*Caste, Class and Catholicism in India 1789-1914* Kenneth Ballhatchet 2013-12-16 This is a study of the ways in which changing social expectations among Indian Catholics confronted the Roman Church with new questions, as well as giving fresh urgency to the old problem of the persistence of caste among Christians. Low-caste restiveness prompted different reactions among European missionaries and high-caste Indian priests, and the socio-economic significance of religious conversion became a problem that reached the level of the Apostolic Delegate, and eventually of the Pope. The English brought their social attitudes to India, where they became racial attitudes while retaining their triple functions of supporting authority structures, protecting vested interests and providing psychological reinforcement, Roman Catholic missionaries came from different European countries and brought with them different national attitudes to social mores. A major question asked in this book is how far such national differences were reflected in attitudes to caste, class and sexual behaviour, how similar were the attitudes of Indian Christians, and how far the functions of such attitudes remained constant.

[The Dip](#) Seth Godin 2007-05-10 A New York Times, USA Today, and Wall Street Journal bestseller In this iconic bestseller, popular business blogger and bestselling author Seth Godin proves that winners are really just the best quitters. Godin shows that winners quit fast, quit often, and quit without guilt—until they commit to beating the right Dip. Every new project (or job, or hobby, or company) starts out fun...then gets really hard, and not much fun at all. You might be in a Dip—a temporary setback that will get better if you keep pushing. But maybe it's really a Cul-de-Sac—a total dead end. What really sets superstars apart is the ability to tell the two apart. Winners seek out the Dip. They realize that the bigger the barrier, the bigger the reward for getting past it. If you can beat the Dip to be the best, you'll earn profits, glory, and long-term security. Whether you're an intern or a CEO, this fun little book will help you figure out if you're in a Dip that's worthy of your time, effort, and talents. The old saying is wrong—winners do quit, and quitters do win.

*Calling Family* Tanja Ahlin 2023-08-11 How do digital technologies shape both how people care for each other and, through that, who they are? With technological innovation is on the rise and increasing migration introducing vast distances between family members--a situation additionally complicated by the COVID-19 pandemic and the requirements of physical distancing, especially for the most vulnerable - older adults--this is a pertinent question.

Through ethnographic fieldwork among families of migrating nurses from Kerala, India, Tanja Ahlin explores how digital technologies shape elder care when adult children and their aging parents live far apart. Coming from a country in which appropriate elder care is closely associated with co-residence, these families tinker with smartphones and social media to establish how care at a distance can and should be done to be considered good. Through the notion of transnational care collectives, *Calling Family* uncovers the subtle workings of digital technologies on care across countries and continents when being physically together is not feasible. *Calling Family* provides a better understanding of technological relationality that can only be expected to further intensify in the future.

[Routledge Handbook of Urbanization in Southeast Asia](#) Rita Padawangi 2018-10-11 The study of urbanization in Southeast Asia has been a growing field of research over the past decades. The Routledge Handbook of Urbanization in Southeast Asia offers a collection of the major streams and themes in the studies of the cities in the region. A focus on the urbanization process rather than the city as an object opens the topic more broadly to bring together different perspectives. This timely handbook presents these diverse views to build a clearer understanding of theoretical contributions of urban studies in Southeast Asia and to provide a complete collection of scholarly works that are thematically structured and a useful tool for teaching urbanization in Southeast Asia. Following the introduction by the editor, the handbook is structured along central, emerging themes. It contains six parts, which are each introduced by the editor: Theorizing Urbanization in Southeast Asia Migration, Networks and Identities Development and Discontents Environmental Governance The Social Production of the Urban Fabric Social Change and Alternative Development This handbook will be an essential reference work for scholars interested in Urban Studies, cities and urbanization in Asia, and Southeast Asian Studies.

