**The Regulation of Financial Planning in Australia** Angelique Nadia Sweetman McInnes 2019-08-20 This book investigates the legitimacy of the current Australian Financial Services Licensee-Authorised Representative (AFSL-AR) licensing model, as specified in the Commonwealth Corporations Act 2001. The book rectifies the deficiency in scholarly attention to this matter by developing a new conceptualised framework for the financial planning discipline. It takes into account theories in agency, legislation, legitimacy and the independent individual regulatory regimes in other professions; thereafter integrating this framework with the financial planning theory to examine the legitimacy, or what was found to be the illegitimacy of licensing advisers via multiple third party conflicted commercially oriented licensees. This book makes a very useful reference to understanding financial planning licencing model in Australia.

**Reforming the Governance of the Financial Sector** David G. Mayes 2013 This volume argues that good governance is crucial to the success of any regulatory regime, and explores how better governance of the financial sector can be achieved.

**Accounting, Accountability and Society** Mara Del Baldo 2020-03-31 This book addresses the growing interest among policymakers, practitioners and academics in the evolution and the future implications of social, environmental and sustainability accounting. To do so, it examines the conceptual and practical application of accountability at multiple levels and contexts, and presents a range of case studies focusing on salient issues, perspectives and the potential of multidimensional accounting and reporting regimes. Intended for a diverse audience, the book allows readers to gain a better understanding of the topics, encourages dialogue and debate, and stimulates innovation in scholarship, policy and practice.

**Harnessing Renewable Energy in Electric Power Systems** Boaz Moselle 2010-09-23 Reflecting its reliance on fossil fuels, the electric power industry produces the majority of the world’s greenhouse gas emissions. The need for a revolution in the industry becomes further apparent given that ‘decarbonization’ means an increasing electrification of other sectors of the economy in particular, through a switch from gasoline to electric vehicles. Of the options for producing electric power without significant greenhouse gas emissions, renewable energy is most attractive to policymakers, as it promises increased national self-reliance on energy supplies and the creation of new industries and jobs, without the safety and political concerns of nuclear power or the unproven technology of carbon capture and storage. Drawing on both economic theory and the experiences of the United States and EU member states, Harnessing Renewable Energy addresses the key questions surrounding renewable energy policies. How appropriate is the focus on renewable power as a primary tool for reducing greenhouse gas emissions? If renewable energy is given specific support, what form should that support take? What are the implications for power markets if renewable generation is widely adopted? Thorough and well-evidenced, this book will be of interest to a broad range of policymakers, the electric power industry, and economists who study energy and environmental issues.

**The Rowman & Littlefield Handbook of Media Management and Business** L. Meghan Mahoney 2020-12-15 The Rowman & Littlefield Handbook of Media Management and Business connects research and industry practice to offer a strategic guide for aspiring and current media professionals in convergent environments. As a comprehensive one-stop reference for understanding business issues that drive the production and distribution of content that informs, entertains, and persuades audiences, aims to inspire and inform forward-thinking media management leaders. The handbook examines media management and business through a convergent media approach, rather than focusing on medium-specific strategies. By reflecting media management issues in the information, entertainment, sports, gaming industries, contributed chapters explore the unique opportunities and challenges brought by media convergence, while highlighting the fundamental philosophy, concepts, and practices unchanged in such a dynamic environment. this handbook examines media management through a global perspective, and encourages readers to connect their own diverse development to a broader global context. It is an important addition to the growing literature in media management, with a focus on new media technologies, business management, and internationalization.

**Modern Corporations and Strategies at Work** Bhabani Shankar Nayak 2022-09-13 Strategies are integral to growth, expansion and sustainability of modern corporations. The agile strategies are central to overcome challenges of the turbulent times accelerated by risks, pandemics, wars, political instabilities and environmental disasters. This book on ‘Modern Corporations and Strategies at Work’ focuses on different strategies followed by corporations. This book makes critical reading of corporate strategies and evaluates them. This book offers insights into the way corporations develop and implement strategies to face different challenges. This book explores wider world of corporate strategies and their limitations. The future of world economy and international business is shaped by large modern corporations and their rapidly changing business, management and marketing strategies. This book explores the way modern nation states are standing behind the corporations to ensure that their strategies are successful in a world of complex challenges. This book further examines how collaborations between the state and modern corporations are part of the corporate strategy at work today. Further how modern strategies are integral to the start, growth, expansion and sustainability of modern corporations. This book explores operational agilities and organisational abilities of modern corporations to engage with diverse challenges and overcome the crisis. The volatile business environment is creating conditions of instabilities for the market to function effectively and efficiently. Such conditions are weakening all agents and structures operating within international business and world economy. This book argues that there is an urgent need for a profound reshaping of the corporate strategies to deal with a post pandemic society. It is perhaps as far reaching as that the remaking of corporate strategies are in the crossroads today due to its intrinsic profit motives. The remaking of modern corporate strategy comes in the wake of pestilence of a global health crisis; its full impacts are yet to be felt, evaluated and understood. A comprehensive shift in corporate strategy from formulation, implementation and evaluation to remaking is at the heart of this transformations in the working of the corporations and their fundamental ideological apparatus.

