Capturing Value in Digital Health Eco-Systems Felix Lena Stephanie 2021-11-10 The United Nation's Sustainable Development Goals call for the establishment of Good Health and Well-being and target a universal digital healthcare ecosystem by 2030. However, existing technology infrastructure is ineffectual in achieving the envisioned target and requires massive reconfiguration to achieve its intended outcome. This book suggests a way forward with fair and efficient digital health networks that provide resource efficiencies and inclusive access to those who are currently under-served. Specifically, a fair and efficient digital health network that provides a common platform to its key stakeholders to facilitate sharing of information with a view to promote cooperation and maximise benefits. A promising platform for this critical application is 'cloud technology' with its offer of computing as a utility and resource sharing. This is an area that has attracted much scholarly attention as it is well-suited to foster such a network and bring together diverse players who would otherwise remain fragmented and be unable to reap the benefits that accrue from cooperation. The fundamental premise is that the notion of value in a digital-health ecosystem is brought about by the sharing and exchange of digital information. However, notwithstanding the potential of information and communication technology to transform the healthcare industry for the better, there are several barriers to its adoption, the most significant one being misaligned incentives for some stakeholders. This book suggests among other findings, that e-health in its true sense can become fair and efficient if and only if a regulatory body concerned assumes responsibility as the custodian of its citizens' health information so that 'collaboration for value' will replace 'competition for revenue' as the new axiom in delivering the public good of healthcare through digital networks.

Die Reise des Wanderimkers Johannes Gruber 2017-08-16 DEM GESCHMACK DES HONIGS AUF DER SPUR Wenn die Bäume im Frühling in voller Blüte stehen, zieht Wanderimker Johannes Gruber mit seinen Bienenvölkern von Weide zu Weide und fängt den Geschmack der Landschaft ein. Je nachdem, wo die Bienen fliegen und welche Pflanzen sie vorfinden, ist der Honig golden oder milchig weiß und schmeckt nach Holunder oder Karamell, duftet nach zarter Bittermandel oder würzigem Harz. EINE HOMMAGE AN DEN HONIG UND DAS IMKERHANDWERK Gemeinsam mit Nina Wessely hat Johannes Gruber Imker im ganzen Land besucht, um dem Geschmack und der Geschichte des Honigs nachzuspüren. Sie beschreiben die Entstehung des Honigs, die Arbeit mit den Bienen, erzählen von feuchten Aulandschaften und saftigen Bergwiesen und den so genannten Trachtpflanzen, die den Bienen Nektar spenden. Wolfgang Hummer hat sie dabei begleitet und über 100 stimmungsvolle Bilder eingefangen. - alles über Honig, seine Historie, Entstehung und Inhaltsstoffe in wundervollen Geschichten und Bildern erzählt - lebendige Landschafts-porträts: Feld und Stadt, Hügel- und

Moorlandschaft, Hochgebirge, Wald und Au - ausführliche Beschreibungen zu den Bienenweiden: Vogelkirsche und Sonnenblume, Fichte und Alpenrose - atmosphärisch dichte Porträts von Imkern aus ganz Österreich und Deutschland - jeder Imker präsentiert sein Lieblingsrezept - mit Bildern zum Träumen von Wolfgang Hummer

Forest Bioeconomy and Climate Change Lauri Hetemäki 2022-08-17 This edited open access volume explores the role of forest bioeconomy in addressing climate change. The authors put a particular focus on planetary boundaries and how the linear, growth-oriented economy, is coupled with climate change and environmental degradation. Biobased products and sustainable production paths have been developed, but how can they be scaled in order to lead to an economic paradigm shift? This and other questions are discussed throughout the volume. Since science indicates that climate change will continue this century, the authors also analyse how forests can be adapted to increasing forest disturbances that changing climate are expected to cause. The authors propose climate-smart forestry as useful approach for climate mitigation and adaptation of forests to climate change, as wells as sustainable increase of economic well-being based on forestry. The book illustrates the application of climate-smart forestry in the Czech Republic, Finland, Germany and Spain, i.e., in EU countries with quite different forests and forest sectors. This proactive and inspiring volume is an essential resource for Forest Management professionals, decision makers, scientists, and forestry students.

