Created by Lloyd M. Dunn and Douglas M. Dunn, the assessment is designed to measure receptive vocabulary for American English. It is quick and easy to administer, saving precious time so that concentration can be put on implementing successful approaches.

The PPVT-4 test content covers a broad array of vocabulary comprehension levels, ranging from pre-kindergarten through adulthood. The assessment questions broadly feature words that portray 20 subject domains (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and educational vocabulary.

The evaluation offers two equal editions which hold distinct vocabulary words, ensuring that the person has not "learned" the test. One edition can be used before intervention implementation to measure individuals' vocabulary understanding and the other version can be employed for re-testing to assess and note advancement. The PPVT-4 also contains a unique Growth Scale Value (GSV) which is sensitive to small changes over time.
