Fatal Exit Thomas M. Kowalick 2005-02-11

FATAL EXIT is the first and only book documenting the decades-long debate among the automotive industry, government regulators, and safety and privacy advocates over what the public terms "automobile black boxes". The book briefly traces the history of the debate from 1974 to 2004, and then clearly presents opposing viewpoints for and against the widespread use of

emerging Motor Vehicle Event Data Recorder (MVEDR) technology. The arguments are followed by proposals to proceed with developing and utilizing the technology in ways that are both effective and respectful of individual privacy. The reader of this book will be able to develop an informed opinion as to the usefulness of MVEDRs and thus contribute intelligently to the debate as the United States Congress considers legislation that mandates this technology. In the United States 220,935,000 registered owners of motor vehicles are becoming aware of black box technology through newspaper and magazine

articles, and television news stories.

Many understand that these boxes already exist in 40 million cars. Yet motorists still have many questions and concerns about widespread use of the technology. As the only book of its kind, written by an insider and expert on the subject, FATAL EXIT provides an invaluable resource for anyone interested in why these devices have caused such international controversy.

you've been in an accident or in case you do get into an accident, you will walk away better prepared and better equipped to help yourself and reduce some of your stress and anxiety. *Car Accidents* Howard K. Rosenberg 2018-12-09 Warning: Making certain mistakes after an accident can make any insurance claims null and void, leaving you thousands of dollars out of pocket... If you want to learn how to do things the right way, then this short message will be the most important you ever read. Here's why. In the United States last year there were 2.4 million car accidents In fact, most drivers are now likely to

be in an accident at least once in their lives. And if you've never been in an accident before - believe me, you won't know exactly what to do when it does happen Adrenaline is running high. You might be shaken up. There may be police on the scene. So it pays to learn the exact steps you need to take before you get into an accident This short book (you can read it from start to finish in less than 60 minutes) will show you the exact steps you need to take if the unfortunate does happen. Here's what you'll discover: What you may not know about leaving the scene of a minor accident The two words you should never say

after an accident (doing this could land you a large bill at the end of the day without even realizing) The nine things to look for at the scene of a crash The unknown problem with waiting 48 hours after a crash to see a doctor How to avoid sleazy ambulance chasers and hire the right law firm - lawyers 5 hidden auto accident injuries (not just concussions and whiplash) Why you shouldn't rely on smartphone apps to store your insurance details The startling link between car insurance and identity theft Why you should get multiple repair estimates The exact number of hours you should wait before contacting the

police to get a police report Don't hire an attorney before getting this straight - contingency The filing requirements for each state There's also free bonus "at the scene" checklist included. You can print this off and keep it in your glove compartment so you are prepared if the unfortunate does happen And If you know someone who has recently passed their test - this book should be considered as much of a necessity as a tire jack and a hands free kit for their cell phone

importance of the role of the law enforcement officer (LEO) in the investigation of commercial motor vehicle crashes cannot be overstated, yet few LEOs have any significant specialized training in the unique standards of care that apply to operators of commercial motor vehicles. As a result, LEOs often mistakenly apply the standards applicable to drivers of cars when analyzing the conduct of a commercial driver involved in a commercial motor vehicle crash. This book is designed to address the gap in training and knowledge about the standards applicable to operators of commercial motor vehicles.

Death by Rental Car Ben Kelley 2016-02-06 After sisters Raechel and Jacqueline Houck died in a fiery crash while driving a Chrysler PT Cruiser belonging to Enterprise Rent-A-Car, their parents were shocked to learn that the car was under recall at the time for a flawed power steering hose. A small plaintiffs' law firm, Grassini & Wrinkle, agreed to take their case, filing suit against DaimlerChrysler and Enterprise in June 2005. *Death by Rental Car: The Houck v. Enterprise Case* offers an insider's view of the six-year court battle between the Houcks and the two corporate defendants, who attempted to

blame the crash on the sisters. With a foreword by Ralph Nader, this book uncovers the shocking truth about defective rental cars, deadly malfeasance, and the failure of public policy to close loopholes that allow companies to put profits ahead of consumer safety.

