At Risk Piers Blaikie 2014-01-21 The term 'natural disaster' is often used to refer to natural events such as earthquakes, hurricanes or floods. However, the phrase 'natural disaster' suggests an uncritical acceptance of a deeply engrained ideological and cultural myth. At Risk questions this myth and argues that extreme natural events are not disasters until a vulnerable group of people is exposed. The updated new edition confronts a further ten years of ever more expensive and deadly disasters and discusses disaster not as an aberration, but as a signal failure of mainstream 'development'. Two analytical models are provided as tools for understanding vulnerability. One links remote and distant 'root causes' to 'unsafe conditions' in a 'progression of vulnerability'. The other uses the concepts of 'access' and 'livelihood' to understand why some households are more vulnerable than others. Examining key natural events and incorporating strategies to create a safer world, this revised edition is an important resource for those involved in the fields of environment and development studies.

Web Mining Anthony Scime 2005-01-01 Web Mining is moving the World Wide Web toward a more useful environment in which users can quickly and easily find the information they need. Web Mining uses document content, hyperlink structure, and usage statistics to assist users in meeting their needed information. This book provides a record of current research and practical applications in Web searching. It includes techniques that will improve the utilization of the Web by the design of Web sites, as well as the design and application of search agents. This book presents research and related applications in a manner that encourages additional work toward improving the reduction of information overflow, which is so common today in Web search results.

The Oxford Handbook of Egyptology Ian Shaw 2020-05-11 The Oxford Handbook of Egyptology offers a comprehensive survey of the entire study of ancient Egypt, from prehistory through to the end of the Roman period. Authoritative yet accessible, and covering a wide range of topics, it is an invaluable resource for scholars, students, and general readers alike.

History and Religion Bernd-Christian Otto 2015-08-31 History is one of the most important cultural tools to make sense of one's situation, to establish identity, define otherness, and explain change. This is the first systematic scholarly study that analyses the complex relationship between history and religion,

taking into account religious groups both as producers of historical narratives as well as distinct topics of historiography. Coming from different disciplines, the authors of this volume ask under which conditions and with what consequences religions are historicised. How do religious groups employ historical narratives in the construction of their identities? What are the biases and elisions of current analytical and descriptive frames in the History of Religion? The volume aims at initiating a comparative historiography of religion and combines disciplinary competences of Religious Studies and the History of Religion, Confessional Theologies, History, History of Science, and Literary Studies. By applying literary comparison and historical contextualization to those texts that have been used as central documents for histories of individual religions, their historiographic themes, tools and strategies are analysed. The comparative approach addresses circum-Mediterranean and European as well as Asian religious traditions from the first millennium BCE to the present and deals with topics such as the origins of religious historiography, the practices of writing and the transformation of narratives.

Advances in Modeling Agricultural Systems Petraq Papajorgji 2009-02-28 Agriculture has experienced a dramatic change during the past decades. The change has been structural and technological. Structural changes can be seen in the size of current farms; not long ago, agricultural production was organized around small farms, whereas nowadays the agricultural landscape is dominated by large farms. Large farms have better means of applying new technologies, and therefore technological advances have been a driving force in changing the farming structure. New technologies continue to emerge, and their mastery and use in requires that farmers gather more information and make more complex technological choices. In particular, the advent of the Internet has opened vast opportunities for communication and business opportunities within the agricultural community. But at the same time, it has created another class of complex issues that need to be addressed sooner rather than later. Farmers and agricultural researchers are faced with an overwhelming amount of information they need to analyze and synthesize to successfully manage all the facets of agricultural production. This daunting challenge requires new and complex approaches to farm management. A new type of agricultural management system requires active cooperation among multidisciplinary and multi-institutional teams and refining of existing and creation of new analytical theories with potential use in agriculture. Therefore, new management agricultural systems must combine the newest achievements in many scientific domains such as agronomy, economics, mathematics, and computer science, to name a few.

The Language of Evaluation J. Martin 2007-09-27 This is the first comprehensive account of the Appraisal Framework. The underlying linguistic theory is explained and justified, and the application of this flexible tool, which has been applied to a wide variety of text and discourse analysis issues, is demonstrated throughout by sample text analyses from a range of registers, genres and fields.

