**The Medium Is the Monster** Mark A. McCutcheon 2018-04-21 Technology, a word that emerged historically first to denote the study of any art or technique, has come, in modernity, to describe advanced machines, industrial systems, and media. McCutcheon argues that it is Mary Shelley's 1818 novel *Frankenstein* that effectively reinvented the meaning of the word for modern English. It was then Marshall McLuhan's media theory and its

adaptations in Canadian popular culture that popularized, even globalized, a Frankensteinian sense of technology. *The Medium Is the Monster* shows how we cannot talk about technology—that human-made monstrosity—today without conjuring *Frankenstein*, thanks in large part to its Canadian adaptations by pop culture icons such as David Cronenberg, William Gibson, Margaret Atwood, and Deadmau5. In the unexpected connections illustrated by *The Medium Is the Monster*, McCutcheon

brings a fresh approach to studying adaptations, popular culture, and technology.

*Lines Composed a Few Miles Above Tintern Abbey, on Revisiting the Banks of the Wye During a Tour, July 13th, 1798* William Wordsworth 2002

*Queer Gothic* George E. Haggerty 2006  
George Haggerty examines the ways in which gothic fiction centers on loss as the foreclosure of homoerotic possibility and the relationship between transgressive sexual behaviors and a range of religious behaviors understood as 'Catholic'.

*Ethnomathematics* Arthur B. Powell 1997-01-01  
Presents the emerging field of ethnomathematics from a critical perspective, challenging particular ways in which Eurocentrism permeates mathematics education and mathematics in general.

*Disabling Imagery and the Media* Colin Barnes 1992-01-01

**The Curious Incident of the Dog in the Night-Time** Mark Haddon 2009-02-24

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls

apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the

freshhest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

*The Old Man And The Sea* Ernest Hemingway 2012-02-14 Santiago, an old Cuban fisherman, has gone 84 days without catching a fish. Confident that his bad luck is at an end, he sets off alone, far into the Gulf Stream, to fish. Santiago's faith is rewarded, and he quickly hooks a marlin...a marlin so big he is unable to pull it in and finds himself being pulled by the giant fish for two days and two nights.

### **The Thirteen American Arguments**

Howard Fineman 2009-03-10 Howard Fineman, one of our most trusted political journalists, shows that every debate, from our nation's founding to the present day, is rooted in one of thirteen arguments that—thankfully—defy resolution. It is the very process of never-ending argument, Fineman explains, that defines us, inspires us, and keeps us free. At a time when most public disagreement seems shrill and meaningless, Fineman makes a cogent case for nurturing the real American dialogue. The Thirteen American Arguments runs the gamut, including • Who Is a Person? The Declaration of Independence says “everyone,” but it took a Civil War, the Civil Rights Act, and other movements to make that

a reality. Now, what about human embryos and prisoners in Guantanamo?

- The Role of Faith No country is more legally secular yet more avowedly prayerful. From Thomas Jefferson to James Dobson, the issue persists: Where does God fit in government?
- America in the World In Iraq and everywhere else, we ask ourselves whether we must change the world in order to survive and honor our values—or whether the best way to do both is to deal with the world as it is. Whether it's the nomination of judges or the limits of free speech, presidential power or public debt, the issues that galvanized the Founding Fathers should still inspire our leaders, thinkers, and fellow citizens. If we cease to argue about these things, we cease to be. "Argument is strength, not weakness,"

says Fineman. "As long as we argue, there is hope, and as long as there is hope, we will argue."

### **Mathematical Recreations and Essays**

W. W. Rouse Ball 2018-07-11

Mathematical Recreations and Essays W. W. Rouse Ball For nearly a century, this sparkling classic has provided stimulating hours of entertainment to the mathematically inclined. The problems posed here often involve fundamental mathematical methods and notions, but their chief appeal is their capacity to tease and delight. In these pages you will find scores of "recreations" to amuse you and to challenge your problem-solving faculties—often to the limit. Now in its 13th edition, *Mathematical Recreations and Essays* has been thoroughly revised and updated over the decades since its

first publication in 1892. This latest edition retains all the remarkable character of the original, but the terminology and treatment of some problems have been updated and new material has been added. Among the challenges in store for you: Arithmetical and geometrical recreations; Polyhedra; Chess-board recreations; Magic squares; Map-coloring problems; Unicursal problems; Cryptography and cryptanalysis; Calculating prodigies; ... and more. You'll even find problems which mathematical ingenuity can solve but the computer cannot. No knowledge of calculus or analytic geometry is necessary to enjoy these games and puzzles. With basic mathematical skills and the desire to meet a challenge you can put yourself to the test and win. "A must to add

to your mathematics library."-The Mathematics Teacher We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. To ensure a high quality product, each title has been meticulously hand curated by our staff. Our philosophy has been guided by a desire to provide the reader

with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience.

