Free Choice in and Out of Context 2007 Evangelia Vlachou It has often been argued that Free Choice Items (FCIs) are Polarity Items. Consequently, we have analyzed FCI distribution in terms of the conditions of licensing and anti-licensing. Based on French, Greek and English data, I defend the hypothesis that this approach is not correct. FCIs have a very strong lexical semantics. They express widening, indiscriminacy, indifference, ignorance, indistinguishability and low-level. Since all the readings of FCIs can be pragmatically blocked in all contexts, I propose that the distribution of FCIs is entirely free with the exception of certain cases in which we have semantic blocking.

Social Media and the 2008 U. S. Presidential Election 2009-10 Emily Metzgar The 2008 U.S. presidential campaign offered a unique opportunity to evaluate the usefulness and applicability of social media technology in the American political environment. This study's assessment of the role that social media played during the 2008 U.S. presidential campaign confirms some widely held tenets of conventional wisdom about social media, but it also indicates that the role of social media as the new sine qua non of American politics is far from certain.

Off-Screen Cinema 2015-01-26 Kaira M. Cabañas One of the most important avant-garde movements of postwar Paris was Lettrism, which crucially built an interest in the relationship between writing and image into projects in poetry, painting, and especially cinema. Highly influential, the Lettrists served as a bridge of sorts between the earlier works of the Dadaists and Surrealists and the later Conceptual artists. Off-Screen Cinema is the first monograph in English of the Lettrists. Offering a full portrait of the avant-garde scene of 1950s Paris, it focuses on the film works of key Lettrist figures like Gil J Wolman, Maurice Lemaître, François Dufrêne, and especially the movement's founder, Isidore Isou, a Romanian immigrant whose "discrepant editing" deliberately uncoupled image and sound. Through Cabañas's history, we see not only the full scope of the Lettrist project, but also its clear influence on Situationism, the French New Wave, the New Realists, as well as American filmmakers such as

The Art of Asking Your Boss for a Raise 2017-01-17 Georges Perec Darkly funny account of the office worker's mindset by the celebrated French novelist A long-suffering employee in a big corporation has summoned up the courage to ask for a raise. But as he runs through the looming encounter in his mind, his neuroses come to the surface: What is the best day to see the boss? What if he doesn't offer you a seat when you go into his office? The Art of Asking Your Boss for a Raise is a hilarious account of an employee losing his identity—and possibly his sanity—as he tries to put on the most acceptable face for the corporate world, with its rigid hierarchies and hostility to new ideas. If he follows a certain course of action, so this logic goes, he will succeed—but, in accepting these conditions, are his attempts to challenge his world of work doomed from the outset? Neurotic and pessimistic, yet endearing, comic and never less than entertaining, Perec's Woody Allen-esque underling presents an acute and penetrating vision of the world of office work, as pertinent today as it was when it was written in 1968.

Verbivorous Festschrift Volume Six 2017-10-24 G. N. Forester The sixth Verbivorous Festschrift is a broodingnagian spectacular fEting the famous workshop of potential literature, The Oulipo, now entering its 57th year. Our contributors were invited to write a piece of fiction, an essay, a poem, or any other hybrid, and choose their own constraints. The results have yielded a marvellous sprawl of oulipian homage, from petite poetic tributes to Queneau, to long lipogrammatic bows to Perec. In this issue: Philip Terry's take on Perec's I Remember, Warren Motte's literary abecedaries, David Bellos's iconoclastic essay on Hugo and Perec, two chapters from Jeff Bursey's lipogrammic novel Ennead, Louis Bury's anticipatory blurbs, Michael Leong's take on the Oulipo's ever-expanding influence, Tom Jenks and Jeanelle D'Alessandro's satirical NJ7s, Andriana Minou's typographically playful novella Hypnotic Labyrinth, John Peck's murder mystery in 100 sentences, poetry from Doug Nufer and Stephen Frug, Marc Lapprand's view on evolution and The Oulipo, a slew of palindromes, lists, papers, and fancies from Pablo Ruiz, and many other pieces. The issue concludes with a wholly original work of sustained constraint: Christine Brooke-Rose's first novel rewritten with her grammatical constraints and polylingual puns reinstated. The sixth issue is our fattest feast yet, and a must for Oulipo enthusiasts.

Invasion of the Sea 2013-08-15 Jules Verne Jules Verne, celebrated French author of Twenty Thousand Leagues Under the Sea and Around the World in 80 Days, wrote over 60 novels collected in the popular series "Voyages Extraordinaires." A handful of these have never been translated into English, including Invasion of the Sea, written in 1904 when large-scale canal digging was very much a part of the political, economic, and military strategy of the world's imperial powers. Instead of linking two seas, as existing canals (the Suez and the Panama) did, Verne proposed a canal that would create a sea in the heart of the Sahara Desert. The story raises a host of concerns -- environmental, cultural, and political. The proposed sea threatens the nomadic way of life of those Islamic tribes living on the site, and

they declare war. The ensuing struggle is finally resolved only by a cataclysmic natural event. This Wesleyan edition features notes, appendices and an introduction by Verne scholar Arthur B. Evans, as well as reproductions of the illustrations from the original French edition.

