Current Research on Gender Issues in Advertising Yorgos Zotos 2020-10-12 Gender stereotypes are general beliefs about sex-linked traits and roles, psychological characteristics, and behaviors, all of which contribute towards describing women and men. Gender role stereotyping in advertising has been a critical topic

since the 1970s, and there is a long-lasting debate between advertisers and sociologists about the role and the social nature of advertising. Although changing role structures in the family and the labor force have brought significant variation in both male and female roles, it has been noted that there is a cultural lag in advertising, where men and women were, for a long period of time, depicted in more traditional roles. This book extends the research on gender stereotypes in advertising over the past 20 years, highlighting key themes such as attitude towards sex and nudity in advertising; women in decorative roles; the changing roles of women and men in advertising; and the viewpoints of those advertising professionals who design campaigns. This book was originally published as a special issue of the International Journal of Advertising.

Inside the White Cube Brian O'Doherty 1999 These essays explicitly confront a particular crisis in postwar art, seeking to examine the assumptions on which the modern commercial and museum gallery was based.

Art and the Sea Emma Roberts 2022-04-15 This edited collection re-examines the relationship between art and the sea, reflecting growing interest in the intersections between art and maritime history. Artists have always been fascinated by and drawn to the sea and this book considers some of the themes and approaches in art that have evolved as a result of this captivation. The chapters consider how an examination of art can provide new insights into existing knowledge of port and maritime history, and are representative of a 'cultural turn' in port and maritime studies, which is becoming

increasingly visible. In *Art and the Sea*, multiple perspectives are offered as a result of the contributors' individual positions and methodologies: some museological, others art historical or maritime-historical. Each chapter proposes a new way of building upon available interpretations of port and maritime history: whether this be to reject, support or reconsider existing knowledge. The book as a whole is a timely addition, therefore, to the developing body of revisionist texts in port and maritime history. The interdisciplinary nature of the volume relates to a current trend for interdisciplinarity in art history and will appeal to those with an interest in art history, geography, sociology, history and transport / maritime studies.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed

plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration.

Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Making Hong Kong Pui-yin Ho 2018-09-28 This insightful book provides a comprehensive survey of urban development in Hong Kong since 1841. Pui-yin Ho explores the ways in which the social, economic and political environments of different eras have influenced the city's development. From colonial governance, wartime experiences, high density development and the return to Chinese sovereignty in 1997 through to contemporary challenges, this book explores forward-looking ideas that urban planning can offer to lead the city in the future. Evaluating the relationship between town planning and social change, this book looks at how a local Hong Kong identity emerged in the face of conflict and compromise between Chinese and European cultures. In doing so, it brings a fresh perspective to urban

research, providing historical context and direction for the future development of the city. Hong Kong's urban development experience offers not only a model for other Chinese cities but also a better understanding of Asian cities more broadly. Urban studies scholars will find this an exemplary case study of a developing urban landscape. Town planners and architects will also benefit from reading this comprehensive book as it shows how Hong Kong can be taken to the next stage of urban development and modernisation.

Drawdown Paul Hawken 2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” –Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” –David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” –Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers,

professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

The Roots of Culture, the Power of Art Monica Gattinger 2017-12-15 The Canada Council for the Arts is the country's largest provider of grants for artists and arts organizations, benefiting not only writers, visual artists, performers, and musicians but Canadian culture as a whole. In *The Roots of Culture, the Power of Art* Monica Gattinger outlines the history of the Canada Council, the impetus for its foundation, and the ongoing debate about its goals and impact. Tracing the Council's gradual shift from focusing on artistic supply and building the roots of Canadian arts and culture in its early years to its expanded focus on the power of the arts in society over time, Gattinger describes how leaders have navigated core tensions inherent in the Council's activities. She examines the arguments for and

against "art for art's sake" and pursuing broader social and economic aims through the arts, as well as the inherent political conflicts between serving the needs of the artistic community and the needs of Canadian society, between leadership and followership, between autonomy and collaboration, and between emerging and established artistic practices. Combining lively storytelling with insightful analysis, and beautifully produced with dozens of photos of the art, people, and events that have shaped the organization through the years, *The Roots of Culture, the Power of Art* is essential reading for those with an interest in Canadian arts and culture and cultural policy.