Journal of Character Education Jacques S. Benninga 2021-04-01 Sample Chapters- FOR THE BETTER, Marvin W Berkowitz, University of Missouri-St. Louis - THE OVERLOOKED INEQUITY, Eric Schaps The Journal of Character Education is the only professional journal in education devoted to character education. It is designed to cover the field-from the latest research to applied best practices. We include original research reports, editorials and conceptual articles by the best minds in our field, reviews of the latest books, and other relevant strategies and manuscripts by educators that describe best practices in teaching and learning related to character education. The Journal of Character Education has for over a decade been the sole scholarly journal focused on research, theory, measurement, and practice of character education. In this issue of the Journal of Character Education we return to something foundational and introduce something new. The foundational element is a set of six independent scholarly manuscripts by a mix of emerging and established scholars. We are pleased to introduce a new feature of the Journal of

Character Education in this issue, namely a section we are calling simply "Opinion." We began the JCE with an exclusive focus on publishing scholarship because there was no scholarly journal that focused on character education. Over time we realized that we wanted to speak about practice and particularly to practitioners as well. Hence we created a section we call "Voices" to present innovations and perspectives representing the "voices" of exemplary practitioners of character education. Now we introduce the "Opinion" section that will allow us to publish perspectives from leading authorities in the field that might be more provocative. We would love to hear responses to either or both opinion articles and are working on plans to share such responses, perhaps on one of our related websites. At this point, we plan on publishing more opinion articles, and for now, by invitation. However, we are always willing to consider unsolicited articles for possible inclusion in the JCE.

Advancing Crisis Communication Effectiveness Yan Jin 2020-12-29 Advancing Crisis Communication Effectiveness shows how crisis communication plans and efforts for complex and challenging issues benefit when academic perspectives are connected with practitioner experiences. This book brings crisis and public relations scholars together with practicing professionals to integrate academic theories and research with the knowledge and lessons learned on the frontlines of crisis communication and management. This book illustrates how having insights and observations from both leading crisis communication scholars and professionals strengthens crisis management and communication strategies, plans, and coordination. Chapters co-authored by leading scholars and professionals highlight how academic theories and research can inform crisis management and response - and how practitioners can utilize, inform, and strengthen academic theories and research. For each topic area covered, examples and applications are provided that show how integrating public relations scholarship with practice can advance crisis communication effectiveness. This book represents a unique and timely contribution to the field of crisis management and communication. It will be an important resource for public relations and crisis management and communication scholars, educators, professionals, consultants, and graduate students.

Industrial Symbiosis for the Circular Economy Roberta Salomone 2020-02-07 The book is designed to help public and private decision-makers and academics deepen their knowledge and understanding of the contexts, obstacles and challenges of a variety of business types involved in Industrial Symbiosis and Circular Economy practices. Industrial Symbiosis is reported in the Action Plan on the Circular Economy developed by the European Commission in 2015 (COM / 2015/0614 final) and in its revision of 14 March 2017, but relatively little is known of how these practices start, develop or fail, and mutate in a rapidly changing context. Including selected contributions presented at the 24th ISDRS 2018 Conference, "Actions for a Sustainable World: from theory to practice" in the two theme tracks "5c. Circular economy, zero waste & innovation" and "5g. Industrial symbiosis, networking and cooperation as part of industrial ecology", this book offers a transdisciplinary perspective on real experiences of industrial symbiosis, performed both by industries and the scientific community, best practices, success and unsuccessful cases (implemented or under implementation), with the final aim to promote the adoption of Industrial Symbiosis as an operational and systematic tool for the Circular Economy. In particular, a focus on the environmental, social, and economic impact of Circular Economy and Industrial Symbiosis practices, and how

those impacts may be context and/or scale dependent is given.

Mastering Microsoft Windows, Novell NetWare and UNIX William J Buchanan 1999-11-11 Many computer networks are now a hybrid of different types, typically a mixture of two or more different operating systems. These systems must successfully integrate for the complete system to operate properly, whether it is in terms of its compatibility, its security or its ease-of-use. The main aim of this book is to cover the configuration, architecture and networking of the three of the most popular networking operating systems - Microsoft Windows, Novell NetWare and UNIX.
