Created by Lloyd M. Dunn and Douglas M. Dunn, the assessment is crafted to measure receptive vocabulary for Standard American English. It is quick and effortless to carry out, preserving precious time so that attention can be set on applying successful approaches.

The PPVT-4 assessment content encompasses a wide scope of vocabulary comprehension levels, ranging from preschool through adulthood. The assessment questions widely feature words that portray 20 content areas (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and educational vocabulary.

The assessment gives two identical editions which contain distinct vocabulary items, making sure that the individual has not "learned" the evaluation. One form can be employed before intervention implementation to measure test-takers' vocabulary understanding and the second form can be used for re-assessment to measure and document improvement. The PPVT-4 also features a distinctive Growth Scale Value (GSV) which is reactive to small changes with time.
