ELEMENTS OF GEOLOGY 2008-04-22 S.M.
MATHUR Aimed at B.Sc. students of geology,
this introductory text develops a basic
understanding of the Earth as a complex,

evolving system of geological processes. This book will also be of immense use to those postgraduate students of geology who opt for this stream after graduating in disciplines other than geology. Geology as a science has recently gained increasing importance because of the current developments in oil and mineral exploration and also because of recent occurrences of earthquakes and tsunamis. This book covers the entire spectrum of the geologic concepts and relates them to the main processes of geomorphology, earthquakes and volcanoes. Important types of the three categories of rocks—igneous, sedimentary and metamorphic—that form the crust of the Earth are described with their characteristic mineralogy. Major structures that are born of tectonic activities are discussed. Palaeontological descriptions cover not only the plant and animal groups but also other evidences of life in the geological record and evolution. An important feature of the text is that modern stratigraphic methods of classification are outlined clearly, and the latest geologic time scale with numerical ages as approved in 2004 by the International Commission on Stratigraphy of the International Union of Geological Sciences is incorporated.

The God Market 2011-10-01 Meera Nanda Conventional wisdom says that integration into the global marketplace tends to weaken the power of traditional faith in developing countries. But, as Meera Nanda argues in this path-breaking book, this is hardly the case in today's India. Against expectations of growing secularism, India has instead seen a remarkable intertwining of Hinduism and neoliberal ideology, spurred on by a growing capitalist class. It is this "State-Temple-Corporate Complex," she claims, that now wields decisive political and economic power, and provides ideological cover for the dismantling of the Nehru-era state-dominated economy.

According to this new logic, India's rapid economic growth is attributable to a special "Hindu mind," and it is what separates the nation's Hindu population from Muslims and others deemed to be "anti-modern." As a result, Hindu institutions are replacing public ones, and the Hindu "revival" itself has become big business, a major source of capital accumulation. Nanda explores the roots of this development and its possible future, as well as the struggle for secularism and socialism in the world's second-most populous country.

landscape is evolving with tremendous speed. We are facing an extremely fast-growing attack surface with a diversity of attack vectors, a clear asymmetry between attackers and defenders, billions of connected IoT devices, mostly reactive detection and mitigation approaches, and finally big data challenges. This book contains eleven chapters dealing with different Cybersecurity Issues in Emerging Technologies. The issues that are discussed and analyzed include smart connected cars, unmanned ships, 5G/6G connectivity, blockchain, agile incident response, hardware assisted security, ransomware attacks, hybrid threats and cyber skills gap. Both theoretical analysis and experimental evaluation of state-of-the-art techniques are presented and discussed. Prospective readers can be benefitted in

understanding the future implications of novel technologies and proposed security solutions and techniques. Indian Film Stars 2020-05-28 Michael Lawrence

Indian Film Stars offers original insights and important reappraisals of film stardom in India from the early talkie era of the 1930s to the contemporary period of global blockbusters. The collection represents a substantial intervention to our understanding of the development of film star cultures in India during the 20th and 21st centuries. The contributors seek to inspire and inform further inquiries into the histories of film stardom—the industrial construction and promotion of star personalities, the actual labouring and imagined lifestyles of professional stars, the stars' relationship to specific aesthetic cinematic conventions (such as frontality and song-dance) and production technologies (such as the play-back system and post-synchronization), and audiences' investment in and devotion to specific star bodies—across the country's multiple centres of film production and across the overlapping (and increasingly international) zones of the films' distribution and reception. The star images, star bodies and star careers discussed are examined in relation to a wide range of issues, including the negotiation and contestation of tradition and modernity, the embodiment and articulation of both Indian and non-Indian values and vogues; the representation of gender and sexuality, of race and ethnicity, and of cosmopolitan mobility

and transnational migration; innovations and conventions in performance style; the construction and transformation of public persona; the star's association with film studios and the mainstream media; the star's relationship with historical, political and cultural change and memory; and the star's meaning and value for specific (including marginalised) sectors of the audience.
