Molecules Of Emotion

2012-12-11 Candace Pert Why do we feel the way we feel? How do our thoughts and emotions affect our health? Are our bodies and minds distinct from each other or do they function together as part of an interconnected system? In MOLECULES OF EMOTION, neuroscientist Candace Pert provides startling and decisive answers to these long-debated questions, establishing the biomolecular basis for our emotions and explaining these new scientific developments in a clear and accessible way. Her pioneering research on how the chemicals inside us form a dynamic information network, linking mind and body, is not only provocative, it is revolutionary. The Emotions of the Ancient Greeks

2007-12-22 David Konstan It is generally assumed that whatever else has changed about the human condition since the dawn of civilization, basic human emotions - love, fear, anger, envy, shame - have remained constant. David Konstan, however, argues that the emotions of the ancient Greeks were in some significant respects different from our own, and that recognizing these differences is important to understanding ancient Greek literature and culture. With *The Emotions of the Ancient Greeks*, Konstan reexamines the traditional assumption that the Greek terms designating the emotions correspond more or less to those of today. Beneath the similarities, there are striking discrepancies. References to Greek 'anger' or 'love' or 'envy,' for example, commonly neglect the fact that the Greeks themselves did not use these terms, but rather words in their own language, such as *orgê* and *philia* and *phthonos*, which do not translate neatly into our modern emotional vocabulary. Konstan argues that classical representations and analyses of the emotions correspond to a world of intense competition for status, and focused on the attitudes, motives, and actions of others rather than on chance or natural events as the elicitors of emotion. Konstan makes use of Greek emotional concepts to interpret various works of classical literature, including epic, drama, history, and oratory. Moreover, he illustrates how the Greeks' conception of emotions has something to tell us about our own views, whether about the nature of particular emotions or of the category of emotion itself.

The Emotional Foundations of Personality: A Neurobiological and Evolutionary Approach

2018-03-27 Kenneth L. Davis A CHOICE Magazine Outstanding Academic Title of 2018. A novel approach to understanding personality, based on evidence that we share more than we realize with other mammals. This book presents the wealth of scientific evidence that our personality emerges from evolved primary emotions shared by all mammals. Yes, your dog feels love—and many other things too. These subcortically generated emotions bias our actions, alter our perceptions, guide our learning, provide the basis for our thoughts and memories, and become regulated over the course of our lives. Understanding personality development from the perspective of mammals is a groundbreaking approach, and one that sheds new light on the ways in which we as humans respond to life events, both good and bad. Jaak Panksepp, famous for discovering laughter in rats and for creating the field of affective neuroscience, died in April 2017. This book forms part of his lasting legacy and impact on a wide range of scientific and humanistic disciplines. It will be essential reading for anyone trying to understand how we act in the world, and the world's impact on us.