**Early Childhood Education for Marginalized Children in India** Monimalika Day 2021-11 This book presents the challenges of providing pre-school education to children from marginalized communities in India and approaches that address these issues.

**Brainwashed** Sally Satel 2013-06-04 Demonstrates how the explanatory power of brain scans in particular and neuroscience more generally has been overestimated, arguing that the overzealous application of brain science has undermined notions of free will and responsibility.

**Advances in Biometrics** G.R. Sinha 2019-12-13 This book provides a framework for robust and novel biometric techniques, along with implementation and design strategies. The theory, principles, pragmatic and modern methods, and future directions of biometrics are presented, along with in-depth coverage of biometric applications in driverless cars, automated and AI-based systems, IoT, and wearable devices. Additional coverage includes computer vision and pattern recognition, cybersecurity, cognitive computing, soft biometrics, and the social impact of biometric technology. The book will be a valuable reference for researchers, faculty, and practicing professionals working in biometrics and related fields, such as image processing, computer vision, and artificial intelligence. Highlights robust and novel biometrics techniques Provides implementation strategies and future research directions in the field of biometrics Includes case studies and emerging applications

**Hacking Wireless Access Points** Jennifer Kurtz 2016-12-08 Hacking Wireless Access Points: Cracking, Tracking, and Signal Jacking provides readers with a deeper understanding of the hacking threats that exist with mobile phones, laptops, routers, and navigation systems. In addition, applications for Bluetooth and near field communication (NFC) technology continue to multiply, with athletic shoes, heart rate monitors, fitness sensors, cameras, printers, headsets, fitness trackers, household appliances, and the number and types of wireless devices all continuing to increase dramatically. The book demonstrates a variety of ways that these vulnerabilities can be—and have been—exploited, and how the unfortunate consequences of such exploitations can be mitigated through the responsible use of technology. Explains how the wireless access points in common, everyday devices can expose us to hacks and threats Teaches how wireless access points can be hacked, also providing the techniques necessary to protect and defend data Presents concrete examples and real-world guidance on how to protect against wireless access point attacks

**Capabilities and Governance of Nanotechnology in the Developing World** Shilpanjali Deshpande Sarma 2013-05-24 The imperative for responsible innovation in the nanotechnology domain has inspired and provoked assorted views on its trajectory, potential implications as well as appropriate pathways for its development across a spectrum of stakeholders. These debates assume greater significance in the context of developing nations since harnessing the inherent potential of this transformational technology presumes the establishment of simultaneous capabilities to cutting-edge technological innovation as well as risk governance, regulation and public engagement in an environment challenged by limited resources, weak innovation systems and inadequate abilities for risk management.This book seeks to examine developments, opportunities, concerns and challenges in

nanotechnology from a developing country perspective raising complex questions and issues in the course of the responsible development of nanotechnology. It covers a range of issues such as potential R & D prospects, S&T capacities and innovation systems, issues of environment, health and safety, risk and regulatory preparedness, and prospective socio-economic and ethical repercussions, with a focus on Indian developments. Based on half a decade of interdisciplinary research and informed by multi-stakeholder insights on the aforementioned aspects, it proposes options for effective and inclusive governance for nanotechnology in India. **India and Iran in Contemporary Relations** R. Sidda Goud 2014-04-20 This edited book is an outcome of the International Conference on ‘India and Iran in Contemporary Relations’, organized by the Centre for Indian Ocean Studies, Osmania University in cooperation with the Iran Consulate General at Hyderabad in India in November 2013. The book addresses the India-Iran bilateral relations dating back to the beginning of the Indo-Aryan civilization in the 7th Century B.C. to the current global controversy over the Iranian nuclear programme and India’s stand on the issue of sanctions imposed by the United States. The book highlights besides economic and commercial ties, the strong cultural relations. The volume analyses in depth the new areas of cooperation and conflict, the extra regional powers, energy and nuclear security and economic and trade cooperation. This book will be of considerable interest to students and scholars of international relations, sociology, politics and economics.