Merger Control in Post-Communist Countries Jurgita Malinauskaite 2010-11-01 This book provides a critical analysis of merger control regimes in the former socialist countries with small market economies, looking at the unique challenges facing these economies. Questions will be asked as to what extent these countries have had to follow dictation from the EU and whether this implementation of EU merger control rules has been justified from the point of view of these countries' economic situations. The book will analyse the merger control regimes in Estonia, Latvia and Lithuania, Slovenia and Slovakia. However, reference will be made to other small market economies of the EU including Cyprus, Ireland, Luxembourg and Malta in order to evaluate the particular difficulties the former socialist countries with small market economies have had in the implementation and further development of merger control rules.

Transnational Commercial Disputes in an Age of Anti-Globalism and Pandemic Sundaresh Menon 2023-01-12 In this book, senior judges and academics at the forefront

of transnational commercial law in Asia, Australia, Europe, the US, and elsewhere, reflect on the implications of anti-globalism and the COVID-19 pandemic on international commercial dispute resolution (ICDR). The chapters consider: (1) What types of cross-border commercial disputes will arise in the future and what resources will be needed to respond to them in a cost-effective, time-efficient, and equitable manner? (2) Is there still merit in a multilateral approach to transnational commercial law and ICDR, despite the closing of borders, the rise of protectionism, and the disruption of global supply chains? (3) What reforms and innovations should courts, arbitrators, and mediators contemplate when navigating the post-pandemic landscape? (4) Can the accelerated use of remote technology in ICDR (as prompted by the pandemic) be leveraged to enhance access to justice for all? With a focus on the current crisis in globalism, as well as the associated problems of ensuring justice and fairness in the resolution of cross-border commercial and investment-state disputes along the Belt-and-Road and elsewhere, the book will be an invaluable resource for academics, judges and practitioners alike.

The Transformation of Arbitration in Africa Emilia Onyema 2016-09-17 Given the dynamic growth of African economies and the expansion of cross-border trade and commerce, the need for readily accessible African arbitral institutions has become increasingly urgent. Accordingly, this book not only offers an in-depth analysis of the role arbitration centres based in African cities currently play throughout the continent but also defines and recommends ways in which they can emerge as a major and indispensable factor in the growth and development of commerce in Africa. Administrators of arbitration institutions from a variety of African countries offer insightful appraisals and suggestions directed to promoting the development and delivery of efficient, effective arbitration services to users across the continent. Among the issues and topics

covered are the following: • types of arbitration institutions available in Africa; • viability and sustainability of these institutions; • institutions' relationship with government; • quality of service; • performance of arbitration institutions in their respective countries and regions; • national laws that regulate arbitration in Africa's fifty-four states; • extent of collaboration with foreign institutions; • provision of functional facilities, transcription services, hearing rooms, document handling, and managerial and translation services; • marketing activities and strategies; • mending the disconnect between Francophone and Anglophone countries; • role of the Common Court of Justice and Arbitration (CCJA); and • necessity of overcoming foreign negative perceptions and bias. The book was inspired by an arbitration conference hosted by the African Union Commission at its headquarters in Addis Ababa in July 2015. As a contribution to the discussion of the role arbitration and arbitration institutions can play in transforming the legal landscape in African countries for the resolution of commercial disputes – indeed, the entire discourse on legal efficiency and access to justice in African countries – this book will prove invaluable to practitioners and academics in international commercial arbitration within and beyond the continent. Its emphasis on the creation of a facilitative, supportive, and conducive cultural and infrastructural environment as a mechanism for commercial dispute resolution in Africa and for the practice of arbitration in Africa will appeal to in-house counsel, external legal advisors, consultants, arbitral institutions, arbitrators, and government policymakers.

Protection of Foreign Investment in India and Investment Treaty Arbitration Aniruddha Rajput 2016-04-24 India is one of the fastest growing economies and intends to achieve the desired growth with the help of foreign investment. Recently, India terminated all the existing Bilateral Investment Treaties (BITs) and announced to renegotiate them based on the newly issued Model BIT. This book is the first comprehensive commentary and analyses of international investment law with focus on India. It offers detailed examination of India's legal position in relation to protection of foreign investment and the impact of investment treaty arbitration and related jurisprudence on the country's governance structures and regulatory framework. Additionally, it reflects upon the political and economic rationales for the policy on foreign investment. Among the matters discussed are the following: • jurisprudence of investment tribunals, with focus on cases where India was a party (*White Industries v. India*); • impact of the Make in India campaign and other reforms on foreign investment; • requirement of valid entry and operation of foreign investment; • prominent treatment standards such as expropriation, fair and equitable treatment, full protection and security, most favoured nation, and national treatment; • dispute resolution clauses and enforcement of investment arbitration awards; • interaction of protection of foreign investment and the Indian judiciary; and • reasons for India not joining the ICSID Convention. Given India's position as a hugely influential player in the cross-border movement of capital, with the willingness to 'change the rules' on

foreign investment and investment treaty arbitration worldwide, this book will prove of immeasurable value to practitioners, legal academics, interested policy makers, multinational corporations and their counsel and others interested in international investment law and India.

