

severity (AIS) of the injury. In addition, for the major occupant protection technologies – seat belts, air bags, and energy-absorbing materials – analysis methods of past NHTSA evaluations will show if fatality-reducing effectiveness is significantly different for younger and older occupants or for men and women. Finally, the report identifies specific injuries and injury sources (vehicle components contacted) that are prevalent among older or female occupants.

*The Sleepwalkers* Christopher Clark 2013-03-19 One of The New York Times Book Review's 10 Best Books of the Year Winner of the Los Angeles Times Book Prize (History) *The Sleepwalkers: How Europe Went to War in 1914* is historian Christopher Clark's riveting account of the explosive beginnings of World War I. Drawing on new scholarship, Clark offers a fresh look at World War I, focusing not on the battles and atrocities of the war itself, but on the complex events and relationships that led a group of well-meaning leaders into brutal conflict. Clark traces the paths to war in a minute-by-minute, action-packed narrative that cuts between the key decision centers in Vienna, Berlin, St. Petersburg, Paris, London, and Belgrade, and examines the decades of history that informed the events of 1914 and details the mutual misunderstandings and unintended signals that drove the crisis forward in a few short weeks. Meticulously researched and masterfully written, Christopher Clark's *The Sleepwalkers* is a dramatic and authoritative chronicle of Europe's descent into a war that tore the world apart.

*Google Maps JavaScript API Cookbook* Alper Dincer 2013-12-26 *Google Maps API Cookbook* follows a fast-paced, high-level, structured cookbook approach,

with minimal theory and an abundance of practical, real-world examples explained in a thorough yet concise manner to help you learn quickly and efficiently. *Google Maps API Cookbook* is for developers who wish to learn how to do anything from adding a simple embedded map to a website to developing complex GIS applications with the Google Maps JavaScript API. It is targeted at JavaScript developers who know how to get by but who are also seeking the immediacy of recipe-based advice.

*Disease Control Priorities, Third Edition (Volume 6)* King K. Holmes 2017-11-06 Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. *Major Infectious Diseases* identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.