*Guidelines for the Management of Snakebites Second Edition* Who Regional Office for South-East Asia 2016-08-17 Snakebites are well-known medical emergencies in many parts of the world especially in rural areas. Agricultural workers and children are most affected. The incidence of snakebite mortality is particularly high in South-East Asia. Rational use of snake anti-venom can substantially reduce mortality and morbidity due to snake bites. These guidelines are a revised and updated version of those published in 2011. The geographical coverage extends from India in the west to DPR Korea and Indonesia in the east Nepal and Bhutan in the north and to Sri Lanka and Indonesia in the south and south-east. Snakes inhabiting the Indonesian islands east of Wallace's line (West Papua and Maluku Islands) are part of the Australasian elapid fauna differing from those west of this line. This publication aims to pass on a digest of available knowledge about all clinical aspects of snake-bite to medically trained personnel including medical doctors nurses dispensers and community health workers. They aim to provide sufficient practical information to allow medically trained personnel to assess and treat patients with snake-bites at different levels of the health service.

**The Gift of the Magi (Illustrated)** O. Henry 2022-04-27 "The Gift of the Magi" is a short story by O. Henry first published in 1905. The story tells of a young husband and wife and how they deal with the challenge of buying secret Christmas gifts for each other with very little money. The main idea of "The Gift of the Magi" is that the value of a gift is in the giver, rather than the gift itself. Jim and Della, out of their love for each other, purchased a gift that required them to sacrifice something that was precious to them.

**Attacking Poverty** 2000 At the start of each decade the World Development Report focuses on poverty reduction. The World Development Report, now in its twenty-third edition, proposes an empowerment-security-opportunity framework of action to reduce poverty in the first decades of the twenty-first century. It views poverty as a multidimensional phenomenon arising out of complex interactions between assets, markets, and institutions. This Report shows how the experience of poverty reduction in the last fifteen years has been remarkably diverse and how this experience has provided useful lessons as well as warnings against simplistic universal policies and interventions. It shows how current global trends present extraordinary opportunities for poverty reduction but also cause extraordinary risks, including growing inequality, marginalization, and social explosions. The World Development Report 2000/2001 explores the challenge of managing these risks in order to make the most of the opportunities for poverty reduction.

Pocket Book of Hospital Care for Children World Health Organization 2013 The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem.

*Women, Business and the Law* Bloomsbury Publishing 2013-11-07 Women perform 66% of the world's work, produce 50% of the food, but earn 10% of the income and own 1% of the property. To shed light on why this grim statistic still holds true, *Women, Business and the Law* aims to

examine legal differentiations on the basis of gender in 143 of the world's economies. *Women, Business and the Law* tracks governments' actions to expand economic opportunities for women across six key areas: accessing institutions, using property, getting a job, providing incentives to work, building credit and going to court. The report uncovers legal differentiations for women and married versus unmarried women such as being able to register a business, open a bank account and work at night. These issues are of fundamental importance. When, because of tradition, social taboos or simple prejudice, half of the world's population is prevented from making its contribution to the life of a nation, the economy will suffer. The empirical evidence does suggest that, slowly but surely, governments are making progress in expanding opportunities for women. It is our hope that data presented in *Women, Business and the Law* will both facilitate research on linkages between legal differentiation and outcomes for women, and promote better informed policy choices on what governments can do to expand opportunities for women.

**Development and Gender Capital in India** Shoba Arun 2017-09-06 The Indian state of Kerala has invoked much attention within development and gender debates, specifically in relation to its female capital- an outcome of interrelated historical, cultural and social practices. On the one hand, Kerala has been romanticised, with its citizenry, particularly women, being free of social divisions and uplifted through educational well-being. On the other hand, its realism is stark, particularly in the light of recent social changes. Using a Bourdieusian frame of analysis, *Development and Gender Capital in India* explores the forces of globalisation and how they are embedded within power structures. Through narratives of women's lived experiences in the private and public domains, it highlights the 'anomie of gender' through complexities and contradictions vis-à-vis processes of modernity, development and globalisation. By demonstrating the limits placed upon gender capital by structures of patriarchy and domination, it argues that discussions about the empowered Malayalee women should move from a mere 'politics of rhetoric and representation' to a more embedded 'politics of transformation', meaningfully taking into account women's changing roles and identities. This book will be of interest to scholars and students of Development Studies, Gender Studies, Anthropology and Sociology.