Fernweh Monique Henriëtte van den Dries 2015 'Fernweh' is a collection of essays on archaeological heritage management issues dedicated to Professor dr. Willem J.H. Willems. Willem Willems (1950-2014) was one of the most prominent and influential Dutch archaeologists. He directed three national archaeological and heritage organizations, and played a major role in the development of both national and international heritage management systems. His professional passion was threefold: Roman archaeology, archaeological heritage management and international collaboration. This volume is a tribute to him, his passions and the provocative discussions he loved so much. It holds contributions by people who worked closely with him. The essays originate from various contexts across the globe; from governmental organizations to museums, from private sector companies to universities. Some are contemplative, others offer refreshing visions for the future. The essays contribute to contemporary debates in archaeological heritage management. They concern the various dimensions and consequences of current policies and practices and address the meaning and use of the world's legacies from the past in and for society, at present and in the future. The overarching theme is the question of whose heritage we are protecting and how we can better valorise research results and connect with society. The book is organised into three parts. The first part, 'Time travels' covers the major challenges the archaeological heritage discipline is facing while heading towards the future. The second part, 'Crossing borders and boundaries', consists of essays that consider the international organizations and projects Willem Willems became (directly and indirectly) involved with. It reflects his trans-disciplinary interests and endeavours. In the third part, 'Home sweet home', the contributions discuss prof. Willems' involvement with and dedication to Dutch archaeological heritage management, from the implementation of the Council of Europe's Valletta Convention, to the engagement with people from all walks of life. Willems *Contemporary Art* Terry E. Smith 2011 Contemporary Art: World Currents is the first comprehensive worldwide survey of contemporary art from the 1980s to the present day. Author Terry Smith argues that, in recent decades, a global shift from modern to contemporary art has occurred: artists everywhere have embraced the contemporary world's teeming multiplicity, its proliferating differences and its challenging complexities and new technologies. Alongside more than 350 carefully selected color images of key works, Terry Smith offers the first account of these changes, from their historical beginnings to the present day. Exploring key works by both well known and little-known artists, the author shows how contemporary art achieved definitive force in the markets and museums of the major art centres during the 1980s and then became a global phenomenon as artworlds everywhere began to connect more closely: new communicative technologies and expanding social media are now shaping the future of art. Contemporary Art: World Currents breaks new ground in tracing how modern, traditional and indigenous art became contemporary in each cultural region of the world, ranging across Western, East and Central Europe, North and South America and the Caribbean, Oceania, Africa, and the Middle East. Terry Smith lays the groundwork for a new comparative approach to contemporary art, emphasizing its relationships to all aspects of contemporary life. He argues that it is cultural diversity and individual artistic inventiveness, not a convergence towards sameness, which makes today's art contemporary. Contemporary Art: World Currents brings the subject right up-to-date, highlighting the concerns of contemporary artists while giving the reader an invaluable insight to art today. Teaching and Learning Experience Improve Critical Thinking- Explore how contemporary art has become a global, connected phenomenon Engage Students- Looks at the work of contemporary artists from across the world. Topic Detection and Tracking James Allan 2012-12-06 Topic Detection and Tracking: Event-based Information Organization brings together in one place state-of-the-art research in Topic Detection and Tracking (TDT). This collection of technical papers from leading researchers in the field not only provides several chapters devoted to the research program and its evaluation paradigm, but also presents the most current research results and describes some of the remaining open challenges. Topic Detection and Tracking: Event-based Information Organization is an excellent reference for researchers and practitioners in a variety of fields related to TDT, including information retrieval, automatic speech recognition, machine learning, and information extraction.

Current Debates in History & Politics Abidin Çevik 2018 As the outcome of the sixth international congress, the papers in this volume cover a wide range of topics related to the main theme of the conference, titled “Current Debates in Social Sciences”, and basically focus on politics and history. In this context, the articles in the book draw attention to the different aspects of history and politics such as the transition period from the Ottoman Empire to the Turkish Republic, theoretical discussions in politics, history and arts, and the issues regarding neo-liberalism, migration, citizenship and communication. Even though most of the papers deal with the issues regarding Turkey, there are also studies on ancient Anatolia, the Medieval Muslim Dynasties, the Mughal period, the Ottomans and Tsarist Russia. We believe that these studies would contribute to the development of debates in social sciences and encourage interdisciplinary

approaches.