**The Black Panther Party and Transformative Pedagogy** Omari L. Dyson 2013-11-14 The Black Panther Party and Transformative Pedagogy: Place-Based Education in Philadelphia, by Omari L. Dyson, draws attention to the social dynamics that spawned a Philadelphia Branch of the Black Panther Party.

**Mainstreaming Building Energy Efficiency Codes in Developing Countries** Feng Liu 2010-10-12 Urbanization and growing wealth in developing countries portend a large increase of demand for modern energy services in residential, commercial and public-service buildings in the coming decades. Pursuing energy efficiency in buildings is vital to energy security in developing countries and is identified by the Intergovernment Panel on Climate Change as having the greatest potential for cost-effective reduction of CO2 emissions by 2030 among all energy-consuming sectors. Building energy efficiency codes (BEECs), along with energy efficiency standards for major appliances and equipment, are broadly recognized as a necessary government intervention to overcome persistent market barriers to capturing the economic potential of energy efficiency gains in the residential, commercial and public-service sectors. Implementation of BEECs help prevent costly energy wastes over the lifecycles of buildings in space heating, air conditioning, lighting, and other energy service requirements. Nonetheless, achieving the full potential of energy savings afforded by more energy-efficient buildings requires holding people who live or work in buildings accountable for the cost of energy services. Compliance enforcement has been the biggest challenge to implementing BEECs. This report summarizes the findings of an extensive literature survey of the experiences of implementing BEECs in developed countries, as well as those from case studies of China, Egypt, India, and Mexico. It also serves as a primer on the basic features and contents of BEECs and the commonly adopted compliance and enforcement approaches. This report highlights the key challenges to improving compliance enforcement in developing countries, including government commitment to energy efficiency, the effectiveness of government oversight of the construction sector, the compliance capacity of building supply chain, and financing constraints. The report notes that the process of transforming a country’s building supply chain toward delivering increasingly more energy-efficient buildings takes time and requires persistent government intervention through uniformly enforced and regularly updated BEECs. The report recommends increased international support in strengthening the enforcement infrastructure for BEECs in middle-income developing countries. For low- and lower-middle-income countries, there is an urgent need to assist in improving the effectiveness of government oversight system for building construction, laying the foundation for the system to also cover BEECs.

**The River Runs Black** Elizabeth C. Economy 2011-05-15 China’s spectacular economic growth over the past two decades has dramatically depleted the country’s natural resources and produced skyrocketing rates of pollution. Environmental degradation in China has also contributed to significant public health problems, mass migration, economic loss, and social unrest. In *The River Runs Black*, Elizabeth C. Economy examines China’s growing environmental crisis and its implications for the country’s future development. Drawing on historical research, case studies, and interviews with officials, scholars, and activists in China, the author traces the economic and political roots of China’s environmental challenge and the evolution of the leadership’s response. She argues that China’s current approach to environmental protection mirrors the one embraced for economic development: devolving authority to local officials, opening the door to private actors, and inviting participation from the international community, while retaining only weak central control. The result has been a patchwork of environmental protection in which a few wealthy regions with strong leaders and international ties improve their local environments, while most of the country continues to deteriorate, sometimes suffering irrevocable damage. Economy compares China’s response with the experience of other societies and sketches out several possible futures for the country. This second edition is updated with information about events during the past five years, covering China’s tumultuous transformation of its economy and its landscape as it deals with the political implications of this behavior as viewed by an international community ever more concerned about climate change and dwindling energy resources.

**Payment Services** Casanova, John 2022-02-15 The rise of Fintech and crypto-assets in the payments sector presents new opportunities and challenges for firms, regulators and policymakers, and the law is continually changing to keep pace with these developments. This book provides an overview and practical examination of key areas of payments law and regulation in the EU and UK, as well as introductions to analogous legal regimes in the United States, Hong Kong, Singapore and sub-Saharan Africa.

