UN Millennium Development Library: Prescription for Healthy Development 2013-06-17 UN Millennium Project The Millennium Development Goals, adopted at the UN Millennium Summit in 2000, are the world's targets for dramatically reducing extreme poverty in its many dimensions by 2015 income poverty, hunger, disease, exclusion, lack of infrastructure and shelter while promoting gender equality, education, health and environmental sustainability. These bold goals can be met in all parts of the world if nations follow through on their commitments to work together to meet them. Achieving the Millennium Development Goals offers the prospect of a more secure, just, and prosperous world for all. The UN Millennium Project was commissioned by United Nations Secretary-General Kofi Annan to develop a practical plan of action to meet the Millennium Development Goals. As an independent advisory body directed by Professor Jeffrey D. Sachs, the UN Millennium Project submitted its recommendations to the UN Secretary General in January 2005. The core of the UN Millennium Project's work has been carried out by 10 thematic Task Forces comprising more than 250 experts from around the world, including scientists, development practitioners, parliamentarians, policymakers, and representatives from civil society, UN agencies, the World Bank, the IMF, and the private sector. This report lays out the recommendations of the UN Millennium Project Task Force 5 Working Group on Access to Essential Medicine. The Working Group recommends increasing the availability, affordability, and appropriate use of medicines in developing countries. This will require new incentives for research; better procurement, supply and distribution; strengthened primary health systems; pro-poor planning and budgeting; close collaboration with communities; and large increases in funding and the number of health workers. These bold yet practical approaches will ensure that substantially more people living in developing countries will have access to essential medicines by 2015.

War on Words 2011-07-13 Joanne M. Lisosky This unprecedented book provides a comprehensive examination of the issue of protecting journalists in conflict situations from both a practical and humanitarian law perspective. Violent criminals and corrupt governmental officials harass, co-opt, and kill local and foreign journalists in countries from Mexico to Afghanistan, to Russia and the Philippines. Staggeringly, there has been little or no prosecution in 89 percent of journalist murders worldwide. Such widespread impunity is arguably one of the greatest threats to press freedom. A number of international organizations and advocates have developed efforts to mitigate this problem, but belligerents continue to act with few restraints and little, if any, accountability. War on Words: Who Should Protect Journalists? is an examination of the deteriorating and dangerous environment facing journalists and what stakeholders are doing to address this serious problem threatening democracy worldwide. The authors explore the peril facing journalists, delve into the legal and practical history of press protection, evaluate current safety strategies for journalists, and gather opinions from an array of local and international correspondents and practitioners on how to improve this untenable situation.

Informal Norms in Global Governance 2016-05-23 Wolfgang Hein Hein and Moon take up a serious problem of contemporary global governance: what can be done when international trade rules prevent the realization of basic

human rights? Starting in the 1990s, intellectual property obligations in trade agreements required many developing countries to begin granting medicines patents, which often rendered lifesaving drugs unaffordable. At stake was the question of what priority would be given to health-particularly of some of the world's poorest people-and what priority to economic interests, particularly those of the most powerful states and firms. This book recounts the remarkable story of the access to medicines movement. The authors offer an explanation for how the informal, but powerful norm that every person should have access to essential medicines emerged after a decade of heated political contestation and against long odds. They also explore the stability and scope of the norm. Finally, the book examines the limitations of informal norms for protecting human rights, and when renewed focus on changing formal norms is warranted.

The Politics of Fear 2017-01-05 Michiel Hofman The 2014-2015 Ebola epidemic in West Africa was an unprecedented medical and political emergency that cast an unflattering light on multiple corners of government and international response. Fear, not rational planning, appeared to drive many decisions made at population and leadership levels, which in turn brought about a response that was as uneven as it was unprecedented: entire populations were decimated or destroyed, vaccine trials were fast-tracked, health staff died, untested medications were used (or not used) in controversial ways, humanitarian workers returned home to enforced isolation, and military was employed to sometimes disturbing ends. The epidemic revealed serious fault lines at all levels of theory and practice of global public health: national governments were shown to be helpless and unprepared for calamity at this scale; the World Health Organization was roundly condemned for its ineffectiveness; the US quietly created its own African CDC a year after the epidemic began. Amid such chaos, Médecins sans Frontières was forced to act with unprecedented autonomy -- and amid great criticism -- in responding to the disease, taking unprecedented steps in deploying services and advocating for international aid. The Politics of Fear provides a primary documentary resource for recounting and learning from the Ebola epidemic. Comprising eleven topic-based chapters and four eyewitness vignettes from both MSF- and non-MSF-affiliated contributors (all of whom have been given access to MSF Ebola archives from Guinea, Sierra Leone, and Liberia for research), it aims to provide a politically agnostic account of the defining health event of the 21st century so far, one that will hopefully inform current opinions and future responses.

Neopatrimonialism in Africa and Beyond 2013-03-01 Daniel C. Bach Neopatrimonialism, a system whereby rulers use state resources for personal benefit and to secure the loyalty of clients in the general population, is central to any teaching or conceptualisation of contemporary African politics. This book is a theoretical and comparative study of neopatrimonialism in Africa and across world regions. Although such practices are widespread in other parts of the world, the African neopatrimonial state has also become a global prototype of the anti-developmental state. This volume calls for a reappraisal of the genesis and interpretations of the concepts of patrimonialism and neopatrimonialism. Expert contributors consider recent debates in Africa through the study of democracy, clientelism, the 'big man' syndrome (Kenya), the rise of 'godfatherism' (Nigeria), 'warlordism' (Liberia) and the neopatrimonial state on a day to day basis (Niger). They discuss patrimonialism and neopatrimonialism from Latin America to Europe, Central Asia and Asia-Pacific, to weave a comparative analysis of the interplay between public policies and private interest. Neopatrimonialism in Africa and Beyond is an important and timely volume that will

be of interest to students and scholars of international politics, African studies, sociology and international development.

Disasters: Core Concepts and Ethical Theories 2018-10-16 Dónal P. O'Mathúna This Open Access Book is the first to examine disasters from a multidisciplinary perspective. Justification of actions in the face of disasters requires recourse both to conceptual analysis and ethical traditions. Part 1 of the book contains chapters on how disasters are conceptualized in different academic disciplines relevant to disasters. Part 2 has chapters on how ethical issues that arise in relation to disasters can be addressed from a number of fundamental normative approaches in moral and political philosophy. This book sets the stage for more focused normative debates given that no one book can be completely comprehensive. Providing analysis of core concepts, and with real-world relevance, this book should be of interest to disaster scholars and researchers, those working in ethics and political philosophy, as well as policy makers, humanitarian actors and intergovernmental organizations..

Reshaping Decentralised Development Co-operation The Key Role of Cities and Regions for the 2030 Agenda 2018-06-26 OECD Over the last decades, and in line with the adoption of the Sustainable Development Goals (SDGs) in 2015, cities and regions have played an important part in helping to implement global agendas at local level through their Decentralised Development Cooperation (DDC) activities.

Cyberactivism and Citizen Journalism in Egypt 2016-09-23 Courtney C. Radsch This compelling book explores how Egyptian bloggers used citizen journalism and cyberactivism to chip away at the state's monopoly on information and recalibrate the power dynamics between an authoritarian regime and its citizens. When the Arab uprisings broke out in early 2011 and ousted entrenched leaders across the region, social media and the Internet were widely credited with playing a role, particularly when the Egyptian government shut down the Internet and mobile phone networks in an attempt to stave off the unrest there. But what these reports missed were the years of grassroots organizing, digital activism, and political awareness-raising that laid the groundwork for this revolutionary change. Radsch argues that Egyptian bloggers created new social movements using blogging and social media, often at significant personal risk, so that less than a decade after the information revolution came to Egypt they successfully mobilized the overthrow of the state and its president.

