Public Relations Management in Africa  
Volume 2 2023-07-19  
Albert A. Anani-Bossman  
This two-part volume, the first of its kind, examines current pedagogical modules and research directions in public relations and communication management, identifying emerging issues driving the practice in Africa. In comparison to its Western and Asian counterparts, literature on public relations management in Africa is limited, and much of it is examined through the lenses of Western philosophies and pedagogies, failing to reflect Africa's socioeconomic, political, and cultural contexts. This project aims to change that. □  
Albert Volume 2 brings together African scholars, moving beyond organizational impact to share the wider theoretical and practical perspectives on the practice of public relations on the continent, within its cultural, global, and technological milieu. Through conceptual discussions and empirical analyses, this volume shows how Africa is gradually coming out of the shadows of the Western world by building a body of knowledge that reflects the nature of public relations management on the continent. Chapters cover: how public relations contributes to strategic management in Africa; health

organizations are faced with environments of volatility, uncertainty, complexity, and ambiguity. The COVID-19 pandemic, other healthcare challenges, expectations for evidence-based practice usage, and racial justice are vivid examples. Clients and communities deserve effective services delivered by competent, compassionate, and committed staff members. Taxpayers, donors, philanthropists, policy makers, and board members deserve to have their contributions used to deliver programs that are effective and efficient. All these forces create demands and opportunities for organizational change. Planned organizational change can happen at the level of a program, division, or an entire organization.

copasetic leader-member relationship. While Leader-Member Exchange Theory (LMX) research addresses the impact that the leader-member relationship has on the individual employee experience, much of this scholarship overlooks or obscures the vital role that communication plays in the development and maintenance of workgroup relationships. Much of extant literature also glosses over the role that communication plays in workgroup collaboration. Using a communicative lens, this text illustrates the complex theoretical underpinnings of LMX theory, such as the importance of social interaction and relationship building and maintenance necessary to achieve organizational goals. We explore how an employee's relationship

shapes their peer relationships and their overall standing within their workgroup. Further, the text examines the potential dark side of LMX theory, such as the tendency towards demographic and trait and state similarity. Employing a communicative perspective emphasizes the extent of position and personal power both leaders and members have in engineering the quality of the relationship they desire. Integrating and applying once disparate lines of academic literature, this book offers employees, students, and teacher-scholars pragmatic yet research-based insights into developing and maintaining successful, healthy workplace relationships.

2019-10-09 Headquarters Department of the Army ADP 6-22 describes enduring concepts of leadership through the core competencies and attributes required of leaders of all cohorts and all organizations, regardless of mission or setting. These principles reflect decades of experience and validated scientific knowledge. An ideal Army leader serves as a role model through strong intellect, physical presence, professional competence, and moral character. An Army leader is able and willing to act decisively, within superior leaders' intent and purpose, and in the organization's best interests. Army leaders recognize that organizations, built on mutual trust and confidence, accomplish missions. Every member of leadership Army, military or

civilian, is part of a team and functions in the role of leader and subordinate. Being a good subordinate is part of being an effective leader. Leaders do not just lead subordinates- they also lead other leaders. Leaders are not limited to just those designated by position, rank, or authority.

The field of Engineering Economics and Cost Estimation is a vital aspect of any engineering project. It involves current and upcoming economic factors, making it essential to obtain dependable estimates of future costs, benefits, and other economic parameters. Engineers regularly deal with projects whose scale, complexity, and uncertainty call for sophisticated approaches to planning and budgeting<sup>[1]</sup>. A number of methods are used for cost estimation, including rough estimates, semi-detailed estimates, or detailed estimates, depending on the needs for the estimates<sup>[2]</sup>. Key concepts in this field include overhead costs, cost driver identification, cost allocation methods, capital budgeting, flexible budgeting, zero-based budgeting, budgets, and estimates. A number of models are available for developing cost (or benefit) estimates, such as the per-unit model, the segmenting model, cost indexes, the power-sizing model, and learning curve cost estimating. The quality of a cost estimate generally increases as the resources allocated to developing the estimate increase.
