deprivation presents a structured analysis that explores the following: Improving awareness among the general public and health care professionals. Increasing investment in interdisciplinary somnology and sleep medicine research training and mentoring activities. Validating and developing new and existing technologies for diagnosis and treatment. This book will be of interest to those looking to learn more about the enormous public health burden of sleep disorders and sleep deprivation and the strikingly limited capacity of the health care enterprise to identify and treat the majority of individuals suffering from sleep problems.

A Taxonomy for Learning, Teaching, and Assessing Lorin W. Anderson 2001 This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.

Researching Early Childhood Literacy in the Classroom Lucy Henning 2019-11-05 This volume demonstrates how the ethnographic approach to research demanded by a ‘Literacy as Social Practice’ perspective can generate fresh insights into what happens when young children engage with schooled literacy tasks. Researching Early Childhood Literacy in the Classroom argues that the lived experience of young children encountering formal schooled literacy curricula should be the foremost consideration in educational reforms intended to improve rates of literacy acquisition in schools. To make this argument, the author suspends traditional concerns with ‘learning’ and

'progress' to concentrate on 'practice' and 'meaning' in a careful analysis of key classroom incidents. The author concludes that such insights suggest a need for re-considering the assumptions upon which educational policy rests. This book will be of great interest to graduate and postgraduate students, researchers, academics, and libraries in the fields of Literacy Studies, Teacher Education, Education Policy and Applied Linguistics.

School, Family, and Community Partnerships Joyce L. Epstein 2018-07-19 Strengthen programs of family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, the fourth edition of the bestseller *School, Family, and Community Partnerships: Your Handbook for Action*, presents tools and guidelines to help develop more effective and more equitable programs of family and community engagement. Written by a team of well-known experts, it provides a theory and framework of six types of involvement for action; up-to-date research on school, family, and community collaboration; and new materials for professional development and on-going technical assistance. Readers also will find: Examples of best practices on the six types of involvement from preschools, and elementary, middle, and high schools Checklists, templates, and evaluations to plan goal-linked partnership programs and assess progress CD-ROM with slides and notes for two presentations: A new awareness session to orient colleagues on the major components of a research-based partnership program, and a full One-Day Team Training Workshop to prepare school teams to develop their partnership programs. As a foundational text, this handbook demonstrates a proven approach to implement and sustain inclusive, goal-linked programs of partnership. It shows how a good partnership program is an essential component of good school organization and school improvement for student success. This book will help every district and all schools strengthen and continually improve their programs of family and community engagement.

Positive Psychology Perspectives on Foreign Language Learning and Teaching Danuta Gabryś-Barker 2016-05-23

This book introduces readers to the principles of a fairly new branch of psychology – positive psychology – and demonstrates how they can be applied in the context of second language acquisition in a natural environment and in instructed foreign language (FL) learning. It focuses both on the well-being and success of the learner and the professional and personal well-being of the teacher. Further, the book stresses the importance of the positive emotions and character strengths of those involved in the process of language learning and teaching, as well as the significant role played by enabling institutions such as school and, at the micro-level, individual FL classes.

Psychology of Intelligence Analysis Richards J Heuer 2020-03-05 In this seminal work, published by the C.I.A. itself, produced by Intelligence veteran Richards Heuer discusses three pivotal points. First, human minds are ill-equipped ("poorly wired") to cope effectively with both inherent and induced uncertainty. Second, increased knowledge of our inherent biases tends to be of little assistance to the analyst. And lastly, tools and techniques that apply higher levels of critical thinking can substantially improve analysis on complex problems.

Community Practice and Urban Youth Melvin Delgado 2015-10-30 Community Practice and Urban Youth is for graduate level students in fields that offer youth studies and community practice courses. Practitioners in these fields, too, will find the book particularly useful in furthering the integration of social justice as a conceptual and philosophical foundation. The use of food, environmental justice, and immigrant-rights and the book's focus on service-learning and civic engagement involving these three topics offers an innovative approach for courses.

Handbook of Research on Pedagogies and Cultural Considerations for Young English Language Learners Onchwari, Grace 2017-10-31 In the schools of today, English learners are the fastest-growing segment of the student population. As such, it is increasingly imperative to educate these students properly, while still practicing inclusion for overall student success. The Handbook of Research on Pedagogies and Cultural Considerations for Young English Language Learners is an authoritative research publication on research-based, theoretical frameworks and best practices for teaching young English language learners. Featuring exhaustive coverage on a variety of topics and perspectives such as co-teaching, inclusion, and social awareness, this publication is ideally designed for academicians, researchers, and students seeking current research on the examination of how diverse backgrounds, cultures, and experiences contribute to curriculum and pedagogy for bilingual young learners.

Engaging in Educational Research-Practice Partnerships Sharon Friesen 2022-12-20 Engaging in Educational Research-Practice Partnerships guides academic researchers into forming mutually respectful, collaborative, and scalable partnerships with school practitioners. Despite robust theoretical and conceptual planning, research on learning is often removed from real settings and generates findings with limited practical relevance, yielding frustration for K-12 stakeholders. This book provides invaluable resources to researchers seeking to work with practitioners as they solve problems and improve outcomes while answering fundamental questions about who gets to generate knowledge, from where, to whom, and in what contexts. A range of illustrative case studies and strategies explores how to apply appropriate theories and methodologies, negotiate agendas that ensure mutually beneficial goals, determine the role of pracademics, establish institutional supports, policies, and procedures that amplify impact and sustainability, and much more.