Seeing Others Michèle Lamont 2023-09-12 Acclaimed Harvard sociologist makes the case for reexamining what we value to prioritize recognition—the quest for respect—in an age that has been defined by growing inequality and the obsolescence of the American dream. In this capstone work, Michèle Lamont unpacks the power of recognition—rendering others as visible and valued—by drawing on nearly forty years of research and new interviews with young adults, and with cultural icons and change agents who intentionally practice recognition—from Nikole Hannah Jones and Cornel West to Michael Schur and Roxane Gay. She shows how new narratives are essential for everyone to feel respect and assert their dignity. Decades of neoliberalism have negatively impacted our sense of self-worth, up and down the income ladder, just as the American dream has become out of reach for most people. By prioritizing material and professional success, we have judged ourselves and others in terms of self-reliance, competition, and diplomas. The foregrounding of these attributes of the upper-middle class in our values system feeds into the marginalization of workers, people of color, LGBTQIA+ individuals, and minority groups. The solution, Lamont argues, is to shift our focus towards what we have in common while actively working to recognize the diverse

ways one can live a life. Building on Lamont's lifetime of expertise and revelatory connections between broad-ranging issues, *Seeing Others* delivers realistic sources of hope: By reducing stigma, we put change within reach. Just as Robert Putnam's *Bowling Alone* did for a previous generation, *Seeing Others* strikes at the heart of our modern struggles and illuminates an inclusive path forward with new ways for understanding our world.

[Tracking People](#) Anthea Hucklesby 2023-08-30 Tracking technologies are now ubiquitous and are part of many people's everyday lives. Large sections of the population voluntarily use devices and apps to track fitness, medical conditions, sleep, vital signs or their own or others' whereabouts. Governments, health services, immigration and criminal justice agencies increasingly rely upon tracking technologies to monitor individuals' whereabouts, behaviour, medical conditions and interventions. Despite the human rights concerns of some organisations and individuals, most wearers and

their significant others tend to welcome the technologies. This paradox is only one of the many fascinating challenges raised by the widespread use of tracking technologies which are explored in this book. This book critically explores the ethical, legal, social, and technical issues arising from the current and future use of tracking technologies. It provides a unique and wide-ranging discussion, via a cross-disciplinary collection of essays, on issues relating to technological devices and apps whose use is imposed upon wearers or suggested by others, whether agencies or individuals, including in the domains of criminal justice, terrorism, and health and social care. Contributions from leading academics from across social sciences, engineering, computer and data science, philosophy, and health and social care address the diverse uses of tracking technologies including with individuals with dementia, defendants and offenders, individuals with mental health conditions and drug users alongside legal, ethical and normative questions about the appropriate use of these technologies. Cross-disciplinary themes emerge focusing on both the benefits of the technologies – freedom, improved safety, security, well-being and autonomy, and increased capacity of and efficiencies for public services – and the challenges – implementation and operational costs, mission creep, privacy concerns, stigmatisation, whether the technologies work as expected, and useability and wearability for all wearers. This book is essential reading for academics and students engaged in criminology, criminal justice, socio-legal studies, science and technology studies, medicine, health and social care, psychology, engineering, computer and data science, philosophy, social policy and social work and

security studies. It will also be of great interest to policy-makers, regulators, practitioners already deploying or considering using tracking technologies, and to current and potential wearers.

Collective Management of Music Copyright Qinqing Xu 2023-04-17 Two of the objectives of the Chinese Copyright Law are to protect the copyright of authors to their literary and artistic works and encourage the creation and dissemination of works. In practice, however, in spite of the existence of the Music Copyright Society of China ('MCSC') that was established to assist with exercising copyright, music creators in China remain in need of help to protect and manage their fragmented copyright. The MCSC was the first collective management organisation ('CMO') in mainland China and is the only CMO in the field of musical works. While there is a large music industry and copyright business in China, the MCSC only had 11,356 members at the end of 2021. The third amendment of the Chinese Copyright Law was initiated in 2011 and came into effect in June 2021 after a long debate for almost ten years. The discussion of the third amendment has highlighted the controversial topic of collective management of copyright. This book explores the adequacy of the MCSC as an intermediary representing rights for music creators. The main argument developed in this study is that the work of the MCSC for individual composers and lyricists is hampered by shortcomings in the regulatory regime as well as by a