**McDonald’s**

**Strengthening Forensic Science in the United States** National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation** Intergovernmental Panel on Climate Change 2012-05-28 Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. This Special Report explores the social as well as physical dimensions of weather- and climate-related disasters, considering opportunities for managing risks at local to international scales. SREX was approved and accepted by the Intergovernmental Panel on Climate Change (IPCC) on 18 November 2011 in Kampala, Uganda.

**Anticipatory Policymaking** Rob A. DeLeo 2015-09-16 Public policy analysts and political pundits alike tend to describe the policymaking process as a reactive sequence in which government develops solutions for clearly evident and identifiable problems. While this depiction holds true in many cases, it fails to account for instances in which public policy is enacted in anticipation of a potential future problem. Whereas traditional policy concerns manifest themselves through ongoing harms, "anticipatory problems" are projected to occur sometime in the future, and it is the prospect of their potentially catastrophic impact that generates intense speculation and concern in the present. Anticipatory Policymaking: When Government Acts to Prevent Problems and Why It Is So Difficult provides an in depth examination of the complex process through which United States government institutions anticipate emerging threats. Using contemporary debates over the risks associated with nanotechnology, pandemic influenza, and global warming as case study material, Rob A. DeLeo highlights the distinctive features of proactive governance. By challenging the pervasive assumption of reactive policymaking, DeLeo provides a dynamic approach for conceptualizing the political dimensions of anticipatory policy change.

**Sport and Militarism** Michael L. Butterworth 2017-06-14 The institutional relationship between sport and the military appears to be intensifying. In the US for example, which faced global criticism for its foreign policy during the “war on terror,” militaristic images are commonplace at sporting events. The growing global phenomenon of conflating sport with war calls for closer analysis. This critical, interdisciplinary and international book seeks to identify intersections of sport and militarism as a means to interrogate, interrupt and intervene on behalf of democratic, peaceful politics. Viewing sport as a crucial site in which militarism is made visible and

legitimate, the book explores the connections between sport, the military and the state, and their consequent impact on wider culture. Featuring case studies on sports such as association football, baseball and athletics from countries including the US, UK, Germany, Canada, South Africa, Brazil and Japan, each chapter sheds new light on the shifting significance of sport in our society. This book is fascinating reading for all those interested in sport and politics, the sociology of sport, communication studies, the ethics and philosophy of sport, or military sociology.

**Economic Outlook for Southeast Asia, China and India 2019 – Update Responding to Environmental Hazards in Cities** OECD 2019-07-10 The Economic Outlook for Southeast Asia, China and India is a bi-annual publication on regional economic growth, development and regional integration in Emerging Asia. It focuses on the economic conditions of Association of Southeast Asian Nations (ASEAN) member countries: Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, the Philippines, Singapore, Thailand and Viet Nam. It also addresses relevant economic issues in China and India to fully reflect economic developments in the region.

**Model Rules of Professional Conduct** American Bar Association. House of Delegates 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule’s purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

**Rehabilitation of Pipelines Using Fiber-reinforced Polymer (FRP) Composites** Vistasp M. Karbhari 2015-05-23 Rehabilitation of Pipelines Using Fibre-reinforced Polymer (FRP) Composites presents information on this critical component of industrial and civil infrastructures, also exploring the particular challenges that exist in the monitor and repair of pipeline systems. This book reviews key issues and techniques in this important area, including general issues such as the range of techniques using FRP composites and how they compare with the use of steel sleeves. In addition, the book discusses particular techniques, such as sleeve repair, patching, and overwrap systems. Reviews key issues and techniques in the use of fiber reinforced polymer (FRP) composites as a flexible and cost-effective means to repair aging, corroded, or damaged pipelines Examines general issues, including the range of techniques using FRP composites and how they compare with the use of steel sleeves Discusses particular techniques such as sleeve repair, patching, and overwrap systems

**Energy Efficiency** Steven Fawkes 2016-04-29 Energy risk has reappeared on the corporate and social agenda with a bang and the complexity of the issues has increased many-fold since the days of the last great wave of concern following the oil crises of the 1970s. Steven Fawkes’ Energy Efficiency is a comprehensive guide for managers and policy-makers to the fundamental questions underpinning energy-efficiency and our responses to it: € what do we really mean by energy efficiency? € what is the potential (in different dimensions)? € why it is important? € what management processes lead to optimisation of energy efficiency? € what technologies are useful for improving energy efficiency? € what policies can be used to promote energy efficiency? € how can energy efficiency be financed? € how can energy suppliers engage with energy efficiency? The result is the most comprehensive review to-date of the barriers and opportunities associated with improving energy efficiency. Clearly written and erudite, Steven Fawkes addresses every aspect of energy efficiency, including the huge and vitally important untapped potential offered by effective energy management and the application of existing technology. He also identifies barriers, such as the rebound effect and how they can be mitigated and he provides a comprehensive review of innovative energy efficiency financing options. This book is a ‘must read’ for anyone with an interest in energy supply and demand reduction.