The Routledge Companion to Humanitarian Action 2015-03-24 Roger Mac Ginty The Companion on Humanitarian Action addresses the political, ethical, legal and practical issues which influence reactions to humanitarian crisis. It does so by exploring the daily dilemmas faced by a range of actors, including policy makers, aid workers, the private sector and the beneficiaries of aid and by challenging common perceptions regarding humanitarian crisis and the policies put in place to address these. Through such explorations, it provides practitioners and scholars with the knowledge needed to both understand and improve upon current forms of humanitarian action. The Companion will be of use to those interested a range of humanitarian programmes ranging from emergency medical assistance, military interventions, managing refugee flows and the implementation of international humanitarian law. As opposed to addressing specific programmes, it will explore five themes seen as relevant to understanding and engaging in all modes of humanitarian action. The first section explores varying interpretations of humanitarianism, including critical historical and political-economic explanations as well as more practice based explorations focused on notions needs assessments and evaluation. Following this, readers will be exposed to the latest debates on a range of humanitarian principles including neutrality and sovereignty, before exploring the key issues faced by the main actors involved in humanitarian crisis (from international NGOs to local community based

organizations). The final two sections address what are seen as key dilemmas in regards to humanitarian action and emerging trends in the humanitarian system, including the increasing role of social media in responding to crises. Whilst not a 'how to guide', the Companion contains many practical insights for policy makers and aid workers, whilst also offering analytical insights for students of humanitarian action. Indeed, throughout the book, readers will come to the realization that understanding and improving humanitarian action simultaneously requires both active critical reflection and an acceptance of the urgency and timeliness of action that is required for humanitarian assistance to have an impact on vital human needs. Exploring a sector that is far from homogenous, both practitioners and scholars alike will find the contributions of this book offers them a deeper understanding of the motivations and mechanics of current interventions, but also insight into current changes and progress occurring in the field of humanitarian practice.

The Anti-Slavery Project 2011-05-26 Joel Quirk It is commonly assumed that slavery came to an end in the nineteenth century. While slavery in the Americas officially ended in 1888, millions of slaves remained in

bondage across Africa, Asia, and the Middle East well into the first half of the twentieth century. Wherever laws against slavery were introduced, governments found ways of continuing similar forms of coercion and exploitation, such as forced, bonded, and indentured labor. Every country in the world has now abolished slavery, yet millions of people continue to find themselves subject to contemporary forms of slavery, such as human trafficking, wartime enslavement, and the worst forms of child labor. The Anti-Slavery Project: From the Slave Trade to Human Trafficking offers an innovative study in the attempt to understand and eradicate these ongoing human rights abuses. In The Anti-Slavery Project, historian and human rights expert Joel Quirk examines the evolution of political opposition to slavery from the mid-eighteenth century to the present day. Beginning with the abolitionist movement in the British Empire, Quirk analyzes the philosophical, economic, and cultural shifts that eventually resulted in the legal abolition of slavery. By viewing the legal abolition of slavery as a cautious first step—rather than the end of the story—he demonstrates that modern anti-slavery activism can be best understood as the latest phase in an evolving response to the historical shortcomings of earlier forms of political activism. By exposing the historical and cultural roots of contemporary slavery, The Anti-Slavery Project presents an original diagnosis of the underlying causes driving one of the most pressing human rights problems in the world today. It offers valuable insights for historians, political scientists, policy makers, and activists seeking to combat slavery in all its forms.

Sustainable Development in Crisis Conditions 2008 Phillip J. Cooper Sustainable Development in Crisis Conditions takes a broad-based and integrative approach to exploring nation-building and reconstruction in the wake of environmentally destructive warfare.

The New Arab Journalist 2010-12-18 Lawrence Pintak The Arab media is in the midst of a revolution that will inform questions of war and peace in the Middle East, political and societal reform, and relations between the West and the Arab World. Drawing on the first broad cross-border survey of Arab journalists, first-person interviews with scores of reporters and editors, and his three decades' experience reporting from the Middle East, Lawrence Pintak examines how Arab journalists see themselves and their mission at this critical time in the evolution of the Arab media. He explores how, in a diverse Arab media landscape expressing myriad opinions, journalists are still under siege as governments fight a rear-guard action to manage the message. This innovative book breaks through the stereotypes about Arab journalists to reveal the fascinating and complex reality - and what it means for the rest of us.

Media Practice in Iraq 2012-08-07 A. Al-Rawi A historical survey of the Iraqi media from its beginning up to the present day, focusing on the post-2003 media scene and the political and societal divisions that occurred in Iraq after US-led occupation. Investigates the nature of the media outlets and offers an analysis of the way Iraqi satellite channels covered the 2010 general elections.

Cultural Anxieties 2020-03-13 Stéphanie Larchanche Cultural Anxieties is a compelling ethnography about Centre Minkowska, a transcultural psychiatry clinic in Paris, France. From her unique position as both observer and staff member, Stéphanie Larchanché explores the challenges of providing non-stigmatizing mental healthcare to migrants, and she identifies practical routes for improving caregiving practices.

Fortress Europe 2016-01-12 Matthew Carr Singled out by Foreign Affairs for its reporting on “the brutal frontiers of new Europe,” Fortress Europe is the story of how the world’s most affluent region—and history’s greatest

experiment with globalization—has become an immigration war zone, where tens of thousands have died in a humanitarian crisis that has galvanized the world’s attention. Journalist Matthew Carr brings to life remarkable human dramas, based on extensive interviews and firsthand reporting from the hot zones of Europe’s immigration battles, in a narrative that moves from the desperate immigrant camps at the mouth of the Channel Tunnel in Calais, France, to the chaotic Mediterranean sea, where African migrants have drowned by the thousands. Speaking with key European policy makers, police, soldiers on the front lines, immigrant rights activists, and an astonishing range of migrants themselves, Carr offers a lucid account both of the broad issues at stake in the crisis and its exorbitant human costs. The paperback edition includes a new afterword by the author, which offers an up-to-the-minute assessment of the 2015 crisis and a searing critique of Europe’s response to the new waves of refugees.

A Legal Analysis of NGOs and European Civil Society 2019-06-26 Piotr Staszczyk Amid widespread awareness and discussion of “the democratic deficit” and “shrinking civil space,” the role of nongovernmental organizations (NGOs) becomes increasingly important. Yet the precise legal status of such bodies is ill-defined. Here, for the first time, is a thorough commentary and analysis of the position of NGOs and European civil society in the European Union (EU) constitutional system, bringing to the fore existing and desirable means of public participation in EU lawmaking. Recognizing that NGOs have historically been designed to meet the ends of civil society, the analysis focuses on the following topics and issues: means in EU law of advocating for the collective interests of civil society; unofficial means of influencing the EU institutions; access to documents and the European Citizens’ Initiative as means of exerting pressure on EU legislation; relations between the EU institutions and NGOs, including lobbying activities; bringing actions in the common good before courts and other institutions; the special role of NGOs in environmental protection; complaints to the Commission and the European Ombudsman; EU funding for NGOs; and transboundary philanthropy. Drawing on a broad spectrum of sources of law, including CJEU case law and relevant legal literature, the book offers insightful proposals leading to the democratization of the EU’s internal procedures that will allow enhanced cooperation of civil society representatives across national borders. In its thorough examination of legal tools that can respond to the “democratic deficit,” this book makes a distinctive contribution to the public debate on the future of the European Union, especially in the context of emerging threats to further integration. It will prove of great value not only to civil activists, academics and policymakers but also to everyone interested in European integration and affordance for social participation.

Supply Chain Management for Humanitarians 2016-08-03 Ira Haavisto Supply Chain Management for Humanitarians provides an in-depth insight into the management of supply chains in the context of humanitarian logistics. This accessible and practical book considers humanitarian logistics from a strategic and operational perspective. The overarching theme is collaboration and coordination, one of the biggest challenges in the humanitarian community. Supply Chain Management for Humanitarians takes a problem-based learning approach, featuring real cases and examples from leading organizations including Oxfam, Unicef, and The Red Cross. Each chapter is self-standing, relating the content in each chapter to the supply chain as a whole. This enables the reader to easily dip into different sections. At the end of each chapter, there is a case study written by a leading practitioner currently working in the humanitarian field. Supply Chain Management for Humanitarians fills a much needed gap in the market and is essential reading for humanitarians worldwide.

