BlackBerry Town Chuck Howitt 2019-09-03 The smartphone was an incredibly successful Canadian invention created by a team of engineers and marketers led by Mike Lazaridis and Jim Balsillie. But there was a third key player involved — the community of Kitchener-Waterloo. In this book Chuck Howitt offers a new history of BlackBerry which documents how the resources and the people of Kitchener-Waterloo supported, facilitated, benefited from and celebrated the achievement that BlackBerry represents. After its few short years of explosive growth and pre-eminence, BlackBerry lost its market to digital juggernauts Apple, Samsung and Huawei. No surprises there. Like Nokia and Motorola before it, BlackBerry was eclipsed.

Thousands of employees lost jobs. Bankruptcy was avoided but the company's founding geniuses were gone, leaving an operation that today is only a fragment of what had been. For Kitchener-Waterloo — as Chuck Howitt tells the story — the BlackBerry experience is a mixed bag of disappointments and major ongoing benefits. The wealth it generated for its founders produced two very important university research institutes. Many recent digital startups have taken advantage of the city's pool of talented and experienced tech workers and ambitious, well-educated university grads. A strong digital and tech industry thrives today in Kitchener-Waterloo — in a way a legacy of the BlackBerry experience. Across Canada, communities hope for homegrown business successes like BlackBerry. This book underlines how a mid-sized, strong community can help grow a world-beating company, and demonstrates the importance of the attitudes and decisions of local institutions in enabling and

The Stafford Act of 2011, a federal government directive, designates libraries as among the temporary facilities delivering essential services, making a Continuity of Operations Plan imperative for libraries. Peppered with informative first-person narratives from librarians recounting emergency situations, Halsted, Clifton, and Wilson cover such topics as: An eight-step approach to developing a risk assessment plan How to draft a one-page service continuity plan Information on how to use mobile devices and social media effectively in times of disaster Sample disaster plans, along with model exercises, manuals and customizable communications Published in cooperation with the Medical Library Association (MLA) www.mla.org

Knife of smart phones. BlackBerry Planet tells the behind-the-scenes story of how this little device has become the machine that connects the planet. Starting with the early years of Mike Lazaridis' invention and his founding of RIM at age 23, it details his drive to innovate, developing what was a glorified pager into the essential corporate communicator, used by everyone from dealmakers to the Queen, from movie stars to the entire US Congress. With access to senior staffers and former RIM employees, BlackBerry Planet tells the inside story about the branding and marketing success of the BlackBerry, from its use during 9/11, which earned RIM a reputation for security and reliability, to the cultural adoption of the iconic device as a must-have symbol, to the backlash against the addictive properties of the "CrackBerry," and the various patent suits RIM has had to

Bridging Research and Good Practices towards Patients

2014-11-21 Ergonomics is a human-centered discipline. This is particularly true for healthcare systems and patient safety where the human's well-being will undergo critical impacts if solutions are not properly designed and practiced. Effective handling of these concerns involves knowledge from healthcare work (e.g., shift work, patient handling, and medical teamwork), to safety research (resilience, medical process control, intensive care, surgery/anesthesiology, and patient involvement), and to more general issues such as community participation in public affairs. Following the founding success, HEPS became an IEA-sponsored event and the series subsequently took place in Strasbourg, France in 2008, and in Oviedo, Spain in 2011. The three remarkable conferences have forged a world-class platform for researchers and practitioners from around the globe to exchange and disseminate the knowledge in HEPS. This volume contains the selected papers presented at the Fourth International conference on HEPS, held from June 23 to 26, 2014 in Taiwan. Blackberry Pie Murder Joanne Fluke 2014-05-16 In this “witty” New York Times bestseller, a sleuthing baker hits someone with her car—and then has to unravel the mystery behind his identity (Publishers Weekly). It's been a sleepy summer for the folks of Lake Eden, Minnesota. In fact, it's been a whole four months since anyone in the Swensen family has come across a dead body—a detail that just made the front page of the local paper. And that means Hannah Swensen can finally focus on her bakery...or can she? Life is never really quiet for Hannah. After all, her mother's wedding is about a month away and guess who's in charge of the planning? Just when Hannah believes her biggest challenge will be choosing buttercream or fondant for the cake, she accidentally hits a stranger with her cookie truck while driving down a winding country road in a raging thunderstorm. Hannah is wracked with guilt, and things get even worse