**Pizza and Pizza Chefs in Japan: A Case of Culinary Globalization** Rossella Ceccarini 2011-02-03 This book analyzes the reception of artisanal pizza in Japan through the lens of professional pizza chefs. The movement of food and workers, and the impact that such movements have on the artisanal workers occupation are at issue.

**Social Media Marketing: A Strategic Approach** Melissa Barker 2012-03-09 Social Media Marketing: A Strategic Approach promises to be the seminal textbook in the field with its distinctive conceptual foundation and practical approach to developing successful social media marketing plans. A proven eight-step social media planning model provides students with a cumulative learning experience, showing them how to construct social media strategies that achieve desired marketing goals. These marketing goals shape the development of tailored social media strategies. Special attention is given to the most effective techniques for identifying targeted marketing on the social web, with emphasis on the creation of personas that represent the critical online market segments for a company. Students discover how to put these well-defined personas to work in selecting the optimal social media platforms for reaching an organization’s marketing goals. Students are taught rules of engagement and social media ethics for behaving properly as marketers on the social web. With these guidelines in mind, the most productive marketing tactics for each type of major social media platform are examined in depth. These platform-specific tactics, along with all the proceeding material in the book, are brought together in the final chapter to create a comprehensive social media marketing plan, with detailed explanations and illustrations from a real world plan. Extensive consideration is given to monitoring, evaluating, and tuning the implementation of social media marketing initiatives. In addition, students are introduced to the most useful quantitative and qualitative social media measurements, along with various ways to estimate an organization’s return on investment in social media marketing activities. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Making an Impact on Policing and Crime** Clifford Stott 2020-10-19 Making an Impact on Policing and Crime: Psychological Research, Policy and Practice applies a range of case studies and examples of psychological research by international, leading researchers to tackle real-world issues within the field of crime and policing. Making an Impact on Policing and Crime documents the application of cutting-edge research to real-world policing and explains how psychologists’ insights have been adapted and developed to offer effective solutions across the criminal justice system. The experts featured in this collection cover a range of psychological topics surrounding the field, including the prevention and reduction of sexual offending and reoffending, the use of CCTV and ‘super-recognisers’, forensic questioning of vulnerable witnesses, the accuracy of nonverbal and verbal lie detection interview techniques, psychological ‘drivers’ of political violence, theoretical models of police-community relations, and the social and political significance of urban ‘riots’. This collection is a vital resource for practitioners in policing fields and the court system and professionals working with offenders, as well as students and researchers in related disciplines.

**Cryptography and Security: From Theory to Applications** David Naccache 2012-03 This Festschrift volume, published in honor of Jean-Jaques Quisquater on the occasion of his 65th Birthday, contains 33 papers from colleagues all over the world and deals with all the fields to which Jean-Jacques dedicated his work during his academic career. Focusing on personal tributes and re-visits of Jean-Jacques Quisquater’s legacy, the volume addresses the following central topics: symmetric and asymmetric cryptography, side-channels attacks, hardware and implementations, smart cards, and information security. In addition there are four more contributions just “as diverse as Jean-Jacques’ scientific interests”.

**Law, Normative Pluralism, and Post-Disaster Recovery** Vivencio O. Ballano 2017-09-14 This book looks at how the multiplicity of formal and informal normative systems that actualize the post-disaster recovery goals of the country’s Disaster Risk Reduction and Management Act of 2010 has resulted in the inadequate housing and relocation of Typhoon Ketsana victims in the Philippines. Using the sociological and normative pluralist perspectives and the case study method, it evaluates the level of conformity of the components of the housing project according to international conventions and legal standards. It highlights the negative unintended consequences caused by the complex normative regimes of various competing stakeholders, rigid real estate regulation, and the unscrupulous involvement of powerful and ‘corrupt’ real estate developers and housing groups as largely contributing to the project’s deviation from the law’s proactive objectives. This book attempts to promote the socio-legal perspectives which have long been overlooked in disaster research. Finally, it invites policymakers to enact a comprehensive disaster law and create a one-stop disaster management agency to improve the long-term rehabilitation of disaster victims in developing countries such as the Philippines.