The Girl in Room 105 Chetan Bhagat 2018 "Zara and I broke up four years ago. She moved on in life. I didn't. I drank every night to forget her. I called, messaged, and stalked her on social media. She just ignored me. However, that night, on the eve of her birthday, Zara messaged me. She called me over, like old times, to her hostel room 105. I shouldn't have gone, but I did... and my life changed forever. This is not a love story. It is an unlove story."--page 4 of cover.

Gendering Caste Uma Chakravarti 2018-10-31 The continuous demand for *Gendering Caste: Through a Feminist Lens* (2003) led to this revised edition which analyses the recent socio-economic and political changes that have taken place. Caste-based marriage and control over women's sexuality have been crucial for the continuation of the caste system in India. Thus, caste and gender are linked. Brutal reprisals have followed when dalits and women have tried to challenge caste-based marriage and inequality which allots strict rules of conduct for women and all dalits. Maithreyi Krishnaraj, the Series Editor, highlights the author's discussion on the new ways in which caste violence targets women and on the changes within the family—immediate and extended—that still keep women subservient to caste norms. She points to the new discussion on an economy in transition to capitalism, and persistent conflicts over religion, language, ethnicity and other differences that relate to gender. The book also includes a new 'Afterword: Caste and Gender in the New Millennium', which provides an updated discussion on the Scheduled Castes and Scheduled Tribes (Prevention of Atrocities) Act 1989 (known in short as Prevention of Atrocities Act: POA). Erudite, yet accessible, this book enables the reader to understand the ramifications of caste today.

**Images of the Church in the New Testament** Paul Sevier Minear 2004-11-12 First published in 1960, Paul Minear's classic work identifies and explicates ninety-six images for the church found in the New Testament. Comprehensive and accessibly written, it has been used in seminary classes for over thirty years. Its range of reach and incredibly rich discussions of the many images and metaphors make this book a splendid resource for students and pastors. The New Testament Library offers authoritative commentary on every book and major aspect of the New Testament, as well as classic volumes of scholarship. The commentaries in this series provide fresh translations based on the best available ancient manuscripts, offer critical portrayals of the historical world in which the books were created, pay careful attention to their literary design, and present a theologically perceptive exposition of the text.

**Voice and Agency** Jeni Klugman 2014-09-29 Despite recent advances in important aspects of the lives of girls and women, pervasive challenges remain. These challenges reflect widespread deprivations and constraints and include epidemic levels of gender-based violence and discriminatory laws and norms that prevent women from owning property, being educated, and making meaningful decisions about their own lives--such as whether and when to marry or have children. These often violate their most basic rights and are magnified and multiplied by poverty and lack of education. This groundbreaking book distills vast data and hundreds of studies to shed new light on deprivations and constraints facing the voice and agency of women and girls worldwide, and on the associated costs for individuals, families, communities, and global development. The volume presents major new findings about the patterns of constraints and overlapping deprivations and focuses on several areas key to women's empowerment: freedom from violence, sexual and reproductive health and rights, ownership of land and housing, and voice and collective action. It highlights promising reforms and interventions from around the world and lays out an urgent agenda for governments, civil society, development agencies, and other stakeholders, including a call for greater investment in data and knowledge to benchmark progress.

**World Report on Ageing and Health** World Health Organization 2015-10-22 The WHO World report on ageing and health is not for the book shelf it is a living breathing testament to all older people who have fought for their voice to be heard at all levels of government across disciplines and sectors. - Mr Bjarne Hastrup President International Federation on Ageing and CEO DaneAge This report outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability. This will require a transformation of health systems away from disease based curative models and towards the provision of older-person-centred and integrated care. It will require the development sometimes from nothing of comprehensive systems of long term care. It will require a coordinated response from many other sectors and multiple levels of government. And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations. These actions are likely to be a sound investment in society's future. A future that gives older people the freedom to live lives that previous generations might never have imagined. The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are

formulated and services are provided. As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes. The report's recommendations are anchored in the evidence comprehensive and forward-looking yet eminently practical. Throughout examples of experiences from different countries are used to illustrate how specific problems can be addressed through innovation solutions. Topics explored range from strategies to deliver comprehensive and person-centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long-term care.

**Our Common Future** World Commission on Environment and Development 1987 The Commission was created by the UN in 1983 to formulate new proposals to deal with the important issues of environmental development facing the world. The Commission's findings are presented in this book.