How to Read a Paper Trisha Greenhalgh 2019-05-06 Required reading in many medical and healthcare institutions, How to Read a Paper is a clear and wide-ranging introduction to evidence-based medicine and healthcare, helping readers to understand its central principles, critically evaluate published data, and implement the results in practical settings. Ecosystem Goods and Services from Plantation Forests Jürgen Bauhus 2010 Plantation forests often have a negative image. They are typically assumed to be poor substitutes for natural forests, particularly in terms of biodiversity conservation, carbon storage, provision of clean drinking water and other non-timber goods and services. Often they are monocultures that do not appear to invite people for recreation and other direct uses. Yet as this book clearly shows, they can play a vital role in the provision of ecosystem services, when compared to agriculture and other forms of land use or when natural forests have been degraded. This is the first book to examine explicitly the non-timber goods and services provided by plantation forests, including soil, water and biodiversity conservation, as well as carbon sequestration and the provision of local livelihoods. The authors show that, if we require a higher provision of ecosystem goods and services from both temperate and tropical plantations, new approaches to their management are required. These include policies, methods for valuing the services, the practices of small landholders, landscape approaches to optimise delivery of goods and services, and technical issues about how to achieve suitable solutions at the scale of forest stands. While providing original theoretical insights, the book also gives guidance for plantation managers, policy-makers, conservation practitioners and community advocates, who seek to promote or strengthen the multiple-use of forest plantations for improved benefits for society. Figurative Thinking and Foreign Language Learning Jeannette Littlemore 2006-08-22 Many of the vocabulary items that foreign language learners encounter involve figurative extensions of meaning. For example, bottleneck, hard-headed and getting a foot in the door all involve figurative extensions of parts of the body. To understand words and expressions such as these, language learners often need to employ figurative thinking. This book examines the nature of figurative thinking, considers its contribution to communicative language ability, and explores the implications for language teaching and learning. **Of the Farm** John Updike 2004-03-30 “A small masterpiece . . . With *Of the Farm*, John Updike has achieved a sureness of touch, a suppleness of style, and a subtlety of vision that is gained by few writers of fiction.”—The New York Times In this short novel, Joey Robinson, a thirty-five-year-old New Yorker, describes a visit he makes, with his second wife and eleven-year-old stepson, to the Pennsylvania farm where he grew up and where his aging mother now lives alone. For three days, a quartet of voices explores the air, making confessions, seeking alignments, quarrelling, pleading, and pardoning. They are not entirely alone: ghosts (fathers, lovers, children) press upon them, as do phantoms from the near future (nurses, lawyers, land developers). *Of the Farm* concerns the places people choose to live their lives, and the strategies they use to stand their ground.

Ubicomp 2001: Ubiquitous Computing Gregory D. Abowd 2003-06-30 This book constitutes the refereed proceedings of the Third International Conference on Ubiquitous Computing, Ubicomp 2001, held in Atlanta, GA, USA in September/October 2001. The 14 revised full papers and 15 revised technical notes were carefully selected during a highly competitive reviewing process from a total of 160 submissions (90 paper submissions and 70 technical notes submissions). All current aspects of research and development in the booming area of ubiquitous computing are addressed. The book offers topical sections on location awareness, tools and infrastructure, applications for groups, applications and design spaces, research challenges and novel input, and output.

How to Write a BA Thesis, Second Edition Charles Lipson 2018-12-05 How to Write a BA Thesis is the only book that directly addresses the needs of undergraduate students writing a major paper. This book offers step-by-step advice on how to move from early ideas to finished paper. It covers choosing a topic, selecting an advisor, writing a proposal, conducting research, developing an argument, writing and editing the thesis, and making through a defense. Lipson also acknowledges the challenges that arise when tackling such a project, and he offers advice for breaking through writer’s block and juggling school-life demands. This is a must-read for anyone writing a BA thesis, or for anyone who advises these students.

Archaeological Heritage Management Henry Cleere 2020-11-25 This book results from discussions at the 1982 World Archaeological Congress on 'Public Archaeology and Cultural Resource Management'. It brings to everyone's notice the common need of a coherent, well-planned response to the potentially destructive threats of development and tourism to archaeology.