**In Defense of Lost Causes** Slavoj Žižek 2009-10-19 No Marketing Blurb  
**The Lonely Man of Faith** Joseph B. Soloveitchik 2009-07-01 Joseph B. Soloveitchik, the rabbi known as "The Rav" by his followers worldwide, was a leading authority on the meaning of Jewish law and prominent force in building bridges between traditional Orthodox Judaism and the modern world. In THE LONELY MAN OF FAITH, a soaring, eloquent essay first published in Tradition magazine in 1965, Soloveitchik investigates the essential loneliness of the person of faith in our narcissistic, materially

oriented, utilitarian society. In this modern classic, Soloveitchik uses the story of Adam and Eve as a springboard, interweaving insights from such important Western philosophers as Kierkegaard and Kant with innovative readings of Genesis to provide guidance for the faithful in today's world. He explains prayer as "the harbinger of moral reformation," and discusses with empathy and understanding the despair and exasperation of individuals who seek personal redemption through direct knowledge of a God who seems remote and unapproachable. He shows that while the faithful may become members of a religious community, their true home is "the abode of loneliness." In a moving personal testimony, Soloveitchik demonstrates a deep-seated commitment,

intellectual courage, and integrity that people of all religions will respond to.

*Time Within Time* Andrei Tarkovsky  
2019-02-08 "Tarkovsky for me is the greatest," wrote Ingmar Bergman. Andrey Tarkovsky only made seven films, but all are celebrated for its striking visual images, quietly patient dramatic structures, and visionary symbolism. *Time within Time* is both a diary and a notebook, maintained by Tarkovsky from 1970 until his death. Intense and intimate, it offers reflections on Dostoyevsky, Tolstoy, Hermann Hesse, Thomas Mann, and others. He writes movingly of his family, especially his father, Arseniy Tarkovsky, whose poems appear in his films. He records haunting dreams in detail and speaks of the state of society and the

future of art, noting significant world events and purely personal dramas along with fascinating accounts of his own filmmaking. Rounding out this volume are Tarkovsky's plans and notes for his stage version of Hamlet; a detailed proposal for a film adaptation of Dostoyevsky's *The Idiot*; and a glimpse of the more public Tarkovsky answering questions put to him by interviewers.

*Monster theory [electronic resource]*  
Jeffrey Jerome Cohen 1996 The contributors to *Monster Theory* consider beasts, demons, freaks and fiends as symbolic expressions of cultural unease that pervade a society and shape its collective behavior. Through a historical sampling of monsters, these essays argue that our fascination for the

monstrous testifies to our continued desire to explore difference and prohibition.

*A Reader's Guide to Contemporary Literary Theory* Raman Selden 1989  
Unsurpassed as a text for upper-division and beginning graduate students, Raman Selden's classic text is the liveliest, most readable and most reliable guide to contemporary literary theory. Includes applications of theory, cross-referenced to Selden's companion volume, *Practicing Theory and Reading Literature*.

**Autonomous Technology** Langdon Winner 1978-08-15  
The truth of the matter is that our deficiency does not lie in the want of well-verified "facts." What we lack is our bearings. The contemporary experience of things technological has repeatedly

confounded our vision, our expectations, and our capacity to make intelligent judgments. Categories, arguments, conclusions, and choices that would have been entirely obvious in earlier times are obvious no longer. Patterns of perceptive thinking that were entirely reliable in the past now lead us systematically astray. Many of our standard conceptions of technology reveal a disorientation that borders on dissociation from reality. And as long as we lack the ability to make our situation intelligible, all of the "data" in the world will make no difference. From the Introduction

**Understanding Nature** Hub Zwart 2008-01-29 Science is not the only route to understanding nature. This volume presents a series of case studies in comparative epistemology, critically comparing the works of prominent representatives of the life sciences, such as Aristotle, Darwin, and Mendel, with the writings of literary masters, such as Andersen, Melville, Verne, and Ibsen. It constitutes a major contribution to

the growing field of science and literature studies.