**Girls and Autism** Barry Carpenter 2019-02-07 Often thought of as a predominantly 'male' disorder, autism has long gone unidentified, unnoticed and unsupported in girls - sometimes with devastating consequences for their social and mental well-being. As current research reveals a much more balanced male-to-female ratio in autism, this book provides crucial insight into autistic girls' experiences, helping professionals to recognize, understand, support and teach them effectively. Drawing on the latest research findings, chapters consider why girls have historically been overlooked by traditional diagnostic approaches, identifying behaviours that may be particular to girls, and exploring the 'camouflaging' that can make the diagnosis of autistic girls more difficult. Chapters emphasize both the challenges and advantages of autism and take a multidisciplinary approach to encompass contributions from autistic girls and women, their family members, teachers, psychologists and other professionals. The result is an invaluable source of first-hand insights, knowledge and strategies, which will enable those living or working with girls on the autism spectrum to provide more informed and effective support. Giving voice to the experiences, concerns, needs and hopes of girls on the autism spectrum, this much-needed text will provide parents, teachers and other professionals with essential information to help them support and teach autistic girls more effectively.

**Kerala** Richard W. Franke 1994 Kerala, a state in southwestern India, has implemented radical reform as a development strategy. As a result, Kerala now has some of the Third World's highest levels of health, education, and social justice. Originally published in 1989, this book traces the role that movements of social justice played in Kerala's successful struggle to redistribute wealth and power. A 21-page introduction updates the earlier edition. This book underlines the following positive lessons that the Kerala experience offers to developing countries: Radical reforms deliver benefits to the poor even when per capita incomes remain low. Popular movements and militant progressive organizations with dedicated leaders are necessary to initiate and sustain reform. Despite their other benefits, radical reforms cannot necessarily create employment or raise per capita income. Local reformers are restricted by national politics. Public distribution of food is a highly effective policy in poor agrarian economies. Devoting significant resources to public health can bring about low infant mortality, high life expectancy, and low birth rates even when incomes are low. Widespread literacy and educational opportunities can help create a more just and open social order. Meaningful land reform can reduce inequalities and give resources to the poor. Wage and working-condition laws can help effect more equitable resource distribution even in a poor economy. Greater socioeconomic equality can lead to lower levels of violence and a healthier social and political environment. Women can benefit from radical reforms not aimed at them, but special attention must eventually be given to their needs. Progressive forces, including Communist parties, can play a major positive role in benefiting very poor Third World citizens. Radical reforms can shield the poor against recessions. Contains over 200 references. (TD)

**Privileged Minorities** Sonja Thomas 2018 Syrian Christians in Kerala, India, although a demographic minority, are not a subordinated community. They are caste-, race-, and class-privileged and have long benefited economically and socially from their privileged position. In this book, the author focuses on Syrian Christian women to illuminate larger questions of multiple oppressions, privilege and subordination, racialization, and religion and secularism in India. Drawing on oral histories, ethnographic interviews, and personal insights, the author employs an intersectional approach and US women of color feminist theory to interrogate the relationships between religious rights and women's rights in Kerala. By exploring how inequalities within groups shape very different experiences of religious and political movements, the author lays the groundwork for imagining new feminist solidarities across religions, castes, races, and classes.

*Growing Populations, Changing Landscapes* National Academy of Sciences 2001-06-12 As the world's population exceeds an incredible 6 billion people, governments' and scientists' everywhere are concerned about the prospects for sustainable development. The science academies of the three most populous countries have joined forces in an unprecedented effort to understand the linkage between population growth and land-use change, and its implications for the future. By examining six sites ranging from agricultural to intensely urban to areas in transition, the multinational study panel asks how population growth and consumption directly cause land-use change, and explore the general nature of the forces driving the transformations. *Growing Populations, Changing Landscapes* explains how disparate government policies with unintended consequences and globalization effects that link local land-use changes to consumption patterns and labor policies in distant countries can be far more influential than simple numerical population increases. Recognizing the importance of these

linkages can be a significant step toward more effective environmental management.

*Edible Insects* Arnold van Huis 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

*World Development Report 1978* 1978 This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.