Who Pays for Car Accidents? Estate of Jerry J. Phillips 2001-12-18 In this new volume, two

lawyers debate which kind of automobile insurance is the best, no-fault or tort liability. This book presents in one place all the legal, political, historical, and financial arguments about the two types of auto insurance. Under the fault system currently used by thirty-seven states, tort law provides that the party at fault in the accident pays the full damages of accident victims. Jerry J. Phillips favors this system, arguing that it allows for fair compensation to the injured and deters drivers from dangerous behavior on the road. Stephen Chippendale counters this claim with the argument that tort-law based insurance combines

high cost and low benefits, and that those who truly profit from it are the lawyers representing injured clients, while their claims clog up the court system. A better solution, he proposes, would be "Auto Choice," a plan under which consumers would choose whether or not they wished to be eligible for damages from pain and suffering. With civility and respect, these two legal scholars present thoughtful and thorough arguments on both sides of the debate, giving readers a balanced view of an issue that affects nearly every American. It will be of particular value to those in the fields of law, policy, and insurance.

Collision on I-75 Lawrence David Weiss 2004

Collision on I-75 tells an extraordinary public health story that has not been told before, and it tells it in a compelling and exciting way. It details over two decades of struggle by public health

professionals, legislators, state officials, and law enforcement to compel a huge corporation to prevent deadly, suspected industrial-fog-related collisions. A couple of weeks before Christmas in 1990, nearly one hundred vehicles collided on Interstate-75 northeast of Chattanooga in an unusually dense fog bank, leaving 12 dead and dozens seriously injured. Within days of the collision, Attorney Douglas Fees was contacted by Evelyn Piper whose son, Craig, had burned to death in the cab of his truck on I-75. Fees became the lead attorney in the case, eventually representing nearly all the accident victims who

sought legal assistance. It became clear to Fees that the cause of the tragedy was an artificial industrial fog that originated at the Bowater pulp mill a couple of miles up the valley from where the collision occurred. Bowater was the largest pulp mill in the United States, and the largest employer and landowner in Tennessee. This is the true story of a tragic incident involving large numbers of people, corporate negligence, faulty state regulation, and a risk-taking attorney in pursuit of uncertain compensation for the victims and himself.

Everyone understands that the invention of the automobile has had a profound effect on daily life in America. It has transformed our workplaces, altered our neighborhoods, and radically changed our environment. But cars have never been perfectly safe, and, as the years have passed, injuries and fatalities have mounted. This Article contends that, just as motor vehicles have remade our culture, these injuries and deaths -- some 3.5 million fatalities and counting -- have catalyzed fundamental changes in the contours, purposes, and limits of our law.

Biggest Mistakes Drivers Make After an Accident

The Cost of Accidents Guido Calabresi

2008-10-01 Accident law is currently under review throughout the United States, and indeed the world, as present systems prove increasingly inadequate to handle the mounting costs of automobile accidents. In this pioneering work,

After Cars Crash The Need For Legal And Insurance Reform Pdf upload Mia i Grant

Guido Calabresi develops a framework for evaluating different systems of accident law. Defining the goal of accident law as the maximum reduction of accident and accident avoidance costs that can be achieved fairly, he examines ten political and economic choices implied in various approaches to reducing these costs. Calabresi then considers two fundamental problems all systems of accident law must face: who should be held responsible for accident costs, and how should they be valued? He analyzes the fault-insurance system now widely used and finds it wanting on grounds both of cost

reduction objectives and fairness. In conclusion, he discusses recent proposals for reform of the law, points out questions they raise, and ends by indicating the two he thinks most likely to prevail and the fundamental conflict between them.

“Calabresi’s book is most significant for its first-rate combination of modern economic analysis and legal policy. The methodology and underlying principles extend far beyond the particular subject matter of accident law to many other legal areas that could benefit from economic analysis. In turn, some economic analyses may become the richer

for the discussion in this book. It is truly one of those rare important volumes.”—Gerald M Meier
