Game Feel Steve Swink 2008-10-13 "Game Feel" exposes "feel" as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks where game design is concerned. They create the meta-sensation of involvement with a game. The understanding of how game designers create feel, and affect feel are only partially understood by most in the field and tends to be overlooked as a method or course of study, yet a game's feel is central to a game's success. This book brings the subject of feel to light by consolidating existing theories into a cohesive book. The book covers topics like the role of sound, ancillary indicators, the importance of metaphor, how people perceive things, and a brief history of feel in games. The associated web site contains a playset with ready-made tools to design feel in games, six key components to creating virtual sensation. There's a play palette too, so the designer can first experience the importance of that component by altering variables and feeling the results. The playset allows the reader to experience each of the sensations described in the book, and then allows them to apply them to their own projects. Creating game feel without having to program, essentially. The final version of the playset will have enough flexibility that the reader will be able to use it as a companion to the exercises in the book, working through each one to create the feel described.

The Financial Crisis Inquiry Report, Authorized Edition Financial Crisis Inquiry Commission 2011-01-27 The definitive report on what caused America's economic meltdown and who was responsible. The financial and economic crisis has touched the lives of millions of Americans who have lost their jobs and their homes, but many have little understanding of how it happened. Now, in this very accessible report, readers can get the facts. Formed in May 2009, the Financial Crisis Inquiry Commission (FCIC) is a panel of 10 commissioners with experience in business, regulations, economics, and housing, chosen by Congress to explain what happened and why it happened. This panel has had subpoena power that enabled them to interview people and examine documents that no reporter had access to. The FCIC has reviewed millions of pages of documents, and interviewed more than 600 leaders, experts, and participants in the financial markets and government regulatory agencies, as well as individuals and businesses affected by the crisis. In the tradition of The 9/11 Commission Report, "The Financial Crisis Inquiry Report" will be a comprehensive book for the lay reader, complete with a glossary, charts, and easy-to-read diagrams, and a timeline that includes important events. It will be read by policy makers, corporate executives, regulators, government agencies, and the American people.

Gravity Check Alex Van Tol 2011-05-01 Jamie is determined that nothing—not even his annoyingly popular younger brother Seth—is going to spoil his fun at a mountain biking camp in the backcountry. Nothing but stumbling on a giant grow-op in the woods, that is. And watching their fellow campers get captured by violent drug dealers. And working with Seth to figure out a way to save them without getting caught themselves.

Chicago Mountain Bike Trails Guide P. L. Strazz 2003-04-01

The Masked Rider Neil Peart 2010-11-16 Neil Peart's travel memoir of thoughts, observations, and experiences as he cycles through West Africa, reveals the subtle, yet powerful writing style that has made him one of rock's greatest lyricists. As he describes his extraordinary journey and his experiences ' from the pains of dysentery, to a confrontation with an armed soldier, to navigating dirt roads off the beaten path ' he reveals his own emotional landscape, and along the way, the different "masks" that he discovers he wears. "Cycling is a good way to travel anywhere, but especially in Africa. You are independent and mobile, and yet travel at people speed ' fast enough to travel on to another town in the cooler morning hours, but slow enough to meet people: the old farmer at the roadside who raises his hand and says, 'You are welcome,' the tireless women who offer a smile to a passing cyclist, the children whose laughter transcends the humblest home."

Mountain Bike Master Mark Langton 2013-03-15 Ride faster, better, and stronger with professional mountain bike skills guide Mark Langton. *Mountain Bike Master* is a practical and inspiring guide that begins with the fundamental skills like shifting, braking, and climbing. Simple moves such as correcting seat-height adjustment and learning how to best-shift when engaging a steep ascent add tons of fun and efficiency to any ride. Intermediate skills, including riding technical terrain, power wheelies, and cornering, zip readers into the next level of riding competence. Now sporting a wide grin and the confidence of nailing the basic and intermediate skills, readers transition into advanced skills such as jumps, bunny hops, and counter steering. After reading and putting Langton's lessons to practice, what once was a thigh-quivering lap around the park should now feel and look more like an iron-saddled grind up a steep mountain path. Today's demanding trails and high-tech bikes meet needs for speed, bumps, and thrills. Veteran mountain biker Mark Langton expertly guides and instills the confidence needed to get out there and have a great time while minimizing injury to self and bike. Headed into his 22nd year as a mountain bike trainer and guide, Langton and *Mountain Bike Master* take the guesswork out of quickly and safely mastering the art and science of cleanly rounding banked mountain curves and getting the most pedal for the metal with efficient riding basics.

Democratizing Innovation Eric Von Hippel 2006-02-17 The process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy. Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and firms—often freely share their innovations with others, creating user-innovation communities and a rich intellectual commons. In *Democratizing Innovation*, Eric von Hippel looks closely at this emerging system of user-centered

innovation. He explains why and when users find it profitable to develop new products and services for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in physical products. Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and service development is concentrated among "lead users," who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned to assist user-innovators by providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a democratized user-centered innovation system, says von Hippel, is well worth striving for. An electronic version of this book is available under a Creative Commons license.

Down to Earth Lisa Parks 2012-06-13 Down to Earth presents the first comprehensive overview of the geopolitical maneuvers, financial investments, technological innovations, and ideological struggles that take place behind the scenes of the satellite industry. Satellite projects that have not received extensive coverage—microsatellites in China,

WorldSpace in South Africa, SiriusXM, the failures of USA 193 and Cosmos 954, and Iridium—are explored. This collection takes readers on a voyage through a truly global industry, from the sites where satellites are launched to the corporate clean rooms where they are designed, and along the orbits and paths that satellites traverse. Combining a practical introduction to the mechanics of the satellite industry, a history of how its practices and technologies have evolved, and a sophisticated theoretical analysis of satellite cultures, Down to Earth opens up a new space for global media studies.