**The Cambridge Companion to 'Frankenstein'** Andrew Smith 2016-08-25 Sixteen original essays by leading scholars on Mary Shelley's novel provide an introduction to Frankenstein and its various critical contexts.

The Lottery Shirley Jackson 2008 A seemingly ordinary village participates in a yearly lottery to determine a sacrificial victim.  
Crack Capitalism John Holloway 2010-06-15 Crack Capitalism, argues that radical change can only come about through the creation, expansion and multiplication of weak points, or "cracks" in the capitalist system. John Holloway's previous book, Change the World Without Taking Power, sparked a world-wide debate among

activists about the most effective methods of resisting capitalism. Now Holloway rejects the idea of a disconnected plurality of struggles and finds a unifying contradiction -- the opposition between the time we spend working as part of the system and our excess "doing" where we revolt and refuse to be subsumed. Clearly and accessibly presented in the form of 33 theses, *Crack Capitalism* is set to reopen the debate among radical scholars and activists seeking to break capitalism.

Lord of the Flies Robert Golding  
2002-01-01 The classic study of human nature which depicts the degeneration of a group of schoolboys marooned on a desert island.

*Women, Race, & Class* Angela Y. Davis  
2011-06-29 From one of our most

important scholars and civil rights activist icon, a powerful study of the women's liberation movement and the tangled knot of oppression facing Black women. "Angela Davis is herself a woman of undeniable courage. She should be heard."—The New York Times  
*Angela Davis* provides a powerful history of the social and political influence of whiteness and elitism in feminism, from abolitionist days to the present, and demonstrates how the racist and classist biases of its leaders inevitably hampered any collective ambitions. While Black women were aided by some activists like Sarah and Angelina Grimke and the suffrage cause found unwavering support in Frederick Douglass, many women played on the fears of white supremacists for political gain rather than take an intersectional

approach to liberation. Here, Davis not only contextualizes the legacy and pitfalls of civil and women's rights activists, but also discusses Communist women, the murder of Emmitt Till, and Margaret Sanger's racism. Davis shows readers how the inequalities between Black and white women influence the contemporary issues of rape, reproductive freedom, housework and child care in this bold and indispensable work.

**Monsters of the Market** David McNally 2011-07-12 "Monsters of the Market" investigates modern capitalism through the prism of the body panics it arouses. Examining "Frankenstein," Marx's "Capital" and zombie fables from sub-Saharan Africa, it offers a novel account of the cultural and corporeal economy of global capitalism.

**The Digital Dialectic** Peter Lunenfeld 2000 How our visual and intellectual cultures are changed by the new interaction-based media and technologies.

The Surprising Effects of Sympathy David Marshall 1988 Through readings of works by Marivaux, Diderot, Rousseau, and Mary Shelley, David Marshall provides a new interpretation of the eighteenth-century preoccupation with theatricality and sympathy. Sympathy is seen not as an instance of sensibility or natural benevolence but rather as an aesthetic and epistemological problem that must be understood in relation to the problem of theatricality. Placing novels in the context of eighteenth-century writing about theater, fiction, and painting, Marshall argues that an

unusual variety of authors and texts were concerned with the possibility of entering into someone else's thoughts and feelings. He shows how key eighteenth-century works reflect on the problem of how to move, touch, and secure the sympathy of readers and beholders in the realm of both "art" and "life." Marshall discusses the demands placed upon novels to achieve certain effects, the ambivalence of writers and readers about those effects, and the ways in which these texts can be read as philosophical meditations on the differences and analogies between the experiences of reading a novel, watching a play, beholding a painting, and witnessing the spectacle of someone suffering. The Surprising Effects of Sympathy traces the interaction of sympathy and

theater and the artistic and philosophical problems that these terms represent in dialogues about aesthetics, moral philosophy, epistemology, psychology, autobiography, the novel, and society.