Mental Health Self-Help Louis D. Brown 2010-08-05 Building on earlier patient-empowerment movements, consumer- and advocate-driven mental health self-help (MHSH) initiatives currently outnumber traditional mental health organizations. At the same time, this apparent success raises significant questions about their short-term efficacy and their value to lasting recovery. Mental Health Self-Help assembles the state of the evidence on the effectiveness of MHSH, beginning with the individual and larger social factors behind the expansion of consumer-directed services. Clearly organized and accessibly written, the book traces the development and evolution of MHSH as both alternative and adjunct to traditional mental health structures, offers research-based perspectives on the various forms of MHSH, and identifies potential areas for consumer initiatives to work with—and help improve—mental health systems. Contributors weigh strengths and limitations, raise research and methodology questions, and discuss funding and training issues to give readers a deeper understanding of the field and an informed look at its future impact on mental health treatment. Individual chapters cover the spectrum of contemporary self-help initiatives in mental health, including: • Online mutual aid groups. • Consumer-run drop-in centers. • Family and caregiver groups. • Certified peer support specialists. • Consumer advocacy initiatives. • Technical assistance organizations. • Professional/self-help collaborations. Mental Health Self-Help is a bedrock guide to an increasingly influential aspect of the mental health landscape. Researchers studying these initiatives from a variety of fields including community and clinical psychology, and public health—as well as clinicians, counselors, social workers, case managers, and policymakers—will find it an indispensable reference.

Automaticity and Control in Language Processing Antje Meyer 2007-01-24 The use of language is a fundamental component of much of our day-to-day life. Language often co-occurs with other activities with which it must be coordinated. This raises the question of whether the cognitive processes involved in planning spoken utterances and in understanding them are autonomous or whether they are affected by, and perhaps affect, non-linguistic cognitive processes, with which they might share processing resources. This question is the central concern of Automaticity and Control in Language Processing. The chapters address key issues concerning the relationship between linguistic and non-linguistic processes, including: How can the degree of automaticity of a component be defined? Which linguistic processes are truly automatic, and which require processing capacity? Through which mechanisms can control processes affect linguistic performance? How might these mechanisms be represented in the brain? How do limitations in working memory and executive control capacity affect linguistic performance and language re-learning in persons with brain damage? This important collection from leading international researchers will be of great interest to researchers and students in the area.

At the Great Crossroads Paul Bennett 2008 The widening of the road between the Monkton and Mount Pleasant roundabouts on the A253 led to the archaeological investigation of a 3km long strip of land between July 1994 and February 1995. Prehistoric discoveries included Neolithic inhumations and pits, well-preserved Beaker graves and ten ring-ditches of late Neolithic and Bronze Age date. An extensive and unusual Roman settlement of the late first to early second century AD was characterised by a large number of sunken-floored buildings. A small rectangular structure on the fringes of the settlement may have been a roadside shrine. A small Anglo-Saxon cemetery was located at the eastern end of the excavated area and at the western end a medieval farmstead

with at least five buildings was investigated. The information is presented in four parts covering the main periods of occupation of the site and each chapter includes specialist reports on pottery, small finds, human and animal bones and the plant and insect remains.

[An Introduction to African Languages](#) G. Tucker Childs 2003-12-19 This book introduces beginning students and non-specialists to the diversity and richness of African languages. In addition to providing a solid background to the study of African languages, the book presents linguistic phenomena not found in European languages. A goal of this book is to stimulate interest in African languages and address the question: What makes African languages so fascinating? The orientation adopted throughout the book is a descriptive one, which seeks to characterize African languages in a relatively succinct and neutral manner, and to make the facts accessible to a wide variety of readers. The author's lengthy acquaintance with the continent and field experiences in western, eastern, and southern Africa allow for both a broad perspective and considerable depth in selected areas. The original examples are often the author's own but also come from other sources and languages not often referenced in the literature. This text also includes a set of sound files illustrating the phenomena under discussion, be they the clicks of Khoisan, talking drums, or the ideophones (words like English lickety-split) found almost everywhere, which will make this book a valuable resource for teacher and student alike.