lack of members' rights to participate in the management of their own rights and by the ineffective international cooperation between the MCSC and other musical CMOs overseas. The analysis is undertaken through a case study approach, comparing the collective management systems of music copyright in China, the United States and Australia and addressing the question of how musical CMOs operate in these countries. Specifically, three perspectives are examined: the regulatory systems designed to limit the misuse of those CMOs' monopoly, members' rights in the organisations, and international cooperation between these CMOs. Overall, the main findings of this book suggest that the MCSC in China could work more effectively to protect music creators' interests. In contrast, although the operational frameworks of the American Society of Composers, Authors and Publishers ('ASCAP') and the Broadcasting Broadcast Music, Inc. ('BMI') in the United States and the Australasian Performing Right Association ('APRA') in Australia are not perfect models, the systems in these two countries may at least provide reference points for potential improvement of the regime of the MCSC. The research recommends three courses of action: strengthening the regulatory design overseeing the MCSC's monopoly, clarifying the relationship between the MCSC and its members while providing the members with the right to manage their own copyright, and improving the international cooperation between the MCSC and CMOs in other countries.

The Oxford Handbook of the Positive Humanities Louis Tay 2021-09-17 This handbook examines the new and rapidly

growing field of the positive humanities--an area of academic research at the intersection of positive psychology and the arts and humanities. Written by leading experts across a wide range of academic disciplines, the volume begins with an overview of the science and culture of human flourishing, covering historical and current trends in this literature. Next, contributors consider the well-being benefits of engagement with the arts and humanities, marking out neurological, cognitive, emotional, behavioral, and social pathways to human flourishing. These pathways lead to detailed investigations of individual fields within the arts and humanities, including music, the visual arts, philosophy, history, literature, religion, theater, and film. Along the way, the book thoroughly synthesizes theory, research, and exemplary practice, concluding with thought-provoking discussions of avenues for public engagement and policy. With its expansive coverage of both the field as a whole and specialized disciplinary and interdisciplinary drivers, The Oxford Handbook of the Positive Humanities advances the literature on the theory and science of well-being and extends the scope of the arts and humanities.

Back to the Drawing Board Jennifer Quick 2022 The first book to consider the importance of commercial art and design for Ed Ruscha's work Ed Ruscha (b. 1937) emerged onto the Los Angeles art scene with paintings that incorporated consumer products, such as Spam and SunMaid

raisins. In this revelatory book, Jennifer Quick looks at Ruscha's work through the tools, techniques, and habits of mind of commercial art and design, showing how his training and early work as a commercial artist helped him become an incisive commentator on the presence and role of design in the modern world. The book explores how Ruscha mobilized commercial design techniques of scale, paste-up layout, and perspective as he developed his singular artistic style. Beginning with his formative design education and focusing on the first decade of his career, Quick analyzes previously unseen works from the Ruscha archives alongside his celebrated paintings, prints, and books, demonstrating how Ruscha's engagement with commercial art has been foundational to his practice. Through this insightful lens, Quick affirms Ruscha as a powerful and witty observer of the vast network of imagery that permeates visual culture and offers new perspectives on Pop and conceptual art.

The Routledge Handbook of International Development, Mental Health and Wellbeing Laura Davidson 2019-07-10

Mental health has always been a low priority worldwide. Yet more than 650 million people are estimated to meet diagnostic criteria for common mental disorders such as depression and anxiety, with almost three-quarters of that burden in low- and middle-income countries. Nowhere

in the world does mental health enjoy parity with physical health. Notwithstanding astonishing medical advancements in treatments for physical illnesses, mental disorder continues to have a startlingly high mortality rate. However, despite its widespread neglect, there is now an emerging international imperative to improve global mental health and wellbeing. The UN's current international development agenda finalised at the end of 2015 contains 17 Sustainable Development Goals (SDGs), including SDG3, which seeks to ensure healthy lives and promote wellbeing for all at all ages. Although much broader in focus than the previous eight Millennium Development Goals (MDGs), the need for worldwide improvement in mental health has finally been recognised. This Handbook addresses the new UN agenda in the context of mental health and sustainable development, examining its implications for national and international policy-makers, decision-makers, researchers and funding agencies. Conceptual, evidence-based and practical discussions crossing a range of disciplines are presented from the world's leading mental health experts. Together, they explore why a commitment to investing in mental health for the fulfilment of SDG3 ought to be an absolute global priority.