Child Refugee and Migrant Health 2021-08-05 Christian Harkensee This is a practical book for any health professional working with refugee children and families in various settings, from the initial humanitarian crisis, through displacement, living in camps, transfer between countries, settling in host countries, to return to the country of origin. Providing a holistic and intergenerational perspective, topics include the psychological impact, growth and nutrition, the management of chronic illness and infectious diseases, as well as the health of girls, pregnant women and mothers. Finally social issues such as education and the development of a healthy future generation are addressed. Child Refugee and Migrant Health is a hands-on resource for anyone who cares for children, assessing and addressing their health and psychological needs, in the best way possible, with the available resources, in any setting. There is a strong focus not just on caring for refugee and migrant children in crisis situations, but also on their families, long term physical and mental health.

Anthropologies of Global Maternal and Reproductive Health 2022-01-11 Lauren J. Wallace This open access edited book brings together new research on the mechanisms by which maternal and reproductive health policies are formed and implemented in diverse locales around the world, from global policy spaces to sites of practice. The authors – both internationally respected anthropologists and new voices – demonstrate the value of ethnography and the utility of reproduction as a lens through which to generate rich insights into professionals' and lay people's intimate encounters with policy. Authors look closely at core policy debates in the history of global maternal health across six different continents, including: Women's use of misoprostol for abortion in Burkina Faso The place of traditional birth attendants in global maternal health Donor-driven maternal health programs in Tanzania Efforts to integrate qualitative evidence in WHO maternal and child health policy-making Anthropologies of Global Maternal and Reproductive Health will engage readers interested in critical conversations about global health policy today. The broad range of foci makes it a valuable resource for teaching in medical anthropology, anthropology of reproduction, and interdisciplinary global health programs. The book will also find readership amongst critical public health scholars, health policy and systems researchers, and global public health practitioners.

When the Rivers Run Dry, Fully Revised and Updated Edition 2018-08-28 Fred Pearce A new edition of the veteran science writer's groundbreaking work on the world's water crisis, featuring all-new reporting from the most recent global flashpoints Throughout history, rivers have been our foremost source of fresh water for both agriculture and individual consumption, but looming water scarcity threatens to cut global food production and cause conflict and unrest. In this visionary book, Fred Pearce takes readers around the world on a tour of the world's rivers to provide our most complete portrait yet of the growing global water crisis and its ramifications for us all. With vivid on-the-ground reporting, Pearce deftly weaves together the scientific, economic, and historic dimensions of the water crisis, showing us its complex origins--from waste to wrong-headed engineering projects to high-yield crop varieties that have saved developing countries from starvation but are now emptying their water reserves. Pearce argues that the solution to the growing worldwide water shortage is more efficiency and a new water ethic based on managing the water cycle for maximum social benefit rather than narrow self-interest.

Managing the global health response to epidemics 2019-02-12 Mathilde Bourrier Recent epidemics have prompted large-scale international interventions, aimed at mitigating the spread of disease in a globalized world. During a crisis, however, global health actions – including planning and organizing, communicating about risk, and cost-benefit evaluations – aren't usually part of a single, integrated global response. Arguing that an uncoordinated approach can be challenged by local conditions and expectations, generating a wide range of resistance and difficulties, this volume provides important insights for future outbreak management and global health

governance. Drawing on experiences with A(H1N1) and Ebola virus disease, the book is divided into three parts looking at how responses to global health crises have developed, lessons learned from particular pandemics and the ethical implications of our management of them. Individual chapters focus on, among other issues, financing, cost-benefit analysis, matrix management, risk communication and organizational strategies. Taking a social science perspective, this valuable book outlines the current state of global health emergency responses and explores ways in which they can be improved. It is a useful read for academics and practitioners interested in global health, the sociology of health and illness, health economics and emergency management.

Meeting the Challenge of Cultural Diversity in Europe 2018-08-31 Robin Wilson Europe has talked itself into a refugee and security crisis. There is, however, a misrecognition of the real challenge facing Europe: the challenge of managing the relationship between Europeans and the currently stigmatized 'others' which it has attracted. Making the case against a 'Europe of walls', Robin Wilson instead proposes a refounding of Europe built on the power of diversity and an ethos of hospitality rather than an institutional thicket serving the market.

Religious Violence Today [2 volumes] 2020-07-15 Michael Jerryson Through sections containing overview essays and reference entries related to particular religions, this resource explores the rise of religious violence, hate crime, and persecution around the world. Religious violence and persecution have been growing steadily both within the United States and around the world. Drawing on the expertise of a wide range of scholars, this current and comprehensive reference helps readers understand the persecution of members of particular faiths as well as violence committed by members of those faiths. In doing so, it promotes a greater understanding of the role of religion in global politics, domestic and international terrorism, and religious bigotry. The book contains sections on particular religious traditions from around the world. Each section begins with an overview essay surveying violence related to that particular religion, whether committed by or against members of that faith. Reference entries in each section then provide objective, fundamental information about particular topics related to violence and the religion discussed. The entries provide cross-references and suggestions for further reading, and the work closes with a bibliography of resources for further study.

Vaccines E-Book 2017-04-07 Stanley A. Plotkin From the development of each vaccine to its use in reducing disease, Plotkin's Vaccines, 7th Edition, provides the expert information you need to provide optimal care to your patients. This award-winning text offers a complete understanding of each disease, as well as the latest knowledge of both existing vaccines and those currently in research and development. Described by Bill Gates as "an indispensable guide to the enhancement of the well-being of our world," Plotkin's Vaccines is a must-have reference for current, authoritative information in this fast-moving field. Includes complete information for each disease, including clinical characteristics, microbiology, pathogenesis, diagnosis, and treatment, epidemiology, and public health and regulatory issues – plus complete information for each vaccine, including its stability, immunogenicity, efficacy, duration of immunity, adverse events, indications, contraindications, precautions, administration with other vaccines, and disease-control strategies. Analyzes the cost-benefit and cost-effectiveness of different vaccine options. Helps you clearly visualize concepts and objective data through an abundance of tables and figures. Covers the new oral cholera and zoster vaccines, as well as newly licensed meningococcal group B vaccines and a newly licensed dengue vaccine. Brings you up to date on successful human trials of Ebola vaccines, an enterovirus 71 vaccine licensed in China, and new recommendations and changes to polio vaccines. Features a new chapter on maternal immunization.

Disability Histories 2014-12-30 Susan Burch The field of disability history continues to evolve rapidly. In this collection, Susan Burch and Michael Rembis present nineteen essays that integrate critical analysis of gender, race, historical context, and other factors to enrich and challenge the traditional modes of interpretation still dominating the field. As the first collection of its kind in over a decade, Disability Histories not only brings readers up to date on scholarship within the field but fosters the process of moving it beyond the U.S. and Western Europe by offering work on Africa, South America, and Asia. The result is a broad range of readings that open new vistas for investigation and study while encouraging scholars at all levels to redraw the boundaries that delineate who and what is considered of historical value. Informed and accessible, Disability Histories is essential for classrooms engaged in all facets of disability studies within and across disciplines. Contributors are Frances Bernstein, Daniel Blackie, Pamela Block, Elsbeth Bösl, Dea Boster, Susan K. Cahn, Alison Carey, Fatima Cavalcante, Jagdish Chander, Audra Jennings, John Kinder, Catherine Kudlick, Paul R. D. Lawrie, Herbert Muyinda, Kim E. Nielsen, Katherine Ott, Stephen Pemberton, Anne Quartararo, Amy Renton, and Penny Richards.

The Care of the Witness 2016-10-31 Michal Givoni The Care of the Witness explores the historical shifts in the crises of witnessing to genocide, war, and disaster and their contribution to nongovernmental politics.

New Directions in Genocide Research 2012-03-12 Adam Jones Genocide studies is a relatively new field of comparative inquiry, but recent years have seen an increasing range of themes and subject-matter being addressed that reflect a variety of features of the field and transformations within it. This edited book brings together established scholars with rising stars and seeks to capture the range of new approaches, theories, and case studies in the field. The book is divided into three broad sections: Section I focuses on broad theories of comparative genocide, covering a number of different perspectives. Section II critically reconsiders core themes of genocide studies and unfolds a range of challenging new directions, including cultural genocide, gender and genocide (as it pertains to both women and men), structural violence, and the novel application of remote-sensing technologies to the detection and study of genocide. Section III is case-study focused, seeking to place both canonical and little-known cases of genocide in broader comparative perspective. Cases analyzed include genocide in North America, the Nazi Holocaust, the Armenian genocide, and the Sri Lankan genocide. The combination of cutting-edge scholarship and innovative approaches to familiar subjects makes this essential reading for all students and scholars in the field of genocide studies.