Self-Awareness (HBR Emotional Intelligence Series) Harvard Business Review 2018-11-13 Self-awareness is the bedrock of emotional intelligence that enables you to see your talents, shortcomings, and potential. But you won't be able to achieve true self-awareness with the usual quarterly feedback and self-reflection alone. This book will teach you how to understand your thoughts and emotions, how to persuade your colleagues to share what they really think of you, and why self-awareness will spark more productive and rewarding relationships with your employees and bosses. This volume includes the work of: Daniel Goleman Robert Steven Kaplan Susan David HOW TO BE HUMAN AT WORK. The HBR Emotional Intelligence Series features smart, essential reading on the human side of professional life from the pages of Harvard Business Review. Each book in the series offers

proven research showing how our emotions impact our work lives, practical advice for managing difficult people and situations, and inspiring essays on what it means to tend to our emotional well-being at work. Uplifting and practical, these books describe the social skills that are critical for ambitious professionals to master.

Early Childhood Theories Today Aaron Bradbury 2022-05-25 If you work in the early years, you have probably heard of Montessori and Bronfenbrenner - but have you heard of Bavolek or Fisher? Contemporary theorists and theories of early childhood learning have much to teach us. It is often forgotten that this learning is still evolving and that new voices are joining the discussion every year. This book introduces early years practitioners to some contemporary theorists and explores their work alongside more well-known thinkers. It demonstrates how these theories relate to everyday practice in the early years and that discussion of them can support ongoing professional learning.

Investment and Interventions to Improve the Quality of Education Systems Jin Chi 2021-12-29 Quality improvement is a major current goal of Education in China and this will be achieved through overall quality improvement of the education system as a whole, a situation that is also the case across the world. Deploying a cost-benefit analysis and multidisciplinary perspectives from education, economics, neurocognition, gender studies, child development, and international development, this book presents a range of critical interventions in education development and investment that have proven to be effective in many countries around the world. The book draws on theoretical and practical experience in the field of education investment and analyses key issues in China's early childhood education, early reading, girls' education, brain science application in international education, small-scale schools in low income areas and teacher education. Students and scholars of education and development and Chinese education will benefit from this title.

Learning English and Chinese as Foreign Languages Wen-Chuan Lin 2019-09-19 Learning English and Chinese is becoming increasingly important to the prospects of young people. This book compares English as a Foreign Language teaching in Taiwan with Chinese as a Foreign Language education in England in order to highlight how classroom activities are embedded within multiple settings, including ethnic or other social group cultures, family and community resources and school visions or goals. The book illustrates how in Taiwan different ethnic groups recognise, access and value English language learning to varying extents. Its findings illuminate why some ethnic groups are highly motivated to learn English and are able to gain privileged economic positions in the job market. In England, access to Chinese is marked by social class, and the book argues that this could augment an 'educational apartheid' that already exists in language teaching in secondary schools, thereby exacerbating existing inequality.

Building Knowledge in Early Childhood Education Jane Murray 2017-04-27 A focal point of early childhood education is how young children build knowledge and the ways that practitioners, parents and carers can help them to do so. Many adults find it challenging to identify what knowledge young children are building and how they do so, making it difficult to support young children's learning and development in the most effective ways. This essential guide will help you to identify and develop young children's knowledge and understanding in early years settings, not only in terms of statutory requirements but far beyond them. Building Knowledge in Early Childhood Education draws on empirical research findings from the Young Children As Researchers (YCAR) project to examine everyday activities and reveal the means that young children use to build knowledge and understanding, as well as exploring the similarities between learning behaviours in early childhood and adult life. Interweaving everyday activities in practice with research and theory, this book covers: how young children construct knowledge; learning, problem-solving and exploring; concepts and conceptualising in early childhood; evidence-based decision-making; how young children behave as researchers. Offering practical advice and suggestions to create opportunities that identify and facilitate young children's own constructions of knowledge and understanding, this book is essential reading for practitioners, students and all those interested in the theories surrounding young children as researchers.

Leadership in the Asia Pacific Chris Rowley 2016-05-06 This book examines the vital nature of the subject of leadership in Asia and looks, in particular, at the processes and practices within the Asia Pacific region. It describes how leadership processes differ across various regions and teaches managers how to better employ these processes in order to improve the success of their organisations. The work moves beyond looking only at Western ideas and explores further leadership perspectives based on differing cultural foundations. It considers the influences of Confucianism, Daoism, Mohism and Legalism and also reflects the character of different leadership styles, such as paternalistic, benevolent transactional and transformational styles, as well as authentic and entrepreneurial approaches. Throughout the text, a wide range of international contributors adopt an array of leadership and other theories, cases, sectors and methods to discuss leadership in Asia. This book was originally published as a special issue of the Asia Pacific Business Review.