never forget the night Arthur  
Leander, the famous Hollywood actor,

had a heart attack on stage during a production of King Lear. That was the night when a devastating flu pandemic arrived in the city, and within weeks, civilization as we know it came to an end. Twenty years later, Kirsten moves between the settlements of the altered world with a small troupe of actors and musicians. They call themselves The Traveling Symphony, and they have dedicated themselves to keeping the remnants of art and humanity alive. But when they arrive in St. Deborah by the Water, they encounter a violent prophet who will threaten the tiny band's existence. And as the story takes off, moving back and forth in time, and vividly depicting life before and after the pandemic, the strange twist of fate that connects them all will be revealed. A Theory of Adaptation Linda Hutcheon  
2012-08-21 A Theory of Adaptation explores the continuous development of creative adaptation, and argues that the practice of adapting is central to the story-telling imagination. Linda Hutcheon develops a theory of adaptation through a range of media, from film and opera, to video games, pop music and theme parks, analysing the breadth, scope and creative possibilities within each. This new edition is supplemented by a new preface from the author, discussing both new adaptive forms/platforms and recent critical developments in the study of adaptation. It also features an illuminating new epilogue from Siobhan O'Flynn, focusing on

adaptation in the context of digital media. She considers the impact of transmedia practices and properties on the form and practice of adaptation, as well as studying the extension of game narrative across media platforms, fan-based adaptation (from Twitter and Facebook to home movies), and the adaptation of books to digital formats. *A Theory of Adaptation* is the ideal guide to this ever evolving field of study and is essential reading for anyone interested in adaptation in the context of literary and media studies.

**Emergent Strategy** adrienne maree brown 2017-03-20 In the tradition of Octavia Butler, here is radical self-help, society-help, and planet-help to shape the futures we want. Change is constant. The world, our bodies,

and our minds are in a constant state of flux. They are a stream of ever-mutating, emergent patterns. Rather than steel ourselves against such change, *Emergent Strategy* teaches us to map and assess the swirling structures and to read them as they happen, all the better to shape that which ultimately shapes us, personally and politically. A resolutely materialist spirituality based equally on science and science fiction: a wild feminist and afro-futurist ride! adrienne maree brown, co-editor of *Octavia's Brood: Science Fiction from Social Justice Movements*, is a social justice facilitator, healer, and doula living in Detroit.

**The Cultural Cold War** Frances Stonor Saunders 2013-11-05 During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for

or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the *New York Times*, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (*The Wall Street Journal*), and its story of covert

cultural efforts to win hearts and minds continues to be relevant today.

2013-02-14 The hauntingly prophetic classic novel. Over 1 million copies sold in the UK.

Life to Those Shadows Noël Burch

1990-11-21 Noel Burch's new book is a critique of the assumptions underlying 'classical' approaches to film history: the assumption that what we call the language of film was a natural, organic development, that it lay latent from the outset in the basic technology of the camera, waiting for the prescient pioneers to bring it into being; and the assumption that this language was a universal, neutral medium, innocent of any social or historical meaning in itself." "His major thesis is

that, on the contrary, film language has a social and economic history, that it evolved in the way it did because of when and where it was constructed -- in the capitalist and imperialist west between 1892 and 1929." "The book examines the chronology of the emergence of what it defines as cinema's Institutional Mode of Representation and the socio-historical circumstances in which this took place. It examines the principles of visualisation -- camera placement and movement, lighting, editing, mise-en-scene -- that film-makers and audiences came to internalize over the first three decades. Special emphasis is laid on the allimportant change that occurred in the imaginary placing of the spectator, from a position of exteriority to the film image,

implicit in both film-form and viewing conditions during the primitive era (pre-1909), to the imaginary centering of the spectator-subject, completed only with the generalisation of lip-synch sound after 1929. It is the contention of this book that this imaginary centering of a sensorily isolated spectator is the keystone of the cinematic illusion of reality, still achieved today by the same means as it was sixty years ago.

**Monstrous Imagination** Marie-Hélène Huet 1993 What woeful maternal fancy produced such a monster? This was once the question asked when a deformed infant was born. From classical antiquity through to the Enlightenment, the monstrous child bore witness to the fearsome power of the mother's imagination. What such a

notion meant and how it reappeared, transformed, in the Romantic period are the questions explored in this book, a study of theories linking imagination, art and monstrous progeny.

**Speculative Everything** Anthony Dunne 2013-12-06 How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In *Speculative Everything*, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating;

these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose “what if” questions that are intended to open debate and discussion about the kind of future people want (and do not want). *Speculative Everything* offers a tour through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on

futurology, political theory, the philosophy of technology, and literary fiction. They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.