The New Humanitarians [3 volumes] 2008-11-30 Chris E. Stout Ph.D. From Braille Without Borders and Unite for Sight, to Geekcorps and PeaceWorks, humanitarian groups are working worldwide largely in undeveloped countries to better the lives of the residents. Whether they are empowering people with schools for the blind, prosthetic limbs, the devices to understand and use technology, or the information to work for civil peace, the men and women of these agencies offer tremendous talent to their causes, great dedication and, sometimes, even risk their lives to complete their missions. Working in war or civil war zones, humanitarians with nonprofits, non-governmental agencies, and university-connected centers and foundations have been injured, kidnapped, or killed. Now terrorist events and war crimes are more and more often bringing these self-sacrificing workers into the national spotlight by media headlines. Their work is, doubtless, remarkable. And so too are the stories of how they developed - including the defining moments when their founders felt they could no longer stand by and do nothing. In this set of books, founders and top officials from humanitarian organizations established in the last 50 years spotlight how and why they began their organizations, what their greatest victories and challenges have been, and how they run the organizations, down to where they get their funding and how they spend it to grow

the group and its efforts. Led by Chris E. Stout, named Humanitarian of the Year by the American Psychological Association, the contributors here come from across training disciplines including psychology, medicine, technology, science, politics, social work, and business. Stout, who has worked in Latin American terrorist zones, in Vietnam, and along the Amazon in Ecuador with Flying Doctors of America, has chosen to feature a sample of humanitarian groups across four primary areas - medicine, environment, education, and social justice. He also concentrates on what he calls guerilla humanitarians - those who step into unsafe or unhealthy conditions despite the dangers. There is also a concentration on those that have been very successful with on-the-ground-guerilla-innovations without a lot of bureaucracy or baloney. Above all, They are rebels with a cause whose actions speak louder than mere words, Stout explains. They have all felt a moral duty to serve as vectors of change. In addition to being psychologically insightful, these volumes hold invaluable practical information.

Prescription for the People 2017-11-15 Fran Quigley In Prescription for the People, Fran Quigley diagnoses our inability to get medicines to the people who need them and then prescribes the cure. He delivers a clear and convincing argument for a complete shift in the global and U.S. approach to developing and providing essential medicines—and a primer on how to make that change happen. Globally, 10 million people die each year because they are unable to pay for medicines that would save them. The cost of prescription drugs is bankrupting families and putting a strain on state and federal budgets. Patients' desperate need for affordable medicines clashes with the core business model of the powerful pharmaceutical industry, which maximizes profits whenever possible. It doesn't have to be this way. Patients and activists are aiming to make all essential medicines affordable by reclaiming medicines as a public good and a human right, instead of a profit-making commodity. In this book, Quigley demystifies statistics and terminology, offers solutions to the problems that block universal access to medicines, and provides a road map for activists wanting to make those solutions a reality.

Dying for an iPhone 2020-06-02 Jenny Chan Suicides, excessive overtime, and hostility and violence on the factory floor in China. Drawing on vivid testimonies from rural migrant workers, student interns, managers and trade union staff, Dying for an iPhone is a devastating expose of two of the world's most powerful companies: Foxconn and Apple. As the leading manufacturer of iPhones, iPads, and Kindles, and employing one million workers in China alone, Taiwanese-invested Foxconn's drive to dominate global electronics manufacturing has aligned perfectly with China's goal of becoming the world leader in technology. This book reveals the human cost of that ambition and what our demands for the newest and best technology means for workers. Foxconn workers have repeatedly demonstrated their power to strike at key nodes of transnational production, challenge management and the Chinese state, and confront global tech behemoths. Dying for an iPhone allows us to assess the impact of global capitalism's deepening crisis on workers.'

Ensuring Innovation in Diagnostics for Bacterial Infection 2016-04-18 Morel C. The inappropriate use of antibiotics is a primary cause of the ongoing increase in drug resistance amongst pathogenic bacteria. The resulting decrease in the efficacy of antibiotics threatens our ability to combat infectious diseases. Rapid point-of-care tests to identify pathogens and better target the appropriate treatment could greatly improve the use of antibiotics. Yet there are few such tests currently available or being developed despite the rapid pace of medical innovation. Clearly something is inhibiting the much-needed development of new and more convenient diagnostic tools. This study delineates priorities for developing diagnostics to improve antibiotic prescription and use with the goal of managing and curbing the expansion of drug resistance. It calls for new approaches particularly in the provision of diagnostic devices and in doing so outlines some of the inadequacies in health science and policy initiatives that

have led to the dearth of such devices. The authors make the case that there is a clear and urgent need for innovation not only in the technology of diagnosis but also in public policy and medical practice to support the availability and use of better diagnostic tools. This book explores the complexities of the diagnostics market from the perspective of both supply and demand unearthing interesting bottlenecks some obvious some more subtle. It calls for a multifaceted and broad policy response and an overhaul of current practice so that the growth of bacterial resistance can be stemmed.

To End a Plague 2021-07-06 Emily Bass “Randy Shilts and Laurie Garrett told the story of the HIV/AIDS epidemic through the late 1980s and the early 1990s, respectively. Now journalist-historian-activist Emily Bass tells the story of US engagement in HIV/AIDS control in sub-Saharan Africa. There is far to go on the path, but Bass tells us how far we’ve come.” —Sten H. Vermund, professor and dean, Yale School of Public Health With his 2003 announcement of a program known as PEPFAR, George W. Bush launched an astonishingly successful American war against a global pandemic. PEPFAR played a key role in slashing HIV cases and AIDS deaths in sub-Saharan Africa, leading to the brink of epidemic control. Resilient in the face of flatlined funding and political headwinds, PEPFAR is America’s singular example of how to fight long-term plague—and win. To End a Plague is not merely the definitive history of this extraordinary program; it traces the lives of the activists who first impelled President Bush to take action, and later sought to prevent AIDS deaths at the whims of American politics. Moving from raucous street protests to the marbled halls of Washington and the clinics and homes where Ugandan people living with HIV fight to survive, it reveals an America that was once capable of real and meaningful change—and illuminates imperatives for future pandemic wars. Exhaustively researched and vividly written, this is the true story of an American moonshot.

Routledge Handbook of Media Law 2013 Monroe E. Price Featuring specially commissioned chapters from experts in the field of media and communications law, this book provides an authoritative survey of media law from a comparative perspective. The handbook does not simply offer a synopsis of the state of affairs in media law jurisprudence, rather it provides a better understanding of the forces that generate media rules, norms, and standards against the background of major transformations in the way information is mediated as a result of democratization, economic development, cultural change, globalization and technological innovation. The book addresses a range of issues including: Media Law and Evolving Concepts of Democracy Network neutrality and traffic management Public Service Broadcasting in Europe Interception of Communication and Surveillance in Russia State secrets, leaks and the media A variety of rule-making institutions are considered, including administrative, and judicial entities within and outside government, but also entities such as associations and corporations that generate binding rules. The book assesses the emerging role of supranational economic and political groupings as well as non-Western models, such as China and India, where cultural attitudes toward media freedoms are often very different. Monroe E. Price is Director of the Center for Global Communication Studies at the Annenberg School for the University of Pennsylvania and Joseph and Sadie Danciger Professor of Law and Director of the Howard M. Squadron Program in Law, Media and Society at the Cardozo School of Law. Stefaan Verhulst is Chief of Research at the Markle Foundation. Previously he was the co-founder and co-director, with Professor Monroe Price, of the Programme in Comparative Media Law and Policy (PCMLP) at Oxford University, as well as senior research fellow at the Centre for Socio Legal Studies. Libby Morgan is the Associate Director of the Center for Global Communication Studies at the Annenberg School for the University of Pennsylvania.