**International Migration** Philomena de Lima 2016-11-01 Migration has been a widely discussed and debated issue in recent years while events in Africa and the Arab world have caused migration on a huge scale and pushed

the subject close to the top of the political agenda. Globalisation, climate change and demographic developments in the West provide a backdrop to the current discourses and policies on migration. There is a conflict between humanitarian impulses and protectionism. Recent decades have seen an increase in research and writing, in the UK and internationally, on the different aspects of migration. The increase in numbers and diversity of migrants is recognised as posing significant challenges and opportunities for social and public policies. Simultaneously the policy landscape on migrants entitlements to public services, as well as notions of social protection. are in a state of flux in the context of the adoption of austerity policies across the European Union and beyond. These trends have significant implications on access to services generally, including health and social care services. Philomena de Lima provides a contemporary understanding of migrants and migration processes and trends. She reviews the conceptual and theoretical discourses on integration and citizenship rights with a particular focus on issues related to migrants access to services, including health and social care services. The book will inform and educate social science students, policy-makers and those wrestling on a practical level with the implications of migration.

**Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation** Christopher B. Field 2012-05-28 This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

**Ontological Landscapes** Vesselin Petrov 2013-05-02 In the last decades ontology has been successfully developed in many directions and has fostered various approaches for depicting the contemporary ontological landscapes. An important task is to outline recent thought on the conceptual interfaces between science and philosophy. The present volume opens up a view onto the plurality of different ontological schemes. The papers collected here discuss the interfaces between ontology and empirical research that are created by the notions of a whole, a thought, a number, a quality, an ability, a kind, notions of causation, dynamicity, and social objects, the application of relevant logical tools for the reconsideration of ontological paradigms, as well as the investigation of the consequences in cognitive sciences on the development of ontology.

**Global Aging** Frank J. Whittington, PhD 2019-12-01 Praise for the first edition: “This book is exemplary in amassing demographic, policy, and sociopsychological data from around the world... The content of the book is rich with current information seldom accumulated into one source! recommend this volume to gerontologists, aging studies undergraduate and graduate students... demographers, and global studies scholars.” Dr. Carol A. Gosselink, PsycCritiques Written by leading scholars, this esteemed text on global aging is distinguished by its unique perspective on universal similarities and sociocultural differences across nations. Fully revised, updated, and reorganized, the second edition presents comprehensive coverage of major topics in social gerontology and expands its treatment of health behavior, health care, families, caregiving, older workers, and retirement. It delivers new information on living environments, religious beliefs and practices; environmental threats; cross-cultural views of dementia; ageism in advertising; age-friendly communities; global immigration and cultural assimilation, and end-of-life caregiving. The second edition also offers additional case studies, first-person narratives and focused essays to enhance core material and a greater number of non-Western contributors. The topical essays reflect changing mores and current issues affecting societies and the aging experience. Discussion questions conclude each chapter, and an Instructor’s Manual and PowerPoint slides are available to instructors. Print version of the book includes free, searchable, digital access to entire contents. New to the Second Edition: Expanded content on health beliefs and health behavior, religious belief and practice, environmental threats, housing and living environments, physical security, consumer control of health care, family life, and more Additional topics on global immigration and cultural assimilation, age portrayals in advertising, voluntarism, and the use of social media in caregiving Abundant new and expanded essays New case studies and first-person narratives Many more non-Western contributors Key Features: Delivers comprehensive coverage of major topics in gerontology Uses a unique comparative, cross-national perspective Authored by world-renowned aging scholars Includes case studies/essays/personal narratives to enliven core information Provides the most comprehensive demographic data on aging around the world

**Environment, Climate, and Social Justice** Devendraraj Madhanagopal 2022-08-10 This book approaches environmental, climate, and social justice comprehensively and interlinked. The contributors, predominantly from the Global South and have lived experiences, challenge the eurocentrism that dominates knowledge production and discourses on environmental and climate [in] justices. The collection of works balances theoretical, empirical, and practical aspects to address environmental and climate justice challenges through the lens of social justice. This book gives voice to scholars of the Global South and uses an interdisciplinary approach to show the complexity of the problem and the opportunities for solutions, making this book a powerful resource in teaching, research, and advocacy efforts.