Salt boundaries 2017-03-13 VVAA We live in this planet since time immemorial, a tiny dot in an ocean of darkness. All the people we know and love live here. Here are our dreams and our disappointments. This planet is our country; this planet is us. In this planet we live as our ancestors did. This land belongs to all religions, faiths and their representatives, teachers of ethics, fair men, people who create but also people who destroy. Some people whose only goal is ending up with the civilization. Corrupt people who do not respect the essence of the human being and whose desire is their enrichment based on the death of others. War lords turned this planet into a theatre where they represent a terrible play in which the death is the main character. A play in which blood flows as rivers and floods the corpses of its innocent victims. Why is this happening? Why this willingness to kill each other it is so uncontrollable? I know that nobody will come to help us in case of a hecatomb; a savior will not come from another planet to rid us of ourselves. There is no place for us to flee or to emigrate to. Why do not we treat ourselves with love and respect? Why do not we build rather than destroy? Why is the human being so selfish? This planet is our homeland. This planet is us, and we are killing it. Why do not we unite our voices against those doers of death? A unique voice that defends the right of a dignified, safe and peaceful life. A unique voice that raises against destruction, death, torture and exiles caused by wars. No one wants to be forced to leave behind his family or friends. No one wants to leave his land, the place of his childhood or deprive his children of it. (Con ilustraciones a color y texto a varios idiomas).

Convergence of the life sciences with fields including physical, chemical, mathematical, computational, engineering, and social sciences is a key strategy to tackle complex challenges and achieve new and innovative solutions. However, institutions face a lack of guidance on how to establish effective programs, what challenges they are likely to encounter, and what strategies other organizations have used to address the issues that arise. This advice is needed to harness the excitement generated by the concept of convergence and channel it into the policies, structures, and networks that will enable it to realize its goals. Convergence investigates examples of organizations that have established mechanisms to support convergent research. This report discusses details of current programs, how organizations have chosen to measure success, and what has worked and not worked in varied settings. The report summarizes the lessons learned and provides organizations with strategies to tackle practical needs and implementation challenges in areas such as infrastructure, student education and training, faculty advancement, and inter-institutional partnerships.

Chaotic Harmony 2014-06-11 Ali Sanayei This fascinating book written by Ali Sanayei and Otto E. RöSSLer is not a classic scientific publication, but a vivid dialogue on science, philosophy and the interdisciplinary intersections of science and technology with biographic elements. Chaotic Harmony: A Dialog about Physics, Complexity and Life represents a discussion between Otto RöSSLer and his colleague and student, focusing on the different areas of science and highlights their mutual relations. The book's concept of interdisciplinary dialogue is unusual nowadays although it has a long tradition in science. It provides insight not only into interesting topics that are often closely linked, but also into the mind of a prominent scientist in the field of physics, chaos and complexity in general. It allows a deep look into the fascinating process of scientific development and discovery and provides a very interesting background of known and unknown facts in the areas of complex processes in physics, cosmology, biology, brains and systems in general. This book will be valuable to all who are interested in science, its evolution and in an unconventional and original look at various issues. Surely it can serve as an inspiration for students, explaining the often overlooked fact that science and philosophy enrich each other.

Vortices in the Magnetic Ginzburg-Landau Model 2008-05-14 Etienne Sandier This book presents the mathematical study of vortices of the two-dimensional Ginzburg-Landau model, an important phenomenological model used to describe superconductivity. The vortices, identified as quantized amounts of vorticity of the superconducting current localized near points, are the objects of many observational and experimental studies, both past and present. The Ginzburg-Landau functionals considered include both the model cases with and without a magnetic field. The book acts a guide to the various branches of Ginzburg-Landau studies, provides context for the study of vortices, and presents a list of open

problems in the field.

Congressional Elections 2015-11-17 Paul S. Herrnson In Congressional Elections: Campaigning at Home and in Washington author Paul Herrnson combines top-notch research with real-world politics as he argues that successful candidates run two campaigns: one for votes, the other for resources. Using campaign finance data, original survey research, and hundreds of interviews with candidates and political insiders, Herrnson looks at how this dual strategy affects who wins and how it ultimately shapes the entire electoral system. The Seventh Edition considers the impact of the Internet and social media on campaigning; the growing influence of interest groups in the wake of the Supreme Court's Citizens United ruling; and the influence of new voting methods on candidate, party, and voter mobilization tactics.