Pediatric Surgery and Medicine for Hostile Environments 2017-03-15 Michael M. Fuenfer This new edition is

revised and expanded and is the pediatric version of Borden’s popular Emergency War Surgery Handbook. This authoritative resource applies lessons learned in past and present conflicts to ill and injured pediatric casualties. Topics include critical care, surgical treatment, and general medical management of acute and chronic conditions. Individual chapters address concerns such as anesthesia and intraoperative resuscitation, mechanical ventilation, aeromedical evacuation, thoracic surgery, surgery of the abdominal wall and diaphragm, fluid management, status epilepticus, care of the newborn, and emergency nutrition. Written and compiled by experts in the field of pediatric trauma, this book is constructed in an easy-to-read bullet format for quick reference, and includes up-to-the moment treatment recommendations for ill or injured children in theaters of war and austere environments. Military medical providers, civilian medical providers (pediatricians, pediatric surgeons, nursing staff, etc.) and first responders performing emergency medicine to children resulting from traumatic and hostile environments may find this pragmatic resource helpful in diagnosing, assessing care, and treating many of the most common medical and surgical conditions of childhood.

Sanctuary cities and urban struggles 2019-07-04 Jonathan Darling Sanctuary Cities and Urban Struggles makes the first sustained intervention into exploring how cities are challenging the primacy of the nation-state as the guarantor of rights and entitlements. It brings together cutting-edge scholars of political geography, urban geography, citizenship studies, socio-legal studies and refugee studies to explore how urban social movements, localised practices of belonging and rights claiming, and diverse articulations of sanctuary are reshaping the governance of migration. By offering a collection of empirical cases and conceptualisations that move beyond ‘seeing like a state’, Sanctuary Cities and Urban Struggles proposes not a singular alternative but rather a set of interlocking sites and scales of political imagination and practice. In an era when migrant rights are under attack and nationalism is on the rise, the topic of how citizenship, rights and mobility can be recast at the urban scale is more relevant than ever.

Telemedicine in Low-Resource Settings 2015-04-24 Richard Wootton Telemedicine networks to support healthcare workers in resource-limited settings (often for humanitarian purposes) have evolved over the last decade or so in a largely autonomous way. Communication between them has been informal and relatively limited in scope. This situation could be improved by developing a comprehensive approach to the collection and dissemination of information. A recent review identified seven telemedicine networks, each of which had been in operation for at least five years and which provided store-and-forward telemedicine services to doctors in low- and middle-income countries. These networks provide clinically useful services and improved healthcare access. However, like much of telemedicine, the formal evidence for their cost-effectiveness remains weak. Topics of current research interest therefore include the cost-effectiveness of telemedicine in resource-limited settings. Outcomes data (and methods for gathering it) such as patient quality of life following a telemedicine episode, the knowledge-gain of healthcare staff involved in telemedicine, and staff recruitment and retention in rural areas are also of interest. Finally, there is little published information about the performance of these telemedicine networks (and methods for measuring it), about how best to manage them, and about how to share resources between them. A collection of articles reporting the current evidence supporting the use of telemedicine in resource-limited settings would build the evidence base and should provide a focus for future research. It would also serve to raise the profile of this potentially important research field.

Global HIV/AIDS Medicine 2008 Paul Volberding HIV/AIDS management poses many different challenges around the world, and the therapies available in the West are often not economically feasible in developing countries. This

new book is the first to address the myriad of clinical difficulties faced by health practitioners worldwide in managing HIV/AIDS. Edited by the same authorities responsible for the highly respected reference "The Medical Management of AIDS," with Associate Editors that include the President of the International AIDS Society and a preeminent opinion leader in the fight against AIDS in Africa, and authored by a "who's who" of current global experts on HIV and AIDS medicine, this visionary text presents all the practical, indispensable information that clinicians everywhere need to offer their patients the best possible care. Access reliable, up-to-the-minute guidance that addresses the realities of HIV/AIDS management in your geographical region, thanks to contributions from a global cast of renowned expert clinicians and researchers. Locate the clinically actionable information you need quickly with an organization that mirrors the current state of the AIDS epidemic and the different needs of Western vs. developing-world patients and clinicians. Diagnose AIDS manifestations confidently by comparing them to full-color clinical images. Review essential data quickly through numerous at-a-glance tables.

Routledge Handbook of Sexuality, Health and Rights 2010-01-30 Peter Aggleton The last two decades have witnessed an explosion of research on sexuality as the social sciences have worked to find new ways of understanding a rapidly changing world. Growing concern for issues such as population, women's and men's reproductive health, and the HIV and AIDS pandemic, has since provided new legitimacy for work on sexuality, health and rights. A detailed and up-to-date reference work, The Handbook of Sexuality, Health and Rights provides an authoritative overview of the main issues in the field today. Leading academics and practitioners are brought together to reflect on past, present and future approaches to understanding and promoting sexual health and rights. Divided into nine parts, it covers: Pioneering beginnings Language, discourse and sexual categories From sexuality to health The reproductive imperative How to have sex in an epidemic The choreography of sex The darker side of sex From sexual health to sexual rights Struggles for erotic justice This handbook surveys the state of the discipline and offers an examination and discussion of emerging, controversial and cutting edge areas. It is an essential reference for academics and researchers in the fields of sexuality studies, sexual health and human rights, and offers key reading for more advanced students.

Guide sans frontieres 9e pdf pdf pdf-Instruments

Modern acupuncturists nowadays use disposable fine stainless steel needles that are 0.007 to 0.020 inches in diameter which are sterilized with either ethylene oxide or by autoclave. Since they are way finer than hypodermic syringe needles, being poked by these needles are relatively painless. The upper third of the needle is covered with either a thicker bronze wire or plastic to make the needle sturdier and easier to handle. The length of the needle and how far they are inserted is all up to the acupuncturist and his practised style of acupuncture.

Example Of Treatment

If a patient has a headache, he/she is diagnosed and is treated by stimulating the sensitive points located at the webs between the thumbs and palms. In acupuncture theory, these points are connected to the face and head and can be used for treatment of headaches and other ailments involved. Needles are then carefully inserted into the skin until the patient feels a twinge, which is usually accompanied by a slight involuntary twitching of the area. During this treatment, a number of things may occur.

- Sensitivity to pain in where needles are inserted.
- A hint of nausea during treatment in case of bad headaches.
- Near-immediate headache relief.

Story of" sans frontieres 9e pdf pdf pdf;Before you decide to have a session with them, talk to the acupuncturist to know their credentials. This will also give you the opportunity to find out how much do they charge as this can be from \$45 to more than \$100 per session.

You can probably ask for the name and contact number of a previous client so you can ask this person how everything went. Remember, if it doesn't work out for you, don't be afraid to find someone else who can do a better job. The most important thing to do during the session is to relax. If you feel an itch or something, tell the acupuncturist. The same goes if you are nervous or experience a burning sensation so the specialist will take out the needles.

The greatest advantage of this ancient Oriental procedure is the absence of side-effects during and after treatment. Unlike smoking cessation medications and nicotine replacement therapy products, acupuncture does not employ chemically manufactured substances. There is also no risk of weight gain during therapy. In conjunction with helping a patient quit smoking, it can also curb appetite, thus reducing food cravings. If you have tried several methods in smoking cessation to no avail, perhaps it is high time you consider the alternative method that is acupuncture. With the right practitioner and the right frame of mind, there is no reason why you won't be nicotine-free before long.

Happiness sans frontieres 9e pdf pdf pdf

The profit & loss of a certain company is determined by finance professionals through accounting. They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

Heat-Related Illnesses in Teens

Heat related illnesses are caused due to prolonged exposure to heat and also humidity without any reprieve and due to inadequate intake of fluids. Kids and teens adjust to the variations in heat compared to adults who adapt more quickly. However the heat production is high in them when compared to adults but sweat relatively less. Sweating is the natural action of the body and cooling mechanism to counter heat. Kids and teens often ignore these facts and do not hydrate themselves enough while playing, participating in sports and exercises.

