Creating Aging-friendly Communities 2016 Andrew E. Scharlach Creating Aging-Friendly Communities (CAFC) examines the need to redesign America's communities to respond to the realities of our rapidly aging society. The text focuses on the interface between individuals and their environments, and the ways in which communities can enhance individual and community well-being. What differentiates CAFC from other books is its breadth of focus, its comprehensive and evidence-based consideration of key concepts, its inclusion of social as well as physical infrastructure characteristics, and its intensive examination of models of community change for fostering aging-friendliness. It presents a conceptually and empirically-based model of aging-friendliness, identifies environmental modifications that could enhance individual and community well-being, outlines a typology of community change approaches, and considers the potential efficacy of those approaches. This book identifies practical implications for policies, programs, and knowledge development designed to help communities become more aging-friendly.

A Jewish Guide in the Holy Land 2016-04-11 Jackie Feldman For many Evangelical Christians, a trip to the Holy Land is an integral part of practicing their faith. Arriving in groups, most of these pilgrims are guided by Jewish Israeli tour guides. For more than three decades, Jackie Feldman—born into an Orthodox Jewish family in New York, now an Israeli citizen, scholar, and licensed guide—has been leading tours, interpreting Biblical landscapes, and fielding questions about religion and current politics. In this book, he draws on pilgrimage and tourism studies, his own experiences, and interviews with other guides, Palestinian drivers and travel agents, and Christian pastors to examine the complex interactions through which guides and tourists "co-produce" the Bible Land. He uncovers the implicit politics of travel brochures and religious souvenirs. Feldman asks what it means when Jewish-Israeli guides get caught up in their own performances or participate in Christian rituals, and reflects on how his interactions with Christian tourists have changed his understanding of himself and his views of religion.

Copper Zinc Tin Sulfide-Based Thin-Film Solar Cells 2015-02-23 Kentaro Ito Beginning with an overview and historical background of Copper Zinc Tin Sulphide (CZTS) technology, subsequent chapters cover properties of CZTS thin films, different preparation methods of CZTS thin films, a comparative study of CZTS and CIGS solar cell, computational approach, and future applications of CZTS thin film solar modules to both ground-mount and rooftop installation. The semiconducting compound (CZTS) is made up earth-abundant, low-cost and non-toxic elements, which make it an ideal candidate to replace Cu(In,Ga)Se2 (CIGS) and CdTe solar cells which face material scarcity and toxicity issues. The device performance of CZTS-based thin film solar cells has been steadily improving over the past 20 years, and they have now reached near commercial efficiency levels (10%). These achievements prove that CZTS-based solar cells have the potential to be used for large-scale deployment of photovoltaics. With contributions from leading researchers from academia and industry, many of these authors have contributed to the improvement of its efficiency, and have rich experience in preparing a variety of semiconducting thin films for solar cells.

Data Profiling and Insurance Law 2019-03-21 Brendan McGurk The winner of the 2020 British Insurance Law Association Book Prize, this timely, expertly written book looks at the legal impact that the use of 'Big Data' will have on the provision – and substantive law – of insurance. Insurance companies are set to become some of the biggest consumers of big data which will enable them to profile prospective individual insureds at an increasingly granular level.

More particularly, the book explores how: (i) insurers gain access to information relevant to assessing risk and/or the pricing of premiums; (ii) the impact which that increased information will have on substantive insurance law (and in particular duties of good faith disclosure and fair presentation of risk); and (iii) the impact that insurers' new knowledge may have on individual and group access to insurance. This raises several consequential legal questions: (i) To what extent is the use of big data analytics to profile risk compatible (at least in the EU) with the General Data Protection Regulation? (ii) Does insurers' ability to parse vast quantities of individual data about insureds invert the information asymmetry that has historically existed between insured and insurer such as to breathe life into insurers' duty of good faith disclosure? And (iii) by what means might legal challenges be brought against insurers both in relation to the use of big data and the consequences it may have on access to cover? Written by a leading expert in the field, this book will both stimulate further debate and operate as a reference text for academics and practitioners who are faced with emerging legal problems arising from the increasing opportunities that big data offers to the insurance industry.

Post-admission Language Assessment of University Students 2016-08-10 John Read English-medium universities around the world face real challenges in ensuring that incoming students have the language and literacy skills they need to cope with the demands of their degree programmes. One response has been a variety of institutional initiatives to assess students after admission, in order to identify those with significant needs and advise them on how to enhance their academic language ability. This volume brings together papers from Australia, Canada, Hong Kong, New Zealand, Oman, South Africa and the United States, written by language assessment specialists who discuss issues in the design and implementation of these post-admission assessments in their own institutions. A major theme running through the book is the need to evaluate the validity of such assessments not just on their technical quality but on their impact, in terms of giving students access to effective means of developing their language skills and ultimately enhancing their academic achievement.

Jurisdiction and Cross-Border Collective Redress 2019-07-11 Alexia Pato In recent decades, the rise in cross-border law violations has harmed numerous victims around the globe. The damages are often dispersed and low-level. As a result, the private enforcement gap has deepened and collective redress represents an interesting procedural instrument that is able to provide effective access to justice. This book analyses thoroughly the dominant collective redress models adopted in the EU. Data from 13 Member States has been catalogued and categorised. The research mainly focuses on the consumer law field but frequent references to financial and data protection-related cases are made. The dominant collective redress models are then studied from a private international law perspective. In particular, the book highlights the current mismatch between collective redress on the one hand, and rules on international jurisdiction on the other. Additionally, it notes that barriers to cross-border litigation remain significant for victims and their representatives. The unprecedented empirical study included in this book confirms that statement. Observing that EU measures have not satisfactorily lowered those barriers, the author proposes the creation of a new head of jurisdiction for cases of international collective redress. This book will be of interest to private international law scholars, researchers, students, legal practitioners, judges and policy-makers. It is a reference point for those with an interest in cross-border collective redress in particular, and private international law in general.

Sexual Assault in the U.S. Military 2015-12-01 Rosemarie Skaine This book provides an in-depth analysis of sexual assault in the military from historical and contemporary perspectives, offering suggestions that could change the existing culture and approaches that will reduce or eliminate sexual assault in the armed forces. Sexual assault has been an aspect of the U.S. military historically and is today widely recognized as a significant problem with far-reaching repercussions. How does sexual assault negatively impact not only the victims themselves but also the U.S. military's strength, readiness, and morale? This book answers these questions and documents the problems with reporting and prosecuting sexual assault complaints within our armed forces, examines the current policy and laws to identify what changes are needed, and analyzes recent efforts to prevent sexual assault. Author Rosemarie Skaine introduces the subject with a historical perspective that covers women, men, gays and lesbians, and non-military personnel as the subjects of sexual assault and provides readers with clear definitions of sexual harassment and sexual assault. The chapters explain how sexual assault negatively affects the military's performance as a whole, thereby serving to undermine national security; and covers preventative approaches and legislation intended to change the current military culture. The book also includes a bibliography, tables of key figures, and footnotes and endnotes that fully document the data presented.