Chinese New Migrants in Suriname Paul B. Tjon Sie Fat 2009 This book covers various aspects of New Chinese Migration in Suriname in the 1990s and early 2000s. It is an ethnography of New Chinese Migrants in the context of South- South migration, but also a first ethnography of Chinese in Suriname, as well as an analysis of Surinamese ethnic discourse and ethnopolitics. Starting in the 1990s, renewed immigration from China changed the dynamics of the Surinamese Chinese community, which developed from a Hakka enclave to a culturally and linguistically diverse, modern Chinese migrant group. Local positioning strategies of Chinese had always depended on ethnic entrepreneurship and political participation, but were now complicated by anti-immigrant sentiments.

Drawn from the Antique Adriano Aymonino 2015 "This catalogue examines one of the most important educational tools and sources of inspiration for Western artists for over five hundred years: drawing after the Antique. From the Renaissance to the 19th century, classical statues offered young artists idealised models from which they could learn to represent the volumes, poses and expressions of the human figure and which, simultaneously, provided perfected examples of anatomy and proportion. For established artists, antique statues and reliefs presented an immense repertory of forms that they could use as inspiration for their own creations. Through a selection of thirty-nine drawings, prints and paintings, covering more than four hundred years and by artists as different as Federico Zuccaro, Hendrick Goltzius, Peter Paul Rubens, Charles-Joseph Natoire, Henry Fuseli and Joseph Mallord William Turner, this catalogue provides the first overview of a phenomenon crucial for the understanding and appreciation of European art."--Page 2 of cover.

The Routledge Handbook of Applied Linguistics James Simpson 2011-03-15 The Routledge Handbook of Applied Linguistics serves as an introduction and reference point to key areas in the field of applied linguistics. The five sections of the volume encompass a wide range of topics from a variety of perspectives: applied linguistics in action language learning, language education language, culture and identity perspectives on language in use descriptions of language for applied linguistics. The forty-seven chapters connect knowledge about language to decision-making in the real world. The volume as a whole highlights the role of applied linguistics, which is to make insights drawn from language study relevant to such decision-making. The chapters are written by specialists from around the world. Each one provides an overview of the history of the topic, the main current issues and possible future trajectory. Where appropriate, authors discuss the impact and use of new technology in the area. Suggestions for further reading are provided with every chapter. The Routledge Handbook of

Cognitive Linguistic Approaches to Teaching Vocabulary and Phraseology Frank Boers 2008 Review text: "This volume, one in a series of applications of cognitve linguistics, revolves around the importance of figurative thought and linguistic iconicity for vocabulary acquisition. Being mainly devoted to phraseology, it is an important contribution to an area in need of attention. For this reason alone, it is a useful resource for SLA researchers?in particular, for those involved in the training of language teachers."Kirsten Haastrup in: Studies in Second Language Acquisition 4/2009.

How to Read a Paper Trisha Greenhalgh 2014-02-26 The best-selling introduction to evidence-based medicine In a clear and engaging style, How to Read a Paper demystifies evidence-based medicine and explains how to critically appraise published research and also put the findings into practice. An ideal introduction to evidence-based medicine, How to Read a Paper explains what to look for in different types of papers and how best to evaluate the literature and then implement the findings in an evidence-based, patient-centred way. Helpful checklist summaries of the key points in each chapter provide a useful framework for applying the principles of evidence-based medicine in everyday practice. This fifth edition has been fully updated with new examples and references to reflect recent developments and current practice. It also includes two new chapters on applying evidence-based medicine with patients and on the common criticisms of evidence-based medicine and responses. How to Read a Paper is a standard text for medical and nursing schools as well as a friendly guide for everyone wanting to teach or learn the basics of evidence-based medicine.

The Philosophy of Biology Kostas Kampourakis 2013-06-18 This book brings together for the first time philosophers of biology to write about some of the most central concepts and issues in their field from the perspective of biology education. The chapters of the book cover a variety of topics ranging from traditional ones, such as biological explanation, biology and religion or biology and ethics, to contemporary ones, such as genomics, systems biology or evolutionary developmental biology. Each of the 30 chapters covers the respective philosophical literature in detail and makes specific suggestions for biology education. The aim of this book is to inform biology educators, undergraduate and graduate students in biology and related fields, students in teacher training programs, and curriculum developers about the current state of discussion on the major topics in the philosophy of biology and its implications for teaching biology. In addition, the book can be valuable to philosophers of biology as an introductory text in undergraduate and graduate courses.