Kids and teens with health problems that are chronic or those who are on certain prescription could be more susceptible to heat related problems. Overweight adolescents or those who wear heavy clothing in times of exertion also suffer heat related illnesses. Heat related illnesses are basically classified into three types. They are: Heat cramps, heat stroke and heat exhaustion.

Acupuncture treatment for smokers should only be done by a license professional. You can do some research online to find out if they are accredited by the National Commission for Acupuncture and Oriental Medicine, ask how long they have been in the profession, find out how many smokers they have helped and how much will they charge.

Once you have found one, you have to commit yourself to the program because both you and the acupuncturist have to work together to give up this habit.

Acupuncture can help smokers in the same way that it has helped addicts and alcoholics quit their addictions. You just have to try it even if you may not believe in it.

Liberation sans frontieres 9e pdf pdf pdf But you have to remember that acupuncture is not permanent. It merely starts something that you have to finish on your own. Some smokers who go 2 or 3 times a week to the clinic will need to come back for follow up sessions in the future.

At the same time, you have to find ways to prevent yourself from picking up a cigarette. You can do this by staying away from people who smoke since you will be tempted to ask for a stick. You can create your own personal mantra which you repeat to yourself every time you have an urge.

Remember that this craving is only short term and will last only for a few minutes. You have worked so hard to leave this behind so stick to the path and stay smoke free.

Power sans frontieres 9e pdf pdf pdf

Heat stroke is the severest condition of all heat related illnesses. In this condition the body gets overwhelmed with excessive heat and the efficiency of the system that regulates body heat goes down considerably which can result in a serious emergency requiring immediate medical care. The symptoms of heat stroke include dry and warm skin, very high fever generally above 104 degree Fahrenheit, increased heart rate, appetite loss, nausea, headache, vomiting, fatigue, agitation, confusion, stupor, seizures, coma and possible death. A teenager experiencing symptoms of heat stroke should stay in a cool place and have adequate rest. Heat stroke is a serious condition and emergency attention should be sought by calling 911. In the meanwhile the affected teenager should be made free of excessive clothing and should be worn with cool clothes and also put cool water on the skin to lower the temperature. Placing ice bags in armpits also helps. Make the teenager drink cool drinks if the teenager is alert.

Heat strokes are very much preventable if certain precautions are taken like drinking adequate water during hot days, avoiding alcoholic and caffeine drinks, wearing light clothes, exercising in cooler time of the day, wearing sunglasses and hat, using umbrella on a hot day, applying sun cream with a spf of at least 15 etc.

Life Lessons from sans frontieres 9e pdf pdf pdf~A rest of about a month is generally advised and normal activities can be resumed after acute symptoms disappear. Also care should be taken to avoid physical activities which are heavy in nature and also activities or sports involving physical contacts should also be avoided. Care must also be taken to avoid eating sweet things in excess for few months.

Menstrual Disorders in Adolescent Girls

Adolescence is the time when there is sudden transformation in the body and many questions arise in the minds of the adolescents. Firstly they are not able to cope with the changes and secondly the changes bring along problems with them. The most challenging problems are related to menses, in girls. Menstrual conditions are many that may require physician's attention or any other healthcare professional's attention. The most common of the menstrual disorders are premenstrual syndrome, dysmenorrhea and amenorrhea.

Before the onset of the menses, females face many uncomfortable symptoms which last for a short period, stretching from few hours to few days. But some of them can be very intense and can disturb the normal functioning of the person. These symptoms are grouped as premenstrual syndrome. In usual cases, the symptoms come to a halt when the menses begin, but for some they may last even after the menstrual periods are over. Eighty five percent of the females experience some of the symptoms of premenstrual syndrome at one time or the other. Nearly forty percent experience the symptoms so intensely that their daily chores are affected by it and ten percent are disabled by it.

Study case sans frontieres 9e pdf pdf pdf There are many premenstrual syndrome symptoms which can be broadly classified as neurologic & vascular symptoms, psychological symptoms, gastrointestinal symptoms, fluid retention, eye problems and respiratory problems. The cause of premenstrual syndrome are fluctuations in the levels of progesterone & estrogen, hypoglycemia, hyperprolactinemia, psychogenic factors, changes in carbohydrate metabolism, excessive aldosterone, progesterone allergy and water retention by kidneys. The good thing is that premenstrual syndrome can be prevented by exercising regularly, eating balanced diet and sleeping adequately.

Dysmenorrhea is feeling intense menstrual pain and cramps. Depending on the severity, dysmenorrhea is stated as primary dysmenorrhea or secondary dysmenorrhea. Primary dysmenorrhea symptoms are felt from the onset of the menstrual periods and are felt life-long. Because of abnormal uterine contractions due to chemical imbalance, severe menstrual cramping is experienced. Secondary dysmenorrhea starts in the later stages. The causes are different for primary and secondary dysmenorrhea. Secondary dysmenorrhea can be blamed on medical conditions such as endometriosis, uterine fibroids, pelvic inflammatory disease, tumors, infections, and abnormal pregnancy.

Dysmenorrhea symptoms are lower abdomen cramping & pain, lower back pain, nausea, diarrhea, vomiting, fatigue, fainting, weakness and headaches. Females who are overweight, smoke, and have started to menstruate before turning eleven are at a higher risk of developing dysmenorrhea. Females who drink alcohol during menstrual period experience prolonged pain. After studying the health conditions, age, cause of dysmenorrhea, and extent of condition of the individual, corresponding treatment will be recommended. Regular exercise, abdominal massage, hot bath, vitamin supplements, and dietary modifications can help overcome dysmenorrhea.

The profit & loss of a certain company is determined by finance professionals through accounting. They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

The history of acupuncture is first discussed in an ancient Chinese medical text called the "Huang Di Nei Jing" or The Yellow Emperors Classic of Internal Medicine.

But there have been a few who are skeptic as archaeologists have found a 5,000 year old mummy in the Alps with similar acupuncture points in the body. This gives some people the idea that it was used even before the Chinese did but since there is no written text to prove that, no one is certain and credit to this ancient practice goes back to the Chinese.

In the 6th century, this knowledge moved to Japan. In the 17th century, a man by the name of Waichi Sugiyama wanted to make this procedure painless for the patient so he developed the insertion tube, a small cylindrical tube through which the needle is inserted. Believe it or not, this technique is still being used today.

If the church doesn't want to hire a skilled force of financial experts, they can simply make use of the church accounting software. Accounting experts designed the software and it can assist church officials in managing finances. The software engineers are already well-acquainted with the church's various needs and so they can easily tailor-fit a certain church's software according to its particular requirements.

The church accounting software is quite different from other software. Ordinary accounting software is designed to suit the needs of modern businesses. The church accounting software on the other hand focuses mainly on the

necessities of the institution. The church has no ambition or any financial interest. Remember, the church is not being taxed by the government and so its expenditure and resources takes a different curve altogether. Aside from that, the church has several expenditure and income account heads.

OCD is a sign of brain circuitry's unusual functioning and it involves the striatum part of the brain. The brain activity patterns of such people differ from normal people and people with other mental disorders. Researchers have concluded that OCD is usually a family problem and is a disorder of the brain. Streptococcal bacterial infection can create or worsen the condition of OCD. Adolescents with no family history of OCD can also develop it. Most of the adolescents feel embarrassed to talk about their OCDs. They think that people will label them as crazy and this will make them feel ashamed. This will make it difficult for the parents to talk to their children about their OCD, in order to solve them. Parents need to develop good communication skills for this purpose. Parent's support is also very important to the adolescent. Cooperation is extremely important along with treatment, because if the problem is not treated the adolescent will grow into a disturbed adult.

Most of the adolescents with OCD can receive effective treatment. The treatment can include psychotherapy and intake of medications such as fluoxetine, clomipramine, fluvoxamine, paroxetine, sertraline and other serotonin reuptake inhibitors. When OCD is caused due to streptococcal infection, the adolescent can be administered with antibiotics to kill the bacterium which is causing it. Exposure and response prevention behavioral therapy is very useful in solving OCD. In this therapy, the adolescent is wotedly exposed to his/her fears which give him/her obsessive thought. After that he/she is trained to avoid these thoughts and the rituals which he/she carries out to tackle the anxiety.

