Dark Persuasion

2021-08-10 Joel E. Dimsdale A harrowing account of brainwashing’s pervasive role in the twentieth and twenty-first centuries This gripping book traces the evolution of brainwashing from its beginnings in torture and religious conversion into the age of neuroscience and social media. When Pavlov introduced scientific approaches, his research was enthusiastically supported by Lenin and Stalin, setting the stage for major breakthroughs in tools for social, political, and religious control. Tracing these developments through many of the past century’s major conflagrations, Dimsdale narrates how when World War II erupted, governments secretly raced to develop drugs for interrogation. Brainwashing returned to the spotlight during the Cold War in the hands of the North Koreans and Chinese. In response, a huge Manhattan Project of the Mind was established to study memory obliteration, indoctrination during sleep, and hallucinogens. Cults used the techniques as well. Nobel laureates, university academics, intelligence operatives, criminals, and clerics all populate this shattering and dark story—one that hasn’t yet ended.

The Manipulated Mind

2000-01 Denise Winn Ever since American prisoners of war in Korea suddenly switched sides to the Communist cause, the concept of brainwashing has continued to fascinate and confuse. Is it really possible to force any thinking person to act in a way completely alien to his character? What makes so-called brainwashing so different from the equally insidious effects of indoctrination and conditioning, or even advertising and education? Research findings from psychology show that brainwashing is not a special subversive technique; it is the clever manipulation of unrealized influences that operate in all our lives. This book, by breaking down so-called brainwashing to its individual elements, shows how social conditioning, need for approval, emotional dependency and much else that we are unaware of, prevent us from being as self-directed as we think; and, conversely, which human traits make us the least susceptible to subtle influence.

Eva had always been fascinated by magic, but she never expected to find out that she was a witch. She had grown up in a normal family, in a normal town, with no signs of anything supernatural. But on her sixteenth birthday, everything changed. She received a mysterious package from her grandmother, who had died years ago. Inside was a leather-bound book with the words "The Book of Shadows" engraved on the cover. Eva opened it and felt a surge of power run through her veins. She realized that the book contained the secrets of her family's magical heritage, and that she was the last of a long line of powerful witches. But she also learned that she was not alone. There were others like her, and some of them wanted to use their magic for evil. Eva had to decide whether to embrace her destiny as a witch, or to reject it and live a normal life. But either way, she knew that her life would never be the same again.