An adolescent having OCD can also have depression, substance abuse, attention deficit hyperactivity disorder, eating disorders, and other types of anxiety disorders. When a person with OCD and other mental illness, is treated, OCD becomes more difficult to treat and even diagnose.

Accounting Terms – Profit & Loss and Other Terms

Different fields of study make use of certain terms that are not easily understood by others. If you're an accounting student or a professional accountant, you know the different terms used in accounting. One very popular term is profit & loss.

So, do you know what the term means? To start with, you have to determine what profit means. Profit can be referred to as net earnings or net income. Businesses can either sell services or even products. Profit will come from the sales of these services and products. If the costs of running a business are controlled, it can add up to the profits.

Profits are also called ROI or return on investment. However, this term is often limited to securities like bonds or stocks. But still, some companies use ROI to mean short or long term business outcomes. Taxable income is another term for profit.

There are a number of acupuncture practitioners in existence nowadays, offering a host of services. If you are considering this form treatment for your weight management, make sure that you settle with no less than a trained and professional acupuncturist. A poorly trained acupuncturist may not be able to pinpoint the specific meridian points and worse, may cause unnecessary bodily pain and discomfort.

Moreover, your acupuncturist may require an herbal supplement for your treatment, to encourage a longer-term effect. Your sessions need not be maintained for an extensive period; however you may be required to visit your acupuncturist during the entire course of the sessions.

There are other means for losing weight successfully, and this does not include crash dieting and strenuous work outs. If carried out by trained professionals, acupuncture can be the answer for effective weight management. While it is far from being a cure-all, it may just be the right weight loss solution for you.

Before this person does anything, you will first have to answer a few questions. You will then be given a physical exam to check your pulse and observe the shape, color and coating of your tongue. Other things that are checked will

be the color and texture of the skin and your posture as this will give clues to your health.

Only then will you be told to lie down on a padded examining table and the needles are inserted to the skin. The difference with this kind of needle is that they twirl and jiggle each time they are pushed further into the body. You may not feel them at all and if you do, it will only be a twitch that soon goes away. Once they are in place, this will be left there for 15 to 60 minutes that may make you feel very relaxed and sleepy that you may even doze off. Once the session is complete, the needles are removed and you will be on your way.

Collection of pieces of evidence is very important and also its documentation. Courtroom proceedings use the documented papers. Aside from that, forensic accountants also prepare the needed reports for the effective management of the concerned company or enterprise and reports for the litigation parties or agencies. In court proceedings, forensic accountants testify to provide depositions based on their findings.

Various agencies and companies hire the services of forensic accountants. Most of them are included in the agency staffs of law enforcements and criminal investigations. Criminals are prosecuted based on the money trail tracked by the accountants. CPA firms also have available forensic accountants in their staff to assist partnership and shareholder disputes, employee theft or fraud, business loss, and issues of professional negligence. Insurance companies also hire the services of forensic accountants to investigate some insurance claims.

Depression in Adolescents

Depression in adolescents is a disorder which occurs due to persistent sadness, loss of interest, loss of self worth and discouragement. Depression is normally a temporary reaction towards situations of stress. Depression is a normal part of the maturation process of adolescents. It is even induced due to production of sex hormones. Adolescent females are depressed twice more than adolescent boys according to a study.

Adolescent behavior is normally marked with good and bad moods. The transition from a good mood to bad mood and vice-versa, can take minutes, hours and even days. That is the reason why true depression is very difficult to find out. Depression in adolescents can be caused due to bad school performance, break up with boyfriend or girlfriend, and failing relations with friends and family. These causes can lead to persistent depression. Other serious causes are chronic illness, obesity, child abuse, stressful lifestyle, poor social skills, unstable care giving and depression in family history.

Concepts sans frontieres 9e pdf pdf pdf..When adolescents wear braces they have to take certain precautions in order to avoid any more oral health complications. The most important precautionary measure is to brush the teeth regularly after every meal. Since the food can be easily lodged in braces, it is a good idea to brush carefully with soft bristles toothbrush and fluoride toothpaste. In the morning, the adolescent must floss between the braces and teeth. Food stuffs which are sticky or hard must be avoided as they are very difficult to remove. Foods like caramel, chew candy, popcorn, and nuts must be avoided. Cleaning must be done by the orthodontist or general dentist, every five to six months.

The wisdom teeth or third molars can grow in people of the age fifteen to twenty five. These teeth cause problem, because most of the mouths are too small to adjust new teeth and hence they need to be removed. If the wisdom tooth has place to grow, without affecting other teeth, they can be left to themselves. But if the adolescent experiences pain, facial swelling, mouth infection and gum-line swelling, then they should be extracted immediately. They can also destroy the second molars and impact other tooth. Various gum and jaw diseases can be caused. There can be a tumor development; cysts development and plaque build up. Hence, a surgery is performed to remove the tooth or teeth. The gum tissue covering the wisdom tooth is removed and the connective tissue connecting the tooth to the bone is detached. The tooth is then removed and the opening is sutured. A general dentist can perform wisdom tooth surgery in the local office using anesthesia.

Five times common than asthma is tooth cavities. The tooth above the gum line is made up of enamel, the hardest tissue within the human body. The tooth below the gum-line comprise of nerves, roots and dentin. Dentin is another

type of tissue and isn't as hard as the enamel. The acid which leads to tooth decay is produced by bacteria. These acids, along with dietary sugar, attach the enamel and eat away the minerals within the enamel, until a cavity is formed. This is known as tooth cavity. The biggest prevention against dental cavities is brushing teeth twice a day and even better, after every meal with fluoride toothpaste and soft bristle toothbrush. Carbonated drinks must be avoided strictly and must be replaced with fruit juices and sugary food must be avoided. Intake of fluoridated water also helps a lot or fluoride supplements can be used as replacement.

Symptoms of depression in adolescents are eating disorders, weight change, irritable mood, excessive sleeping in daytime, excessive temper, criminal behavior, memory loss, fatigue, self preoccupation, sadness, difficulty in concentrating, worthlessness feelings, loss of interest, self hatred, obsession with death and thought & attempts of suicides. When these symptoms are being noticed for more than two weeks, it is important to get treatment for the adolescent. Depression not only affects interpersonal relationships, but school performance as well. Depressed adolescents are more prone to take onto drugs and alcohol as an attempt to overcome their depression. Such problems require intensive treatment.

The doctor will take blood test and perform physical examination to determine the cause of depression. The adolescent can also be tested for substance abuse such as smoking, heavy alcohol consumption, marijuana smoking, and usage of other drugs. After the physical examination, psychiatric evaluation is also done to understand the cause of sadness, loss of interest and irritability. Depression can also lead to the development of other psychiatric disorders such as schizophrenia, mania and anxiety. It is also important to determine whether the adolescent poses a risk for himself/herself and others. Family and school personnel can provide valuable information about the adolescent to the doctor. Treatment for depression for adolescent is similar to the treatment of depression for adults. Along with the treatment, the adolescent are given antidepressant medication and psychotherapy. Antidepressant medications include tricyclics, Prozac, selective serotonin reuptake inhibitors or SSRI. Some of the medicines increase the risk, so it is a good idea that parents discuss the possible risks with the doctor. Only some of the antidepressant medications are meant for children and adolescents. Adolescents with severe depression need to be hospitalized as they are more prone to kill themselves.

There are two subcategories of eating disorders, anorexia nervosa and bulimia nervosa. Anorexia nervosa is the restrictive form, where the intake of food is limited severely. In bulimia nervosa is the eating disorder where the adolescent binges on food and then tries to minimize the effects by forcibly vomiting, fasting, and catharsis or over exercising. When handling adolescence eating disorders, they must be handled differently from adult eating disorders. Adolescents face problems such as growth retardation, suppressed height, abnormal weight, pubertal delay, menstrual periods absence, and menses unpredictability. When the adolescent is growing there will be critical tissue components loss like loss of body fat, muscle mass and bone mineral.

Nutritional imbalance is also caused which reflect abnormalities in the levels of vitamins, mineral and other trace elements. The problem is that these abnormalities cannot be recognized clinically. But since protein and calories are essential to the growth of the adolescent, it is important to trace their abnormalities. Because of the problems, healthy adulthood is not a possible thing. Because of all these reasons, it is important to diagnose adolescence eating disorders as early as possible. Eating disorders give rise to peak bone mass impaired acquisition in case of adolescents. When they turn into adults, this problem aggravates to osteoporosis. Even internal organs get affected due to eating disorders. All this can be prevented by early intervention so as to limit, prevent and ameliorate medical complications, which can turn become life threatening.

Adolescents who practice unhealthy weight control practices and are obsessive about figure, weight, food or exercise should be treated clinically. Not only should the symptoms be checked, but their duration, intensity and frequency should also be checked. Although most of the physical complications caused due to eating disorders get solved with the help of nutritional rehabilitation some of the conditions become irreversible and the long term consequences of this are very dangerous. It is best if the eating disorders are recognized in the early stages as it won't result in irreparable damage. The medical monitoring should be pursued till the adolescent returns back to appropriate psychological and medical health.

Some improvement was noticeable within a few TAC sessions, especially for drooling, spasticity (scissoring or tiptoeing), ataxia, and poor balance in walking. Functional improvement was noted after one to two courses of TAC. Most children tolerated TAC well, with only occasional pain and minor bleeding in some patients.

The reason why tongue acupuncture is being experimented with is because there is a connection between the tongue and the heart through the meridians that spread to all the organs in the body. It is believed that the points on the tongue can influence the state of the other body organs thus giving relief to the one suffering from autism.

But many believe that acupuncture alone cannot help autism sufferers. It has to be combined with other things like maintaining a certain diet to help improve one's mood and communication skills. Although it is only short term, it is better than nothing until a cure is found.

The bone marrow replaces small amounts of blood is lost due to some reason without making a person anemic. But in cases where considerable amount of blood flows in small amount of time as a result of an injury due to a serious example for instance, it may not be possible for bone marrow to replace RBCs so quickly resulting in anemia. Also, losing small amounts of blood over long periods of time may also lead to anemia. Example of this situation can be seen in girls who get heavy periods attributed mainly to deficiency of iron in the diet.

Anemia due to iron deficiency is the most common kind of anemia in the United States. It occurs mainly due to lack of iron in a person's diet. A teen with iron deficiency would have lower hemoglobin production and consequently lower RBCs. When the production of RBCs is low the person is regarded as anemic. The signs of anemia are paleness and tiredness. There can be other reasons as to why enough RBCs are not produced in the body. Folic acid and Vitamin B-12 are also essential to produce RBCs. Getting these in adequate quantities is this important too. There can be a problem with bone marrow's working too resulting in anemia.

Hemolytic anemia occurs when a person has RBCs whose lifespan is shorter. The bone marrow may not be able to produce new blood cells if the blood cells die too early. This can result due to many reasons including person having disorders like sphenocytosis or sickle cell anemia. In some cases the immune system of the body may itself destroy the RBCs. In some cases certain antibodies can form in the blood as a result of reaction to certain drugs or infections and may attack the RBCs.

File Pdf sans frontieres 9e pdf pdf pdf, It sounds like a made-up explanation with no basis in reality, but there are numerous scientific studies which support the effects of acupuncture. Although the exact scientific basis is still unknown, recent theories seem to suggest involvement of complicated neurochemical effects in the brain, nerve to spinal cord impulse modulation, and microscopic connective tissue changes.

What risks and side effects are of concern?

The use of things not completely understood for the treatment of medical conditions is nothing new. Penicillin and aspirin were used for decades solely on the basis of their beneficial effects, without doctors knowing exactly how they worked. Results are what are truly important. However, it is equally important is to ensure that the technique is used safely.

Life Lessons from sans frontieres 9e pdf pdf pdf

Seventy four percent of females above fourteen years and sixty percent of females below fifteen years have reported to have involuntary sex. Fifty percent of the adolescent pregnancies are within the time period of six months after the initial sexual intercourse. More than nine hundred thousand teenagers are reported to have become pregnant every year in the United States. Fifty one percent of the adolescent pregnancies result in live birth, thirty five percent result in induced abortion and fourteen percent result in stillbirths or miscarriages. Four out of ten adolescent females get pregnant, before they turn twenty, at least once. Twenty five percent of adolescent deliveries aren't the mother's first child. When a teenager gives birth to her first child, she increases the risk of begetting another child. One third of the adolescent parents are themselves result of adolescent pregnancies.

There are many reasons why adolescents choose to become sexually active at an early stage in life. The reasons can be early pubertal development, poverty, sexual abuse in childhood, lack of parent's attention, lack of career goals, family and cultural patterns of early sex, substance abuse, dropping out from school and poor school performance. Factors which discourage an adolescent to become sexually active are stable family environment, parental supervision, good family income, regular prayers, connectedness with parents and living with complete family and both the parents. The factors which are responsible for the consistent use of contraceptive among adolescents are academic success, anticipation for successful future, and involvement in a stable relationship.

There are many medical risks associated with adolescent pregnancies. Adolescents who are less than seventeen years are at a greater risk of developing medical complications, when compared to adult females. The risk is even more in teenagers below seventeen. The weight of the child, given birth by an adolescent, is very low in these pregnancies. It is usually below 2.5 kilogram. The rate of neonatal birth is also three times greater in adolescents, when compared to adults. Other problems caused by adolescent pregnancies are prematurity of the child, birth of underweight child, poor maternal weight gain, poor nutritional status, anemia, STDs and hypertension induced due to pregnancy.

Rating : sans frontieres 9e pdf pdf pdf Right after each acupuncture session, you will feel a bit tired and may need to rest. Some people feel an increase in their energy levels. The response to acupuncture is very individual. In some cases there is immediate relief of symptoms. For some patients, the beneficial effects may only be noticed after undergoing a few sessions. Do not be alarmed and keep your acupuncturist updated on what you are feeling to ensure everything is going as expected.

You need never fear the thought of needles ever again. Acupuncture is a beneficial treatment with a long history of effectiveness. It is used to complement current medical therapy and should not replace currently existing medications or treatments.

The safe application of this once exclusively Chinese therapy can now be experienced by chronic disease sufferers worldwide.

Investment sans frontieres 9e pdf pdf pdf—Like other strategies used in treating health conditions, acupuncture may have some side effects. Medications have side effects and allergic reactions, surgeries have risk of infection and complications. For needle puncture, there is a risk of injury, rare infections, minor bleeding, small bruises, and some dizziness.

You can minimize the possible side effects by choosing a licensed acupuncturist. Most countries either have government licensing in place or have professional organizations with very strict rules and regulations.

How do treatments go?

An acupuncturist will do an initial evaluation of your medical history and your body's current state. Multiple pressure points are palpated, and a regimen of treatment is formulated. Most courses involve a series of 10 to 20 treatment sessions, each lasting 30 to 90 minutes. Needles will be carefully placed at the required points and kept in place for some time. Most patients report a feeling of mild sensation at the site of the puncture, but no real pain.

Happiness sans frontieres 9e pdf pdf pdf—A group of children in the US participated in a test to see how effective acupuncture is among children. There are 22 respondents and each of them was given the treatment once every other day for four months.

After the treatment 20 out of the 22 respondents showed remarkable improvement. In fact 2 of them has cerebral blood flow. The only thing that did not change prior to treatment and after was the blood flow between the left and right cerebrum as it showed no differences.

Aside from traditional acupuncture to help children with autism, a preliminary study in Hong Kong is trying to see if tongue acupuncture can produce better results.

In the 5th or 7th treatment, this becomes more evident as your face looks more relaxed as though you just came from a vacation.

The end result is that you will look and feel 5 to 15 years younger but of course this depends on how well the patient has taken care of themselves outside the confines of the clinic.

To sum things up, facial acupuncture can do for you. It can eliminate fine lines and reduces wrinkles, improve your overall facial color and add luster to the skin, relaxes tension in the face and furrows in the brow, brightens the eyes and reduce dark circles and puffiness, improve muscle tone for sagging skin, enhance your natural radiance in the skin and eyes, slow the aging process within, promotes overall health and well being as well as relaxes and revitalizes the entire body.
